Welcome to Bunker Hill Community College!

I want to extend a warm and personal welcome to you at the start of a new academic year. You have come to the right place, at the right time. Whatever your educational dreams, our purpose at Bunker Hill Community College is to ensure your success.

We offer you a choice of more than 100 degree and certificate programs in all of today’s fastest growing fields, from biotechnology to sustainability, computer gaming, nursing and many areas of medical technology. And we are always adding more programs to meet student career goals. New this year are certificates in Android Mobile App and Data Management. We also have a new Environmental Science degree program, a Gaming/Computer program with both a programming track and an artist track, a Gas Utility Technology degree option, a Health Information Technology certificate, and a Sport Management certificate and degree. Our Admissions staff are here to help you get started.

If you are unsure of your direction, visit the LifeMap Commons. Our LifeMap staff can help you determine which program might be best for you, what courses to take, and how to map out a career based on your interests and goals. They will also help you learn how to conduct a job search or explore transfer options.

For practical experience in the field, our Learn and Earn internship program offers students paid work two days a week throughout a full semester in some of Greater Boston’s most prestigious companies.

And there’s so much more. We want to help you meet your goals, finish what you start, and walk across the stage at Commencement one day soon to receive your degree or certificate.

You are now part of our community of learners, and I wish you every success in achieving your educational goals at Bunker Hill Community College.

Pam Y. Eddinger, Ph.D.
President
Bunker Hill Community College

About the Bunker Hill Community College Catalog

This publication serves the purpose of providing information about Bunker Hill Community College to persons who may be interested in applying for admission, to parents, teachers, counselors, people who work and study at the College, and to the general public.

This publication is neither a contract nor an offer to make a contract. While every effort is made to ensure accuracy, the College reserves the right to make changes at any time with respect to course offerings, degree and program requirements, services provided, cost of attendance, or any other subject addressed in this publication. This publication provides information solely for the convenience of the reader, and the College disclaims any liability that may otherwise be incurred.

Accreditation Statements

Bunker Hill Community College is accredited by the New England Association of Schools and Colleges, Inc. (NEASC), through its Commission on Institutions of Higher Education.

Inquiries regarding accreditation status by the New England Association should be directed to the administrative staff of the institution. Individuals may also contact: Commission on Institutions of Higher Education, New England Association of Schools and Colleges, 3 Burlington Woods Road, Suite 100, Burlington, MA 01803; telephone: 781-425-7700; fax: 781-425-1001; email: cieo@neasc.org; URL: neasc.org.

The Certified Nurse Assistant Program is accredited by the Massachusetts Department of Public Health, Nurse Aide Registry, MDPH/Division of Health Care Quality, 10 West Street, 5th Floor, Boston, MA 02111-1212; telephone: 617-753-8144; fax: 617-753-8096; URL: state.ma.us/dph.

The Diagnostic Medical Sonography Program is accredited by the Commission on Accreditation of Allied Health Education Programs (CAAHEP) upon the recommendation of The Joint Review Committee on Education in Diagnostic Medical Sonography. Commission on Accreditation of Allied Health Education Programs, 1361 Park Street, Clearwater, FL 33756, Phone: 727-210-2350; URL: caahep.org.

The Medical Laboratory Technician is accredited by the National Accrediting Agency for Clinical Laboratory Science (NAACLS), 5600 North River Rd. Suite 720, Rosemont, IL 60018; telephone 773-714-8880. URL: naacls.org.

The Medical Radiography Program is accredited by the Joint Review Committee on Education in Radiologic Technology (JRCERT), 20 North Wacker Drive, Suite 2850, Chicago, IL 60606-3182; telephone: 312-704-5300; fax: 312-704-5304; email: mail@jrcert.org; URL: jrcert.org.

The Practical Nursing Program has initial approval status granted by the Massachusetts Board of Registration in Nursing, 239 Causeway Street, Suite 500, 5th Floor, Boston, MA 02114; telephone: 617-973-0900; or 1-800-414-0168; fax: 617-973-0984; URL: mass.gov/dph/boards/rn and is in the process of seeking accreditation by the Accreditation Commission for Education in Nursing (ACEN), 3343 Peachtree Road NE, Suite 850, Atlanta, GA 30326; telephone: 404-975-5000; fax: 404-975-5020; email: nlnc@nlnc.org; URL: nlnc.org.

The Associate Degree Registered Nursing Program is accredited by the Accreditation Commission for Education in Nursing (ACEN), 3343 Peachtree Road NE, Suite 850, Atlanta, GA 30326; telephone: 404-975-5000; fax: 404-975-5020; email: info@acenursing.org; URL: acenursing.org, and approved by the Massachusetts Board of Registration in Nursing, 239 Causeway Street, Suite 500, 5th Floor, Boston, MA 02114; telephone: 617-973-0900; or 1-800-414-0168; fax: 617-973-0984 URL: mass.gov/dph/boards/rn.

The Pharmacy Technician Certificate program is approved by the Massachusetts Board of Registration in Pharmacy. The Board of Registration in Pharmacy is located at 239 Causeway Street, Suite 500, 5th Floor, Boston, MA 02114; telephone: 800-414-0168; URL: mass.gov/reg/boards/pharmacy.

The Surgical Technology Program is accredited by the Commission on Accreditation of Allied Health Education Programs (CAAHEP), 1361 Park Street, Clearwater, FL 33756; Phone: 727-210-2350; Fax: 727-210-2354. Please contact Mail@caahep.org if you have any general questions about CAAHEP.

College Catalog Addendum Statement

The College reserves the right to make changes at any time with respect to course offerings, degree and program requirements. The 2015-2017 BHCC Catalog Web Addendum will be used in conjunction with the published version of the catalog so that students may have access to the most current and up-to-date information.

Statement of Student Responsibility

In all cases, the student bears ultimate responsibility for reading the College Catalog and following the academic policies and regulations of the College. For the most up-to-date Catalog information including changes or corrections to curricula, course descriptions, and tuition and fees, see the 2015-2017 BHCC Catalog Web Addendum at bhcc.edu/catalog. The addendum should be used in conjunction with the published version of the 2015-2017 Bunker Hill Community College Catalog. Information in the 2015-2017 BHCC Catalog Web Addendum supersedes the published version of the printed 2015-2017 BHCC Catalog.
Bunker Hill Community College
Long Range Goals

Create Pathways and Partnerships to Promote Student Success
BHCC will strengthen and coordinate public and private sector pathways and partnerships leading to college readiness, student internships, dual enrollment, mentoring, career opportunities, practica, civic engagement and learning communities.

Demonstrate Strength Through Diversity
BHCC will demonstrate the value of diversity by modeling successful college initiatives; collaborating with public and private sectors to expand diversity interests; strengthening college hiring, promotion and retention practices; and closing achievement gaps among all student populations.

Develop and Cultivate College-Wide Sustainability Initiatives
BHCC will raise institutional and individual awareness of and commitment to the responsible use of natural resources.

Expand Technology Throughout the College
BHCC will provide software, hardware, infrastructure, social networking, internet, multimedia, repository and other extended technology resources required to maintain institutional excellence and increase student success.

Foster Wellness, Growth and Lifelong Learning
BHCC will address the holistic needs of the college community by expanding student support interventions and strategies and by increasing faculty and staff professional development.

Identify and Close Workforce Gaps
BHCC will design and align curricula to meet current and future high-demand employer needs.

Institute a Culture of Evidence and Accountability
BHCC will collect, analyze and use data for assessment of academic programs, non-academic departments and college-wide decision making.

2015 - 2017 Bunker Hill Community College Catalog 9
Three separate but cohesive mission statements guide Bunker Hill Community College. The first is a comprehensive, system-wide mission statement for Public Higher Education in the Commonwealth of Massachusetts. The second is a mission statement of general characteristics common to all Massachusetts community colleges. The third mission statement contains the specialized and focused component that identifies Bunker Hill Community College’s distinctive characteristics and priorities.

Mission of the Massachusetts System of Public Higher Education
Massachusetts Public Higher Education is a SYSTEM with a distinguished past, increasing and measurable accomplishments, and dedicated to being recognized as having one of the nation’s most outstanding array of institutions. It comprises 15 community colleges, nine state colleges, and five campuses of the University of Massachusetts. The system exists to provide accessible, affordable, relevant, and rigorous programs that adapt to meet changing individual and societal needs for education and employment. The public system is committed to continuous improvement and accountability in all aspects of teaching and learning. The Board of Higher Education, together with each respective Board of Trustees, expects all students, faculty, and staff to be held to exacting standards in the performance of their roles and responsibilities.

Mission of the Massachusetts Community Colleges
The fifteen Massachusetts Community Colleges offer open access to high quality, affordable academic programs, including associate degree and certificate programs. They are committed to excellence in teaching and learning and provide academic preparation for transfer to four-year institutions, career preparation for entry into high-demand occupational fields, developmental coursework, and lifelong learning opportunities.

Community colleges have a special responsibility for workforce development and through partnerships with business and industry, provide job training, retraining, certification, and skills improvement. In addition, they assume primary responsibility, in the public system, for offering developmental courses, programs, and other educational services for individuals who seek to develop the skills needed to pursue college-level study or enter the workforce.

Rooted in their communities, the colleges serve as community leaders, identifying opportunities and solutions to community problems and contributing to the region’s intellectual, cultural, and economic development. They collaborate with elementary and secondary education and work to ensure a smooth transition from secondary to post-secondary education. Through partnerships with baccalaureate institutions, they help to promote an efficient system of public higher education.

The community colleges offer an environment where the ideas and contributions of all students are respected. Academic and personal support services are provided to ensure that all students have an opportunity to achieve academic and career success. No eligible student shall be deprived of the opportunity for a community college education in Massachusetts because of an inability to pay tuition and fees.

Mission of Bunker Hill Community College
Bunker Hill Community College serves as an educational and economic asset for the Commonwealth of Massachusetts by offering associate degrees and certificate programs that prepare students for further education and fulfilling careers. Our students reflect our diverse local and global community, and the College integrates the strengths of many cultures, age groups, lifestyles and learning styles into the life of the institution. The College provides inclusive and affordable access to higher education, supports the success of all students, and forges vibrant partnerships and pathways with educational institutions, community organizations, and local businesses and industries.

Vision of Bunker Hill Community College
Bunker Hill Community College empowers and inspires students, faculty, and staff diverse in identities, experiences and ideas to make meaningful contributions to our local and global communities. The College embodies a spirit of inquiry, critical thought, inclusive excellence, and lifelong learning.

Institutional Values
Bunker Hill Community College Trustees, Faculty, Staff and Students embody the highest academic and institutional integrity through their commitment to:

- Access and Success
- Excellence and Innovation
- Economic and Social Justice
- Inclusiveness and Equity
- Civic Engagement and Service
- Kindness and Respect
- Accountability and Transparency

The Vision, Mission and Values statements were approved by Board of Trustees, Massachusetts Department of Higher Education and Massachusetts Secretary of Education, October 2014.

Statement on Inclusion
The Bunker Hill Community College Board of Trustees endorsed and approved for adoption on June 9, 1997, the American Association of Community Colleges Statement on Inclusion as follows:
BHCC Statement on Civility

Bunker Hill Community College believes that civility in the workplace and classroom is everyone’s right and responsibility. This statement is consistent with the Student Handbook, all collective bargaining agreements, and the College’s personnel policies. We understand “civility” to mean respectful language and behavior toward everyone at all times, regardless of the circumstances. These qualities are intrinsic to excellence in teaching and learning, and contribute to the maintenance of a productive workplace and an overall positive campus climate.

Further, we affirm our commitment to behavior that is courteous and respectful in all interactions with members of the BHCC community as well as with members of the larger communities we serve.

Institutional Policy Statements

Affirmative Action and Equal Opportunity Policy

Bunker Hill Community College is an affirmative action/equal opportunity institution and does not discriminate on the basis of race, creed, religion, color, sex, sexual orientation, gender identity, age, disability, genetic information, maternity leave, and national origin in its education programs or employment pursuant to Massachusetts General Laws, Chapter 151B and 151C, Titles VI and VII, Civil Rights Act of 1964; Title IX, Education Amendments of 1972; Section 504, Rehabilitation Act of 1973; Americans with Disabilities Act, and regulations promulgated thereunder, 34 C.F.R. Part 100 (Title VI), Part 106 (Title IX) and Part 104 (Section 504). All inquiries concerning application of the above should be directed to Thomas L. Saltonstall, Director of Diversity and Inclusion, Affirmative Action Officer, and Coordinator of Title IX and Section 504, at 250 New Rutherford Avenue, Room E236F, Boston, MA 02129, via email at tlsalton@bhcc.mass.edu or by calling 617-228-3311. When a student or employee believes s/he has been discriminated against based on race, creed, religion, color, national origin, age, sex, gender identity, genetic information, maternity leave, sexual orientation or disability status, the College’s Affirmative Action Plan provides an informal complaint process and a formal complaint process which may be accessed by any member of the College community. Whether a complaint/grievance is formal or informal, the College will conduct a prompt, thorough, fair and objective investigation, and will take such corrective action as is appropriate under the circumstances. No student or employee shall be retaliated against for filing a discrimination complaint/grievance or for cooperating with the College’s investigation thereof. For more information, to file a complaint/grievance, or for a copy of the plan and/or complaint/grievance procedure, contact Thomas L. Saltonstall, the College’s Affirmative Action Officer at 617-228-3311.

Annual Security Report Notice of Availability

Bunker Hill Community College’s Office of Public Safety is responsible for issuing crime alerts in compliance with the Clery Act. In the event a situation arises, either on or about the campus, these alerts are issued to keep the campus community informed about safety and security matters. This report includes statistics for the previous three years concerning reported crimes that occurred on campus; in certain off-campus buildings...

Institutional Mission and Vision Statements • Institutional Policy Statements
Institutional Policy Statements

or property owned or controlled by Bunker Hill Community College; and on public property within, or immediately adjacent to and accessible from, the campus. The report also contains information regarding campus security and personal safety, including topics such as: crime prevention, law enforcements practices and authority, crime reporting policies, and other matters of importance related to security on campus.

As required by law, Bunker Hill Community College’s Office of Public Safety and Campus Police, publishes and distributes this report annually by October 1. To obtain a copy of this report, contact the Office of Public Safety and Campus Police, Room E127 or access the report at bhcc.edu/PublicSafety/ASR.

College Assessment

Implementation, assessment and continuous program improvement are an integral part of the College’s Strategic Plan. Both formative and summative assessments are conducted at BHCC. Formative assessment in academics and student development occurs within the learning environment, and are framed as Student Learning Outcomes and Student Development Outcomes. Faculty anchor the assessment of Student Learning Outcomes process within SLOAP (Student Learning Outcome Assessment Program); Student Development Outcomes, developed in 2014, will add new dimensions to the outcomes assessment work as the initiative progresses. Assessment activities do not affect a student’s grade, academic standing, ability to transfer, or ability to graduate. The College considers student privacy of the utmost importance and takes all necessary steps to ensure the confidentiality of student records and student work reviewed through this process in accordance with FERPA regulation.

Directory Information

Bunker Hill Community College has designated the following items as directory information: student name, academic program, semesters of attendance, current enrollment status, Dean’s and Merit Lists, degrees or certificates awarded and dates of graduation.

The College may release directory information to a third party requesting such student information without first obtaining the student’s consent.

A student has the right to refuse to permit the College to release directory information. In order to facilitate this, a student must request in writing that a privacy code be placed on his/her directory information through the Registrar’s Office. If a privacy code is placed on a student’s record, no directory information will be released in College publications or to third parties, excluding cases in which the Solomon Amendment or lawful subpoenas require the College to release such information by law.

Notwithstanding the College’s definition of directory information, the Department of Defense, pursuant to the Omnibus Consolidated Appropriations Act of 1997, identifies the following additional student information as directory information for Department of Defense purposes: student’s address, age and level of education. This information is available and accessible from student records. Non-consensual release of directory information may be submitted to the Department of Defense in accordance with the Solomon Amendment.

Educational Records

The Family Educational Rights and Privacy Act (FERPA) affords students certain rights with respect to their educational records. Students are informed of their rights under this act through the College Catalog and the Student Handbook. They are:

• The right to Inspect and Review the student’s educational records within 45 days of the day the College receives a request for access. Students should submit to the Registrar, dean, head of the academic department or other appropriate official, written requests that identify the record(s) they wish to inspect. The College official will make arrangements for access and notify the student of the time and place where the records may be inspected. If the records are not maintained by the College official to whom the request was submitted, that official shall advise the student of the correct official to whom the request should be addressed.

• The right to Challenge Records and request the amendment of the student’s educational record that the student believes is inaccurate or misleading. Students may ask the College to amend a record by writing to the College official responsible for the record, clearly identifying the part of the record they want changed and specifying why it is inaccurate or misleading. If the College decides not to amend the record as requested by the student, the College will notify the student of the decision and advise the student of his or her right to a hearing regarding the request for amendment. Additional information regarding the hearing procedures will be provided to the student when notified of the right to a hearing.
The right to consent to Record Disclosure of personally identifiable information contained in the student’s educational records, except to the extent that FERPA authorizes disclosure without consent. One exception which permits disclosure without consent is disclosure to school officials with legitimate educational interests. A school official is a person employed by the College in an administrative, supervisory, academic, research or support staff position (including law enforcement unit personnel and health staff); a person or company with whom the College has contracted (such as an attorney, auditor or collection agency); a person serving on the Board of Trustees or a student serving on an official committee, such as a disciplinary or grievance committee, or assisting another school official in performing his or her task. A school official has a legitimate educational interest if the official needs to review an educational record in order to fulfill his or her professional responsibility.

The right of Complaint, to file a complaint with the U.S. Department of Education concerning alleged failures by Bunker Hill Community College to comply with the requirements of FERPA.

Institutional Policy Statements

Sexual Harassment Guidelines

Sexual harassment of a student, an employee or any other person in the College is unlawful, unacceptable, impermissible and intolerable.

Sexual harassment is a form of sex discrimination. It occurs in a variety of situations which share a common element: the inappropriate introduction of sexual activities or comments into the work or learning environment. Often, sexual harassment involves relationships of unequal power and contains elements of coercion, as when compliance with requests for sexual favors becomes a criterion for granting work, study or grading benefits. However, sexual harassment may also involve relationships among equals, as when repeated sexual advances or demeaning verbal behaviors have a harmful effect on a person’s ability to study or work in the academic setting.

For general purposes, sexual harassment may be described as unwelcome advances, requests for sexual favors and other physical or verbal conduct of a sexual nature when: (1) submission to such conduct is made either explicitly or implicitly a term or condition of an individual’s employment or education; (2) submission to or rejection of such conduct by an individual is used as the basis for academic or employment decisions affecting that individual or (3) such conduct has the purpose or effect of substantially interfering with an individual’s academic or professional performance or creating an intimidating, hostile or demeaning employment or educational environment.

A student, an employee, or any other person in the College who is found to have engaged in sexual harassment is subject to discipline up to and including termination of employment or expulsion from the College.

When a student, an employee or any other person in the College believes s/he has been the subject of sexual harassment, the complaint/grievance process is a mechanism for redress. Whether a complaint/grievance is formal or informal, the College will conduct a prompt, thorough, fair and objective investigation, and will take such corrective action as is appropriate under the circumstances. Reasonable efforts are made to maintain confidentiality during the grievance process.

No student or employee shall be retaliated against for filing a discrimination complaint/grievance or for cooperating with the College’s investigation thereof. For more information, for a copy of the Affirmative Action Complaint/Grievance Procedure, or to file a complaint/grievance, contact Thomas L. Saltonstall, the College’s Affirmative Action Officer, at 250 New Rutherford Avenue, Room E236F, Boston, MA 02129, via email at tlsalton@bhcc.mass.edu or by calling 617-228-3311.

Sexual harassment is forbidden by both federal and state regulations. In keeping with these regulations, a concerted effort will be made to protect employees, students and others from sexual harassment as defined.

For the full text of the College’s policy concerning sexual harassment, refer to the Bunker Hill Community College Affirmative Action Plan (bhcc.edu/eeo) available online.

Guidelines Concerning Sexual Violence

Committing an act of sexual violence upon a student, an employee or any other person in the College constitutes a violation of state and federal laws, and a major violation of the College’s Affirmative Action Policy. Sexual violence is absolutely intolerable and totally unacceptable.

Sexual violence is generally defined as any sexual activity where consent is not obtained or able to be freely given, and includes rape (vaginal, oral or anal penetration without consent), acquaintance rape (rape committed by someone who is known by the victim), or any unwanted sexual activity that is forced or coerced by one person on another. It is a criminal offense to have sex with someone who is incapable of giving consent due to being intoxicated, unconscious, mentally incompetent or under 16 years of age.

An employee or student who commits an act of sexual violence may be subject to criminal prosecution and will be subject to disciplinary action by the College, up to and including expulsion and/or termination of employment.

Victims of sexual violence are encouraged to contact the College’s Department of Public Safety at 617-228-2222 or
INFORMATION

228-2053, or by reporting the matter at Room E127 as soon as is practicable under the circumstances. If a victim is more comfortable reporting the alleged sexual violence to a College employee with whom s/he is better acquainted, such as a Dean, administrator or faculty member, s/he may do so. Any employee to whom an incident of sexual violence is reported, however, is required to notify the College’s Department of Public Safety and Campus Police and the Affirmative Action Officer and Title IX Coordinator forthwith. The Affirmative Action Officer and Title IX Coordinator may be contacted at Room E236F or by calling 617-228-3311.

If any student or employee believes that he or she has been the victim of sexual violence, the student or employee also has the right to file an Affirmative Action Discrimination Grievance with the College. For a copy of the Affirmative Action Grievance Procedure or assistance with filing a complaint, please contact Thomas L. Saltonstall, the College’s Affirmative Action Officer and Title IX Coordinator at 617-228-3311, via email at tlsalton@bhcc.mass.edu or at Room E236F.

Reporting the incident to the College’s Department of Public Safety, the Affirmative Action Officer and Title IX Coordinator, or another College employee does not commit the victim to filing charges. Federal and state laws, however, require the College to investigate such reports. The matter will be investigated both by BHCC Police and separately by the Affirmative Action Officer and Title IX Coordinator. Although every reasonable effort will be made to protect a victim’s privacy, individuals with a need to know may be contacted and information may be shared as necessary to investigate and adjudicate the matter or as public safety requires. A report of the incident will be filed with local police in the event public safety is at risk even if the victim does not intend to report the incident to police or cooperate in an investigation.

The College prohibits retaliation against any person who presents a formal or informal complaint of sexual violence or who testifies or offers evidence connected with a complaint. Retaliation is a violation of the College’s Affirmative Action and Diversity Policy whether or not the underlying claim of sexual violence is confirmed. For the full text of the College’s policy concerning sexual violence, refer to Bunker Hill Community College’s Affirmative Action Plan.

Student Right-to-Know Graduation Rate
Graduation Rates data are available online for all colleges that are required to report this information. This information is reported by colleges and published by the United States Government and available at ope.ed.gov/security.
The Chelsea campus of Bunker Hill Community College is situated in the historic, former Post Office facility at 175 Hawthorne Street in Bellingham Square. Providing higher education and job training opportunities to residents of Chelsea, East Boston, Everett, Revere, Winthrop and other surrounding communities, the campus is actively involved in the community through partnerships with community based organizations, social service organizations, Chambers of Commerce, the City of Chelsea and the Chelsea Public Schools.

Several MBTA bus lines stop directly outside the front door of the campus, making it easily accessible by public transportation. The College also provides free shuttle service between the Charlestown and Chelsea campuses. Day students may park in metered spaces on streets adjacent to Bellingham Square. For directions and more detailed information about public transportation, please visit the College’s website.

All Allied Health certificate programs, including Medical Assistant, Patient Care Technician, Medical Interpreting, Central Processing, Surgical Technology, Emergency Medical Technician (EMT), Paramedic Studies and Pharmacy Technician are based in Chelsea. The Chelsea campus offers laboratory science in biology, offering multiple sections of Human Biology and Anatomy and Physiology I and II. Chelsea also houses a full array of foundation and elective courses leading to college degrees and certificates. Chelsea is also home to the College’s Adult Basic Education (ABE) program which offers GED Spanish and Basic English for Speakers of Other Language (ESOL) classes. The program is funded by the Massachusetts Department of Elementary and Secondary Education.

**Bookstore**

The bookstore opens for select days during the first week of each fall and spring semester, offering textbooks for courses that are taught at the Chelsea campus. Specific days and times will be posted on the College website and around the campus.

**Library**

The College Library maintains a partnership with the Chelsea Public Library to deliver campus library services. With a valid College ID, students may access all of the library’s services and resources. Through the BHCC-Chelsea Library Partnership, the College has access to additional classroom space and BHCC provides and maintains four computers that are located at the library for student use. The Chelsea Public Library is located in Bellingham Square, at 569 Broadway. For hours of operation, call 617-228-2101 or 617-466-4350.

**Student Access and Success Center (SASC)**

Through the campus Student Access and Success Center students may register and pay for courses, complete course placement assessment (Accuplacer), and access advising and academic support services. The Center offers tutoring in mathematics, psychology, sociology, English, reading, writing, biology and allied health content areas. The Center supports student achievement workshops in career exploration, goal setting, time management, learning styles, note-taking strategies, study skills, and test-taking skills. For additional information, visit the Center in Room 202 or call 617-228-2339.

American Student Assistance (ASA), located in the Center, is a partner with the Chelsea campus in the delivery of educational outreach programming for low-income and first generation students promoting access to college and assistance with the federal financial aid process. For additional information on services provided by ASA, call 617-228-2339.

**Student Activities**

The rich cultural diversity of the student population is celebrated by a variety of activities that are held throughout the year. Students have the opportunity to participate in college committees, student clubs, for example, Health Occupations Students of America, (HOSA), and the Student Government Association (SGA).

**Student Lounge**

The student lounge is located on the first floor in the rear of the campus building. The student lounge offers vending, snack and beverage machines, access to copying services, television, and a comfortable setting with tables and chairs where students may take a quick meal break between classes.

**Community Room**

The Chelsea campus Community Room, which comfortably accommodates up to 100 people, provides space for student activities and programs, faculty and staff development.
Satellite Locations

Bunker Hill Community College offers courses at satellite locations, each intended to serve the distinct needs and interests of the host community. The curricula available at the satellites allow students to begin work on associate degree or certificate programs. Courses may include foundation courses that fulfill general education requirements for degrees and certificates as well as courses in response to community interest, such as offerings in business, accounting and computer technology. For a complete listing of current course offerings and schedules each semester, see the current course schedule booklet, visit bhcc.edu/satellites or call Admissions and Enrollment Services at 617-228-3398.

East Boston Satellite

The East Boston Satellite is located at 250 Sumner Street, East Boston. This satellite opened in the spring of 2007 and offers introductory and allied health courses in the evening during the fall, spring and summer semesters. This satellite offers a range of student services prior to each semester, including on-site advising, admissions and enrollment information, and information on federal financial aid. For more information please visit the website at bhcc.edu/satellites.

Malden Satellite

The Malden satellite is located at Malden High School, 77 Salem Street, Malden. Established in the fall of 2009, the Malden satellite offers introductory and college level courses in the day and evening during the fall and spring semesters. Placement testing, advising and registration for these courses are conducted on the BHCC Charlestown campus. Refer to the current course schedule for a list of courses. Malden High School is accessible from the Orange Line, Malden Center transit station. For more information please visit the website at bhcc.edu/satellites.

South End Satellite

Bunker Hill Community College maintains a satellite campus in the South End of Boston that operates in partnership with IBA - Inquilinos Boricuas en Acción. The South End satellite is located at 630 Tremont Street and is a nationally replicable model of a local community college (BHCC) working hand-in-hand with a community based organization (IBA) to establish a college campus directly in the heart of an affordable-housing community (Villa Victoria). The South End satellite provides Boston residents with the opportunity to complete the HiSET (formerly the GED), take ESL and Basic English courses and to enroll in college-level classes. Free child care services and job readiness preparation are also available at this site. Prior to the beginning of each semester and throughout the year, the Satellite offers a range of student services including academic support, success coaching, financial aid assistance, academic advising, and admissions and enrollment assistance. For more information about this satellite, please visit the website at bhcc.edu/satellites.
LifeMap

LifeMap re-imagines the student experience at Bunker Hill Community College by enabling students to develop an individualized pathway to meet their educational, career and personal goals. LifeMap combines technology with personal attention from faculty and staff to enable students to make informed decisions and become more self-sufficient.

LifeMap’s many technological components include tools and resources for career planning, educational planning, financial planning and establishing an integrated support and social network. In addition, LifeMap provides the opportunity for students to design and showcase their work with an e-portfolio.

LifeMap’s technological tools are integrated into the College’s portal. The BHCC Student Portal will allow students to access important information online pertaining to their college experience. Students will be able to access their email, important information regarding college activities, LifeMap, as well as personal information relating to financial aid, student payment, advising and registration. It is advised that students log into their BHCC Portal on a daily basis to receive the most up to date information. It is important to note that the BHCC Portal will not substitute for the caring and personal attention faculty and staff provide to our students.

BHCC’s LifeMap Mission Statement

Bunker Hill Community College is committed to supporting students in achieving their educational, career and life goals. LifeMap embodies this commitment by providing an integrated support system that resides in the BHCC Portal. In cooperation with faculty and staff, students use LifeMap tools to create educational, financial and career plans, connect with support services, participate in social networking and reflect on their learning. By centralizing resources and enlisting faculty and staff in their use in and beyond the classroom, LifeMap enables students to create a personalized plan for realizing their goals.

