

Practice Exit Exam

Please respond to one of the following questions:

“Should Drugs Be Legalized?” by William Bennett

- 1) William Bennett notes that there are four arguments that proponents of legalization give for making currently illegal drugs legal. What are these four arguments for legalization and what arguments does Bennett use to refute them?
- 2) One argument for legalization states that “Drug use should be legal since users only harm themselves.” Assume for the sake of argument sake that it is a proven fact that illegal drug users only harm themselves and nobody else at all. Under these circumstances do you still think that the government should create laws to protect people when their actions only harm themselves?