Academic Advising

Philosophy Statement

Embracing the diversity of its college community, Bunker Hill Community College recognizes the individual needs of its students. Our academic advisors are dedicated to providing continuous academic advising services to strengthen, nurture, empower, and assist students to make sound and responsible academic decisions through their educational career at the College.

Advising Mission Statement

Advising is an ongoing teaching and learning process engaging the student with the entire college community, resulting in a plan for academic and career success as well as personal development.

Academic Advising

Academic advising is available for all BHCC students in a variety of forms that include individualized advising, group advising and online advising. Advising services are designed to assist students in achieving their academic, career and personal goals. These services include interpretation of assessment scores and selection of a program of study, course selection, registration related assistance and resource referral. Advisors also assist students with a variety of issues and concerns affecting their educational success.

Advisor assignments are found in the My Profile section of each student’s WebAdvisor/Portal account. Degree seeking students will be assigned to a specific faculty member, their Learning Community Seminar Instructor, the Advising Center, ESL Advising in The Assessment Center, Room B118 or to the Department in which they are studying. Non-degree seeking students are not assigned to an advisor for one-on-one advising. Non-degree-seeking students may utilize online advising services and are encouraged to apply to the College.

Students assigned to their department will receive email information regarding scheduled group advising sessions and contact information for the departmental faculty. Students assigned to a full-time faculty or professional staff member for advising should contact their advisor to arrange an appointment. All full-time faculty and professional staff advisors have offices with posted office hours, voicemail and email. Students assigned to the Advising Center may access assistance during posted walk-in hours. For more information, call 617-228-2230. Students assigned to ESL Advising may access assistance during posted walk-in hours at the Assessment Center, Room B118. For more information, call 617-228-2377. Advising is also available at the Chelsea campus. Please call 617-228-2101 for more information. In addition, questions about advising can be sent to onlineadvising@bhcc.mass.edu.
WebAdvisor

All registered students have an Online Services account known as WebAdvisor located in the BHCC Portal. This account allows students to print a current course schedule or unofficial transcript, view placement test results and grades, search for course availability, access financial aid and student payment information, register for or drop courses (during the posted registration and add/drop periods), pay for courses, create a payment plan and waive health insurance. The Program Evaluation and Student Planning features allow students to monitor their progress toward program requirement completion and make informed decisions about course selection. In addition, the Student Planning feature allows students to create a plan for completing program requirements and even register from that plan. To log on to the BHCC Portal and access your WebAdvisor account, select the Portal link on the BHCC website bhcc.edu. Directions can be found on the Portal Log on page. Students who encounter trouble accessing their online account can contact the Student Helpline at 617-228-3441. Questions related to the content of a WebAdvisor account and/or advising related questions should be directed to the student’s assigned advisor. Students requiring assistance can also visit the computer station in the main lobby of the B-Building or the LifeMap Commons, Room E235.

Placement Testing and Assessment

All degree and certificate seeking students and all those who intend to take math or English courses, or courses that have a mathematics, reading or English prerequisite, may be required to take the Computerized Placement Tests (CPTs) before registering. Students who test below the tenth-grade reading level on the placement examination must enroll in an appropriate level reading course. Students may not register for English or mathematics courses at a higher level than indicated by their performance on the placement tests. Students can prepare for the CPTs by using review books and practice questions on various websites. Search for “Accuplacer practice” via any Internet search engine or go to bhcc.edu/assessment/cpt. The College reserves the right to determine placement into courses, including English as a Second Language and developmental courses, based on the placement test results. The Assessment Center may restrict retesting. The Assessment Center is located in Room B118.

Assessment testing is also available at the Chelsea campus. Please call 617-228-2101 for details.

Students whose first language is not English and who have not earned a high school diploma or GED in the United States may be required to take the English placement test (LOEP). International students may be required to take the LOEP if they have not scored at least 500 on the TOEFL paper test or 173 on the computerized version or 70 on the Internet-based TOEFL. The LOEP places students into an appropriate level in noncredit Basic English as a Second Language (BESL) courses or Academic English as a Second Language (ESL) courses. For more information, go to the Assessment Center, Room B118, or call 617-228-2468.

Academic Support Services

College Connection
College Connection is an academic and advising support service available to students enrolled in sections of RDG090, RDG095, and ENG090 at the Charlestown campus. At the individual professor’s request, classes are assigned a dedicated Literacy Coach who visits the class on a regular basis, provides individualized tutoring outside of class time, follows up with absent students, connects students to appropriate college resources, and provides advising services. Participation in this program is optional for both faculty and students. The goal of the program is to improve the retention, pass rates, and reading levels of students enrolled in developmental reading and writing classes, as well as to prepare students to meet college expectations.

Early Advantage Program
The Early Advantage Program (EAP) connects students to resources and creates learning opportunities that lead to a successful college experience. Through the use of strength assessments, innovative and proactive programming, and referrals to appropriate on-campus support, the program helps students design their path to academic success.

The EAP Alert System facilitates student utilization of campus resources through timely, proactive intervention by staff in the LifeMap Commons. The system allows faculty and staff to make a referral when there is concern about a student’s progress during the first half of the semester. When a referral is submitted, the Early Advantage Program staff working out of the LifeMap Commons will make every effort to connect with the student in person, via the phone or via email.

Early Advantage Program also coordinates a number of Steps to Success workshops designed to help students reduce stress and earn better grades each semester. Workshop offerings and schedules are mailed to all students at the start of the semester; students may also request a schedule by emailing earlyadvantage@bhcc.mass.edu.

Language Lab
The Language Lab provides students a high-tech learning environment along with a knowledgeable tutoring staff to guide them with any aspect of language learning, from speaking, listening, and pronunciation, to reading, writing, grammar, and punctuation. The Lab currently has several language learning software programs, and support staff members, and 34 workstations. The objective of the Lab is to help all students improve their language skills. In addition to software and tutoring, the Lab offers the following support services.

- One-hour interactive grammar, writing and technology workshops; ENG095 and ENG111 practice exit exams;
- ESL reading and writing practice exit exams;
- Individual tutoring sessions;
- ESL and English IP completion;
- TOEFL and IELTS practice and tutoring;
- Foreign language textbook software and tutoring;
- Online website services.

The Language Lab is located in Room E144. During the fall and spring semesters, the Lab is open seven days a week, with evening hours Monday through Thursday. During the summer semester, the Lab is open Monday through Friday including evenings. For more information about the Lab, call 617-228-3440 or visit bhcc.edu/languagelab.

Math Space
The Math Space is a newly renovated mathematics resource center that is available to all students enrolled in developmental mathematics courses at BHCC. Located in rooms M101, M102, M103, and M105 at the M Building, the primary goal of the MathSpace is to assist students to become independent learners and in achieving academic success in mathematics.

The Math Space is equipped with 60 internet enabled Windows 7 workstations as well as a smart board set up. Students can use these workstations to complete their assigned exercises, homework, and other math projects on MyMathLab, an online interactive educational tool for mathematics. Students who bring their own headphones can also use the Math Space to access video lectures, animations and multimedia textbooks to improve their understanding of course content. In addition, students can learn to use more specialized math software, such as Mathtype, TI interactive, Sketchpad, Derive, and Mathematica, during their visits to the Math Space.
Academic Support Services

The Math Space has several desks that students can use to engage in either group or individual study. Students also have access to the support services provided by staff of the Math Space, which include: receiving one-on-one training and support in the use of MyMathLab; getting tutored on questions in MyMathLab; and participating in developmental math review sessions. Finally, some of the math faculty hold office in the Math Space. This set-up easily allows students to consult math faculty during regular faculty consultation hours.

The Math Space is open seven days a week during the regular academic year. During the fall and spring semesters, the hours of operation are: Monday to Thursday, 8 a.m. to 8 p.m.; Friday, 8 a.m. to 5 p.m., and Saturday and Sunday, 10 a.m. to 4 p.m. During the summer semester, the MathSpace is open from Monday to Thursday, 9 a.m. to 6 p.m.; and Friday, 9 a.m. to 4 p.m. For more information, please contact mathlab@bhcc.mass.edu.

An important note: to protect equipment housed in the Math Space, please do not bring any type of food or drink during your visit.

Office for Students with Disabilities
The College provides support services for students with documented disabilities. These services include (but are not limited to) classroom and testing accommodations and the use of assistive technology. In addition, the Office offers academic advising, supportive counseling and study and support groups. These services promote equal access and student success, while maintaining student confidentiality and consideration in accordance with the Americans with Disabilities Act and the Rehabilitation Act of 1973. Students with appropriate documentation who wish to request accommodations should register with the Office for Students with Disabilities, Room E222, or call 617-228-3415 or 617-228-2234, or TTY 617-242-2365. Note: Students are responsible for initiating the request for accommodations, which are only permissible through the Office for Students with Disabilities.

Student Access and Success Center (SASC) Chelsea Campus
The Chelsea Campus Student Access and Success Center oversees student registration and payment, and houses student activities, academic support, advising, and assessment services delivered on the Chelsea campus. New and continuing students receive advising and course placement testing. Students may drop in for group and individual tutoring. The Center offers tutoring in mathematics, psychology, sociology, English, reading, writing, biology, and allied health content areas. Tutoring in other academic areas is also available by appointment, and as needed. The Center supports student achievement workshops in career exploration, goal setting, time management, learning styles, note-taking strategies, study skills, and test-taking skills. These student achievement workshops are available for small groups and for entire classes at the request of instructors. The Center is located on the second floor in Room 202. During the fall and spring semesters, the Center is open 9 a.m. to 7 p.m., Monday through Thursday, and from 9 a.m. to 4 p.m. on Fridays. The Center also maintains summer hours. Please contact us to obtain a current summer schedule. For additional information regarding student services and support at the Chelsea campus, contact the Associate Dean of the Chelsea Campus, at 617-228-2339.

Tutoring and Academic Support Center (TASC)
The Tutoring and Academic Support Center (TASC) supports and enhances student learning and academic success by offering a variety of traditional and non-traditional services to all BHCC students. The TASC offers tutorial assistance, small group workshops, and academic support to students enrolled in credit-bearing courses. Students are offered a wide range of services to support their work in basic academic skills as well as on course-specific work in their programs. Students may register for weekly, individual, and group appointments.

These services are offered in a student-centered atmosphere. Major areas of concentration on the Charlestown campus are English and writing, English as a Second Language (ESL), mathematics (College level and higher), computers, science, business, behavioral science, human services and early childhood education. Other subject areas may be added on an as-needed basis. The TASC also offers 18 student computer stations where students may type papers, do research or access the Internet.

Students may utilize services during regularly scheduled hours at the TASC located in Room E174. During the fall and spring semesters, the TASC is open seven days a week: Monday through Thursday, 8:30 a.m. to 8 p.m., and Friday through Sunday, 8:30 a.m. to 4 p.m. During the summer semester, the TASC is open Monday through Thursday, 10 a.m. to 6 p.m. The TASC is closed during semester breaks. For more information, contact the TASC at 617-228-3467 or email tasc@bhcc.mass.edu.
The Writing Place
The Writing Place is a tutoring service sponsored by the English Department. Students come to the Writing Place to work with peer tutors on specific writing tasks, including brainstorming ideas for college writing assignments, organizing rough drafts, revising, editing, and doing library research. The Writing Place tutors are students who have successfully completed their College English program and are taking a course that prepares them to provide effective feedback and assistance. Specific materials and computer resources are available in the Writing Place to supplement class instruction and develop composition skills. The Writing Place, located in Room E142, is open during the fall and spring semesters, Monday through Saturday. Hours may vary from semester to semester, depending on tutor availability. Students are encouraged to visit the Writing Place in Room E142 to schedule sessions with a tutor. Tutoring sessions can also be arranged by contacting the Writing Place at 617-936-1948.

Admissions and Enrollment Services

Admissions
Bunker Hill Community College is committed to an open admission policy. This policy offers the opportunity to enroll those who have earned a high school diploma, a GED or an associate degree or higher and who express a desire to pursue a college education. To enroll in a degree or certificate program, students must apply for admission and be accepted to the College. Students choosing this option are referred to as “degree-seeking students.” Students who do not choose this option are referred to as “non-degree-seeking students.” Students are expected to be able to perform college-level work and to conduct themselves in a manner appropriate for college students. In cases where tests or other indicators suggest the contrary, the College reserves the right to deny admission. Students under the age of 18 may be required to sign a release form supplied by the College detailing the responsibilities of a minor taking courses at BHCC. All documents submitted to the College become the property of Bunker Hill Community College and will not be returned to students.

Ability to Benefit Policy
Students who supply the College with documentation of successful completion of their high school course requirements for the Commonwealth of Massachusetts, but who have not passed the MCAS test nor received a GED, may apply for admission to a BHCC degree-granting program (matriculation) through the Ability to Benefit policy. The policy is as follows: Upon submitting an application for admission, applicants will be required to take an Ability-to-Benefit assessment test. Applicants achieving the minimum score as established by the U.S. Department of Education (Accuplacer - Reading: 55; Sentence Skills: 60; Math: 34) will be admitted to BHCC and will be permitted to matriculate, but will not be eligible to apply for or receive financial aid. Students enrolled in an ESL or bilingual program at the time of high school graduation can take the COMPASS ESL exam to qualify for acceptance to the College through Ability to Benefit, but will not be eligible to apply for or receive financial aid.

Credit Hour Policy
In accordance with the United States Department of Education, Bunker Hill Community College uses the credit hour policy as 1 hour of classroom or direct faculty instruction and a minimum of 2 hours of out of class student work, each week, for approximately 15 weeks for 1 semester hour of credit.

Criminal Offender Record Information (CORI) and Sex Offender Registry Information (SORI) Checks
In order for a student to be eligible to participate in an academic, community or clinical program that involves potential unsupervised contact with children, the disabled, or the elderly, the student may be required to undergo a criminal background check which could include Criminal Offender Record Information (CORI) check and/or a Sex Offender Registry Information (SORI) check. Students found to have certain criminal convictions or pending criminal actions will be presumed ineligible to participate in such activities. The College is authorized by the Commonwealth’s Department of Criminal Justice Information Services, pursuant to Massachusetts General Laws, Chapter 6, Sections 167-178B, to access CORI records. In addition, for clinical placement in some programs, a National County Background Check may be required in addition to the CORI check.

Sex Offender checks shall be performed pursuant to Massachusetts General Laws, Chapter 6, Sections 178C-178P. For more information regarding the College’s CORI/SORI check process, please contact the College CORI/SORI Officer at 617-228-2193. In accordance with federal law, the College is required to advise the campus community where information concerning registered sex offenders may be obtained.

Accordingly, in order to access public information pertaining to registered sex offenders enrolled or employed at the College, please contact the Commonwealth of Massachusetts Sex Offender Registry Board, located at P.O. Box 4547, Salem, MA 01970-4647, 978-740-6400, or the BHCC Office of Public Safety and Campus Police, located in Room E127.

Curriculum Year
The term “curriculum year” refers to the academic year in which students are admitted to the College. Students must fulfill the program requirements listed in the College Catalog in effect for their curriculum year. When students are readmitted to the College after an absence of two or more consecutive semesters, they must fulfill the curriculum year/program requirements in effect at the beginning of the semester of re-admission.
Admissions and Enrollment Services

Students changing their program must fulfill the curriculum year program requirements in effect at the beginning of the semester following the date of the change.

Degree and Certificate-seeking Students
All students admitted to degree or certificate programs may be required to take Computerized Placement Tests (CPTs) in English, reading and mathematics, or may be required to take the ESL placement tests if English is their second language. The tests determine the levels at which students will begin their study. Based upon test results, the College may prescribe developmental or ESL courses, or limit a student’s enrollment in an effort to enhance that student’s ability to succeed. Applicants to health careers and technical programs must comply with specific program entrance requirements and application deadlines.

Deferred Action for Childhood Arrivals Process
On June 15, 2012, the Secretary of Homeland Security announced that certain people who came to the United States as children and meet several key guidelines, may request consideration of deferred action for a period of two years, subject to renewal, and would then be eligible for work authorization. Deferred action is a discretionary determination to defer removal action of an individual as an act of prosecutorial discretion. Deferred action does not provide an individual with lawful status. The College requires proof of the C33 card as part of the application process to prove in-state tuition. For further information please go to U.S. Citizenship and Immigration Services at uscis.gov/childhoodarrivals.

Fresh Start Policy
Under the Fresh Start Policy, students may enroll without having to carry a very poor GPA record or low completion rate from years back that could prevent them from ever earning a GPA or completion rate sufficient to lead to graduation or completion of a program. The following conditions apply to the Fresh Start Policy:

1. The student must be a former Bunker Hill Community College student who has credits from BHCC.
2. The credits held by the student must be at least 5 years old. No credits shall have been earned or attempted at BHCC within the past five years.
3. All these credits will be treated as the College treats credits transferred from other colleges. Credit will be granted for a course where a grade of C or better was earned. The courses from the earlier registration that received a grade of C or better will be counted as free electives or as courses fulfilling requirements depending upon the program requirements of the student who is re-entering, just as transfer credits from other colleges are counted. Only credits subsequently taken at BHCC are counted in the GPA. Likewise, only the completion rate subsequent to the return will be used to determine progress.
4. This process can be used only once. If the student drops out again and then returns, the student cannot start again with a new GPA or a new completion rate.
5. This process does not affect the need to repeat courses in certain programs where the earlier completion may be considered out of date (this is frequently the case in science, computer technology, or health programs such as nursing).
6. In all cases where these policies are at variance with federal financial aid policies, the federal policies will determine eligibility for such aid.

Homeschooling Policy
Homeschooled students without a high school diploma or GED are eligible to apply for admission to a degree or certificate program, provided they have successfully completed an approved homeschool program in accordance with Massachusetts General Laws or the laws of their home state. If a homeschooled student has not completed an approved homeschool program, then the student will not be eligible to enroll in a degree or certificate program until he/she has taken and passed an Ability to Benefit assessment test.

Homeschooled students who wish to apply for admission to a degree or certificate program must submit with their admissions application evidence that their homeschool program was approved by their school district’s superintendent or school committee. Additionally, if the homeschooled student is under the age of compulsory attendance, which is 16 years old in Massachusetts, a letter from the student’s school district’s superintendent or school committee is required stating that the student is not considered truant and would not be required to attend further schooling or continue to be homeschooled if the student has completed his/her homeschool program before the age of 16.

The College reserves the right to limit or deny enrollment of any student under the age of 16 in a course or program based on a case-by-case consideration of a variety of factors, including but not limited to the student’s maturity, life experience, placement test scores, prior education, course content, instructional methodology and potential risks associated with participation in a particular course or program.

Immunization
Massachusetts General Laws, Chapter 76, Section 15C, require that all full-time students (enrolled in 12 or more credits) and all students (full- and part-time) enrolled in health career programs present evidence of immunity to measles, mumps, rubella, diphtheria, tetanus and three doses of hepatitis B vaccine. Students in the health career programs also must present evidence of immunity to varicella and Mantoux testing for tuberculosis. For measles, mumps, rubella and hepatitis B, serologic proof of immunity is acceptable.

Students who fail to present the required information within 30 days of the date of registration are not allowed to register for subsequent semesters or receive final grades until the
immunization form is received by Admissions and Enrollment Services, Room B203. Immunization forms become part of the student’s permanent file and cannot be copied, transferred or returned.

Midyear Admission
Bunker Hill Community College admits students to most programs at midyear on a space-available basis. Students can begin courses in the spring semester; however, some courses listed in the College Catalog may not be available to midyear entrants. The College cannot assure the availability of specific courses.

Many programs contain courses that have prerequisites. Because prerequisites are not waived for students admitted at midyear, the number of semesters necessary to complete degree requirements may increase.

Non-Degree Students
To enroll in classes as a non-degree student, students should refer to the appropriate course schedule booklet available in Admissions and Enrollment Services Room B203, or online at bhcc.edu, for registration dates. All students who wish to register for a math or English course or a course with a math, English or reading prerequisite, may be required to take the Computerized Placement Tests (CPTs) prior to registration, or bring appropriate transcripts. All students who wish to register for an ESL course may be required to take the ESL placement test prior to registration. The tests determine the levels at which students begin their studies.

Test of Essential Academic Skills (TEAS)
The Test of Essential Academic Skills (TEAS) measures basic essential skills in the academic content area domains of reading, mathematics, science and English and language usage. The test is intended for use primarily with adult nursing program applicant populations. The objectives assessed on TEAS are those which nurse educators deemed most appropriate and relevant to measure entry level academic readiness of health care program applicants.

Valor Act Credit Evaluation Policy
In accordance with the Valor Act, Bunker Hill Community College uses the American Council on Education (ACE) military program guidelines to the evaluation of educational experience in the Armed Services as the primary method for evaluating and awarding academic credit for military occupation, training, experience, and coursework.

Withdrawal from a Course
Students may withdraw from a course only during the semester in which they are registered for the course and only by the deadline specified for each semester.

The College does not process course withdrawals after the withdrawal deadline date specified for each semester. The College issues no refunds for students who withdraw from a course.

To withdraw from a course, students must complete and submit the appropriate course withdrawal forms, which are available at Admissions and Enrollment Services, Room B203. After students officially withdraw, their transcripts show grades of W. The College designates course withdrawals as “uncompleted courses,” which may adversely affect academic standing and financial aid eligibility. Failure to attend or ceasing to attend classes does not constitute withdrawal from the course and results in a grade of F or NA for the course (see Satisfactory Academic Progress on page 46).

Withdrawal from the College
Students may withdraw from the College only during the semester in which they are registered. Withdrawals are not processed retroactively, that is, after the semester in which the student was enrolled. Students who withdraw from the College are not entitled to a refund. To withdraw from the College, students must complete a withdrawal form available at Admissions and Enrollment Services, Room B203, complete all the withdrawal steps and submit the completed form to Admissions and Enrollment Services. Students who withdraw from the College receive W grades on their transcripts for all courses for the semester withdrawn.

Failure to attend or ceasing to attend a class or classes does not constitute official withdrawal from the College and results in grades of F or NA for the course or courses. Failure to withdraw formally may affect students’ academic standing and eligibility to receive financial aid (see Satisfactory Academic Progress). Students desiring to be readmitted to the College must submit a new application if they register for courses within two consecutive semesters of the date of withdrawal.

Admissions and Enrollment Services - International Students
International students who wish to attend Bunker Hill Community College on a student F-1 visa must have completed their secondary education and must demonstrate proficiency in English, if English is not their first language. International applicants from outside the United States must submit all required application materials to the International Center by July 15 for the September semester, November 30 for the January semester and April 21 for the summer term. International applicants currently within the United States must submit all required application materials by August 15 for the next September semester, January 2 for the next January semester and May 15 for the summer term. If applying to Bunker Hill Community College from within the United States, applicants who are unable to provide a TOEFL score must take the College Placement Test at the BHCC Assessment Center, Room B118. Students can obtain more information by calling 617-228-2468. Bunker Hill Community College is authorized under Federal law to enroll non-immigrant alien students. In addition to satisfying...
admission requirements, students must provide evidence of their financial ability to support their educational and living expenses while in the United States. Specifically, students must provide a completed affidavit of support and an official bank statement that shows evidence of sufficient funds to cover educational and living expenses for the first year ($21,100). F-1 visa students must register and complete at least 12 credits (full-time) for fall and spring semesters, except in the semester of graduation where the student may be eligible to enroll into less than 12 credits. However, during the semester, if F-1 visa students need to withdraw from any of their classes the student must get an authorization from an International Student Advisor BEFORE withdrawing from class. Further, F-1 visa students are eligible to enroll in only one online or distance education class per semester. International applicants may obtain more detailed information concerning the admission process by contacting the International Center at 617-228-2460 or via email at international@bhcc.mass.edu. Financial aid is not available to International students. Lack of sufficient funds may result in an interruption in enrollment at the College that will jeopardize the student’s eligibility to remain in the United States on a student visa. Once admitted, International students receive orientation and other support services through the International Center. See page 49 or or via the College website at bhcc.edu/internationalcenter for more information.

Admissions and Enrollment Services - Online

Enrollment Management and Admissions provides a variety of services to students. Prospective students may obtain information regarding applying to a degree program, specialized programs, information sessions and tours, and general college information through Enrollment Management and Admissions, Room B203, or via the College website at bhcc.edu/admissions.

Online Services

The College offers all students secure, easy online access to academic and financial records, and to course availability information. Using a password, students access this information directly at onlineservices.bhcc.edu. The College provides information online for students regarding semester grades, unofficial transcript, placement test summary, account summary, financial aid status, course schedules and course availability.

Registration. Students with a GPA of at least 2.00 may register online; all students may pay online, providing their student payment account and immunization records (if applicable) are in good standing.

Payment. Students can access their financial account summaries online at onlineservices.bhcc.edu. The account shows both current semester payments received and balances due. Students also are able to make online payments using VISA, MasterCard, Discover and American Express, or from a checking or savings account. International students also have the benefit of making payments in the currency of their choice through the International Payment Portal at onlineservices.bhcc.edu.

Financial Aid. Through the online services system, students can see and print their Financial Aid award letters, view their current and previous years’ Financial Aid records and check the status of their current Financial Aid application documentation.

Obtaining a Password. The College creates students’ initial passwords using either the last six digits of their Student ID number or their Social Security number. To access online services, go to bhcc.edu and click on the Portal link. Click on the Log into Specops Dashboard link and click on the Enroll in Specops link. Log on by entering your BHCC user name (see your acceptance letter), and enter the last six digits of your social security number if you have one or the last six digits of your BHCC Student ID number. Click the next button. Select and answer your three security questions. Now that you are enrolled in Specops, you must change your password. Go back to the portal and click on Log in to Specops Dashboard and click on change your password. Log on by entering your BHCC User Name and your password. Click next. You will then be asked to create a new password: the red dots in the middle of the screen will change to green check marks when the rules are met. Click the finish button to complete.
Transfer Affairs

Transfer Affairs offers services to students interested in transferring from BHCC to four-year institutions. Through information sessions, workshops, and various resources, students will understand the procedures to facilitate the transfer process. The College encourages students to plan early and research future colleges and universities to properly assess their requirements, minimums, and expectations, which will help students make the best curriculum choices at BHCC. Visit the College’s website for upcoming information sessions at bhcc.edu.

Early Childhood Education Transfer Compact

The statewide Education Transfer Compact enables students to transfer associate degree credit from A.A. Education programs to the same programs at specific four-year state colleges, universities and the University of Massachusetts. Students seeking to complete Compact requirements should complete requirements as outlined in the Associate in Arts Education Concentration. Students seeking additional Compact information should review the Additional Transfer Agreement section on the MassTransfer website at mass.edu/masstransfer/.

Transfer and Articulation Information for Baccalaureate Programs

Bunker Hill Community College is dedicated to creating partnerships with four-year colleges and universities. An important way of doing this is by forming articulation agreements. Articulation agreements are partnerships between colleges that can help ensure that the classes a student takes at BHCC will transfer to four-year schools. These agreements are designed to help students make a smooth transition when transferring from BHCC to a four-year institution. Transfer Affairs offers services to students interested in transferring from BHCC to four-year institutions. Through information sessions, workshops, and various resources offered, students will understand the procedures to facilitate the transfer process. The College encourages students to plan early and research colleges and universities to properly assess their requirements, minimums, and expectations, which will help make the best curriculum choices at BHCC. Visit the College’s website for upcoming information sessions at bhcc.edu/transfer.

Transfer Applicants from Other Institutions

Students who have attended another college may apply for transfer credit and advanced standing at Bunker Hill Community College. Official transcripts from all previous colleges should be sent directly to the Academic Records Office, Room B203 at the time the student applies to BHCC. Once the student is accepted and becomes a matriculated student, college transcripts will then be evaluated.

Credit may be awarded if:

- The courses are comparable to those offered at BHCC.
- A grade of C or better is earned from a regionally accredited college or university. A grade of P may be accepted only if it can be demonstrated that the P grade is equivalent to a grade of C or higher.
- Specific departmental requirements may apply to course eligibility for your program: Anatomy and Physiology I, II and Microbiology for selective health programs may not be more than five years old, some programs require a C+ or higher. Detailed information can be found in the Degree and Certificate Program section of the catalog.

Credits earned at colleges which follow a quarter system will be converted to semester-hour equivalents resulting in an adjustment in the number of credits transferred. The College will accept a maximum of 45 transfer credits toward the BHCC associate degree and 75 percent of the total number of credits required for certificate programs.

Lesley at BHCC

Lesley at Bunker Hill Bachelor’s Degree Completion Program is a collaborative initiative between Bunker Hill Community College and Lesley University to encourage student success and promote curricular connections between the two institutions. Through the Lesley at BHCC Program, students can complete a Bachelor’s degree in a convenient and affordable manner. The Lesley courses are taught by Lesley faculty on the Bunker Hill Community College campus during the evenings and weekends at a discounted tuition rate. Lesley University offers three Bachelor’s degree options in Business Management, Early Childhood Studies, and Psychology. To be eligible for this program, a student must plan to complete an Associate’s Degree from BHCC in a corresponding concentration with a cumulative GPA of 2.5 or better. For more information, please contact the Community College Partnerships Coordinator at 617-936-1918.
MassTransfer

MassTransfer provides students with straightforward and understandable options regarding the completion of associate and baccalaureate degrees. MassTransfer has two main purposes:

- To provide community college students who complete designated associate degrees under MassTransfer with the benefits of the full transfer and applicability of credit, guaranteed admission, and a tuition discount (each benefit based on the student’s final grade point average) to linked baccalaureate programs; and

- To provide any student in the Massachusetts public higher education system the intermediate goal of completing a portable transfer block ("MassTransfer Block") which satisfies general education/distribution/core requirements across institutions (with the receiving institution able to add no more than six additional credits/two courses). The MassTransfer policy for community college students who complete designated associate degrees will apply to students who matriculate in or after fall 2009 at a Massachusetts community college.

MassTransfer Block

Students who choose to transfer before graduating, but who have completed the MassTransfer Block of 34 credits with a 2.0 or higher grade point average, will satisfy the core/distribution/general education requirements at the receiving institution.

MassTransfer Block:

<table>
<thead>
<tr>
<th>Subject</th>
<th>Credits</th>

</thead>
<tbody>
<tr>
<td>English Composition/Writing</td>
<td>6</td>
</tr>
<tr>
<td>Behavioral and Social Sciences</td>
<td>9</td>
</tr>
<tr>
<td>Humanities and/or Fine Arts</td>
<td>9</td>
</tr>
<tr>
<td>Natural or Physical Science</td>
<td>7</td>
</tr>
<tr>
<td>(1 credit must include a Lab)</td>
<td></td>
</tr>
<tr>
<td>Mathematics/Quantitative Reasoning</td>
<td>3</td>
</tr>
<tr>
<td><strong>Total Credits</strong></td>
<td><strong>34</strong></td>
</tr>
</tbody>
</table>

The receiving institution is able to add no more than 6 additional credits or 2 courses, if the student is admitted for transfer. Students enrolling in a baccalaureate program requiring a higher grade point average or specific courses for completion of the degree may be required to complete additional courses or GPA requirements.

Completion of the MassTransfer Block does not guarantee admission to the college or university. Students may review the MassTransfer chart on the previous page.

More detailed information regarding MassTransfer and eligible programs at Bunker Hill Community College can be found at the official MassTransfer website mass.edu/masstransfer/.

Eligibility Guidelines

A. Final Cumulative G.P.A. of 2.0 or Higher

- Waives the admissions application fee and essay
- Guarantees the full transfer of college-level credits, including “D” grades, applied to the degree requirements of the linked baccalaureate degree or school at the Massachusetts state college or University of Massachusetts
- Satisfies the general education requirements at the receiving institution with the receiving institution able to add no more than six additional credits/two courses in compliance with the New England Association of Schools and Colleges’ Standards for Accreditation.

B. Final Cumulative G.P.A. of 2.5 or Higher

- Grants all of the benefits outlined in section A.
- Guarantees admission to the linked baccalaureate degree or school at a Massachusetts state college or University of Massachusetts campus.

C. Final Cumulative G.P.A. of 3.0 or Higher

- Grants all of the benefits outlined in both sections A and B.
- Guarantees a tuition waiver equal to 33 percent of the Massachusetts resident tuition rate at a state college or University campus for two years of undergraduate enrollment.

Additional Information

- Students must complete an “Intent to Enroll” form at Admissions and Enrollment Services.
- “Full transfer” ensures that a minimum of 60 credits must be transferred and applied to the linked baccalaureate program UNLESS:
  - the student changes his or her major;
  - the linked baccalaureate program requires a higher grade point average;
  - specific courses for the major are required of native students.

- Admission is guaranteed UNLESS:
  - the linked baccalaureate program requires a higher grade point average;
  - because of space or fiscal limitations the receiving institution does not admit all qualified applicants to a given major or program.

- Students must be in good academic, fiscal and disciplinary standing with all previous institutions.

- Enrollment must be continuous at the state college or University of Massachusetts campus;
  - The student must earn a cumulative G.P.A. of 3.0 or higher for the first year of enrollment at the state college or University of Massachusetts campus.
Partnerships with Secondary Schools

**Dual Enrollment Program**

The Dual Enrollment Program at Bunker Hill Community College enables high school students from Boston area schools to earn high school and college credits simultaneously while gaining familiarity with the college experience. The program staff provides students with advice on procedures for testing, enrollment and college expectations. The staff also provides academic and non-academic support for students throughout their time at the College. For more information, please visit the website at bhcc.edu/dualenrollment.

**Massachusetts DECA, Distributive Education Clubs of America**

Massachusetts DECA, Distributive Education Clubs of America, is a co-curricular career technical high school student organization that operates in over 75 comprehensive and technical high schools in Massachusetts. The organization serves about 5,400 high school members annually and prepares emerging leaders and entrepreneurs in marketing, finance, hospitality and management. Massachusetts DECA has been operating on a continuous basis at BHCC since September 1993, and has served approximately 61,000 66,000 student members since being hosted at BHCC. For more information, contact the Association Advisor for Massachusetts DECA at 617-228-2024 or visit their website at madeca.org.

**MCAS Preparation/Pathways to Success Program**

The MCAS Preparation/Pathways to Success Program at Bunker Hill Community College provides MCAS preparation and college transitional assistance annually to over 120 - 150 Boston area students who have failed the MCAS. Instruction is tailored to individual needs for MCAS mathematics, English and Biology curricula. The program also familiarizes students interested in attending an institution of higher education with the college environment. The program operates three terms each academic year, each lasting 6-8 weeks, with approximately 50 students attending each term. The program has been funded by a grant from the DOE since 2002, and is administered through the Grant Management Office at BHCC. For more information, contact the MCAS Program Coordinator at 617-228-2289.

**Pathways to Prosperity**

Pathways to Prosperity is a six-year pathway program for high school students; starting in grade 9, who have expressed an interest in healthcare professions, with an opportunity to complete Bunker Hill Community College prerequisite coursework prior to enrolling at the College. By completing prerequisite coursework during high school, participants will begin accumulating credits to receive a degree or certificate in their chosen healthcare field from BHCC.

Students Taking Action for Nursing Diversity (STAND) is a component of Pathways to Prosperity for participants interested in the nursing field; specifically. The program serves students from participating Boston area schools. For more information, contact the STAND and Pathways to Prosperity Director at 617-228-2313.

**Summer Bridge Program**

Launched in 2012, the Summer Bridge Program enables entering students with assessed need for developmental (pre-college) English and/or math coursework to receive intensive instruction and review to progress through developmental levels prior to fall entry. The program consists of intensive three-week skill review boot camps, integrating technology and diagnostic assessment to accelerate students through developmental sequences. Boot Camps target students with Accuplacer results near a threshold score for college-level or upper developmental level English and/or math. Bridge Classes are eight-week intensive classes. These classes target students needing more intensive instruction to progress to college-level or upper developmental level English and/or math. Summer Bridge can serve as a critical vehicle for relieving the needs of students mired in developmental classwork, many of whom leave the College due to lack of progress toward their goals. Since this need is more pronounced among entering students of color, Summer Bridge also has a critical role in narrowing achievement gaps.

**Cost of Attendance**

The Board of Higher Education sets tuition and the College sets fees. Both are subject to change.

**Tuition and Fees (Fees are subject to change)**

- **Massachusetts Residents (MA)**
  - $149.00/credit per credit: $24 tuition/$115 course fees/$10 technology fee

- **Non-Massachusetts Residents**
  - $355.00/credit per credit: $230 tuition/$115 course fees/$10 technology fee

- **The New England Regional Student Program**
  - $161.00/credit per credit: $36 tuition/$115 course fees/$10 technology fee
  (Available to students from RI, CT, NH, ME and VT that are approved by the Academic Records Office)

**Other Charges (Subject to change)**

**Health Insurance Fees:**

Massachusetts state law requires that all students taking nine or more credits in the fall semester or nine or more credits in the spring semester have medical insurance. There are no exceptions.

- **Fall Semester 2015**
  - $1,536.00 (subject to change)

- **Spring Semester 2016**
  - $1,026.00 (subject to change)
Cost of Attendance

Fees
Special Cost Course Fee ........................................... $35.00/credit
Liability Insurance Fee .............................................. $15.00
Parking Permit Fee .................................................. $30.00
Photo ID Replacement Fee ....................................... $20.00
Returned Check Fee .................................................. $30.00
Transcript Fee (paper request) .................................... $4.25
Transcript Fee (electronic request) .............................. $6.00
Refund Check Replacement Fee ............................... $20.00

Health Insurance Refund Policy
Except for medical withdrawal due to covered injury or sickness, students withdrawing from the College during the first 31 days of the period for which coverage is purchased shall not be covered under the policy and a full refund of the premium will be made. Students withdrawing after 31 days will remain covered under the policy for which the premium was paid and no refund will be allowed. Students who do not withdraw completely, but who drop below nine credit hours within the first 31 days, may apply to the Student Payment Office, Room B219, for a refund of health insurance premiums. Registering for mini-semester, web courses, and Center for Self-Directed Learning courses later in the fall or spring semester may restore the student’s obligation to carry health insurance.

Outstanding Financial Obligations
Bunker Hill Community College is responsible for making “diligent efforts” to collect amounts due to the state. Diligent efforts shall include written billings, dunning notices and subsequent assignments to a collection agency. The student is responsible for all collection costs and any fees incurred in the collection of debt and for informing the College of any dispute regarding the debt. The College advises students that their debts may be discharged through the intercept of any Commonwealth and Federal payments that are due to them or scheduled to be paid to them including tax refund. Please be advised that your student account debt constitutes an “educational benefit overpayment or loan” as defined pursuant to 11 U.S.C section 523(a)(8), and therefore is not dischargeable in bankruptcy.

Payments
At the time of registration, students receive, or able to view a registration statement and bill combination, along with a class schedule that indicates the amount charged, and information about payment and insurance waiver deadlines. Follow-up and/ or updated statements are sent to the to the student’s BHCC email address. Students must log in to their BHCC accounts at https://selfservice.bhcc.edu/Student/Finance regularly to see updated account information. Delinquent notices will be sent to the mailing address on file until the balance is paid in full. Students must pay all bills by the published due dates or at the time of registration. Failure to receive a bill or check one’s account online does not relieve responsibility for timely payment. Students who register on or after the due date must pay at the time of registration and will not receive any statements or warning notices. The College accepts payment online at https://selfservice.bhcc.edu/Student/Finance by personal check or from a savings account or with VISA, MasterCard, Discover or American Express, or if paying by cash in person at the Student Payment Office, Room B219. The College processes checks through Telecheck electronic check acceptance services and the writer must present positive U.S. identification. Other requirements are available in the Student Payment Office, Room B219. When you provide a check, you are authorizing us to convert the check to an electronic payment item, and submit it for payment as an ACH debit entry to your account. A payment plan is available to eligible students for the Fall and Spring semesters. No payment plan is available for Summer and Mini or condensed sessions. You may sign up on the payment plan by clicking on set up an automatic payment plan link within student finance under Bhcselfservice at: https://selfservice.bhcc.edu/student. For specific information about the payment plan, contact the Student Payment Office, Room B219 at 617-228-2150.

International students also have the benefit of making payments in the currency of their choice through the International Payment/Western Union link at https://selfservice.bhcc.edu/Student/Finance.

Refund Policy
Students dropping or withdrawing from classes must complete the appropriate form available at Enrollment Management and Admissions, Room B202. Failure to officially withdraw results in a grade of F or I in the course and an obligation to pay in full. The schedule of refunds for tuition and general college fees applies only when proper withdrawal or class drop procedures, as established by the Academic Records Office, are followed. Application fees are non-refundable. Lack of attendance or course abandonment does not constitute a drop or withdrawal. For specific refund deadlines please refer to the course schedule for the semester or session.

Residency Tuition
Students registering for classes at Bunker Hill Community College, who are claiming entitlement to in-state tuition, must complete the Massachusetts Community College In-state Tuition Eligibility Form. An eligible person shall mean a U.S. Citizen, lawful immigrant, permanent resident, or holder of another legal immigration status who has satisfied the duration residency requirement of six months prior to the start of the semester of enrollment, but not more than one year prior to that date and can demonstrate his/her intent to remain in Massachusetts. The institution reserves the right to make any additional inquiries regarding the applicant’s status and to require submission of any additional documentation it deems necessary. Questions concerning residency requirements should be directed to the Registrar’s Office at 617-228-2403. Students enrolled in certain program courses are charged a Special Cost Courses Fee. Examples, but not limited to prefixes
AHE, CLS, CTC, DMS, EMT, MIG, MRC, NUR, RTH, SG, SON, VSN, PNP and students enrolled in CIT141 and CIT241 must pay an additional fee of $35 per credit hour. Other courses may be added. Also a malpractice insurance fee of $15.00 per academic year may apply for some health courses.

**Student Comprehensive Health Insurance Plan**

Chapter 23 of the Massachusetts Acts of 1988 requires that all students registered for nine or more credit hours must participate in a comprehensive health insurance plan unless they certify that they are participating in a health insurance plan with comparable coverage. If a student has comparable coverage and wishes to waive participation in the Massachusetts Community Colleges insurance plan, the student must submit waiver information via the Internet by the due date that appears on the registration statement or at the time of registration. Students may access the waiver form online at gallagherstudent.com/bhcc. The College has set up dedicated computer stations in the Main Lobby of the Charlestown campus for students without Internet access. MassHealth and enrollment in a subsidized Health Benefit Plan through the Connector, qualifies as comparable coverage. However, MassHealth Limited, the Health Safety Net and Children’s Medical Security plan do not qualify and cannot be used to waive coverage. Free care that is provided by hospitals and community health is not insurance and cannot be used to waive coverage. In addition, coverage from insurance carriers outside the U.S. and coverage by foreign National Health Service programs travel, and accident insurance plans cannot be used to waive coverage. Therefore, all international students must participate in the Student Health Insurance Program (SHIP) or obtain coverage from a U.S. based carrier that meets state requirements.

All questions regarding Student Health Insurance Program (SHIP) should be directed to MAhealthconnector@state.ma.us or call 1-877-623-6765.

All students carrying nine or more credit hours in the fall or nine or more credit hours in the spring must comply. Classes offered in the Center for Self-Directed Learning or during mini sessions are considered part of the long semester for purposes of determining health insurance requirements. Students are not required to have health insurance coverage during the summer term and students enrolled in all web classes are not required to purchase the College health insurance plan.

**Tuition Waivers**

Several kinds of tuition waivers are available to Bunker Hill Community College students. These waivers include, but are not limited to, National Guard, veterans, senior citizens, Native Americans, state employees and wards of the state. In order to receive a tuition discount, students must present the waiver at the time of registration. If students present the waiver after registration, the College will make no adjustment.

The Commonwealth of Massachusetts does not fund all courses; therefore, the use of certain waivers for those unfunded courses or parts of course charges noted on your registration statement/bill with the suffix NS, or with the codes such as GCFE, TECF, TUIL, HCCR will be restricted. Students eligible for waivers should obtain clarification from Enrollment Management and Admissions before making course selections.

**Financial Aid**

**Alternative Financing**

The College offers a tuition payment plan to students and families who have needs that cannot be met with federal or state financial aid. Tuition payment plan information is available on the website at bhcc.edu/AutoPay.

**Appeals Process for Academic Progress**

Students have the right to request a one-time, unsatisfactory academic progress appeal if they fail to attain a satisfactory GPA and/or course completion rate and are denied financial aid consideration. If financial aid recipients experience extenuating circumstances that affect their schoolwork, they have the right to appeal the decision. Reasons to appeal may involve, for example, a documented illness of a student or of a spouse. Because it is difficult to define all the possible reasons that could lead to unsatisfactory academic progress, students should contact the Financial Aid Office, Room B213 for instructions on how to submit a written appeal.

**Appeals Process for Financial Reasons**

A student’s family’s financial situation may change from that reported on the FAFSA application. At the request of the student, the Financial Aid Office, will review a change in the financial situation of the student to determine if adjustments should be made to the calculation of the student’s financial aid eligibility. Examples of typical appeals include a loss of employment, a reduction of income of a parent and/or spouse or uninsured medical expenses.
Federal Financial Aid Refund Policy
The calculation of the return of Title IV Funds is determined by the date that the student withdraws, which is:

- The date the student began Bunker Hill Community College’s withdrawal process, or;
- The date the student officially notified the institution of intent to withdraw, or;
- The midpoint of the enrollment period for a student who leaves without notifying the institution (an unofficial withdrawal), or;
- The student’s last date of attendance at a documented academically related activity.

Title IV aid and all other aid is earned during the time a student is attending Bunker Hill Community College. The percentage of aid earned, up to a maximum of 60 percent, is determined by dividing the number of days a student was enrolled by the number of days in the semester. If the student withdraws from all courses after 60 percent of the semester is completed, Title IV aid is viewed as 100 percent earned. Return of Title IV funds is no longer required beyond that point. If a student withdraws before 60 percent of the semester is completed, however, the student may owe a portion of his or her financial aid, if the Financial Aid Office determines that the student has received an amount larger than the earned amount.

The term “Title IV Funds” includes the following programs:

- Federal Pell Grant.
- Federal Supplemental Educational Opportunity Grant (SEOG).
- Subsidized Federal Stafford Loan.
- Unsubsidized Federal Stafford Loan.
- Federal PLUS Parent Loan.
- Federal Perkins Loan.

In accordance with federal regulations, financial aid funds are returned and allocated in the following order:

1. Unsubsidized Stafford Loan.
2. Subsidized Stafford Loan.
3. FFEL PLUS.
5. Federal SEOG Program.
6. Other Title IV programs.
7. Other state, private, and institutional aid.
8. The student.

Bunker Hill Community College will return any funds necessary to Title IV based upon the calculation. Based upon the return of Title IV Funds calculation, students are responsible to repay to the Title IV or state programs any funds that were disbursed directly to them and for which the student was determined to be ineligible.

The procedures and policies listed above supersede those published previously and are subject to change. Please contact the Financial Aid Office, Room B213 if you have any questions about the policy.

Financial Aid
The Financial Aid Office at Bunker Hill Community College assists students and their families with meeting the costs of a college education. BHCC participates in a wide variety of federal, state and private financial aid programs. Students must be aware that all institutions, including Bunker Hill Community College, are subject to changes in funding allocations from both the Commonwealth of Massachusetts and the United States Department of Education. For more detailed information, go to the financial aid section of the College’s website at bhcc.edu/fa.

Financial Aid Application Process
Financial Aid applications must be completed for each new academic year. In order to apply for financial aid, students must complete the Free Application for Federal Student Aid (FAFSA) and supply all requested documentation in accordance with the priority deadlines. This form can be completed online at fafsa.ed.gov. When completing the application, please note that the BHCC Title IV code is 011210. Students should retain and keep in an accessible place a copy of their FAFSA as well as all other documents used to complete their FAFSA. Applicants are notified in writing if additional documentation such as tax returns is needed. Returning students and applicants for admission should contact the Financial Aid Office, Room B213, or call 617-228-2275 if they have any questions about this process.

Financial Aid General Eligibility Requirements
In order to be eligible for financial aid, applicants must be United States citizens or eligible non-citizens, possess valid social security numbers, be enrolled in or accepted for
enrollment in an eligible academic program and working toward a degree or certificate. Additionally, applicants must maintain satisfactory academic progress see Satisfactory Academic Progress, on page 46 listed under Academic Policies and Procedures), comply with Federal Selective Service Law and not be in default on any educational loans or owe a refund on any federal grants or loans to any institution. Students who have previously obtained a bachelor’s degree or equivalent at any U.S. or foreign institution are not eligible for financial aid grants, but may be eligible for loans. It is important to know that students may lose their financial aid eligibility if they have attempted 150 percent of the credits needed for a certificate or a degree.

The College strongly advises students to consult with the Financial Aid Office if they are contemplating a change in enrollment status. For information go to the Financial Aid Office, Room B213, or call 617-228-2275.

Grants
Grants are sponsored by the federal and/or state government and need not be paid back. For a complete list of the grant programs in which BHCC participates, visit bhcc.edu/financialaid/typesoffinancialaid/grants/.

Priority Deadlines for Financial Aid
Fall/Spring students .................. April 15
Spring only students ............... November 1

Summer financial aid funds are available on a first-come, first-served basis. Summer financial aid applications are available at the Financial Aid Office, Room B213 at the time of summer course registration.

Satisfactory Academic Progress for Financial Aid
In order to continue at Bunker Hill Community College and/or receive financial aid, the Federal Government requires that students must make satisfactory progress toward a degree or certificate. Students are considered to be achieving satisfactory academic progress if they complete 66 percent or more of the total number of credits attempted and meet the following minimum cumulative grade point average:

<table>
<thead>
<tr>
<th>Credits Attempted</th>
<th>Cumulative Grade Point Average</th>
</tr>
</thead>
<tbody>
<tr>
<td>Fewer than 12</td>
<td>no minimum</td>
</tr>
<tr>
<td>12-30</td>
<td>1.79</td>
</tr>
<tr>
<td>More than 30</td>
<td>2.00</td>
</tr>
</tbody>
</table>

Unofficial Withdrawals
Per federal regulations, students who stop attending all of their classes without formally withdrawing from the College will be identified and may lose a percentage of or their entire financial aid award for that semester. If a student fails all of his or her attempted credits for a semester, the federal regulations require that the College assume the student stopped attending the College. If the Financial Aid Office cannot obtain proof that the student completed at least 60 percent of the semester, the Financial Aid Office will then prorate and recalculate the student’s financial aid award, which may result in the student owing a balance to the College. For more details, see the Financial Aid Refund Policy on page 32.

Workstudy Program
Bunker Hill Community College participates in the Federal College Work-Study Program. Eligible students may receive funds from this program as a result of the financial aid application process. Federal program regulations require that a percentage of these funds be earmarked to community service-related work. Check with the Financial Aid Office, B213 for a listing of available Work-Study positions.

Withdrawal/Graduation
Students who receive loan funds while enrolled at Bunker Hill Community College must complete an exit loan interview session before leaving the College. The Financial Aid Office notifies graduating students prior to their anticipated graduation date. This notice provides information regarding loan repayment. Students can make individual arrangements for a personal exit interview by contacting the Financial Aid Office, Room B213.

Financial Support Services

Scholarships and Awards

Students applying for the following scholarships/awards must be enrolled in an associate degree program at BHCC at the time of application; be full- or part-time unless otherwise noted in the scholarship eligibility criteria; attend BHCC during the semesters they are receiving the scholarship; have no In-Progress (IP) grades at the time of the scholarship application deadline; and have earned the minimum number of credits or cumulative GPA as specified for each scholarship. When scholarship eligibility criteria require a minimum number of credits or grade point average earned, only college-level courses (numbered 100 or above) taken at Bunker Hill Community College and applicable toward a degree or certificate program will be considered unless otherwise noted in the scholarship eligibility requirements. For scholarship deadlines and application forms, please visit the scholarship website at www.bhcc.edu/scholarships. Applications are also available in the Financial Aid Office, Room B213; the Student Activities Office, Room D106; or on the Chelsea Campus at the Front Desk, Main Lobby.

Academic Excellence Award for Continuing Students

Maximum of five awards for spring and a maximum of five awards for fall.

Eligibility Criteria: Awarded to continuing BHCC students who have earned at least 15 credits at BHCC; applicant must have achieved a cumulative GPA of 3.75 or higher and will be enrolled full-time (12 or more credits) for the semester for which the award is granted.

Amount: In-state tuition and fees (for 12 credits) for one semester.

Application Deadline: Please visit the scholarship website at www.bhcc.edu/scholarships

Bethoney Family New Beginnings Scholarship

Eligibility Criteria: Awarded to a continuing student who 1) is enrolled in a degree or certificate program; 2) has completed at least nine credits in college-level courses at BHCC with a cumulative GPA of 3.50 or higher; 3) has a high motivation to succeed; 4) has a financial need but is not eligible for federal financial aid. Preference will be given to students with an immigrant experience but other students who meet the eligibility requirements may apply. An essay is required.

Amount: $500 for the fall semester; renewable for the spring semester if the student maintains eligibility requirements.

Application Deadline: Please visit the scholarship website at www.bhcc.edu/scholarships

Deputy Warden John A. Blaney Memorial Scholarship

Eligibility Criteria: Continuing BHCC second semester Criminal Justice student who has achieved a cumulative GPA of 3.50 or higher and intends to complete the A.S. degree in Criminal Justice.

Amount: $500 for the fall or spring semester.

Application Deadline: Please visit the scholarship website at www.bhcc.edu/scholarships

Brandy R. Bonney Memorial Scholarship

Eligibility Criteria: One graduating senior from Somerville High School nominated by the high school principal/headmaster (or designee) is eligible for this scholarship with the following criteria: 1) accepted into a BHCC degree or certificate program; 2) agree to work closely with a BHCC mentor during the scholarship award period; 3) cumulative high school GPA of 3.00; 4) active member of the high school and community; and 5) current or former tenant of the Somerville Housing Authority.

Amount: In-state tuition and fees (up to 12 credits) for the fall semester; renewable for the spring semester if eligibility requirements maintained.

A nomination form and letter will be sent to the principal during the first week of April.

Boston Sand & Gravel Company Scholarship

Eligibility Criteria: Awarded to two full-time, continuing BHCC students with a cumulative GPA of 3.00 or higher who exemplify the institutional values of the College (see page 10), demonstrate dedication to their field of study, and intend to complete either an A.S. or A.A. degree at BHCC.
Scholarships and Awards

**BHCC/Charlestown Housing Development Award**

**Eligibility Criteria:** New or continuing, full- or part-time, BHCC student who is a resident of the Boston Housing Authority in Charlestown, MA. Continuing students must have a cumulative GPA of 2.00 or higher.

**Amount:** $500 for tuition and fees for the fall semester. The award is renewable for the spring semester if the student maintains eligibility requirements.

**Application Deadline:** Please visit the scholarship website at www.bhcc.edu/scholarships

**BHCC/Charlestown Resident Scholarship**

**Eligibility Criteria:** New or continuing, full- or part-time BHCC student who is a resident of Charlestown, MA, and who is an active member of and has demonstrated outstanding service to the Charlestown community; continuing students must have a cumulative GPA of 2.00 or higher.

**Amount:** In-state tuition and fees (6-12 credits) for the fall semester; renewable for the spring semester if the student maintains eligibility requirements.

**Application Deadline:** Please visit the scholarship website at www.bhcc.edu/scholarships

**BHCC/Chelsea Families United in Educational Leadership (FUEL) Scholarship**

**Eligibility Criteria:** Up to seven new or continuing students, full- or part-time, who are or have been participants in the Chelsea FUEL Program and meet the following criteria: 1) a cumulative high school GPA of 2.50 or higher; 2) agree to work with a BHCC mentor during the period of the award.

**Amount:** In-state tuition and fees (6 or more credits) for the fall semester; renewable for the spring semester if the student maintains a 2.50 GPA.

**Application Deadline:** Please visit the scholarship website at www.bhcc.edu/scholarships

**BHCC/Chelsea Resident Scholarship**

**Eligibility Criteria:** Continuing BHCC student full- or part-time, who is a resident of Chelsea, MA, and has completed at least 15 credits at BHCC with a cumulative GPA of 2.00 or higher.

**Amount:** The scholarship is for in-state tuition and fees (up to 12 credits) for the fall semester. The scholarship is renewable for the spring semester if the student maintains eligibility requirements.

**Application Deadline:** Please visit the scholarship website at www.bhcc.edu/scholarships

**BHCC Commonwealth Honors Program Scholarship for Continuing Students**

**Eligibility Criteria:** Continuing Commonwealth Honors Program student enrolled in the Commonwealth Honors Program within the current year. Student must demonstrate academic excellence and evidence of completion of Honors Program Contracts. Applicants, in a 500-word essay, must address the following topic: Select one of the Honors Contracts you have completed and discuss briefly how you would extend or further investigate the topic. Applications will be reviewed by members of the BHCC Commonwealth Honors Program Committee, using the applicant’s contributions to the Honors Program as part of their selection criteria.

**Amount:** $500

**Application Available:** Contact the Faculty Advisors of the Commonwealth Honors Program.

**Application Deadline:** Please visit the scholarship website at www.bhcc.edu/scholarships

**BHCC Commonwealth Honors Program Scholarship for Graduating Students**

**Eligibility Criteria:** Graduating Commonwealth Honors Program student who has completed the Commonwealth Honors Program and has been accepted by and plans to attend a four-year institution. Students must demonstrate academic excellence and evidence of completion of all Commonwealth Honors Program requirements (four Honors Contracts and the Honors Seminar). Applicants, in a 500-word essay, must address either of the following topics: 1) If you were to continue in an honors program in the next academic year at another institution, describe an honors exploration/project with which you would like to become involved; or 2) If you were to recruit a student for the Commonwealth Honors Program, explain how that student would benefit from the program and include how you have benefited from the Commonwealth Honors Program. Applications will be reviewed by members of the BHCC Commonwealth Honors Program Committee, using the applicant’s contributions to the Honors Program as criteria for their selection.

**Amount:** $500

**Application Available:** Contact the Faculty Advisors of the Commonwealth Honors Program.
Scholarships and Awards

Application Deadline: Please visit the scholarship website at www.bhcc.edu/scholarships

**BHCC Foundation Grant**

**Eligibility Criteria:** The grant is awarded to one new or continuing BHCC student nominated by City Year. Recipients must have a minimum cumulative GPA of 2.00 or higher (or equivalent) and be enrolled in a degree or certificate program at BHCC.

**Amount:** In-state tuition and fees (up to 12 credits) for the fall semester; renewable for the spring semester if the student maintains eligibility requirements; renewable for the following year if nominated again by City Year and other requirements met.

**Nomination Deadline:** Please visit the scholarship website at www.bhcc.edu/scholarships

**BHCC Memorial Scholarship**

**Eligibility Criteria:** Continuing BHCC student who is enrolled part-time (6-11 credits) in the current semester and has completed at least 15 credits at BHCC with a cumulative GPA of 2.00 or higher, and who plans to be enrolled part-time (6-11 credits) for the following semester.

**Amount:** In-state tuition and fees (up to 11 credits) for the fall semester; renewable for the spring semester if the student maintains eligibility requirements.

**Application Deadline:** Please visit the scholarship website at www.bhcc.edu/scholarships

**BHCC Student Government Association Leaders of Tomorrow Award**

**Eligibility Criteria:** All applicants must be enrolled in six or more credits for the spring semester; must have a cumulative GPA of 2.30 or higher; current SGA members are not eligible to apply.

**Amount:** $500 scholarship will be awarded to two returning students for fall and a $1,000 scholarship will be awarded to one June graduating student, who will be transferring to a four-year institution in the fall.

**Application Deadline:** Please visit the scholarship website at www.bhcc.edu/scholarships

**English as a Second Language Award for Continuing Students**

**Eligibility Criteria:** Awarded to one or more continuing BHCC English as a Second Language students who 1) are currently enrolled in ESL at BHCC; 2) have completed at least six credits of ESL at BHCC with a cumulative GPA of 3.00 or higher; and 3) demonstrate financial need.

**Amount:** In-state tuition and fees (up to six credits) for the fall semester; the scholarship is renewable for the spring semester if the student maintains eligibility requirements.

**Application Deadline:** Please visit the scholarship website at www.bhcc.edu/scholarships

**The Gateway Scholarship**

**Eligibility Criteria:** Awarded to two students who have been convicted of a criminal offense and served a sentence in a correctional institution but have been out of prison for at least one year. Student must demonstrate financial need and the ability to earn at least a C+ grade in college-level courses. The scholarship is intended primarily for Hispanic/Latino or Black/African American men who have been formerly incarcerated, but other ex-offenders, including women, may also apply and will be considered. Convicted Level 2 or Level 3 sex offenders will not be considered. An essay, three letters of recommendation, and an interview are required.

**Amount:** $1,250 for the fall semester; renewable for the spring semester if student maintains a 2.50 GPA and meets other eligibility requirements.

**Application Deadline:** Please visit the scholarship website at www.bhcc.edu/scholarships

**Ingalls Family Scholarship for Year Up Graduates**

**Eligibility Criteria:** Awarded to a new or continuing BHCC student who is a graduate of and has an endorsement from the Year Up program in the Greater Boston area.

**Amount:** $500 for the fall semester for in-state tuition and fees or other academic-related expenses; renewable for the spring semester provided recipient earns a cumulative 3.00 GPA.

**Application Deadline:** Please visit the scholarship website at www.bhcc.edu/scholarships

**Edward L. Kerr, Jr. Memorial Scholarship**

**Eligibility Criteria:** Continuing BHCC student who has earned at least 15 credits at BHCC and has a cumulative GPA of 3.25 or higher.

**Amount:** $250 for the fall semester; renewable for the spring semester if student maintains eligibility requirements.

**Application Deadline:** Please visit the scholarship website at www.bhcc.edu/scholarships

**Amount:** 80 percent of total program costs.

**Application Available:** International Center, Room E236.

**Application Deadline:** Please visit the scholarship website at www.bhcc.edu/scholarships
Jeffrey Thompson Memorial Scholarship

Eligibility Criteria: Awarded to one new or continuing full- or part-time student, who has documented a permanent disability with the BHCC Office for Students with Disabilities, and been accepted into a BHCC degree or certificate program. Student must have financial need, as demonstrated by FAFSA. Preference will be given to students with permanent physical disabilities but other students with permanent disabilities will also be considered.

Amount: In-state tuition and fees for up to nine credits, including developmental credits, for the fall semester; renewable for subsequent semesters if eligibility requirements and a cumulative GPA of 3.00 are maintained. A onetime additional amount of up to $1,000 can be used for assistive technology, laptop or books.

Application Deadline: Please visit the scholarship website at www.bhcc.edu/scholarships

Trustees’ Service Award

Eligibility Criteria: Continuing BHCC student who has demonstrated academic achievement and outstanding community service while attending Bunker Hill Community College. Community service includes civic responsibility/civic engagement or volunteer service. Applicants must have completed at least 30 credits at BHCC (includes all credits earned at BHCC and current spring credits) and earned a cumulative GPA of 2.50 or higher. Applicants, in an essay of no more than 300 words, must indicate specifically how they have contributed to the institutional values of the BHCC community (see page 10) and/or communities in which they are involved. Each applicant must submit three letters of recommendation (two of which must be from BHCC faculty) that address the applicant’s leadership qualities as they relate to community service.

Amount: The award is for in-state tuition and fees for up to 12 credits for the fall semester and is renewable for the spring semester if the student maintains eligibility requirements.

Application Available: Office of the Dean of Students, Room B309.

Application Deadline: Please visit the scholarship website at www.bhcc.edu/scholarships

James R. Ware Stop & Shop Scholarship

Eligibility Criteria: Awarded to one or two continuing Business Administration students who have earned at least 30 credits at BHCC with a cumulative GPA of 2.00 or higher.

Amount: $250 for the fall semester. Scholarship is renewable for the spring semester if the student maintains eligibility requirements.

Application Deadline: Please visit the scholarship website at www.bhcc.edu/scholarships
Alternative Learning

Single Stop

Single Stop is an initiative at Bunker Hill Community College, connecting students to state and federal financial resources and local community services. The aim is to help students surmount economic barriers, continue with their education, and move towards economic mobility with the ultimate goal toward ending cycles of poverty. Single Stop provides benefits screening for the Supplemental Nutrition Assistance Program (SNAP), offers consultation for those with housing issues, aids with health insurance applications and is able to advocate on behalf of students with the Department of Transitional Assistance. In conjunction with the nationally successful VITA program, free assistance in completing and filing Federal and State Income Taxes is available from February through mid-April. Single Stop has partnered with the Greater Boston Food Bank in sponsoring monthly Mobile Markets for the campus community. Additionally, Single Stop provides free financial counseling (and workshops) with financial advisors on a one-to-one basis. For more information, visit the Single Stop office in Room D206, or call 617-228-3330, bhcc.edu/singlestop.

The Mary L. Fifield Endowed Student Emergency Assistance Fund

Bunker Hill Community College has established the Mary L. Fifield Endowed Student Emergency Assistance Fund. The purpose of the fund is to provide monetary relief to students for emergencies that occur during the semester and that may cause a student to drop out. Applications will be accepted after the end of the schedule adjustment period for the fall and spring semesters. The fund does not support tuition, fees and books.

Alternative Learning

Bunker Hill Community College provides a variety of alternative learning options for students who are self-directed learners. These options address individual learning styles or provide flexible options for those constrained by time and/or distance. Online, weekend, individualized courses through the Center for Self-Directed Learning, and independent studies through the Contract Learning Program provide these types of non-traditional learning opportunities.

Adult Basic Education and Transitions to College Programs

The Adult Basic Education, Health Careers Pathways, and Transitions to College programs are Massachusetts Department of Elementary and Secondary Education (MADESE) grant-funded programs that offer classes at no cost for adults to develop English language proficiency, content skills to acquire a high school credential, and to be successful in college credit classes. The Adult Basic Education (ABE) program at the Chelsea campus provides educational and support services for adults who lack English language and literacy skills and/or do not have a high school diploma. This comprehensive program provides free educational services that include courses in Basic English for Speakers of Other Languages (ESOL), and HiSet preparation in Spanish and English The ABE and Health Career Pathways courses are offered at the Chelsea campus or at program partner sites in the community. The ABE program collaborates with the following partners in the Chelsea community: Centro Latino, Inc. and LARE Institute/American Training The Transitions to College classes are offered at the Charlestown The ABE, Health Career Pathways and Transitions to College programs offer a variety of support services to assist students in achieving academic success For more information, call the Adult Education and Transitions to College Programs office at 617-228-2108.

Boston Welcome Back Center for Internationally Educated Nurses

The Boston Welcome Back Center assists unemployed and underemployed nurses who earned their credentials outside the United States to obtain state licensure and re-enter the nursing workforce. The Center incorporates educational case management services, educational guidance and counseling and group activities to address the educational and vocational needs of internationally-educated nurses who want to work in Massachusetts.

The Welcome Back Center’s main office is located at Bunker Hill Community College’s Charlestown campus with a branch offices located at Roxbury Community College. The Welcome Back Center addresses several pressing and systemic needs in healthcare delivery in the Greater Boston region: Creating new pipelines into the nursing field to relieve regional workforce shortages.

- Enhancing the racial, ethnic and linguistic diversity of the area’s nursing workforce.
- Building cultural competencies in the nursing workforce and college environment.

The Welcome Back Center offers a range of specially-designed, customized and accelerated educational interventions that address participants’ English proficiency needs and nursing/educational skill gaps in order to expedite re-entry into the nursing profession.

For more information, visit the Welcome Back Center in Room B206, email welcomeback@bhcc.mass.edu or call 617-228-ICAN (4226).

Center for Self-Directed Learning (CSDL)

Students may enroll in college credit courses available through the Center for Self-Directed Learning (CSDL). Students have the flexibility to make their own schedules, and complete assignments and tests according to their unique learning needs. The CSDL provides multi-media resources for individualized, independent instruction under the supervision of professional learning specialists and professional tutors.
Alternative Learning

Students are always active participants in the learning process, solving problems, answering questions and developing skills. In order to ensure that effective learning takes place, student progress is evaluated on a continuous basis. Courses can extend over the entire semester, or be completed in a few weeks, depending on the student’s needs.

Course facilitators and tutors are available to guide and assist students at all times during scheduled hours of operation. During the fall and spring semesters, the CSDL is open seven days a week, with evening hours Monday through Thursday. During the summer semester, the CSDL is open Monday through Thursday including evenings. For schedule information, see the posted schedule or ask a staff member for help. Refer to the current course schedule booklet or the College website at bhcc.edu for a detailed listing of course offerings. For more information, please e-mail CSDL@bhcc.mass.edu, call 617-228-2225, or visit H-Building, Room H165.

Contract Learning
Contract Learning provides students with the opportunity to fulfill degree/certificate requirements or pursue special academic or career interests while learning the techniques and procedures necessary to negotiate, design, and carry out independent projects. Each learning contract is negotiated between the student and a member of the faculty, with approval of the appropriate Academic Dean. For more information see the Academic Dean for the subject area of the appropriate proposed contract.

Prior Learning Assessment (PLA)
The Prior Learning Assessment program (PLA) provides a process for evaluation and, when appropriate, awards academic credits for learning acquired outside the traditional college environment. In order to receive PLA credits, students must provide evidence that their prior learning is equivalent to college-level learning and it must correspond to the courses offered at BHCC. The PLA Coordinator assists students in preparing portfolios and documenting credits. Specialists in each topic review completed portfolios. Students may apply a maximum of 45 PLA credits toward an associate degree at BHCC. For more information, please email pla@bhcc.mass.edu, call 617-228-2350, or visit the Prior Learning Assessment Office, H-Building, Room H165.

Credit by Departmental Examination. The PLA offers credit by departmental examination. Through these examinations, students can demonstrate current proficiency in selected courses listed in the Bunker Hill Community College Catalog. Departmental examinations are graded on a pass/fail basis. For more information about the specific courses and examination, please contact the Prior Learning Assessment Office.

College-Level Examination Program. In addition to the departmental examinations through the PLA program, students may test in the areas of English, foreign languages, social science, history, business, mathematics and science through the College Level Examination Program (CLEP). The examinations cover the material mastered during the first year of a college general education program. For a list of accepted CLEP exams, please contact the Prior Learning Assessment Office.

Military Evaluation. Bunker Hill Community College acknowledges service members’ unique learning experiences acquired during military service. In congruence with the BHCC mission, our college recognizes the Valor Academic Credit Evaluation Policy for service members and student veterans that qualify them to receive academic credit for their military educational experiences and courses As a member of SOC (Service Members Opportunity Colleges), Bunker Hill Community College utilizes ACE (American Council on Education) guidelines, CLEP, Dantes, and/or thorough use of portfolio evaluation to assess military training and experience. Military course work, training, and experience shall be evaluated and awarded credit on a course-by-course basis. For more information, please contact the Prior Learning Assessment Office.

Distance Education
Bunker Hill Community College offers several alternatives to classroom instruction that allow students to complete all or part of their course work online (or in other words, “at a distance”). These alternative modes of instruction include full asynchronous online courses, as well as hybrid courses that are part online and part in class.

Web Courses through BHCConline
Bunker Hill Community College offers online courses as a convenient alternative to the traditional classroom. These web courses, designated as “WB,” are designed for self-directed, motivated learners. The courses are equivalent in content and academic rigor to traditional classroom courses, but offer students the flexibility and convenience of learning virtually anytime and anywhere.
Distance Education

Hybrid courses, designated as “HB,” are also available through BHCCOnline. These courses include both traditional classroom and online components. Students in hybrid courses generally meet onsite for 50 percent of the instructional time. The other 50 percent of instruction is conducted online.

To succeed in Web or Hybrid courses, students must have a computer with broadband Internet access (e.g. DSL, Cable or FiOS). A multi-media laptop or desktop computer (PC or Mac) with at least a 1.5GHz processor, 4GB of RAM, microphone and camera, is recommended. Mozilla Firefox or Chrome are the preferred browsers for PC users; a recent version of Safari (or Firefox for Mac) for Mac users. Internet Explorer may also be used. A recent version of Microsoft Office (2007 or higher, with Word, PowerPoint and Excel) is required for completing assignments.

It is expected that students possess basic computer skills such as navigating the Internet, sending and receiving email with attachments, and word processing.

Students are expected to have solid reading and writing skills with the ability to follow directions. Successful online students are highly motivated, independent learners with excellent time management skills. Online students are required to maintain a consistent pace in submitting coursework and participating in online activities. It is expected that students enrolled in online and hybrid courses spend between 6 to 10 hours each week participating and completing coursework. Proctored exams at the Charlestown H-Building (H-134) may be required for some online courses.

Students must begin their online coursework on the first day of the semester, and are expected to complete their course in a semester’s time frame. Students have access to Moodle, the College’s Learning Management System – and can preview their courses seven days prior to the start of the semester. To access their course(s), students use their WebAdvisor username and password to log into the BHCC Portal. Additional information regarding web course offerings can be found either in WebAdvisor or at the BHCCOnline website at bhcc.edu/bhcconline. Questions regarding access, technical requirements and related information may be emailed to helpdesk@bhcc.mass.edu. Students may also call 617-228-3441 for more information.

Web Course Orientation

Students who are new to online courses are strongly urged to participate in one or more of the following Orientation options to learn about using Moodle. Although participation is not mandatory, taking part in one of these Orientation options will help you get a better grasp of the guidelines and expectations for successfully completing web courses at Bunker Hill Community College:

1. Participate in either of the "live" virtual computer based orientations from home or work-Refer to the BHCCOnline section of the current course schedule or visit bhcc.edu/bhcconline for more information about dates and times. Note: a microphone is required to speak, although questions can be asked through the session’s Chat feature. Webcam is optional, but encouraged.
2. Listen to the two-part pre-recorded orientation any time by visiting the BHCCOnline site and clicking on the video links.
3. Join the Online Student Orientation course (highly recommended for students who are new to online learning), which begins one week prior to the start of each semester, and runs until the day before the start of the semester (about 6 days for this orientation course).

For information about orientations and general information about BHCCOnline, email onlinehelp@bhcc.mass.edu, call 617-228-2466, visit the BHCCOnline office at the H Building at Room H134, or go to bhcc.edu/bhcconline.

For access to online Library resources, go to bhcc.edu/library/. Certain databases, however, can be accessed only with a library ID number. For more information, contact a member of the library staff.
Academic Policies and Procedures

Absence Due to Religious Beliefs

1985 Regular Session

STUDENTS ABSENCE DUE TO RELIGIOUS BELIEFS
Chapter 375

AN ACT EXCLUDING THE ABSENCE OF STUDENTS FOR THEIR RELIGIOUS BELIEFS.

Be it enacted by the Senate and House of Representatives in General Court assembled, and by the authority of the same, as follows:

Chapter 151C of the General Laws is hereby amended by inserting after section 2A the following section:

Section 2B. Any student in an educational or vocational training institution, other than a religious or denominational educational or vocational training institution, who is unable, because of his religious beliefs, to attend classes or to participate in any examination, study, or work requirement on a particular day shall be excused from any such examination or study or work requirement, and shall be provided with an opportunity to make up such examination, study, or work requirement which he may have missed because of such absence on any particular day; provided, however, that such makeup examination or work shall not create an unreasonable burden upon such school. No fees of any kind shall be charged by the institution for making available to the said student such opportunity. No adverse or prejudicial effects shall result to any student because of his availing himself of the provisions of this section.

A copy of this section shall be published by each institution of higher education in the catalog of such institution containing the list of available courses.

Approved October 8, 1985.

Appeals Process for Probation and Suspension

Students placed on academic probation or suspension from the College for unsatisfactory academic progress have the right to appeal. For students on academic probation, the College grants appeals based on computational error. For students who are suspended, the College grants appeals through an Academic Appeals Committee. The decision of this committee is final. Academic reinstatement does not automatically re-establish eligibility for Financial Aid. Students should follow the Financial Aid appeals process separately from the academic appeals process. See page 31 for information on the Financial Aid appeals process.

Attendance

Because poor attendance generally results in poor grades, students must attend all regularly-scheduled classes and laboratory sessions. Students having attendance difficulties should discuss this matter with their course instructors and advisors.

Students who know they will be absent for three or more consecutive class sessions because of a family emergency or personal illness should report the extended absence to the Office of the Dean of Students. The Associate Vice President will notify the course instructors of the absence. Upon returning to class, students are responsible for discussing completion of all course requirements with their course instructors. If the course instructor and student find it impossible to complete all assigned work, the student may need to withdraw from the course.

Students who do not attend classes during the first four weeks of the semester will be withdrawn from the course and receive an NA (non-attendance) grade. The grade appears on the transcript and is counted toward credits attempted but is not computed in the grade point average. The NA grade designation is not used during the summer semester.

Auditing a Course

Students desiring to audit a course must obtain permission from the Registrar or designee. Audit students must pay full tuition and fees. The audit request must be made at the time of registration, and once approved may not be changed to a graded course. An audit course may not be transferred or used toward graduation requirements.

Change of Grades

Students must direct questions regarding grades to the course instructor. The instructor will change final grades only if a clerical error exists. Students must submit a written request to the instructor for re-evaluation if they feel that an error exists. The final decision regarding grades rests with the instructor. Students may initiate grade complaints no later than 30 calendar days following the last day of the instructional period for which the grade was granted. Refer to the Bunker Hill Community College Student Handbook for more information.

Clinical Experience Responsibilities

Students enrolled in programs that require clinical experience must adhere to all stated objectives and course competencies including those required for the clinical experience. Students are responsible for their own transportation to and from the clinical sites. Students are accountable for their behavior and demeanor during all clinical experiences and must conduct themselves in a manner that is in keeping with the College Code of Conduct, all professional conduct and regulations outlined by the regulating body, all conduct and behavioral expectations set forth by the clinical site, and additional specific requirements as are outlined in the program specific student handbook.

Due to the competitive nature of placing students in clinical sites, students may have to travel long distances. It is important to note that some of the clinical sites are located in suburban or rural areas and are not accessible by public transportation. Therefore, students should consider this increase in time and cost in planning their transportation and finances for programs requiring clinical experiences.

The College reserves the right to suspend and/or remove students from the clinical experience whose behavior is
Academic Policies and Procedures

considered inappropriate. Removal may adversely affect prospects for completing the requirements of these programs. Students so removed may appeal in writing to the Office of Nurse Education, Medical Imaging and Respiratory Therapy. Students participating in clinical experiences should refer to the Criminal Offender Record Information (CORI) and the Sex Offender Registry Information (SORI) requirements listed in the College Catalog.

Code of Behavior
Bunker Hill Community College expects students to behave in a manner appropriate to a college environment. College policy prohibits specific behaviors on campus property as described here and in the Student Handbook. These actions include disruptive behavior; violence or the written threat of violence; the possession or use of controlled substances or alcohol on college property; possession or use of weapons, ammunition or fireworks on college property; gambling on college property; unauthorized mass action; hazing; removal or mutilation of library books; plagiarism; cheating; sexual, racial or ideological harassment and damage to college property.

If it is proven that a student in any course in which he or she is enrolled has knowingly cheated or plagiarized, this may result in a failing grade for an exam or assignment, withdrawal from the course or a failing grade in the course. The student would also be subject to disciplinary proceedings as outlined in the Student Handbook for violation of the Student Code of Conduct.

Complaints against students should be referred to the Dean of Academic Affairs and Student Services's decision is final and binding. Complaints by students against other members of the college community may be resolved through the Student Grievance Procedure. Refer to the Bunker Hill Community College Student Handbook for more information.

Course Load
Students who carry 12 or more credit hours in a fall or spring semester or 6 credit hours in a summer or mini session are fulltime students. Students must enroll in a minimum of 15 credit hours per semester in order to complete an associate degree program in two years. Students who wish to carry more than 18 credits during a fall or spring semester or 9 credits during a summer or mini session must obtain written permission from the Registrar or designee.

Course Prerequisites
Some courses require that students meet certain conditions prior to registering. These conditions are known as prerequisites. Prerequisites include completion of lower-level courses with a passing grade, completion of computerized placement tests (CPTs) or formal admission to a specific program of study. In order to count a course from another college or university as a prerequisite at BHCC, students must bring evidence of completion of that course at the time of registration.

Dean’s and Merit Lists
Students with a grade point average of at least 3.00 are named to the Dean’s List, provided that no grade lower than C was earned in any course that semester. Grades lower than C include D, F, NA, W, WA, and IP. For Dean’s List computation, P is not considered a letter grade. Only courses numbered 100 or higher are considered in determining eligibility for the Dean’s List.

Students who are enrolled in at least 6 but less than 12 credits in a given semester, but otherwise have met the same performance level as those on the Dean’s List, are named to the Merit List. The Merit List has the same performance requirements as the Deans’ list. Students must have a GPA of at least 3.00 and no grade lower than a C, and only courses numbered 100 or above are considered.

Dropping or Adding a Course
Students may adjust their schedules either during the registration period or during the schedule adjustment period. After the schedule adjustment period, students may add only those courses offered through the Center for Self-Directed Learning. Refer to the College’s course schedule for published deadlines.

Final Examination Schedule
Final examinations take place during the last week of the semester. Final examination makeup time is scheduled for the last day of final exam week. Students who are scheduled for two final examinations at the same time or who have more than two exams scheduled in one day may request that they be allowed to take one of those exams during the final examination makeup time. Students who miss final examinations must notify the appropriate Academic Dean of their program area immediately, stating the reason. The individual faculty member makes the decision regarding makeup of final exams.

Hazing
The Massachusetts Legislature enacted a law in 1985 that prohibits hazing on all college campuses. Students may obtain copies of the law (MGLc269s17-19) from the Student Activities Office, Room D106.
Grading and Notation System

Grading and Notation System (effective Jan., 1990)

Grades and Notations Definitions of Grades and Notations  Quality points Per Credit Hour

<table>
<thead>
<tr>
<th>Grade</th>
<th>Definition</th>
<th>Quality Points</th>
</tr>
</thead>
<tbody>
<tr>
<td>A</td>
<td>Equivalent to a numerical grade of 94 - 100</td>
<td>4.00</td>
</tr>
<tr>
<td>A-</td>
<td>Equivalent to a numerical grade of 90 - 93</td>
<td>3.70</td>
</tr>
<tr>
<td>B+</td>
<td>Equivalent to a numerical grade of 87 - 89</td>
<td>3.30</td>
</tr>
<tr>
<td>B</td>
<td>Equivalent to a numerical grade of 83 - 86</td>
<td>3.00</td>
</tr>
<tr>
<td>B-</td>
<td>Equivalent to a numerical grade of 80 - 82</td>
<td>2.70</td>
</tr>
<tr>
<td>C+</td>
<td>Equivalent to a numerical grade of 77 - 79</td>
<td>2.30</td>
</tr>
<tr>
<td>C</td>
<td>Equivalent to a numerical grade of 70 - 76</td>
<td>2.00</td>
</tr>
<tr>
<td>D</td>
<td>Equivalent to a numerical grade of 60 - 69</td>
<td>1.00</td>
</tr>
<tr>
<td>F</td>
<td>Equivalent to a numerical grade of 0 - 59</td>
<td>none</td>
</tr>
<tr>
<td>P</td>
<td>Indicates satisfactory completion of coursework where no letter grade is given, or award of credits for a course by special examination. It is equivalent to a grade of C or higher and carries no quality points. Credit hours will be given equivalent to the number of credit hours normally assigned to the course</td>
<td>none</td>
</tr>
<tr>
<td>IP</td>
<td>Required work in the course is in progress. The method and time for completion of work must be agreed upon in writing by student and instructor; no credit is earned until the course is completed. IPs not completed by the end of the following semester are automatically changed to a grade of F</td>
<td>none</td>
</tr>
<tr>
<td>NA</td>
<td>Students who register for a specific course and who have not attended class meetings during the first four weeks of the semester will be withdrawn from the course and receive the grade designation NA (non-attendance) which will appear on the transcript and be counted toward credits attempted but not computed in the grade point average. The NA grade designation is not used during the summer semester</td>
<td>none</td>
</tr>
<tr>
<td>W</td>
<td>Official withdrawal from a course; no credit earned</td>
<td>none</td>
</tr>
<tr>
<td>WA</td>
<td>Administrative withdrawal from a course; no credit earned</td>
<td>none</td>
</tr>
</tbody>
</table>

The total quality points for a course is computed by multiplying the grade quality point by the number of credits for the course; for example, an A in College Writing (3 credits) produces 12.0 quality points.

Midterm Warning Grades: Faculty may issue midterm warning grades during week 7 - 8 of the semester to students who may be in jeopardy of not successfully completing their course. Grades of D or F may be issued to students whose course work is below requirements to earn a grade of C or better in the course. A grade of FX is issued to students who may be in jeopardy of failing the course due to attendance concerns. Midterm warning grades are found in the Grades section under the Academic Profile menu of WebAdvisor on the Portal. Students should speak with their professor immediately to develop a plan to get back on track. A variety of support services are also available to students; please stop by the LifeMap Commons in room E235 for a referral.

Computation of GPA: The Cumulative Grade Point Average (CGPA) is computed by dividing the total number of quality points by the total number of credit hours attempted at Bunker Hill Community College. Grades of AU, IP, P, NA, W and WA are not calculated in the semester, cumulative or graduation grade point average. All grades are used in determining satisfactory academic progress, suspension and probation.

Program Changes: Students wishing to change from one program of study to another should consult with their advisors. Students then must complete a change of program form, available at Enrollment Services, Room B203. A program change may increase the time needed for students to complete program requirements for graduation. Students who receive financial aid should consult with the Financial Aid Office regarding the fiscal implications of program changes. Students changing their program must fulfill the curriculum year program requirements in effect at the beginning of the semester following the date of the change.

Repeating a Course: Students may repeat courses in which they earn a grade of D, F, W, WA, or NA. Students can petition the Registrar’s Office to repeat a course when they have obtained a C grade or better but should recognize that they do so at a substantial risk. The process may be used no more than three times for courses with a letter grade of C or better. Repeating a course when the earlier attempt is a C or better is allowed only if the higher course grade is a course prerequisite or program requirement to continue in or enter a specific academic program. The grade in the final attempt automatically becomes the official grade for purposes of calculating grade point average and for determining eligibility for graduation. The grades for each attempt, however, are recorded and always remain on the students transcript. Repeating a course may not be allowed in specific programs with outside accreditation. Example for determining a Cumulative Grade Point Average:

<table>
<thead>
<tr>
<th>Course</th>
<th>Credits Attempted</th>
<th>Grade</th>
<th>Quality Points</th>
<th>Quality Points Earned</th>
</tr>
</thead>
<tbody>
<tr>
<td>ENG112</td>
<td>3</td>
<td>A-</td>
<td>(3.70)</td>
<td>11.10</td>
</tr>
<tr>
<td>MAT196</td>
<td>3</td>
<td>C+</td>
<td>(2.30)</td>
<td>6.90</td>
</tr>
<tr>
<td>BIO102</td>
<td>4</td>
<td>B</td>
<td>(3.00)</td>
<td>12.00</td>
</tr>
<tr>
<td>SPN201</td>
<td>3</td>
<td>F</td>
<td>(0.00)</td>
<td>0.00</td>
</tr>
<tr>
<td>TOTAL</td>
<td>13</td>
<td></td>
<td></td>
<td>30.00</td>
</tr>
</tbody>
</table>

Cumulative Grade Point Average (CGPA): 30÷13 = 2.31

Graduation Grade Point Average is calculated in the same manner but excludes developmental course work (i.e. courses numbered below 100).

Graduation with Honors

Highest Honors: Students who have completed degree requirements with a Cumulative Grade Point Average of 3.90 - 4.00, less developmental credits.

High Honors: Students who have completed degree requirements with a Cumulative Grade Point Average of 3.50 - 3.89, less developmental credits.

Honors: Students who have completed degree requirements with a Cumulative Grade Point Average of 3.30 - 3.49, less developmental credits. The College gives honors awards for the highest grade point average, less developmental credits, in each program.
Satisfactory Academic Progress

In order to continue at Bunker Hill Community College and/or receive financial aid, students must make satisfactory academic progress toward a degree or certificate. The College considers students to be achieving satisfactory academic progress if they complete 66 percent or more of the total number of credits attempted and meet the following minimum cumulative grade point average:

<table>
<thead>
<tr>
<th>CREDITS ATTEMPTED</th>
<th>CUMULATIVE GRADE POINT AVERAGE</th>
</tr>
</thead>
<tbody>
<tr>
<td>Fewer than 12</td>
<td>no minimum</td>
</tr>
<tr>
<td>12-30</td>
<td>1.79</td>
</tr>
<tr>
<td>More than 30</td>
<td>2.00</td>
</tr>
</tbody>
</table>

Academic Probation

The College places those students on academic probation who fail to meet the criterion of satisfactory academic progress. Students placed on academic probation may enroll in no more than 10 credits each semester while on probation. Students who fail to attain both the required cumulative GPA and the percentage of total credits attempted remain on academic probation even though they attain the appropriate semester GPA and complete 66 percent of credits attempted in the probationary semester. Students who remain on academic probation status for three consecutive semesters are placed on academic suspension.

Academic Suspension

The College will suspend students from attending the College if one or more of the following circumstances occur during any probationary semester:

- They have failed to achieve a semester grade point average of 1.79. (You have attempted between 12 and 30 credits to date at BHCC) or

- They have failed to achieve a semester grade point average of 2.00. (You have attempted more than 30 credits to date at BHCC) or

- They have failed to complete more than 66 percent of the total number of credits attempted in this semester. (Please note that grades of F, IP, N, NA, W and WA count as credits attempted).

The College will also suspend students from attending the College who have remained on academic probation for three consecutive semesters (see Academic Probation).

Suspended students must remain on suspension for a minimum of one semester unless the suspension is successfully appealed (see Appeals Process). Following a minimum leave of one semester, the College may consider suspended students for suspension re-admission. To be considered for re-admission, students must provide a typed letter with evidence of increased potential for academic success along with any other supporting documentation. Students must complete an application for re-admission secured through Admissions and Enrollment Services, Room B203.

Career Services and Internships

Career Services

Career Services provides a wide range of career services to all currently enrolled students and alumni and provides a valuable link in the partnership between the College and the business community. Working closely with the academic programs, career staff assist students in the process of deciding on a major, exploring careers, conducting occupational research, mapping out a career plan, building career connections, and launching a job search. The department offers a robust workshop series, individual appointments and resume drop-in hours, multi-media online career resources including the BHCC CareerConnect job posting tool, and resume writing software programs.

Career Services is located in the LifeMap Commons, Room E235 and can be reached at 617-228-2245, or visit bhcc.edu/careercenter.

Career and Life Planning

The Career Services Office helps students with choosing a major or making wise career decisions. Students can identify their interests, skills and values by attending offered workshops or taking assessments, including the Kuder, Strong Interest Survey, and StrengthsFinder, Self-Directed Search or the Myers-Briggs Type Indicator. These tools will help students set
personal and educational goals as they start and continue their college education. Career counselors are available to meet with students individually to guide them through the process of decision-making and career exploration, while helping them gain the skills necessary for success.

**Job Search Activities**

Workshops or individual sessions designed to assist students in all aspects of finding and keeping employment are offered, including resume writing, interviewing skills, marketing yourself, networking, tips for second language job seekers, how to use online and social networking sites for job searches and more. Students and alumni can receive coaching and support while they conduct their job search. Enrolled students and alumni have around-the-clock web access to BHCC’s CareerConnect (bhcc.edu/careerconnect) where they can search and apply for jobs and internships targeted for BHCC students. Students can test their interviewing skills with our InterviewStream video recording platform. Employers are invited to recruit on campus throughout the year.

**Job Fairs**

Job Fairs are held in the Fall and Spring semesters and provide employers a direct opportunity to recruit BHCC students for part-time, seasonal, and full-time employment. Job Fairs attract employers from a wide range of industries and are open to students and alumni across all programs of study at the College.

**Internship Programs**

The Internship Programs office supports students in gaining valuable on-the-job experience related to their academic program of study. The office works closely with faculty, staff and local employers to support organized internship opportunities that help students develop practical skills necessary to be successful in their chosen careers. Field-based practicums or clinicals are not coordinated through this office. Students in the Human Services and Allied Health programs of study should consult their academic program coordinator for more information. Students should be advised that internship program employers may have minimum eligibility standards or require background screening including drug scans or CORI/SORI checks. For more information, visit the LifeMap Commons, Room E235, or the website bhcc.edu/internships.

**Academic Program Internships.** Academic internships combine relevant on-the-job experience with classroom learning in a 3-credit course as part of your program of study. Academic internship courses are offered for several majors in the Division of Professional Studies and the Division of Engineering and Health Sciences, including Computer Forensics, Computer Networking, Computer Support, Criminal Justice, Culinary Arts, Gaming, Graphic Design, Hospitality, Media Communications, Office Information Management, Paralegal Studies, Pharmacy Technician, Sustainability, and Web Development. Academic internships can be an elective course in many degree programs in the Humanities and Sciences. Students must complete specified pre-requisite courses for their major and obtain an approved internship site in order to qualify to register for an internship course. Planning is required one semester ahead of time and requires sign-off from the Faculty Coordinator or Internship Coordinator. For more information and to prepare please visit bhcc.edu/internships, or contact the Internship Coordinator at internships@bhcc.mass.edu or in the LifeMap Commons, Room E235.

**Career Internships.** Students interested in gaining practical experience to test-drive an occupation or become more marketable in their field of study can explore non-credit internship opportunities. There are many benefits to landing an internship before you graduate from BHCC. Students can build upon the skills learned in the classroom, work on challenging assignments, and receive mentoring from a qualified professional. Students can also expand their knowledge of career options, begin to establish their own professional connections, and have relevant experience at the top of their resume. Students can explore current internship postings at bhcc.edu/careerconnect, or contact the Internship Coordinator at internships@bhcc.mass.edu or in the LifeMap Commons, Room E235.

**Learn and Earn.** A program sponsored by the Massachusetts Competitive Partnership (MACP), offers paid work experience at some of the top companies in Massachusetts, including Bank of America, Beth Israel Deaconess Medical Center, BJ’s Wholesale Club, the Boston Foundation, Dovetail Healthcare, Eaton Vance, EMC, Fidelity Investments, Liberty Mutual, Raytheon, Staples, State Street, Suffolk Construction, UBS, and Vertex Pharmaceuticals. Students work 16-30 hours per week at $15/hour, take a 3-credit internship course, and receive mentoring and support for career goals. Many Learn and Earn students receive continued employment offers from their Learn and Earn employers. Qualified Bunker Hill Community College students majoring in Accounting, Biotech, Business Administration, Communications, Computer Technology, Education, Engineering, Event Planning, Paralegal, Visual and Media Arts, and General Concentration may apply to the program. Learn and Earn internships are now offered in two cycles: September 1 to January 30, and February 1 to August 30. Students should note that the recruitment, application, and interviewing cycle takes place a full semester in advance of the internship start date. For eligibility requirements and more information, please visit bhcc.edu/learnandearn or contact the Learn and Earn Coordinator at 617-228-2006 or in the LifeMap Commons, Room E235R.

**STEM Internships.** Science, Technology, Engineering, and Math students who have or will be completing your 1st year of coursework in your major, may be eligible to apply for a competitive, paid summer internship. These opportunities are offered in collaboration with STEM Faculty and the STEM Club. A majority of research internships are offered in the summer, full-time. BHCC has relationships with a number of National Science Foundation (NSF) and National Institute of Health (NIH) funded
programs, or Community College programs at area institutions such as MIT, Harvard, Tufts, Boston University, UMass, and Dana Farber and Wellesley. Opportunities are also available at small, private sector companies in connection with the Massachusetts Life Sciences Center (MLSC) or Massachusetts Clean Energy (MCE) funding, or at local non-profits and museums, and can be fall, spring or summer semesters.

Student planning and preparation for these programs begins early in the Fall semester with application deadlines starting as soon as Nov 1. More information and a listing of opportunities can be found at bhcc.edu/internships.

Student Life and Support

Athletics
Bunker Hill Community College’s Athletic Department has developed a program of varsity, intramural and Health and Wellness program offerings to support all students at the College. BHCC supports student athletes by providing professional coaches and staff, state-of-the-art facilities, safe equipment and opportunities for student athletes to compete in varsity level programs with other intercollegiate athletic institutions. The Athletic Department sponsors varsity level sports programs in Men's and Women's Basketball, Soccer, Men's Baseball and Women's Volleyball. Collegiate League Memberships include NJCAA (National Junior College Athletic Association) Division III and the MCCAC (Massachusetts Community College Athletic Conference) Division III. Intramural activities include 3-point Basketball Shooting Contests, 5v5 Basketball, Co-ed Volleyball and Bench Press Competitions. Health and wellness offerings include free classes such as Cardio Kickboxing, ABS of Steel and Group Circuit Boot Camp. The Athletic Department is located in Room G117. For more information, visit bhcc.edu/athletics.

Student Activities
Bunker Hill Community College offers a variety of co-curricular activities that provide students with opportunities to develop leadership skills and to engage in social interaction. Students can serve as leaders of a wide array of clubs and organizations, and work with College staff to administer the programs. The activities are designed to promote intellectual development and cultural awareness and understanding.

The Student Government Association (SGA) is an elected body of Bunker Hill Community College students that provides the opportunity for students to develop leadership skills. Student Government Association members work in collaboration with the College administration to enhance the quality of student life on campus. Their meetings are open and all students are encouraged to take part in the decision-making process. The College requires any student holding or seeking an elected or appointed position in the SGA to continue to make satisfactory academic progress. The Student Trustee and officers of the Student Government Association are the elected representatives of the student body; elected student officials are expected to be mature individuals who will responsibly fulfill the requirements of their position while maintaining a record of conduct and behavior that demonstrates integrity, civic responsibility, and service to others. The SGA develops a proposed annual budget with the Coordinator of Student Activities. The Associate Vice President of Student Services reviews the budget proposal. The College President approves the final SGA budget, which is funded with income derived from student fees. The Student Government Association formally approves student clubs and organizations. Clubs and organizations provide the opportunity for students to meet other students, have fun, learn, and develop organizational skills. A roster of clubs and organizations are listed below.

Student Handbook
The Student Handbook includes information about College policies, student disciplinary procedures, student rights and responsibilities and student services. The student grievance procedure for complaints regarding College policies, practices, or personnel is detailed in the Student Handbook. Copies are available online through the BHCC website. Direct all inquiries related to College regulations, student conduct and the student grievance procedure to the Office of Dean of Students.

International Center
The International Center provides programs, services and activities designed to advance the internationalization of the College community. Staff at the Center provide comprehensive programs and individual assistance to international students from more than 100 countries who are welcomed to the College every year. The Center, with assistance from the Student Government Association, provides opportunities for students, faculty and staff to participate in international study and travel experiences in a variety of locations such as Argentina, Belize, Costa Rica, the Czech Republic, France, Italy, Spain and China. The Center hosts many international visitors and the Center staff members develop customized training programs for educators and students from around the world. With federal funding, the Center provides support to faculty to develop new international courses and to update their courses to include an international perspective, so that graduates are prepared to practice their professions within a global and multicultural environment.

The International Center is located in Room E236, and can be reached by calling 617-228-2460, by email at international@bhcc.mass.edu or by visiting the website at bhcc.edu/internationalcenter.

International students who wish to attend Bunker Hill Community College apply through the International Center, where they can obtain the necessary documentation to apply for student visas to study in the United States. International Student Advisors in the International Center assist students to maintain legal immigration status, obtain student visas, apply for a change of their tourist visas to student visas, transfer to other colleges, obtain work permission, obtain practical training and arrange travel or temporary absence certification from the United States. The International Student Advisors also serve as counselors to discuss academic concerns and/or personal issues such as adjustment to life in the United States. Orientation, social and cultural programs sponsored by the Center help international students learn more about U.S. culture and the educational system.

Office of Community Engagement
Bunker Hill Community College’s Office of Community Engagement provides multiple pathways for students to engage as active and responsible members of their communities. BHCC students work with community-based organizations as assigned through their courses, contemplate civic and ethical issues with each other on campus, or simply volunteer in their local communities. The College partners with a range of Greater Boston community-based organizations, including after-school programs, community centers, environmental advocacy groups, food pantries, and refugee and immigration centers. These partners serve as host sites for service learning and provide co-curricular opportunities for students. BHCC students are uniquely positioned to impact the community because they live and work in the neighborhoods they serve. In this spirit, the College seeks to develop reciprocal relationships with community partners. The College has adopted the Carnegie Foundation’s broad definition of Community Engagement, which describes Community Engagement as “a collaboration between institutions of higher education and their larger communities (local, regional/state, national, global) for the mutually beneficial exchange of knowledge and resources in a context of partnership and reciprocity.” The College’s Office of Community Engagement supports faculty integration of community engagement projects into the curriculum, coordinates co-curricular volunteer programs, and provides a pathway for local community-based organizations to partner with the College. The Office employs a four-tier designation system that enables faculty to be creative and intentional in
assignment design. The four designations are Action Research, Civic Activism, Service Learning and Volunteerism. Our Civic Activism designation specifies a community engagement project that makes an explicit connection to civic learning. In 2013-2014, 52 faculty members integrated service learning projects into 80 courses involving more than 2,500 students. An additional 600 plus students contributed direct service to Greater Boston through co-curricular activities, including themed “Service Months” that offer one-time volunteer opportunities to wet students’ appetites for service. The bi-annual Get Involved! Volunteer Fair brought 30 nonprofits to campus to raise awareness of how to volunteer in Greater Boston. Overall, BHCC students contributed 36,000 hours of service to the Greater Boston community in 2013-2014. The Office of Community Engagement helps students act on their passions and realize their goals. The Office provides opportunities for students to reflect on their community engagement work and to recognize how service connects with their professional and personal development. For more information, visit the office in Room B211A or call 617-228-3485, or email the Office at engagement@bhcc.mass.edu.

Student Success Program
Students must apply and be selected to participate in the Student Success Program. Its goal is to assist students in their efforts to be successful in their studies, to graduate, and then transfer to a four-year university or college. It provides a comprehensive program of academic and student support services designed to help students achieve their educational goals at Bunker Hill Community College and transfer assistance to their four-year school of choice. Program participants are known for having an average GPA of 3.0 or higher, successful program completion rates, and strong leadership skills. If interested call 617-228-3283 or go to bhcc.edu/studentsuccessprogram for information about the eligibility criteria, specific services offered, and application process. The United States Department of Education, TRIO Student Support Services Grant funds the Student Success Program.

Study Abroad
The International Center assists BHCC students in integrating study abroad experiences into their academic programs. Short term study abroad programs are offered in 17 countries, and students choose the program of greatest interest to them. The International Center provides scholarship opportunities to qualified students. For more information go to the International Center, Room E236, or visit the study abroad website at bhcc.edu/studyabroad.

Veterans Center
Bunker Hill Community College Veterans Center is committed to providing veterans, active duty military, Guard/Reservists, and their eligible dependents with a smooth transition to college and a successful educational experience. The Veterans Center staff provides specialized customer service for student veterans and serves as advocates within the college community as well as our community partners. The Veterans Center Staff would like to thank you for your military service and we are honored to assist you as you pursue your academic goals.

Students who wish to apply for educational benefits must contact the VA Certifying Official in the Veterans Center. Student’s receiving educational benefits are required to attend classes and maintain satisfactory academic progress in order to continue receiving education benefits. Furthermore, students must notify the Veterans Center of any changes made to their enrollment status.

The Veterans Center staff provides services in the following areas:

- Support and advocacy for veteran students.
- Assistance in solving problems related to education.
- Advice regarding VA Educational Benefits.
- Certification to the VA for each semester of enrollment and any change of enrollment.
- Referrals to College resources and other agencies.
- Verification of pursuit of training.
- Assistance with credit for prior learning.

Please come and visit the Veterans Center located in Room B201. You may contact us by phone at 617-228-3213; email at veteranscenter@bhcc.mass.edu or fax at 617-228-3212.
BHCC Learning Communities: An Opportunity to Engage

BHCC Learning Communities provide students with the opportunity to learn in a supportive and engaging environment. Students who participate in BHCC Learning Communities benefit from interdisciplinary learning experiences, teacher-to-student mentoring, peer mentoring, and integrated support services. BHCC Learning Communities promote active and engaged learning through such practices as collaborative and problem-based learning, peer teaching and study groups, and service learning. Learning Community structures enable stronger relationships among students, faculty, and staff as well as encourage students to take responsibility for their learning. Students enrolled in Learning Communities are more likely to persist in their studies and earn more college credits. First-time-to-college students pursuing associate degrees and enrolled in nine or more credits are required to take a Learning Community Seminar or a Learning Community Cluster within their first year. For more information about BHCC Learning Communities, contact the Director at 617-228-2173.

Learning Community Seminar for First Year Students

The Learning Community Seminar for First Year Students (LCS101) is a three-credit course designed to help incoming students make a successful transition to college. The Seminar provides a student-centered, active learning environment that maximizes academic and personal growth. Students develop competencies in 6 areas: reflection and career exploration; goal setting and problem solving; critical thinking and information literacy; communication skills; diversity and team work; and community engagement. Faculty design Seminar topics based on student programs of study and interests. Students may choose a section based on their major or a topic of interest. Each Seminar section is supported by a designated Success Coach, who collaborates with Seminar instructors and assists students with setting short and long-term goals. The Success Coach offers knowledge and skills, such as time management and study skills, provides new perspectives on problem-solving and strategies for success, and connects students with campus support services. The Success Coach is someone with whom students can connect throughout their time at BHCC.

Learning Community Clusters

Learning Community Clusters enable students to take two or more courses together, and learn and study with the same group of students. In Learning Community Clusters, faculty members have planned their courses together around common themes. Sometimes the work in the Learning Community is related to the student’s major. Clusters offer smaller class sizes and hands-on activities such as field study and team projects that make learning fun. Learning Community Clusters prepare students to work effectively in collaborative environments.

BHCC Commonwealth Honors Program

The Commonwealth Honors Program (CHP) is a statewide program that offers students in the Massachusetts’ public colleges and universities an intellectually stimulating educational foundation for becoming independent thinkers and lifelong learners.

The Commonwealth Honors Program provides opportunities for students to excel academically in a rich and challenging environment and develops a community of scholars that is inclusive, building on the strengths of the college community’s diversity.

Admission Requirements

To enter the Honors Program you must first satisfy one of the following criteria:

• Be a current BHCC student with a minimum 3.5 cumulative GPA and at least 12 earned credits;
• Or a high school graduate with a B+ average or higher;
• Or a transfer student from another college with at least 12 earned credits and a 3.5 GPA.

Students also need two letters of recommendation from faculty who know them well, submit an essay of interest regarding why they would like to be in the Commonwealth Honors Program and submit an official or unofficial copy of their most recent transcript.

Applications are available through Admissions and Enrollment Services, Room B203, and at the Commonwealth Honors Center, Room E145.
Evening and Weekend Services

Benefits of Being a Member of the Commonwealth Honors Program

- Use the Commonwealth Honors Center, Room E145 for studying.
- Explore intriguing topics and create your own research project in the Honors Seminar.
- Present your research project by participating in the statewide Undergraduate Conference.
- Work with your professors on individual honors projects and receive Honors designation for those courses.
- Enhance your transfer applications and scholarship opportunities.

Scholarships
The College offers two scholarships of $500 to CHP students. One is awarded to a continuing BHCC Honors Program student, the other to a student who has completed the Honors Program at BHCC and is transferring to a four-year institution to continue his/her education.

Graduation as a Commonwealth Honors Scholar
The requirements for completion of the Commonwealth Honors Program are:
- Earn a minimum 3.5 cumulative GPA at Bunker Hill Community College.
- Satisfactory completion of the Honors Seminar course (HON200).
- Completion of 3 additional Honors options - Honors Courses (see Honors Center for an updated listing of Honors courses).

Transfer Opportunities
Commonwealth Honor scholars are guaranteed transfer to the Commonwealth College at University of Massachusetts at Amherst or an Honors program at any Massachusetts state college or university where you have been accepted. Students in the CHP can also participate in the Commonwealth Transfer Compact, Joint Admissions Program, and the Tuition Advantage Program for transfer to four-year public colleges and universities in Massachusetts. Participation in this program will also enhance applications to private four-year institutions. Members of the Commonwealth Honors Program have transferred to such schools as Tufts University, Wellesley College, Massachusetts Institute of Technology and Brandeis University. For more information on CHP, contact the Commonwealth Honors Program Advisors at CHP@bhcc.mass.edu or stop by the Honors Center, Room E145.

Evening and Weekend Services
In order to address evening students’ needs, the College offers support services Monday through Thursday evenings. Admissions and Enrollment Services, Financial Aid, Student Payment, Advising and Assessment are open Monday through Thursday until 7 p.m. Some offices are also open on weekends. Please see specific offices for their schedules.

A Dean is available on the Charlestown campus Monday through Thursday evenings until 7 p.m. in Admissions and Enrollment Services, Room B203 during the fall and spring semesters and summer sessions. Students may consult the deans to seek information regarding their programs of study, specific courses or for other academic and student services issues.

BHCConline, Academic Computing Center, Audio-Visual Center, Center for Self-Directed Learning, Library and Learning Commons, Language Lab, Math Space and the Tutoring and Academic Support Center are open evenings and weekends on the Charlestown campus including the H-Building during the fall and spring semesters, and Monday through Thursday evenings during summer sessions.

The College schedules evening workshops such as Test-Taking Strategies, Choosing Your Major, Stress Reduction and a College Transfer Evening each semester. In addition, the College offers evening cultural activities for students, including a poetry series and musical entertainment.

Enrollment Management and Admissions are located in the Main Lobby of both campuses and is open evenings, and also on weekends on the Charlestown campus during the fall and spring semesters. Services available include assistance with
admissions, program information, assistance with transcript requests, change of program forms, degree audits, advising and registration.

The Student Payment Office is open Monday through Thursday evenings to assist students with account information and the purchase of parking permits. The Student Payment Office is open on weekends only for scheduled Saturday registrations.

The Bookstore has extended evening hours during the beginning of each semester and is open on Saturdays during the fall and spring semesters. BHCC students can now order their textbooks online at whywaitforbooks.com to have them shipped or for easy pick up with no waiting in line. For store hours and inquiries, visit the bookstore’s website at bhcc.bncollege.com or contact the bookstore at 617-241-5161.

The Café, located in the Main Lobby of the Charlestown campus, is open Monday through Thursday evenings and on weekends during fall and spring semesters.

General Services

Bookstore. The college bookstore is operated by Barnes and Noble College Booksellers as a service to the students, faculty, and staff. The bookstore is located on the fourth floor, E-Building, and operates all year round. The bookstore offers a large selection of textbooks in a wide variety of formats: Rental, Digital, Used, and New to save students money and give them choice. In addition to the bookstore’s multiple textbook options, it has everything from school supplies and reference materials to backpacks, college apparel, and snacks to go. During finals of each semester, the bookstore offers a Cash for Books Program to offer students up to 50 percent cash back on textbooks. Students can order textbooks and college apparel online at bhcc.bncollege.com to have them shipped or for easy in-store pick up. Stay connected to the BHCC Bookstore by becoming a Facebook fan at facebook.com/BHCCbookstore. For store hours and inquiries, visit the bookstore’s website at bhcc.bncollege.com or contact the bookstore at 617-241-5161, through fax at 617-241-5190, or through email, bksbunkerhill@bncollege.com.

Food Services. Fame Food Service operates a full-service cafeteria on the fourth floor, E-Building. During the fall and spring semesters, the cafeteria is open Monday through Thursday, 8 a.m. to 2:30 p.m., and Friday, 8 a.m. to 2 p.m. The Fame Café, located in the main lobby of the Charlestown campus, is open weekdays year round. During the fall and spring semester, the café extends its hours to include evenings and weekends: Monday through Thursday, 6:30 a.m. to 9 p.m., Friday, 7 a.m. to 2 p.m., Saturday, 8 a.m. to 3 p.m., and Sunday, 9 a.m. to 2 p.m. During the summer sessions, the Fame Café is open Monday through Thursday, 8 a.m. to 3 p.m. and Friday, 8 a.m. to 2 p.m.

Child Care. The Child Focus Early Learning Centers, located on both the Charlestown and Chelsea campuses, are early learning centers licensed by the Massachusetts Department of Early Education and Care. Both Centers are accredited by the National Association for the Education of Young Children (NAEYC). The Centers are open to children ages 15 months to five years of students, faculty and staff of Bunker Hill Community College. The Centers are open daily, Monday through Friday, on both campuses from 7:30 a.m. to 5:30 p.m. For more information, call 617-228-2474.

Student Lounges. Lounges are located throughout both campuses and provide areas for quiet reading, conversation and table games.

Parking. Parking on the Charlestown campus is restricted to permit holders. Student parking is available in the large Parking Lots numbered 1 and 2. The perimeter roadway and Lots 3, 4, 5 and 6 are reserved for faculty and staff parking only. Charlestown campus Lot 4, adjacent to B-Building, provides designated one-hour visitor parking spaces as well as spaces for persons with disabilities. There is no student parking permitted on the Chelsea campus. However, there is metered parking available by the City of Chelsea around the Campus.

Security. The Office of Public Safety and Campus Police is dedicated to protecting students, faculty, staff, visitors and property of Bunker Hill Community College. Campus Police officers are sworn-in Special State Police of the Commonwealth of Massachusetts. As such, the department conducts itself as any other Municipal Police Department and has full arresting powers on College grounds (state laws Chapter 22C, section 63). An additional contracted security staff ensures the security of the building 24 hours a day.

Health Services. Bunker Hill Community College offers health services to promote health education and wellness in an atmosphere that is welcoming, culturally sensitive and growth producing. The Health Services Office promotes wellness through health education awareness programs and individual
The Department of Workforce Development • BHCC Alumni Association

The Department of Workforce Development

Mission Statement
Bunker Hill Community College is a multi-campus academic institution that serves surrounding cities and towns as well as urban neighborhoods within the city of Boston. The Department of Workforce Development, (housed within the Division of Professional Studies and Workforce Development), is the principal organization responsible for leveraging the College’s expertise and resources in order to provide non-traditional educational pathways which lead to both personal growth and professional advancement.

The Department, through its corporate, communications, technology, and employability training, exam preparation and entrepreneurship programs, contributes to the region’s intellectual, cultural, and economic development. It identifies and closes workforce gaps, empowers personal advancement, promotes academic success, and fosters wellness, growth and lifelong learning.

Bunker Hill Community College seeks to enhance its position as the primary educational and economic asset for the Commonwealth, within the service area of Greater Boston, collaborating with community-based organizations, local business entities, and non-profit organizations in pursuit of this goal.

Programs and Services
1. **Corporate Training** provides high quality, industry demand-driven programming to emerging, transitional, and incumbent workers in a corporate setting. Utilizing the resources of the College and strategic business and community partnerships, it offers skills training and both credit and non-credit educational courses to foster a path to post-secondary education and the workforce. It is committed to being the first-choice of businesses and individuals for the delivery of innovative and responsive non-traditional educational programming.

2. **Community Education** empowers personal advancement offering market-driven courses designed to achieve students’ personal and professional goals. There are innovative programs from study tours for international student groups (COIL); the Language Institute for English skills improvement; US culture programs for Au Pairs; courses that are bridge builders to more traditional academic pathways leading to certificate and degree programs; and other unique offerings that enable students to achieve their life goals through non-traditional education.

   It offers many affordable classroom, hybrid and online courses, many of which are a bridge to certificate and degree programs.

3. **Entrepreneurship**, the Community Center for Entrepreneurship is the region’s premier resource for urban business development. Our partner network sponsors and fosters business growth both for the student or individual seeking to launch a new business, as well as the small business owner seeking to grow their business to a new level of expansion.

The Bunker Hill Community College Alumni Association

Established in 1988, the Bunker Hill Community College Alumni Association contributes to the continued growth of the College by sharing the educational, professional and personal experiences of alumni with the College community.

The Alumni Association provides opportunities for alumni to connect with their alma mater, one another and BHCC students through sponsored programs, networking opportunities and events. Membership in the BHCC Alumni Association is open to all degree graduates, certificate graduates and friends of the College.

Recognized as the College’s best ambassadors and as an integral part of the college community, members of the Alumni Association actively participate in and support key programs that enhance the College’s mission. Through the Association, interested alumni may stay actively involved with the College in a variety of ways, serving as alumni mentors for students, working on event committees or serving on the Alumni Association Board of Directors.

The Bunker Hill Community College Foundation, Inc.

The Bunker Hill Community College Foundation, Inc., is a non-profit 501(c)(3) organization established to obtain resources to support the College, thereby enabling students with diverse educational, ethnic and cultural backgrounds to benefit from a high-quality, affordable, post-secondary education. The mission is realized by building constituencies and obtaining financial resources from groups and individuals including alumni, business, civic and community leaders.

The Foundation Board of Directors is committed to advancing the mission of the College and works to secure private contributions, planned gifts and other donations from
individuals, foundations and corporations through personal solicitations, grant applications and fundraising events.

The Foundation provides funding for student scholarships and the Student Emergency Assistance Fund, support for the Textbook Assistance Program (T.A.P.), cultural programs, the Art Gallery and many other activities that advance the goals and mission of the College. In addition, the Foundation is building an endowment to ensure academic excellence and accessibility for future generations of students.

The Mary L. Fifield Art Gallery at Bunker Hill Community College

The Bunker Hill Community College Art Gallery provides the College and the local community opportunities to view high caliber art exhibitions, exposure to diverse ideas and artistic media and access to forums with emerging and established Boston-based artists. Through its scheduled programming, the Gallery offers an innovative backdrop to teaching and learning. The Gallery hosts the Annual VMA Student Juried Art Exhibit and sponsors other opportunities to highlight student creativity and talent. Work-study and internship positions afford BHCC students hands-on Art Gallery experience. The Art Gallery’s Art Mobile program delivers hands-on art projects to senior citizens in our neighboring communities, providing BHCC students with community service-learning opportunities. The Gallery’s Arts Off The Wall programming hosts the Small Audience Film Screenings, Speak-Out, Word and Text as Art, Poetry and Open Mic events, Open Drawing sessions, and musical performances, all held in the A300 area. The annual exhibition schedule showcases artists, gallery talks and interactive workshops, and is designed to reflect the cultural and ethnic diversity of our international college community. Located adjacent to the A300 Auditorium, the Gallery maintains regular posted hours. Go to bhcc.edu for the Gallery’s current, upcoming and archived schedule of events, or call 617-228-2093 or email artgallery@bhcc.mass.edu for more information.

Degree and Certificate Programs

Bunker Hill Community College offers numerous programs of study that lead to Associate in Arts (A.A.) degrees, Associate in Science (A.S.) degrees and certificates. All programs of study include courses from three required areas: general education requirements, career and/or liberal arts electives and program requirements. These required areas are explained on the following pages.

Associate in Arts (A.A.) Degree Concentrations prepare students to transfer to four-year colleges and universities. Extreme care was taken in fashioning these transfer-focused degrees. Nonetheless, the College advises students to comply with the following recommendations:

- In order to make the wises choice of Bunker Hill Community College courses, consult the institution to which you wish to transfer.
- In order to facilitate transfer to a four-year institution, work with the BHCC transfer counselor and your academic advisor in planning your BHCC curriculum.

Information about Transfer Programs are offered through information sessions to discuss transfer options.

Associate in Science (A.S.) Degree Programs prepare students with the knowledge and skills necessary to enter the workforce at the conclusion of the degree. In addition to preparing students for employment, many associate in science degree programs transfer to four-year colleges and universities. To assure smooth transfer to four-year programs, A.S. transfer students should follow the recommendations for the Associate in Arts (A.A.) degree above.

Certificate Programs provide students with skill training and job upgrade opportunities.

General Education Requirements

Bunker Hill Community College is committed to the belief that all graduates should possess the skills and breadth of knowledge necessary to live full and productive lives. The General Education portion of associate degree programs assists students in acquiring knowledge and skills that enhance their major areas of concentration. Students who receive A.A. or A.S. degrees must take a total of 22 credits of General Education.

Those credits must include:

1. ENG111 and ENG112 (six credits) to fulfill General Education requirement 1 -and- 16 additional credits to fulfill General Education Requirements 2, 3, 4, 5 and 6.

Students may fulfill their General Education requirement by completing one course from each of the six General Education menu areas listed on page 57. Instructors teaching General Education menu courses will outline in each course syllabus the General Education outcomes and requirements specific to their courses.

Students should consult their individual program grids (starting on page 61) for General Education course requirements specific to their major. Some General Education requirements are met by concentration courses. Such instances are noted in the program grids.
General Education Outcomes for All Programs

- Students are able to interpret, analyze, synthesize, and evaluate information from multiple sources in a logical and coherent manner.
- Students are able to approach writing as a process and to write coherent, well-developed, effectively proofread essays, research papers, arguments, and critical analyses while using sources responsibly.
- Students are able to explain the sociological and psychological concepts and theories that describe the nature of human societies and can relate these concepts and theories to their own life situations. [Area 2]
- Students are able to apply their understanding of diverse world perspectives and past historical events in order to critically evaluate potential resolutions to conflicts in our multicultural world. [Area 3]
- Students are able to apply computational methods, generate problem-solving strategies, and construct mathematical models necessary in a technologically sophisticated society. [Area 4]
- Students are able to use scientific methods of inquiry to investigate the ideas, laws, and theories used to explain the physical universe, its life forms and its natural phenomena. [Area 5]
- Students are able to explore the dimensions of the human intellect and imagination and develop an informed appreciation of the diverse modes of creative expression. [Area 6]

See the General Education Requirement Menu on the following page.

Student Learning Outcomes Assessment Program (SLOAP)
The Student Learning Outcomes Assessment Program (SLOAP) was designed and implemented by full-time faculty during the 2003-2004 academic year. The SLOAP Taskforce, composed of faculty representatives from each academic department, oversees ongoing assessment of student learning outcomes on the course, program and institutional levels. Faculty submit assessment proposals to the Taskforce for approval and, once the proposed project is complete, submit a report of their findings to the Taskforce. Faculty use data from SLOAP projects to improve learning where assessment projects indicate improvement is needed. All SLOAP data is stored in the SLOAP database which is available on the BHCC Portal.

Sustainability Throughout the Curriculum
Bunker Hill Community College is committed to integrating sustainability within curriculum throughout the institution. Courses designated with a leaf symbol (🌿) in the course schedule emphasize understanding environmental awareness and practice of sustainability. Green Leaf courses are a part of the College’s ongoing sustainability efforts.
General Education Requirements Menu

REQUIREMENT 1: COLLEGE WRITING
This requirement area emphasizes the two core competencies: critical thinking and writing. Upon completing this requirement, a student will approach writing as a process, from planning and drafting through revising and editing. A student will write coherent, well-developed essays, research papers, argumentative essays and critical analysis, while summarizing and using sources responsibly. Students will use computers to write and revise their work and to conduct research.

Area 1:
ENG111 College Writing I
ENG112 College Writing II

REQUIREMENT 2: INDIVIDUAL AND SOCIETY
This requirement area involves an examination of one of the fundamental issues we all face in our development and in our lives: the interrelationship of the individual and the community.

The interaction of the individual with the family, the school or college, the workplace, the voluntary associations we form, and/or the state are studied. Emphasis is placed on how individuals shape and are shaped by institutions, belief systems, and conduct.

Area 2:
GOV101 Gov. and Politics in US
GOV103 State and Local Politics
PSY101 Principles of Psychology
PSY107 Group Dynamics

REQUIREMENT 3: WORLD VIEW
This requirement area involves a study of social, cultural, economic, ethical and political issues from a historical and global perspective. The modern global system is examined in the context of the significant forces, places and events which have, over time, determined the course and development of modern civilization. Students will learn to understand and appreciate diverse perspectives in order to critically evaluate potential resolutions to conflicts in our multi-cultural world.

Area 3:
ECO201 Macroeconomics
ECO202 Microeconomics
GEO101 World Regional Geography
HIS101 Western Civilization to the Renaissance
HIS102 Western Civilization from the Renaissance
HIS111 World Civilization to 1500

AREA 4:

REQUIREMENT 4: QUANTITATIVE THOUGHT
In this requirement area, students will apply computational methods, generate problem-solving strategies, and construct mathematical models necessary in a technologically sophisticated society. The student will also organize, analyze, and interpret data, evaluate quantitative evidence and arguments, and draw valid conclusions from information presented.

Area 4:
MAT171 Finite Math
MAT172 Contemporary Math I
MAT173 Contemporary Math II

REQUIREMENT 5: SCIENCE AND TECHNOLOGY
In this requirement area, students will use scientific methods of inquiry to investigate the ideas, laws, and theories used to explain the physical universe, its life forms and its natural phenomena. Students will study the interrelationships between science and technology and how advances in science and technology have impacted the global community, the environment, and the quality of life.

Area 5:
AST102 Astronomy/Lab
AST104 Earth Science/Lab
AST106 Oceanography/Lab
AST107 Tropical Field Studies
EN110 Sustainability and Environment

REQUIREMENT 6: HUMANITIES
In this requirement area, the student will explore the dimensions of the human intellect and imagination and develop an informed appreciation of the diverse modes of creative expression. Students will learn how people have come to understand and express artistic, esthetic, moral, spiritual and philosophical dimensions of the human condition.

Area 6:
FLM101 Film as Art
FLM102 American Cinema
HON200 Honors Seminar
INT110 American Culture
LIT All Literature Courses
MUS118 Music Appreciation I
MUS119 Music Appreciation II
MUS129 Rock and Roll History
PHL101 Introduction to Philosophy
THE107 Acting I
VMA104 Drawing I

VMA112 Art History I
VMA113 Art History II
VMA122 Painting I
VMA123 Watercolor I
VMA124 Printmaking I
VMA161 Intro to Digital Photography

*Selective program with specific prerequisites and start terms. For updated information, please visit the College’s website at bhcc.edu.

**Students enrolling in any A.A. degree program can earn World Studies Emphasis Certification simultaneously.

BHCC is fully accredited by the New England Association of Schools and Colleges.

AA – Denotes Associate in Arts • AS – Denotes Associate in Science • CT – Denotes Certificate Program
Elective Courses

**Electives** provide students with flexibility in their programs of study. The electives categories help students make choices beyond the required courses for their respective programs.

**Liberal Arts Electives** include not only those categorized as Liberal Arts Electives but also the Science/Lab Science, Social Science and Behavioral Science Electives.

**Career Electives** are courses in the student’s major field or related field approved by the department chair or program coordinator.

Due to the prerequisite requirements, it is not possible to complete this certificate program in one year. The program is intended to be followed on a part-time basis over two years.

PROGRAM OVERVIEW
This program prepares students for entry-level training positions in firms where accounting departments may be specialized or all-inclusive (examples: accounts payable, accounts receivable, or inventory control). In addition, the program certifies those who are currently performing bookkeeper functions at their present employment. The certification enhances students’ opportunities for growth. The program prepares graduates with skills directly transferable to the workplace through a combination of technical accounting training and financial accounting. The certificate program prepares students who feel that a degree program is not an appropriate choice.

CAREER OUTLOOK
This program qualifies graduates for entry-level accounting, billing, or advanced bookkeeping positions. Students may also transfer the courses into the Associate in Science Degree: Business Administration Accounting option or Business Administration Management option.

For more information about our graduation rates, the median debt of students who completed the program, and other important information, please visit our website at www.bhcc.mass.edu/certificate-programs.

UPON COMPLETION OF THIS CONCENTRATION GRADUATES WILL BE ABLE TO:
• Describe and demonstrate an understanding of cash vs. accrual accounting.
• Compare and contrast different concepts of depreciation of property, plant and equipment assets.
• Explain in detail the nature of receivables, payables and inventory.
• Analyze and evaluate revenues, expenses cash flows, and behavior of cost.
• Assess and analyze integrated accounting systems, setup, and applications.
• Use spreadsheet models addressing a range of practical and business applications.
• Record transactions and input data from initial investment in the business cycle, ending entries that are necessary to ready the books for period-ending financial statements.
• Prepare and evaluate financial statements and process and maintain computerized records, accounts, and information.

This program prepares students for employment and for transfer to four-year colleges and universities. The college has transfer articulation agreements with many of the four-year colleges and universities in the area. The College encourages students to meet with their advisors for additional information. This program makes a concentrated effort to demonstrate how the subject matter relates to the cultures of our diversified student population. The program places emphasis on student participation and creates an interactive forum in which to learn. The Business Administration Department at Bunker Hill Community College is a collegial, student-centered learning community dedicated to providing an innovative, creative and relevant education in business disciplines to a diverse student population. We strive to maximize student success by placing graduates in a competitive position when seeking employment in a business environment or upon transfer to a four-year academic institution, ultimately empowering them to complete responsibly and successfully in a global business environment.

OPTION OVERVIEW
This option trains students in use of the accounting software used in industry by introducing computerized applications early in the sequence of courses. Students interface with the public through the Volunteer Income Tax Assistance (VITA) component of this option as they help interested members of the community prepare their tax returns.

CAREER OUTLOOK
This option qualifies graduates to enter the accounting profession in entry-level positions.

UPON COMPLETION OF THIS CONCENTRATION GRADUATES WILL BE ABLE TO:
- Understand all variables that are relevant to preparing individual tax returns at both the state and federal levels.
- Prepare a set of financial statements for a service, merchandising, or manufacturing business that is structured as either a proprietorship, partnership, or corporation.
- Analyze a set of financial statements to determine the strengths or weaknesses of the business.
- Understand the importance of cash flow within a business and account for its use and source in evaluating the effectiveness of managerial decisions.

*Note: Students will complete a minimum of 45 hours for the practicum. Students with prior related office work experience that has been approved by the department chairperson will create a Prior Learning Assessment Portfolio.

**Note: A grade point average of 2.75 and approval by the practicum coordinator is required before students are placed in the practicum.

PROGRAM OVERVIEW

Using the most current computer applications, this program prepares students to acquire the competencies needed to work in an office environment.

CAREER OUTLOOK

Graduates of this program may qualify for entry-level positions such as receptionists, data-entry clerks, word processing specialists, office assistants, or customer service representatives in a wide range of small and large organizations. More experienced graduates may obtain positions as executive assistants or office managers. Students qualify to take the MS Office certification exam at the end of the program.

UPON COMPLETION OF THIS PROGRAM, GRADUATES WILL BE ABLE TO:

- Demonstrate proficiency in computer and software applications.
- Use the complete range of Microsoft Office application in an efficient manner.
- Demonstrate the ability to use various communication mediums.

Exemption exams are available for OIM103 and OIM132. MS Office certification is available after CIT233.

**OVERVIEW**

This program prepares students to be able to have an entry-level position as a mobile app developer in an Android environment.

**CAREER OUTLOOK**

This Certificate Program is designed to align with the needs specified by industry partners. This option will have stackable credentials ideal for the working professional who is not seeking a degree, but looking to enhance their existing information technology skills.

For more information about our graduation rates, the median debt of students who completed the program, and other important information, please visit our website at www.bhcc.mass.edu/certificate-programs.

**UPON COMPLETION OF THIS CONCENTRATION GRADUATES WILL BE ABLE TO:**

- Tackle large problems by systematically breaking them down into smaller, more manageable problems.
- Use their knowledge, skills, and resources to effectively adapt to change.
- Utilize a foundation in programming practices and principles.
- Utilize skills and competencies required to program basic Android applications in Java.
- Utilize skills and competencies required to design basic mobile applications on several device platforms.

** Note: This course satisfies “Quantitative Thought” General Education Requirement Area 4 for Culinary Arts and Pastry Arts students only

*** Note: This course satisfies “Science and Technology General Education Requirement Area 5

Continued on following page
The mission of the Culinary Arts Program is to be a leader in Hospitality and Culinary Arts education and to develop future leaders for the Hospitality and Food Service industries. The Culinary Arts Program provides education for entry level careers in Restaurant Management, Food Service Management, and Culinary Arts. In addition, preparation for transfer to four-year, higher education programs and opportunities for professional development will be provided. Students will develop technological, communicative, critical thinking, quantitative, and human relation skills.

OPTION OVERVIEW
The Baking and Pastry Arts Option prepares students with an intensive, practical application of skills and decision making demanded by the baking and pastry arts profession. The program provides hands on curriculum interwoven with operational procedures found in most pastry production facilities and venues. Students participate in the operation of a restaurant on campus and in an internship experience. The curriculum is based on American Culinary Federation standards.

CAREER OUTLOOK
Graduates of this program qualify for a variety of entry level positions in retail bakeries, pastry shops and related pastry production facilities. An A.S. degree will position the student for entry level management positions, as well as the opportunity to transfer to a four year institution for further studies.

UPON COMPLETION OF THIS CONCENTRATION GRADUATES WILL BE ABLE TO:
• Demonstrate an acquired technical skill in the usage of tools, equipment and machinery found in typical bakeries and commercial pastry production facilities.
• Demonstrate the necessary administrative skills common to basic cost control and planning methods found in a typical commercial pastry shop.
• Demonstrate conceptual skills acquired through course work relative to operating a successful pastry shop or bakery facility.
• Demonstrate the ability to apply advanced decorating techniques in cake and pastry design.
• Demonstrate knowledge of advanced chocolate and sugar design.
• Demonstrate a skill in working with the design and implementation of healthy alternatives to recipes.

*Note: All science, engineering, and math courses that are pre or co-requisites of other science and engineering courses require a grade of C+ or better.

**Note: It is anticipated that both BIO261 and BIO262 must be taken for transfer.
This program offers two degree options: Biology Transfer and Biotechnology. Each option prepares students for employment and for transfer to four-year colleges and universities. Each option engages students in industry-level, inquiry based laboratory activities in order to develop and strengthen their critical thinking as well as their industry skills.

OPTION OVERVIEW
This option provides students with the technical coursework and laboratory experience that enables them to succeed in undergraduate biology programs. Upon graduation from BHCC, students are able to pursue further study at four-year colleges and universities in any number of areas including physiology, ecology, cell biology, biotechnology, genetics, botany, zoology, microbiology, biochemistry, wildlife conservation, or any of the health sciences. BHCC has articulation agreements with UMass Boston, UMass Amherst and UMass Lowell, enabling Biology Transfer graduates to enroll in any one of these universities as juniors, without losing credits.

CAREER OUTLOOK
This option will allow students to transfer to four-year colleges and universities to seek a bachelor’s degree in biology. Students planning to transfer into a pre-medical, pre-veterinary, predental, pharmacy or chiropractic degree program should enroll in this program.

UPON COMPLETION OF THIS CONCENTRATION GRADUATES WILL BE ABLE TO:
- Use currently accepted biological, chemical, and physical concepts to investigate problems and ideas presented in advanced biological study.
- Use biological concepts to evaluate their own science related concerns such as personal health or careers.
- Use laboratory technology, equipment and techniques to investigate scientific problems critically and safely using proper scientific methods.
- Use molecular and cellular laboratory techniques that are commonly used in Biotechnology.
- Explain the major concepts of cell structure, function and cellular processes that are key to life.
Biomedical Engineering Option

**OPTION OVERVIEW**
This option brings engineering design and technology into the field of biology and medicine. The option prepares students to transfer to four-year institutions as Biomedical Engineering majors, or for direct employment in entry-level positions.

**CAREER OUTLOOK**
Graduates with an associate of science degree will be qualified for direct employment in entry-level research/lab assistant, design and manufacturing positions available in private industries, academic research institutions, and hospitals locally and nationwide.

**TOTAL CREDITS** 69

*Note: All science, engineering, and math courses that are pre or co-requisites of other science and engineering courses require a grade of C+ or better.

The Associate of Science in Engineering Program is offered as part of a response to the long-term shortage of skilled workers in the engineering workforce, and is consistent with the mission of the College. It is designed to meet the needs of BHCC students and to address the workforce demands of Greater Boston. The curriculum is structured to mirror the freshman and sophomore years of a university engineering degree. Accordingly, the Science and Engineering Department is developing articulation agreements with area universities to enable BHCC engineering graduates to transfer as juniors upon completing the Associate of Science degree. The curriculum offers two options: a Biomedical Engineering Option and an Engineering Transfer Option.

**UPON COMPLETION OF THIS CONCENTRATION GRADUATES WILL BE ABLE TO:**
- Design and conduct experiments.
- Analyze and interpret data.
- Apply computational tools and scientific concepts to biomedical engineering problems.
- Design systems, components, or processes for solving biomedical engineering problems.
- Function as part of a biomedical engineering team.
- Articulate the professional and ethical responsibilities required of engineers.

Biotechnology Option

Continued from previous page

This program offers two degree options: Biology Transfer and Biotechnology. Each option prepares students for employment and for transfer to four-year colleges and universities. Each option engages students in industry-level, inquiry based laboratory activities in order to develop and strengthen their critical thinking as well as their industry skills.

OPTION OVERVIEW

This option covers the concepts, methodology and techniques of biochemistry, cell biology, genetics, cell culture, molecular biology, immunology, bioinformatics and microbiology. The option provides students with a rigorous academic background as well as industry-specific laboratory skills including sophisticated laboratory procedures, experimental design, data interpretation, and equipment maintenance. The program also reinforces general industry-specific skills such as communication, organization and teamwork. Graduates of this program may transfer to four-year colleges and universities to continue their studies in biotechnology or other life sciences.

CAREER OUTLOOK

Students completing this option qualify for entry level positions in a wide range of biotechnology disciplines in industry, police, government and academic labs. These positions require a biotechnology certificate, AS degree or BS degree with 0-2 years of experience. Such positions offer the possibility of merit bonus and promotion and are available locally as well as nationwide.

UPON COMPLETION OF THIS CONCENTRATION GRADUATES WILL BE ABLE TO:

- Use currently accepted biological, chemical, and physical concepts to investigate problems and ideas presented in advanced biological study.
- Use biological concepts to evaluate their own science related concerns such as personal health or careers.
- Use laboratory technology, equipment and techniques to investigate scientific problems critically and safely using proper scientific methods.
- Use molecular and cellular laboratory techniques that are commonly used in Biotechnology.
- Explain the major concepts of cell structure, function and cellular processes that are key to life.
- Explain current models, concepts and principles of genetics and inheritance.
- Explain and apply the underlying concepts of current topics and experimental models in molecular biology and Biotechnology.
- Use industry skills and work practices of the biotechnology industry for direct employment.

The Business Administration Department at Bunker Hill Community College is a collegial, student-centered learning community dedicated to providing an innovative, creative, and relevant education in business disciplines to a diverse student population. We strive to maximize student success by placing graduates in a competitive position when seeking employment in a business environment or upon transfer to a four-year academic institution, ultimately empowering them to compete responsibly and successfully in a global business environment.

**CONCENTRATION OVERVIEW**

This concentration prepares students to transfer to four-year colleges or universities and major in business administration. A bachelor’s degree enhances the competitive status of students for entry into business-related fields, and prepares students for advanced degrees. The college has transfer articulation agreements with many four-year academic institutions in the area. Graduates of this concentration may qualify for transfer using benefits of MassTransfer to a four-year state college or University of Massachusetts campus. For current information on eligible programs, visit www.mass.edu/masstransfer. The department also encourages students to consult with their advisors concerning transfer requirements.

**CAREER OUTLOOK**

Students’ potential careers vary depending upon the chosen major and include accounting, mid-level management, banking, finance, and insurance. Students must complete a bachelor’s degree as a minimum requirement for entry into these fields. Students may need to pursue graduate work, as well.

**UPON COMPLETION OF THIS CONCENTRATION GRADUATES WILL BE ABLE TO:**

- Describe the interaction of history, culture, literature, economics, and science as studied within a broad liberal arts curriculum.
- Demonstrate competence in reading and writing/literacy skills and in the organization of critical thinking and problem solving behaviors.
- Examine management theory and practice and explain basic business methodology and application.

Students enrolling in this degree program can earn World Studies Emphasis certification simultaneously.
Associate in Science Degree: Medical Imaging Program

The Medical Imaging Program prepares students in four different Associate in Science Degree options:

- **The full-time Cardiac Sonography Option** – 24 months in duration. See page 73.
- **The full-time General Sonography Option** – 24 months in duration. See page 132.
- **The full-time Medical Radiography Option** – 21 months in duration. See page 170.
- **The part-time Medical Radiography Option** – 35 months in duration. See page 171.

Program accreditations are as follows:
The Medical Radiography Program is accredited by the Joint Review Committee on Education in Radiologic Technology (JCERT), 20 North Wacker Drive, Suite 2850, Chicago, IL 60606-3182, Phone: (312) 704-5300; Fax: (312) 704-5304, Email: mail@jrcert.org; URL: www.jrcert.org.

The program prepares students for entry-level positions in the respective fields. Graduates are eligible to apply to take the American Registry of Radiologic Technologists Exam (Medical Radiography) or the American Registry of Diagnostic Medical Sonography Exam (Sonography Options). Medical Radiography graduates are also eligible to apply to take the Massachusetts State Licensure Exam. The program begins in the fall semester, and didactic and clinical education are carefully correlated to provide reinforcement in the clinical setting of skills learned in the classroom. Students in the program must earn a numerical course grade of 80 percent or better in all imaging courses, and a minimum grade of C in all general education courses. Failure to meet clinical objectives or failure to meet the academic standard in any course will result in withdrawal from the program. Students may apply for readmission to the program one time, on a space-available basis. Prior to reapplication, students must successfully repeat failed course(s).

Readmission is considered on a case-by-case basis. All medical imaging students must undergo a physical examination, complete the necessary immunization forms, including the three (3) dose Hepatitis B immunization series, have CPR certification, carry malpractice and health insurance, and undergo a Criminal Offender Record Information (CORI) check and a Sex Offender Registry Information (SORI) check. The application process for the Medical Imaging Program is highly competitive and selective. Potential applicants are ranked based on prerequisite grades, Test of Essential Academic Skills V (TEAS V) results in Reading, Math and English/Language, as well as grades earned in any program required non-core courses. Applicants must achieve a CPT reading level of 10th grade or higher, or a LOEP score of 98 or higher for ESL applicants, to proceed to take the TEAS V Test. The highest ranked students for each A.S. Program will be invited to complete the TEAS V test. Qualified applicants will be able to take the TEAS Test free-of-charge at BHCC a maximum of three (3) times. Job shadows will be recommended to those applicants upon invitation. Standby lists will be generated annually for each A.S. Degree option. Standby students not obtaining a seat in that year will be required to reapply for future admission to any Medical Imaging Program.

**PREREQUISITES FOR ALL MEDICAL IMAGING OPTIONS:**

- Attend one MANDATORY information session within one year of application. (Refer to BHCC website for dates).
- Possess a high school diploma or GED certificate.
- Achieve a reading level of 10th grade or higher on the College Placement Test (CPT) or a numerical score of 98 or above on the LOEP reading test for ESL students
- Complete the following courses with a grade of C or better:
  - One semester of College Algebra (MAT194, MAT520) or equivalent;
  - One semester of college level Anatomy/Physiology I/Lab (must be completed within five years of application unless currently working in related healthcare position).
  - One semester of College Writing I (ENG111) or equivalent with a grade of C or better.

Continued on following page
AFTER ALL PREREQUISITES ARE COMPLETED:

- Prospective students must apply through Admissions and Enrollment Services during the enrollment period. Approximate application dates for the Fall program are September – December for admission to the program for the next academic year. Check with Admissions and Enrollment Services for exact timelines.

- Top-scoring applicants in each option will be invited to complete the Test of Essential Academic Skills V (TEAS V). Job shadows will be recommended to accepted students and those on the stand-by list.

- Applicants must score at least 47.6% in reading, 46.7% in math and 47.6% in English/Language on the TEAS V to be considered for the Medical Imaging Programs.

- The Medical Imaging Admissions Committee will evaluate each candidate’s record after completion of the TEAS V test. Admission to the Program will be based on overall ranking of applicants as described previously.

- Stand-by lists will be developed for each option annually. Stand-by students not offered a seat will need to reapply the next year for future consideration.

- Applicants not selected for admission to the Medical Imaging Program must meet with a member of the advising staff for guidance before reapplication.

Tuition and Fees for Medical Imaging Students***:

Programs of Study

Cardiac Sonography Option

Continued from previous page

OPTION OVERVIEW
This option prepares students in the imaging of the human heart with sound waves. Students are prepared to use the equipment that produces soundwaves, obtains an image, and provides the physician with diagnostic information for treatment.

CRIMINAL OFFENDER RECORD INFORMATION AND SEX OFFENDER REGISTRY INFORMATION CHECKS
As a prerequisite for a clinical placement in the Cardiac Sonography Option, all students must undergo a Criminal Offender Record Information (CORI) check and a Sex Offender Registry Information (SORI) check. These checks are required due to potential unsupervised contact with children, the disabled, or the elderly during a clinical experience. Students found to have certain criminal convictions or pending criminal actions will be presumed ineligible for clinical placement. The College is authorized by the Commonwealth’s Department of Criminal Justice Information Services, pursuant to Massachusetts General Laws, Chapter 6, Sections 167-178B, to access CORI records. Sex Offender checks shall be performed pursuant to Massachusetts General Laws, Chapter 6, Sections 178C-178P.

For more information regarding the College’s CORI/SORI check process, please contact the College CORI/SORI Officer at 617-228-2193.

CAREER OUTLOOK
Graduates of this option qualify for employment in hospitals, HMOs, clinics, doctors’ offices, mobile units, community health agencies, equipment/film companies, and/or as application specialist sales representatives.

UPON COMPLETION OF THIS CONCENTRATION GRADUATES WILL BE ABLE TO:
• Demonstrate general knowledge and technical skills required to perform cardiac echo examinations as an entry-level cardiac sonographer.
• Demonstrate sufficient knowledge of cardiac sonography to pursue registry status through The American Registry of Diagnostic Medical Sonographers.
• Understand the importance of lifelong continuing education in the field of Cardiac Sonography.

*Note: NHP180 course description is found under the Surgical Technology heading.

This program is offered on the Chelsea Campus as a part-time evening program. Applicants to this program are required to undergo a Criminal Offender Record Information (CORI) check and a Sex Offender Registry Information (SORI) check. Admission to the central processing program does not guarantee clinical placement. The outcome of the CORI/SORI check may impact the student’s ability to participate in the clinical experience. For further information, see the Department Chair.

ADMISSION REQUIREMENTS:

- Students must apply to the program through Admissions and Enrollment Services and:
- Possess a high school diploma or GED certificate.
- Attend an information session.
- Complete the college placement tests in reading, math, and English (may be taken during the first semester in the program).

PROGRAM OVERVIEW

This evening program prepares working students to enter this expanding field as Registered Central Processing Technicians. The program prepares students in computer competency, accounting, medical terminology, central processing functions, central processing skills and regulations.

CRIMINAL OFFENDER RECORD INFORMATION AND SEX OFFENDER REGISTRY INFORMATION CHECKS

As a prerequisite for a clinical placement in the Central Processing Certificate Program, all students must undergo a Criminal Offender Record Information (CORI) check and a Sex Offender Registry Information (SORI) check. These checks are required due to potential unsupervised contact with children, the disabled, or the elderly during a clinical experience. Students found to have certain criminal convictions or pending criminal actions will be presumed ineligible for clinical placement. The College is authorized by the Commonwealth’s Department of Criminal Justice Information Services, pursuant to Massachusetts General Laws, Chapter 6, Sections 167-178B, to access CORI records. Sex Offender checks shall be performed pursuant to Massachusetts General Laws, Chapter 6, Sections 178C-178P.

For more information regarding the College’s CORI/SORI check process, please contact the College CORI/SORI Officer at 617-228-2193.

CAREER OUTLOOK

Graduates of this program qualify as Central Processing Technicians who perform duties in one or more of the functional areas of materials management, supply, processing and distribution. Graduates qualify for positions in healthcare facilities and industry. Graduates qualify for advanced responsibilities within the profession, and job prospects are excellent.

For more information about our graduation rates, the median debt of students who completed the program, and other important information, please visit our website at www.bhcc.mass.edu/certificate-programs.

UPON COMPLETION OF THIS CONCENTRATION GRADUATES WILL BE ABLE TO:

- Qualify for the Registered Central Processing Technician certifying exam.
- Support the operative team during surgical procedures.
- Prepare equipment and supplies for use throughout the hospital.
- Assist in resource allocation and budget preparation for central processing.

*Note: All science, engineering, and math courses that are pre or co-requisites of other science and engineering courses require a grade of C+ or better.

**CONCENTRATION OVERVIEW**

This concentration prepares students to transfer to four-year colleges or universities to seek bachelor’s degrees in chemistry. After transferring, students develop a course of study to become proficient in one or more of the divisions of chemistry; e.g., polymer chemistry, physical chemistry, organic chemistry, biochemistry, analytical chemistry, chemical engineering, or hazardous waste management. A further goal of the program is to provide students with the technical coursework and laboratory experience that would enable them to enter the work force as entry-level laboratory technicians in positions that require some background in the physical and/or biological sciences. Graduates of this concentration may qualify to transfer using benefits of MassTransfer to a four-year state college or University of Massachusetts campus. For current information on eligible programs, visit www.mass.edu/masstransfer.

**CAREER OUTLOOK**

Graduates of this concentration should transfer to a four-year college or university because entry-level employment opportunities in chemistry such as lab or field technicians usually require a minimum of a bachelor’s degree in chemistry. Professional positions such as engineers, researchers, or college instructors usually require a minimum of a master’s degree.

**UPON COMPLETION OF THIS CONCENTRATION GRADUATES WILL BE ABLE TO:**

- Use currently accepted chemical concepts to investigate problems and ideas presented in advanced chemical study.
- Use chemical concepts to evaluate their own science-related concerns such as personal health or careers in science.
- Use laboratory technology, equipment, and techniques critically and safely to investigate scientific problems using proper scientific methods.

Students enrolling in this degree program can earn World Studies Emphasis certification simultaneously. See page 214.

Note: The Department recommends a two-semester foreign language sequence. *Note: New students enrolled in 9 credits or more must take a Learning Community Seminar or a Learning Community Cluster within their first year.

**CONCENTRATION OVERVIEW**
The English Department offers programs which qualify graduates to transfer to four-year institutions that prepare them for careers in teaching, journalism, public relations, and media communications. Students must complete a bachelor’s degree and teaching certificate to pursue a teaching career. A bachelor’s degree in English is a minimum requirement for entry-level work in careers such as publishing, advertising, public relations, and journalism.

The communications concentration prepares students to transfer to four-year colleges or universities in journalism or media communications. Graduates of this concentration may qualify to transfer using benefits of MassTransfer to a four-year state college or University of Massachusetts campus. For current information on eligible programs, visit www.mass.edu/masstransfer.

**CAREER OUTLOOK**
Graduates of this concentration qualify to transfer to four-year colleges or universities that prepare students for professional careers in journalism, public relations, and media communications. A bachelor’s degree is the minimum requirement for entry into these fields. Graduate work may be necessary, as well.

**UPON COMPLETION OF THIS CONCENTRATION GRADUATES WILL BE ABLE TO:**
- Communicate effectively in a variety of formats and situations.
- Write for a variety of purposes, adapting to varying audiences.
- Write pieces for specific markets, such as news stories and traditional academic papers.
- Use a computer to compose and edit papers and conduct Internet research.
- Demonstrate proficiency in critical thinking.
- Understand the dynamics of communication in a global context.

Students enrolling in this degree program can earn World Studies Emphasis certification simultaneously. See page 214.
This Computed Tomography Certificate Program is designed for experienced medical imaging professionals seeking to enter the field of computed tomography. The didactic and clinical content is structured to meet the content requirements of the American Registry of Radiologic Technologists (ARRT) Post-primary Registry Exam in CT, and will help professionals prepare for the examination. Didactic courses are delivered online in an interactive format to accommodate the working adult student. Students are responsible for finding a host hospital in which to complete the 100 hour clinical internship in which relevant skills will be reinforced. Students must earn a numerical grade of 80 or higher in all courses. Failure to meet internship objectives or failure to obtain a numerical course grade of 80 or better constitutes failure in that course. Students may apply for readmission to the program one time.

All CT students are required to undergo a physical examination; complete the necessary immunization forms, including three (3) Hepatitis B series; have malpractice and health insurance, and undergo a Criminal Offender Record Information (CORI) check and Sex Offender Registry Information (SORI) check. Students found to have certain criminal convictions or pending criminal actions will be presumed ineligible for clinical placement. The College is authorized by the Commonwealth’s Department of Criminal Justice Information Services, pursuant to Massachusetts General Laws, Chapter 6, Sections 167-178B, to access CORI records. Sex Offender checks shall be performed pursuant to Massachusetts General Laws, Chapter 6, Sections 178C-178P.

Student must apply to the program through Admissions and Enrollment Services and:

• Present a completed application with fee.
• Submit a copy of the current ARRT or NMTCB card.
• Submit a letter of interest.
• Submit a letter of recommendation from a supervisor, including guarantee of a clinical site for the clinical internship.

Admission is selective. Completed applications will be reviewed by the Medical Imaging Department in April and July for a September start.

PROGRAM OVERVIEW
This certificate helps to prepare students for the American Registry of Radiologic Technologists’ (ARRT) post-primary registry examination in CT, as well as for entry-level CT positions. It is intended for ARRT or Nuclear Medicine Technologist Certification Board (NMTCB) registered imaging professionals.

CRIMINAL OFFENDER RECORD INFORMATION AND SEX OFFENDER REGISTRY INFORMATION CHECKS
As a prerequisite for a clinical placement in the Computed Tomography Certificate Program, all students must undergo a Criminal Offender Record Information (CORI) check and a Sex Offender Registry Information (SORI) check. These checks are required due to potential unsupervised contact with children, the disabled, or the elderly during a clinical experience. For more information about our graduation rates, the median debt of students who completed the program, and other important information, please visit our website at www.bhcc.mass.edu/certificate-programs.

CAREER OUTLOOK
It is expected that the number of positions in this modality will continue to grow in the near future. Opportunities exist in hospitals, outpatient clinics and free-standing medical imaging facilities.

UPON COMPLETION OF THIS CONCENTRATION GRADUATES WILL BE ABLE TO:
• Demonstrate competence in the essential aspects of computed tomography at the entry-level.
• Understand the importance of life-long continuing education in the field of computed tomography.

PROGRAM OVERVIEW

Computer Forensics is the name for a field of study and practice that incorporates many areas of expertise including but not limited to hard drive and mobile device analysis, and computer crime investigation. This certificate provides to the Information Technology and Criminal Justice professionals, the opportunity to obtain basic knowledge, training and skills in Computer Forensics.

CAREER OUTLOOK

This Certificate Program is designed to align with the law enforcement, public safety, private industry and homeland security needs to ensure consistent, current and flexible training in the emerging technology field of Computer and Digital Forensics. For more information about our graduation rates, the median debt of students who completed the program, and other important information, please visit our website at www.bhcc.mass.edu/certificate-programs.

UPON COMPLETION OF THIS CONCENTRATION GRADUATES WILL BE ABLE TO:

- Image and analyze the evidence found on a hard drive including file system analysis.
- Analyze digital evidence including evidence found in the seizure of cell phones, PDA’s and other mobile devices.

CAREER OUTLOOK
This Certificate Program is designed to align with the law enforcement, public safety, private industry and homeland security needs to ensure consistent, current and flexible training in the emerging technology field of Computer and Digital Forensics.

For more information about our graduation rates, the median debt of students who completed the program, and other important information, please visit our website at www.bhcc.mass.edu/certificate-programs.

UPON COMPLETION OF THIS CONCENTRATION GRADUATES WILL BE ABLE TO:
- Image and analyze the evidence found on a hard drive including file system analysis.
- Analyze digital evidence including evidence found in the seizure of cell phones, PDA's and other mobile devices.

Demonstrated knowledge of IT skills through work experience or course work, is required for entrance to this program. Permission of Department Chair or program coordinator is required for non-coursework experience.

PROGRAM OVERVIEW
Computer Forensics is the name for a field of study and practice that incorporates many areas of expertise including but not limited to hard drive and mobile device analysis, and computer crime investigation.

This certificate provides to the Information Technology and Criminal Justice professionals the opportunity to obtain basic knowledge, training and skills in Computer Forensics.

### CONCENTRATION OVERVIEW

The Computer Information Technology (CIT) Department mission is two-fold. CIT prepares its students for good paying, entry level careers as database professionals through the Associate in Science (A.S.) and Certificate Database Programming and Administration Programs. CIT also prepares students to transfer to four-year college Information Technology (IT) Programs through two Associate in Arts (A.A.) Programs: A.A. Computer Information Systems Transfer and A.A. Computer Science Transfer. The Department’s goals are in concert with the College’s goals. Using input from its Industry Advisory Committee and internship course, the department is continually updating and fine tuning its programs of study. Graduates of this concentration may qualify to transfer using benefits of MassTransfer to a four-year state college or University of Massachusetts campus. For current information on eligible programs, visit www.mass.edu/masstransfer.

### CAREER OUTLOOK

Graduates of this concentration can transfer to bachelor’s programs at four-year colleges.

### UPON COMPLETION OF THIS CONCENTRATION GRADUATES WILL BE ABLE TO:

- Analyze the system needs of an organization.
- Make feasible recommendations for computer solutions that meet those needs.

This program also is available through the Weekend College Program.

Students enrolling in this degree program can earn World Studies Emphasis certification simultaneously. See page 214.

Note: Advising Tips - students transferring to UMB should take CS240 Programming in C and UNIX at UMB and transfer the course back to BHCC for one of the electives; students transferring to UML and UMA are recommended to take MAT291 as one of the electives; and students transferring to Tufts are recommended to take MAT283 as one of the electives. It is always best practice to check the current requirements of the transfer institution before selecting computer electives at BHCC. Check with the Computer Science Advisor.

*Note: MAT197 waived for students placing higher on Accuplacer test.

**For assistance in choosing electives and waiver of computer course prerequisite(s) see the Computer Science Advisor.
Computer Science Transfer Option

Continued from previous page

The Computer Information Technology Department (CIT) has a clear, well-articulated, three-pronged mission, which includes supporting the IT components of the college’s General Education offerings (across divisions, departments, and campuses, as well as through interdepartmental collaboration), preparing an IT workforce through certificate and associate degree offerings, and providing IT students with seamless transfer opportunities to related Baccalaureate Degree programs.

The Computer Technology Program offers many courses that apply to other options to afford students the opportunity to explore the many career tracks in Information Technology before selecting a career in Computer Support, Data Base or Networking. The Department’s goals are in concert with the College’s goals. Using input from its Industry Advisory Committees and internship course, the Department is continually updating and fine tuning its programs of study.

PROGRAM OVERVIEW
This program prepares students to become vital links between the company and its customers; to educate users, solve hardware or software operation and application problems; and to become good sources of product information.

CAREER OUTLOOK
Graduates of this program qualify for entry-level support positions in hardware support and troubleshooting, help desk, and other Internet support positions.

For more information about our graduation rates, the median debt of students who completed the program, and other important information, please visit our website at www.bhcc.mass.edu/certificate-programs.

UPON COMPLETION OF THIS CONCENTRATION GRADUATES WILL BE ABLE TO:
- Have the skill set necessary to take the Comp TIA A+ Certification Examination.
- Understand help desk, Internet support, hardware and other entry level IT support professions.

The Computer Information Technology Department (CIT) has a clear, well-articulated, three-pronged mission, which includes supporting the IT components of the college’s General Education offerings (across divisions, departments, and campuses, as well as through interdepartmental collaboration), preparing an IT workforce through certificate and associate degree offerings, and providing IT students with seamless transfer opportunities to related Baccalaureate Degree programs.

The Computer Technology Program offers many courses that apply to other options to afford students the opportunity to explore the many career tracks in Information Technology before selecting a career in Computer Support, Data Base or Networking. The Department’s goals are in concert with the College’s goals. Using input from its Industry Advisory Committees and internship course, the Department is continually updating and fine tuning its programs of study.

OPTION OVERVIEW

This option is designed for full-time or part-time students who wish to prepare for the positions of Help Desk Technician, Technical Support Specialist and Customer Service Representative. This occupational group provides technical assistance, support, and advice to customers and users. The degree prepares graduates by developing in them skills ranging from the technical and computer-related to the “people” skills of verbal and written communications, telephone skills, tact, good manners, and logical problem diagnosis and solution. The degree incorporates preparation for ICT Industry Certification Examinations. A range of general education courses in the program also enrich professional skills.

CAREER OUTLOOK

Graduates of this option may qualify for entry-level support positions in hardware support, trouble-shooting, help desk, Microsoft applications and other Internet support positions.

UPON COMPLETION OF THIS CONCENTRATION GRADUATES WILL BE ABLE TO:

- Take the Comp TIA A+ Certification Examination.
- Understand help desk, Internet support, hardware and other entry level IT support professions.
Craft Entrepreneurship Certificate Program

This program prepares students to understand the business issues, technical skills and other knowledge underlying success in entrepreneurial endeavors. All of the courses are part of the Entrepreneurship Option of the A.S. in Business Administration Degree and thus could be used to fulfill requirements of that program. The certificate could also be completed to supplement knowledge acquired in craft disciplines by those that wish to start their own businesses.

CAREER OUTLOOK
This certificate prepares graduates to start and manage a small business, and to move into management and supervisory positions.

For more information about our graduation rates, the median debt of students who completed the program, and other important information, please visit our website at www.bhcc.mass.edu/ certificate-programs.

This program prepares students to understand the business issues, technical skills and other knowledge underlying success in entrepreneurial endeavors. All of the courses are part of the Entrepreneurship Option of the A.S. in Business Administration Degree and thus could be used to fulfill requirements of that program. The certificate could also be completed to supplement knowledge acquired in craft disciplines by those that wish to start their own businesses.

UPON COMPLETION OF THIS CONCENTRATION GRADUATES WILL BE ABLE TO:

- Analyze viability of opportunities from various points of view.
- Understand the leadership skills and personal characteristics needed for success in starting and managing a small business.
- Develop and implement a business plan.
- Prepare a set of financial statements for a service, merchandising or manufacturing business that is structured as a sole proprietorship, partnership or a corporation.
- Analyze a set of financial statements to determine the strengths or weaknesses of the business.
- Understand the basic principles of business law, contracts and agency, intellectual property and product liability.
- Demonstrate proficiency in computer applications as required to operate and manage a small business.
- Examine management theory and practice, and explain basic business methodology and management issues.
- Be able to identify and analyze the marketing strategies of an organization that can be used to advance its mission.
- Understand the techniques useful in achieving full potential from limited resources and improving productivity and effectiveness.
- Integrate a variety of disciplines concurrently to achieve business success.

This program prepares students for employment and for transfer to four-year colleges and universities. The college has transfer articulation agreements with many of the four-year colleges and universities in the area. The College encourages students to meet with their advisors for additional information. This program makes a concentrated effort to demonstrate how the subject matter relates to the cultures of our diversified student population. The program places emphasis on student participation and creates an interactive forum in which to learn.

The Business Administration Department at Bunker Hill Community College is a collegial, student-centered learning community dedicated to providing an innovative, creative, and relevant education in business disciplines to a diverse student population. We strive to maximize student success by placing graduates in a competitive position when seeking employment in a business environment or upon transfer to a four-year academic institution, ultimately empowering them to compete responsibly and successfully in a global business environment.

OPTION OVERVIEW
This option allows students and graduates of North Bennet Street School’s two and three-year programs to learn entrepreneurial skills and build on their own capabilities while earning a college degree. Students will be able to transfer credit for courses to four-year colleges with entrepreneurial programs. Students learn business skills that could be combined with their specialized skills to create opportunities for self-employment or for career advancement and career mobility.

Students who wish to apply to admission to the Craft Entrepreneurship Degree Option must contact the Dean of Professional Studies in Room C309, Charlestown Campus.

CAREER OUTLOOK
This option prepares graduates to start and manage a small business, and to move into management and supervisory positions.

UPON COMPLETION OF THIS CONCENTRATION GRADUATES WILL BE ABLE TO:
- Analyze viability of opportunities from various points of view.
- Understand the leadership skills and personal characteristics needed for success in starting and managing a small business.
- Develop and implement a business plan.
- Prepare a set of financial statements for a service, merchandising or manufacturing business that is structured as a sole proprietorship, partnership or a corporation.
- Analyze a set of financial statements to determine strengths or weaknesses of the business.
- Understand the basic principles of business law, contracts and agency, intellectual property and product liability.
- Be able to identify and analyze the marketing strategies of an organization that can be used to advance its mission.
- Integrate a variety of discipies concurrently to achieve business success.

Criminal Justice Program

Continued from previous page

PROGRAM OVERVIEW
The Criminal Justice Program provides academically rigorous education to prepare students for careers in security, law enforcement, and corrections. Preparation is also provided for transfer to four-year programs and opportunities for professional development for those already employed in areas that are important in the Criminal Justice field.

In addition to specific content knowledge, students develop critical thinking, technological, cross-cultural and gender competencies, and ethical understanding and communication skills.

CAREER OUTLOOK
Graduates of this program qualify for entry-level positions in security, law enforcement, and corrections in local, state, and some federal law enforcement agencies.

UPON COMPLETION OF THIS CONCENTRATION GRADUATES WILL BE ABLE TO:

• Meet specific competencies in the following areas: ethics and professional responsibility; applying theory to policy and procedure; community involvement; constitutional issues; correctional institutions and processes; crime, justice and society; criminal justice administration; criminal law; forensics; innovations in police policy and management; issues of race, class, and gender; and researching criminal justice issues.

• Communicate effectively both orally and in writing.

• Use a computer to access data and information.

**PROGRAM OVERVIEW**

This weekend program prepares students with the basic skills and knowledge required for entry-level positions in the food service industry. The two-semester, 22-credit program is scheduled from September through May.

**CAREER OUTLOOK**

Graduates of this program qualify for a variety of entry-level positions in food production, including restaurant and institutional line cooking, pastry preparation, steward departments, and other related positions. Students also qualify to transfer all credits to the Associate in Science Degree: Culinary Arts Program.

For more information about our graduation rates, the median debt of students who completed the program, and other important information, please visit our website at www.bhcc.mass.edu/certificate-programs.

**UPON COMPLETION OF THIS CONCENTRATION GRADUATES WILL BE ABLE TO:**

- Demonstrate practiced and acquired technical skills in the usage of tools and equipment found in a typical food service/food production setting.
- Demonstrate the necessary administrative skills common to basic cost control and planning methods found in a typical commercial food service/food production setting.
- Demonstrate conceptual skills acquired through course work relative to planning a successful restaurant operation.
Culinary Arts Option

The mission of the Culinary Arts Program is to be a leader in Hospitality and Culinary Arts education and to develop future leaders for the Hospitality and Food Service industries. The Culinary Arts Program provides education for entry level careers in Restaurant Management, Food Service Management, and Culinary Arts. In addition, preparation for transfer to four-year, higher education programs and opportunities for professional development will be provided. Students will develop technological, communicative, critical thinking, quantitative, and human relation skills.

OPTION OVERVIEW
The Culinary Arts Option prepares students with an intensive, practical application of skills and decision making demanded by the culinary arts profession. The program provides a hands-on curriculum interwoven with operational procedures found in most food production and service venues. Students participate in the operation of a restaurant on campus and in an internship experience. The curriculum is based on American Culinary Federation standards.

CAREER OUTLOOK
Graduates of this program qualify for a variety of positions in hotels, restaurants, and resorts. Typically, these positions are in food production, shift supervision, and kitchen management. Students also qualify to transfer to four-year colleges or universities to pursue bachelor’s degrees.

UPON COMPLETION OF THIS CONCENTRATION GRADUATES WILL BE ABLE TO:

- Demonstrate practiced and acquired technical skills in the usage of tools and equipment found in a typical food service/food production setting.
- Demonstrate necessary administrative skills common to basic cost control and planning methods found in a typical commercial food service/food production setting.
- Demonstrate conceptual skills acquired through course work relative to planning a successful restaurant operation.

The mission of the Culinary Arts Program is to be a leader in Hospitality and Culinary Arts education and to develop future leaders for the Hospitality and Food Service industries. The Culinary Arts Program provides education for entry level careers in Restaurant Management, Food Service Management, and Culinary Arts. In addition, preparation for transfer to four-year, higher education programs and opportunities for professional development will be provided. Students will develop technological, communicative, critical thinking, quantitative, and human relation skills.

The Computer Information Technology Department (CIT) has a clear, well-articulated, three-pronged mission, which includes supporting the IT components of the college’s General Education offerings (across divisions, departments, and campuses, as well as through interdepartmental collaboration), preparing an IT workforce through certificate and associate degree offerings, and providing IT students with seamless transfer opportunities to related Baccalaureate Degree programs. The Computer Technology Program offers many courses that apply to other options to afford students the opportunity to explore the many career tracks in Information Technology before selecting a career in Computer Support, Data Base or Networking. The department’s goals are in concert with the college’s goals. Using input from its Industry Advisory Committees and internship course, the department is continually updating and fine tuning its programs of study.

### CAREER OUTLOOK
Graduates of this option may qualify for entry-level database programming and support positions in a wide range of organizations.

### OPTION OVERVIEW
The Database Programming and Administration option prepares students to gather data to determine user requirements and to design and program reports and forms so those users can create queries and interpret results. It also prepares students to determine necessary system changes, to create security procedures, and to implement backup and recovery processes.

Digital and Computer Forensics and Investigations Option

Continued from previous page

The Computer Information Technology Department (CIT) has a clear, well-articulated, three-pronged mission, which includes supporting the IT components of the college’s General Education offerings (across divisions, departments, and campuses, as well as through interdepartmental collaboration), preparing an IT workforce through certificate and associate degree offerings, and providing IT students with seamless transfer opportunities to related Baccalaureate Degree programs.

The Computer Technology Program offers many courses that apply to other options to afford students the opportunity to explore the many career tracks in Information Technology before selecting a career in Computer Support, Data Base or Networking. The Department’s goals are in concert with the College’s goals. Using input from its Industry Advisory Committees and internship course, the Department is continually updating and fine tuning its programs of study.

OPTION OVERVIEW
Digital and Computer Forensics is the name for a newly emerging field of study and practice that incorporates many areas of expertise including but not limited to internet, network and information security, intrusion detection, incident response, infrastructure protection, and computer crime investigation.

This program provides to Information Technology and Criminal Justice professionals the opportunity to obtain knowledge, training, and skills in Computer Forensics. Both civil and criminal offenders are using computers to commit crimes such as illegally downloading information, documents, or copyrighted materials, committing accounting fraud or releasing malicious code on computer networks to disrupt services. Internet crimes against children and other vulnerable populations have increased dramatically. Computers and other digital devices now play a part in many criminal activities. As a result, the need for computer forensics-based skills continues to grow.

CAREER OUTLOOK
This Associate Program is designed to align with the law enforcement, public safety, private industry and homeland security needs to ensure consistent, current and flexible training in the emerging technology field of Computer and Digital Forensics.

UPON COMPLETION OF THIS CONCENTRATION GRADUATES WILL BE ABLE TO:
- Image and analyze the evidence found on a hard drive including file system analysis.
- Demonstrate knowledge of the issues surrounding a digital investigation including evidence and court procedures and search and seizure laws and regulations.
- Analyze digital evidence including evidence found in the seizure of cell phones, PDAs and other mobile devices.

Note: Student may choose LCS that best fits his/her interests. Due to the prerequisite requirements, it may not be possible to complete this certificate program in one year.

**PROGRAM OVERVIEW**
This program prepares students as teachers and/or lead teachers in the State of Massachusetts. Students must meet additional experiential requirements by working in a licensed child care program during or after meeting the educational requirements for teacher and/or lead teacher certification.

**CRIMINAL OFFENDER RECORD INFORMATION AND SEX OFFENDER REGISTRY INFORMATION CHECKS**
As a prerequisite for a clinical placement in the Childhood Development Certificate Program, all students must undergo a Criminal Offender Record Information (CORI) check and a Sex Offender Registry Information (SORI) check. These checks are required due to potential unsupervised contact with children, the disabled, or the elderly during a clinical experience. Students found to have certain criminal convictions or pending criminal actions will be presumed ineligible for clinical placement. The College is authorized by the Commonwealth’s Department of Criminal Justice Information Services, pursuant to Massachusetts General Laws, Chapter 6, Sections 167-178 B, to access CORI records. Sex Offender checks shall be performed pursuant to Massachusetts General Laws, Chapter 6, Sections 178C-178P.

For more information regarding the College’s CORI/SORI check process, please contact the College CORI/SORI Officer at 617-228-2193.

**CAREER OUTLOOK**
Graduates of this program qualify as teacher’s aides in the State of Massachusetts. For more information on minimal requirements for employment, contact the Department chair.

For more information about our graduation rates, the median debt of students who completed the program, and other important information, please visit our website at www.bhcc.mass.edu/certificate-programs.

**UPON COMPLETION OF THIS CONCENTRATION GRADUATES WILL BE ABLE TO:**
- Use knowledge of child development and relationships with children and families to understand children as individuals and plan for their unique development by organizing environments which facilitate development in all developmental areas.
- Design and implement developmentally appropriate learning experiences using methods and materials which promote growth and development.
- Work with parents, families, and community leaders to support growth and development of children by engaging each child in meaningful experiences.
- Observe children in their care to analyze and synthesize information about those children so as to improve their work with children, families, and communities.
- Analyze, evaluate and strengthen their work with children by reflecting upon effective practices and collaborating with other professionals in the field.

Early Childhood Development Program

Continued from previous page

Students with credentials from the Council for Early Childhood Professional Recognition as a Child Development Associate (CDA) may apply for 6 credits in the associate degree program through the Prior Learning Assessment Program (PLAP). Students with credit for ECE223 and ECE224 may use these courses in place of ECE221 and a career elective. See Department Chair for details.

PROGRAM OVERVIEW

Early Childhood, Education and Human Services Department’s mission statement and goals state two primary purposes: 1) To provide knowledge, training and skill development for persons interested in working in the area of social services with specific educational opportunities for those interested in early childhood development, human services, and education, and 2) To serve the community as an information and knowledge-base in the area of social service, with specific expertise in early childhood education and development, human services, and education.

The Early Childhood Development Program prepares students in the fields of growth of the child, influences of the family upon the child, and environmental pressures upon the family.

CRIMINAL OFFENDER RECORD INFORMATION AND SEX OFFENDER REGISTRY INFORMATION CHECKS

As a prerequisite for a clinical placement in the Early Childhood Development program, all students must undergo a Criminal Offender Record Information (CORI) check and a Sex Offender Registry Information (SORI) check. These checks are required due to potential unsupervised contact with children, the disabled, or the elderly during a clinical experience. Students found to have certain criminal convictions or pending criminal actions will be presumed ineligible for clinical placement. The College is authorized by the Commonwealth’s Department of Criminal Justice Information Services, pursuant to Massachusetts General Laws, Chapter 6, Sections 167-178B, to access CORI records. Sex Offender checks shall be performed pursuant to Massachusetts General Laws, Chapter 6, Sections 178C-178P.

For more information regarding the College’s CORI/SORI check process, please contact the College CORI/SORI Officer at 617-228-2193.

CAREER OUTLOOK

Graduates of this program qualify for employment in a variety of settings, including day care centers, preschools, head start programs, family home care and social service organizations. Students also may transfer to four-year colleges or universities in elementary education, human services work, or special needs childcare. Graduates of this program qualify as teachers and/or lead teachers in the state of Massachusetts.

UPON COMPLETION OF THIS CONCENTRATION GRADUATES WILL BE ABLE TO:

• Use knowledge of child development and relationships with children and families to understand children as individuals and plan for their unique development by organizing environments which facilitate development in all developmental areas.

• Design and implement developmentally appropriate learning experiences using methods and materials which promote growth and development.

• Work with parents, families, and community leaders to support growth and development of children by engaging each child in meaningful experiences.

• Observe children in their care and be able to analyze and synthesize information about children so as to improve their own work with children, families, and communities.

• Analyze, evaluate and strengthen their work with children by reflecting upon effective practices and collaborating with other professionals in the field.

Note: Student may choose LCS that best fits his/her interests. Due to the prerequisite requirements, it may not be possible to complete this certificate program in one year.

ADMISSION REQUIREMENTS:
Must be 18 years of age
Must have completed 120 hours of formal college training in Early Childhood Education in subject areas covered by the ECDev Certificate
Within the past three years, must have completed 300 hours of professional work experience in a group setting supervised by a professional Early Childhood educator. (An additional 180 hours of practice will be required before application for the national credential is allowed. These hours will be completed in practicum course required by the certificate program).
Must submit to a CORI/SORI/fingerprinting (if required by the state) records check, as required
Other requirements as indicated by the CDA Council for Certification.

Students will be responsible for the cost of attaining credentialing and completing testing as required by the Council at the end of the program. Testing is done off-campus, currently at Pearson test sites in the Boston metro area.

CRIMINAL OFFENDER RECORD INFORMATION AND SEX OFFENDER REGISTRY INFORMATION CHECKS
As a prerequisite for a clinical placement in the Childhood Development Certificate Program, all students must undergo a Criminal Offender Record Information (CORI) check and a Sex Offender Registry Information (SORI) check. These checks are required due to potential unsupervised contact with children, the disabled, or the elderly during a clinical experience. Students found to have certain criminal convictions or pending criminal actions will be presumed ineligible for clinical placement. The College is authorized by the Commonwealth's Department of Criminal Justice Information Services, pursuant to Massachusetts General Laws, Chapter 6, Sections 167-178 B, to access CORI records. Sex Offender checks shall be performed pursuant to Massachusetts General Laws, Chapter 6, Sections 178C-178P.
For more information regarding the College’s CORI/SORI check process, please contact the College CORI/SORI Officer at 617-228-2193.

UPON COMPLETION OF THIS CONCENTRATION GRADUATES WILL BE ABLE TO:
- Use knowledge of child development and relationships with children and families to understand children as individuals and plan for their unique development by organizing environments which facilitate development in all developmental areas.
- Design and implement developmentally appropriate learning experiences using methods and materials which promote growth and development.
- Work with parents, families, and community leaders to support growth and development of children by engaging each child in meaningful experiences.
- Observe children in their care to analyze and synthesize information about those children so as to improve their work with children, families, and communities.
- Analyze, evaluate and strengthen their work with children by reflecting upon effective practices and collaborating with other professionals in the field.

CAREER OUTLOOK
Graduates of this program are academically qualified in the State of Massachusetts through the Department of Early Education and Care to be either teacher or lead teacher qualified once work experience is completed as required by the state. For more information contact the Department Chair.

CONCENTRATION OVERVIEW

Early Childhood, Education and Human Services Department’s mission statement and goals state two primary purposes: 1) To provide knowledge, training and skill development for persons interested in working in the area of social services with specific educational opportunities for those interested in early childhood development, human services, and education, and 2) To serve the community as an information and knowledgebase in the area of social service, with specific expertise in early childhood education and development, human services, and education.

The Education concentration prepares students seeking bachelor’s degrees in education or liberal arts to transfer to four-year colleges or universities. Graduates of this concentration may qualify to transfer using benefits of MassTransfer to a four-year state college or University of Massachusetts campus. For current information on eligible programs, visit www.mass.edu/masstransfer.

The A.A. Education Concentration is not to be followed by those seeking certification by the Massachusetts Department of Early Education and Care. If work in child care is desired, a student should enroll in the A.S. degree Early Childhood Development. For more information, contact the Department chair.

CRIMINAL OFFENDER RECORD INFORMATION AND SEX OFFENDER REGISTRY INFORMATION CHECKS

As a prerequisite for a clinical placement in this concentration, all students must undergo a Criminal Offender Record Information (CORI) check and a Sex Offender Registry Information (SORI) check. These checks are required due to potential unsupervised contact with children, the disabled, or the elderly during a clinical experience. Students found to have certain criminal convictions or pending criminal actions will be presumed ineligible for clinical placement. The College is authorized by the Commonwealth’s Department of Criminal Justice Information Services, pursuant to Massachusetts General Laws, Chapter 6, Sections 167-178B, to access CORI records. Sex Offender checks shall be performed pursuant to Massachusetts General Laws, Chapter 6, Sections 178C-178P.

For more information regarding the College’s CORI/SORI check process, please contact the College CORI/SORI Officer at 617-228-2193.

CAREER OUTLOOK

Graduates of this concentration may qualify to transfer to four-year colleges or universities as juniors. Potential teaching careers include teacher aide; early elementary, later elementary, middle school and high school teaching; preschool and kindergarten teaching; and special education teaching. Students must obtain a bachelor’s degree as the minimum requirement for entry into these fields. Graduate work may be necessary, as well.

UPON COMPLETION OF THIS CONCENTRATION GRADUATES WILL BE ABLE TO:

- Describe the interaction of history, culture, literature, economics, and science as studied within a broad liberal arts curriculum.
- Demonstrate a mastery in reading and writing/ literacy skills and the organization of critical thinking and problem solving behaviors.

Students enrolling in this degree program can earn World Studies Emphasis certification simultaneously. See page 214.
Electric Power Utility Program – A Partnership with EVERSOURCE

In partnership with EVERSOURCE and Local 369 UWUA, BHCC offers a two-year accredited Associate in Science Degree with a focus on Electric Power Utility Technology. Students receive much of their laboratory training at an EVERSOURCE facility. Most classroom course work takes place at BHCC. Students receive continuous hands-on training at EVERSOURCE labs and during required internships.

Electric Power Utility Technology (EPUT) Program Requirements

- Students in this program must earn a grade of C or higher in all the courses required by the program. Failure to meet this academic standard will result in withdrawal from the program. Courses with EPU, MAT, and PHY prefixes must be taken and completed in the sequence indicated in the program grid. Students in this program must successfully pass any random drug or alcohol screening tests mandated by EVERSOURCE during the program; successfully complete all appropriate Skills Aptitude Tests administered by EVERSOURCE; and maintain safety skills to EVERSOURCE criteria as per OSHA 1910 and OSHA 1926 directives.

- In addition to abiding by the BHCC Student Code of Conduct, EPUT students must also abide by all EVERSOURCE policies contained in the Student Progress Report, Good Standing Agreement, and the Student Guidelines for EVERSOURCE Labs and Coops. Students must abide by the EVERSOURCExCode of Conduct while on EVERSOURCE property.

- In the event of dismissal from the program, students will immediately be denied further entry/access to EVERSOURCE property and any courses taught at EVERSOURCE facilities.

- Students dismissed from the EPUT Program will no longer be eligible for financial support for their tuition and fees from EVERSOURCE.

- Re-instatement to the Program will be considered only for documented medical reasons. Extended absences due to illness must be reported immediately to EVERSOURCE and to the Office of Student Affairs at BHCC in writing.

- Students must petition for re-admission in writing, explaining their circumstances and providing appropriate documentation. To be considered for re-instatement students will be required to meet with a Board of EVERSOURCE and BHCC faculty and staff. Decisions will be made on a case by case basis. The decision of the Board will be final.

- EVERSOURCE reserves the right to withhold a job interview from any student who fails to complete the entire program successfully.

ADMISSIONS REQUIREMENTS:

Students must apply to the program through Admissions and Enrollment Services and:

- Complete the EVERSOURCE application.
- Possess a high school diploma or GED certificate.
- Complete Foundations of Algebra (MAT097) or place into Intermediate Algebra (MAT099).
- Complete Writing Skills II (ENG095) or place into College Writing I (ENG111).
- Achieve a reading level of 10th grade or higher on the College Placement Test (CPT).
- Qualified applicants undergo a Criminal Offender Record Information (CORI) check and a drug and alcohol test before being accepted to the program.
- Qualified applicants must pass additional physical and mechanical testing.

**CAREER OUTLOOK**

Based on a student’s grades, skills, and attitude, employment opportunities exist with Eversource or an Eversource qualified contractor upon graduation. Current starting hourly wage is $20-30 per hour and overtime is also compensated. Eversource offers a competitive and comprehensive benefits package including health and dental care, life insurance, 401K plan (including company matching program), as well as continuing education reimbursement.

**UPON COMPLETION OF THIS CONCENTRATION GRADUATES WILL BE ABLE TO:**
- Demonstrate practiced and acquired skills while working at Eversource in a variety of electrical and gas fields.
- Use a computer to access data and information.
- Communicate effectively both orally and in writing.
- Obtain licenses from Eversource.

**STUDENTS WILL EARN THE FOLLOWING CERTIFICATIONS:**
- OSHA 30 Certification.
- First Aid/CPR.
- CDL Pre-trip Training.
- DL Class A Drivers License.
- D.O.T. Medical Certification.
- Certification in Natural Gas Technology.
- EVERSOURCE Hoisting License.

**TOTAL CREDITS**

26-28

*Note: Students must be enrolled in the Energy and Sustainability Management Program, have completed a minimum of ten credits in ESM courses with a B average or higher or approval of Program Directors.**Note: Declared majors in Business Concentration, Management, and Finance options must take BUS101 as a prerequisite. Non-majors are eligible to take MAN111 without BUS101 as a prerequisite, but must meet other course prerequisites listed in the College catalog.
Energy and Sustainability Management Certificate Program

PROGRAM OVERVIEW
The design of the program is interdisciplinary, combining coursework in project management and finance for renewable and efficient energy projects with training in operating and maintaining environmentally friendly, healthy, and efficient buildings.

CAREER OUTLOOK
Graduates of the ESM program may seek employment in a variety of entry-level positions such as technicians, coordinators, administrators, sales representatives, or specialists in a wide range of industries including renewable energy, construction, facilities management, environmental protection services, energy efficient services, utilities, and industrial operations. In addition to earning BHCC’s ESM Certificate, graduates will qualify to sit for the Leadership in Environmental and Energy Design (LEED) Green Associate exam, a nationally recognized certification.

For more information about our graduation rates, the median debt of students who completed the program, and other important information, please visit our website at www.bhcc.mass.edu/certificate-programs.

This workforce solution is 100% funded by a grant awarded by the U.S. Department Labor, Employment and Training Administration, TAACCCT grant agreement # TC-22505-11-60-A25. The solution was created by the grantee and does not necessarily reflect the official position of the U.S. Department of Labor. The Department of Labor makes no guarantees, warranties, or assurances of any kind, express or implied, with respect to such information, including any information on linked sites and including, but not limited to, accuracy of the information or its completeness, timeliness, usefulness, adequacy, continued availability, or ownership. Massachusetts Community Colleges are equal opportunity employers. Adaptive equipment available upon request for persons with disabilities.

</table>

*Note: Career elective selection must be recommended and approved by the Engineering Advisor and/or the Science and Engineering Department. All science, engineering, and math courses that are pre or co-requisites of other science and engineering courses require a grade of C+ or better.

The Associate of Science in Engineering Program is offered as part of a response to the long-term shortage of skilled workers in the engineering workforce, and is consistent with the mission of the College. It is designed to meet the needs of BHCC students and to address the workforce demands of Greater Boston. The curriculum is structured to mirror the freshman and sophomore years of a university engineering degree. Accordingly, the Science and Engineering Department is developing articulation agreements with area universities to enable BHCC engineering graduates to transfer as juniors upon completing the Associate of Science degree. The curriculum offers two options: a Biomedical Engineering Option and an Engineering Transfer Option.

### OPTION OVERVIEW
This option provides students with the technical coursework and laboratory experience that enables them to succeed in undergraduate engineering programs. Students planning to transfer into Civil, Mechanical, Electrical, Structural, Materials, or other related engineering degree programs should enroll in this option. Upon graduation from BHCC, students are able to pursue further study at four-year colleges and universities.

### CAREER OUTLOOK
Graduates completing a four-year degree will have a strong engineering foundation and able to select from a variety of high demand fields for the balance of their training. Such high demand fields include Nanotechnology, Materials, and Robotics.

### UPON COMPLETION OF THIS CONCENTRATION GRADUATES WILL BE ABLE TO:
- Design and conduct experiments.
- Analyze and interpret data.
- Apply computational tools and scientific concepts to engineering problems.
- Design systems, components, or processes for solving engineering problems.
- Function as part of an engineering team.
- Articulate the professional and ethical responsibilities required of engineers.
## English Concentration

### Course Title | Course Number | Semester Taken | Credits | Prerequisites
--- | --- | --- | --- | ---
**General Education Courses**

LCS or Elective | see note* |  | 3 |
Elective |  |  | 3 |
**Total Credits** |  |  | 62 |

*Note: New students enrolled in 9 credits or more must take a Learning Community Seminar or a Learning Community Cluster within their first year.

### Concentration Overview
The English Department offers programs which qualify graduates to transfer to four-year institutions that prepare them for careers in teaching, journalism, public relations, and media communications. Students must complete a bachelor’s degree and teaching certificate to pursue a teaching career. A bachelor’s degree in English is a minimum requirement for entry level work in careers such as publishing, advertising, public relations, and journalism. The English concentration prepares students to transfer to four-year colleges or universities. Students who select this concentration may be particularly interested in pursuing a career in teaching or journalism. This concentration, however, would be of value in any career in which good communication skills are fundamental to success. Graduates of this concentration may qualify to transfer using benefits of MassTransfer to a four-year state college or University of Massachusetts campus. For current information on eligible programs, visit www.mass.edu/ masstransfer.

### Career Outlook
Graduates of this concentration qualify to transfer to four-year institutions that prepare students for careers in teaching, journalism, public relations, and media communications. Students must complete a bachelor’s degree and teaching certificate to pursue a teaching career. A bachelor’s degree in English is a minimum requirement for entry level work in careers such as publishing, advertising, public relations, and journalism. In order to advance in some fields, graduate work may be required.

### Upon Completion of This Concentration Graduates Will Be Able To:
- Demonstrate competence as a writer. Write for a variety of purposes, adapting to various audiences.
- Demonstrate proficiency in critical thinking.
- Demonstrate a basic understanding of a language other than English.
- Demonstrate strong interpersonal communication skills.

Students enrolling in this degree program can earn World Studies Emphasis certification simultaneously. See page 214.

TOTAL CREDITS 27

PROGRAM OVERVIEW
This program prepares students to understand the business issues, technical skills and other knowledge underlying success in entrepreneurial endeavors. All of the courses are part of the Entrepreneurship Option of the A.S. in Business Administration Degree and thus could be used to fulfill requirements of that program. The certificate could also be completed to supplement knowledge of those majoring in other disciplines such as information technology, hospitality, or culinary arts who may wish to start their own business.

CAREER OUTLOOK
This certificate prepares graduates to start and manage a small business, and to move into management and supervisory positions.
For more information about our graduation rates, the median debt of students who completed the program, and other important information, please visit our website at www.bhcc.mass.edu/certificate-programs.

UPON COMPLETION OF THIS CONCENTRATION GRADUATES WILL BE ABLE TO:
- Analyze viability of opportunities from various points of view.
- Understand the leadership skills and personal characteristics needed for success in starting and managing a small business.
- Develop and implement a business plan.
- Prepare a set of financial statements for a service, merchandising or manufacturing business that is structured as a sole proprietorship, partnership or a corporation.
- Analyze a set of financial statements to determine strengths or weaknesses of the business.
- Understand the basic principles of business law, contracts and agency, intellectual property and product liability.
- Demonstrate proficiency in computer applications as required to operate and manage a small business.
- Examine management theory and practice, and explain basic business methodology and management issues.
- Be able to identify and analyze the marketing strategies of an organization that can be used to advance its mission.
- Understand the techniques useful in achieving the full potential from limited resources and improving productivity and effectiveness.

Entrepreneurship Option

Continued from previous page

This program prepares students for employment and for transfer to four-year colleges and universities. The college has transfer articulation agreements with many of the four-year colleges and universities in the area. The College encourages students to meet with their advisors for additional information. This program makes a concentrated effort to demonstrate how the subject matter relates to the cultures of our diversified student population. The program places emphasis on student participation and creates an interactive forum in which to learn.

The Business Administration Department at Bunker Hill Community College is a collegial, student-centered learning community dedicated to providing an innovative, creative, and relevant education in business disciplines to a diverse student population. We strive to maximize student success by placing graduates in a competitive position when seeking employment in a business environment or upon transfer to a four-year academic institution, ultimately empowering them to compete responsibly and successfully in a global business environment.

OPTION OVERVIEW
This option allows individuals to learn entrepreneurial skills and build on their own capabilities while earning a college degree. Students will be able to transfer credit for courses to four-year colleges with entrepreneurial programs. Students learn business skills that could be combined with their specialized skills to create opportunities for self-employment or for career advancement and career mobility.

CAREER OUTLOOK
This option prepares graduates to start and manage a small business, and to move into management and supervisory positions.

UPON COMPLETION OF THIS CONCENTRATION GRADUATES WILL BE ABLE TO:
• Analyze viability of opportunities from various points of view.
• Understand the leadership skills and personal characteristics needed for success in starting and managing a small business.
• Develop and implement a business plan.
• Prepare a set of financial statements for a service, merchandising or manufacturing business that is structured as a sole proprietorship, partnership or a corporation.
• Analyze a set of financial statements to determine strengths or weaknesses of the business.
• Understand the basic principles of business law, contracts and agency, intellectual property and product liability.
• Demonstrate proficiency in computer applications as required to operate and manage a small business.
• Examine management theory and practice, and explain basic business methodology and management issues.
• Be able to identify and analyze the marketing strategies of an organization that can be used to advance its mission.
• Understand the techniques useful in achieving the full potential from limited resources and improving productivity and effectiveness.

Environmental Science
Continued from previous page

*Note: All science, engineering, and math courses that are pre- or co-requisites of other science and engineering courses require a grade of C+ or better.**Note: Career Electives include: any ESM Energy and Sustainability Management course, ENR101 “Introduction to Engineering”, CIT110 “Applications/Concepts”, MAT281 “Calculus I”, SCI221 “Interpretation of Scientific Research”. Any other courses must be approved by Program Director to be used as career elective.

*** Note: Choose two of the four prerequisite courses.

****Note: Completion or concurrent enrollment in General Biology II/Lab is recommended.

PROGRAM OVERVIEW
Environmental Science is an interdisciplinary field based on the interactions of living and non-living components of nature and with an emphasis on the interaction and impact humans have on the environment. Environmental Scientists examine the role of humans as agents of change with in the environment as a means to better understand causes and effects of issues that threaten the sustainability of the environment and human health.

CAREER OUTLOOK
This program will allow students to transfer to four-year colleges and universities to seek a bachelor’s degree in environmental science or studies.

UPON COMPLETION OF THIS PROGRAM, GRADUATES WILL BE ABLE TO:
• Use currently accepted biological, chemical, and physical concepts to investigate problems and issues in the environment.
• Identify and implement environmental sustainability or energy efficiency strategies within their workplace, home, or community taking into consideration factors such as project impact, cost effectiveness, and technical feasibility.
• Explain and apply the underlying concepts of current topics in environmental science and sustainability.

**PROGRAM OVERVIEW**

This certificate is designed to prepare students for entry-level positions in Excel support. All courses are offered web-based to provide maximum scheduling flexibility for students, and most are offered in the traditional classroom setting each term. This certificate program is open to all CIT, BUS, OIM and other students.

**CAREER OUTLOOK**

Most organizations, across all industry segments have increased utilization of Excel software. As a result, the employment prospects for students completing this certificate program are extremely high. Over 1,500 requests for Excel skills can be found through Boston-area searches of job placement websites.

For more information about our graduation rates, the median debt of students who completed the program, and other important information, please visit our website at www.bhcc.mass.edu/ certificate-programs.

**UPON COMPLETION OF THIS CONCENTRATION GRADUATES WILL BE ABLE TO:**

- Use spreadsheet models, analyze and evaluate revenues, expenses and cash flows.
- Understand and utilize collaboration techniques of the Microsoft Office Suite.
- Understand the requirements of securing data and computer systems.

This program prepares students for employment and for transfer to four-year colleges and universities. The college has transfer articulation agreements with many of the four-year colleges and universities in the area. The College encourages students to meet with their advisors for additional information. This program makes a concentrated effort to demonstrate how the subject matter relates to the cultures of our diversified student population. The program places emphasis on student participation and creates an interactive forum in which to learn. The Business Administration Department offers eight academic programs, placing graduates in a competitive position when seeking employment or transferring to four-year academic institutions. Students qualify for entry-level positions within their areas of concentration.

The Business Administration Department at Bunker Hill Community College is a collegial, student-centered learning community dedicated to providing an innovative, creative, and relevant education in business disciplines to a diverse student population. We strive to maximize student success by placing graduates in a competitive position when seeking employment in a business environment or upon transfer to a four-year academic institution, ultimately empowering them to compete responsibly and successfully in a global business environment.

**OPTION OVERVIEW**

This option prepares students with general workforce skills and specialized educational training for entry-level positions in financial services, investment banking, financial planning, budgeting, and/or administration.

**CAREER OUTLOOK**

This option qualifies graduates for a variety of positions in banking, insurance, finance, brokerage, and mutual fund operations.

**UPON COMPLETION OF THIS CONCENTRATION GRADUATES WILL BE ABLE TO:**
- Understand the process of preparing a budget and recognize the value it provides the end-user.
- Analyze the many choices available to the investor and recognize the importance of diversifying investment options.
- Evaluate sets of financial statements using financial ratios and draw accurate conclusions as to the strengths or weaknesses of the concern.
- Understand the mutual fund industry in order to design a comprehensive portfolio for a wide range of investors.

## CONCENTRATION OVERVIEW

This concentration prepares students to transfer to four-year colleges or universities offering fine arts degrees. Graduates of this concentration may qualify to transfer using benefits of MassTransfer to a four-year state college or University of Massachusetts campus. For current information on eligible programs, visit www.mass.edu/masstransfer.

## CAREER OUTLOOK

Graduates of this concentration qualify to transfer to bachelor’s degree-granting colleges or universities. Potential careers in the visual arts, which vary according to the chosen major, include teaching, museum work, illustration, medical and scientific illustration, advertising and printing, photography, and merchandise display. A bachelor’s degree is the minimum requirement for entry into these fields. Graduate work may be necessary, as well.

## UPON COMPLETION OF THIS CONCENTRATION GRADUATES WILL BE ABLE TO:

- Develop a portfolio in preparation for transfer to a four-year college or university.
- Demonstrate proficiency in the techniques of drawing and painting.
- Demonstrate a basic understanding of color theory.

Students enrolling in this degree program can earn World Studies Emphasis Certification simultaneously. See page 214.

**PROGRAM DESCRIPTION**

This program prepares students for transfer into a four-year studio intensive program in Fine Arts. A fine arts education provides students with a highly versatile skill set that can be translated into successful careers within and outside of the arts. Gaining technical mastery over the foundational basic elements of art and principles of design provides them the flexibility to produce compelling artwork in any medium; skills with obvious, translatable commercial value.

**CAREER OUTLOOK**

Career tracks include: Fine Arts, Commercial Arts, Graphic Design, Photography, Sculpture/3-D Designer, Illustration, Animation, Filmmaker, Videography, Architecture/Interior Architecture, Fashion Designer, Art Therapy, Art Education, Art Criticism and Theory, Art Historian, Art Critic, Curator, Gallerist/Art Dealer, Video Game Designer, Audio/Visual Artist, Audio Technician, Web Designer, Display Designer, Product Designer and the list can go on. Students of all these tracks receive the same foundational curriculum within a typical Four-Year Art College.

**PROGRAM OBJECTIVES**

Building foundational skills such as: observational drawing, principles of design, color theory, concept development. production of a portfolio for acceptance/advanced placement into a four-year studio intensive B.F.A program.

*Note: Choose one career elective if FPS 111 has been completed. If FPS 111 has been waived, choose two career electives from the following career electives: FPS121, FPS125, FPS127, FPS137, FPS221, FPS225 and FPS227.

### PROGRAM OVERVIEW

This program prepares students with practical and technical information and instruction. Students may include both potential fire fighters and in-service fire fighters wishing to upgrade their career status. A certificate in fire protection and safety may lead to higher scores on promotional examinations. This program is offered in the afternoon and evening.

### CAREER OUTLOOK

Graduates of this program qualify for careers in municipal, state and federal agencies, industry, and insurance companies. Graduates also qualify to transfer to the two-year Associate in Science Degree: Fire Protection and Safety. This program also prepares fire fighters who wish to upgrade their career status.

For more information about our graduation rates, the median debt of students who completed the program, and other important information, please visit our website at www.bhcc.mass.edu/certificate-programs.

### UPON COMPLETION OF THIS CONCENTRATION GRADUATES WILL BE ABLE TO:

- Understand the principles of fire protection and safety.
- Demonstrate preparedness to be a fire company officer.
- Understand the principles of arson investigation (see FPS209).
- Demonstrate familiarity with inspections for fire prevention.
- Demonstrate preparedness to take promotional civil service fire exams.

This program is offered in the late afternoon and evening.

PROGRAM OVERVIEW
This program prepares students with practical and technical information and instruction. Students may include both potential fire fighters and in-service fire fighters wishing to upgrade their career status. An associate degree in fire protection and safety may lead to higher scores on promotional examinations.

CAREER OUTLOOK
Graduates of this program qualify for careers in municipal, state and federal agencies, industry, and insurance companies. Graduates also qualify to transfer to four-year colleges or universities in fire protection and safety. This program also prepares fire fighters who wish to upgrade their career status.

UPON COMPLETION OF THIS CONCENTRATION GRADUATES WILL BE ABLE TO:
- Understand the principles of fire protection and safety.
- Demonstrate preparedness to be a fire company officer.
- Understand the principles of arson investigation.
- Demonstrate familiarity with inspections for fire prevention.
- Demonstrate preparedness to take promotional civil service fire exams.

Note: Students must enter with elementary level proficiency.

*Note: Students are encouraged not to take elementary foreign language courses in their native language.

Note: New students enrolled in 9 credits or more must take a Learning Community Seminar or a Learning Community Cluster within their first year.

To enter this program, students should have completed study of at least one foreign language at an elementary level (First Foreign Language in grid).

**CONCENTRATION OVERVIEW**

The mission of the Foreign Language Department at Bunker Hill Community College is to expose students to a language and culture in order to enable them to become knowledgeable and active members of a global society. Students learn to use modern foreign languages for meaningful communication in both spoken and written form. Students completing classes in the Foreign Language Program will gradually achieve course-appropriate outcomes in the four basic language skills of speaking, listening comprehension, reading and writing of the target language. Through foreign language study, students develop sensitivity to other cultural and linguistic heritages, and are prepared to participate in a society characterized by linguistic and cultural diversity.

The Foreign Language concentration prepares students to transfer to four-year colleges or universities with a major in a foreign language. Graduates of this concentration may qualify to transfer using benefits of MassTransfer to a four-year state college or University of Massachusetts campus.

For current information on eligible programs, visit www.mass.edu/masstransfer.

**CAREER OUTLOOK**

Graduates of this concentration often qualify for careers that require bilingual skills.

**UPON COMPLETION OF THIS CONCENTRATION GRADUATES WILL BE ABLE TO:**

- Demonstrate the basic skills for understanding and speaking a foreign language.
- Read and comprehend simple selections in a foreign language.
- Express their thoughts and ideas in writing in an uncomplicated manner in a foreign language.

Students enrolling in this degree program can earn World Studies Emphasis certification simultaneously. See page 214.

* Note: Select the career elective from the Computer Media Technology or Visual Media Arts department.

The Computer Media Technology program provides students in the design, development, and production skills necessary for entry into the Computer Gaming Industry and the Computer Simulation industry. Students will satisfy the requirements of this program by completing a succession of General Education courses and Gaming/Simulation specific courses as well as elective courses from within the program disciplines. Graduates of this program will qualify for entry-level positions in the computer Gaming and Computer Simulation industries.

OPTION OVERVIEW

This program option is designed to appeal to those students that have a preference for the artistic side of game and computer simulation development such as scene lighting, creating customized 3D texture maps, customized shaders, diffuse shaders, sky boxes and bump maps. This option will also instruct students in the fundamentals of 3D Game/Simulation design, development and production construct, shape, texture, and animate 3D objects and characters in a computer game environment. The program also teaches students the techniques and skills required to incorporate depth, lights, textures and 3D liquids into the 3D game to simulate real-world situations.

CAREER OUTLOOK

Students completing this program qualify for entry level positions in local and national gaming and computer simulation companies. The career outlook for computer gaming/simulation opportunities is projected to grow at a rapid rate in the coming years. The inclusion of computer generated graphics in movies, television, educational tutorials and social media have made this career choice very attractive.

UPON COMPLETION OF THIS CONCENTRATION GRADUATES WILL BE ABLE TO:

- Create game characters.
- Create custom textures for clothing, surfaces and environmental objects.
- Create 3D objects as game constructs.
- Create 3D lakes, rivers, streams, beverages, soft candy products and liquefied solids to name a few.
- Effectively light and shade the game scene.
- Manage the game development process.

OPTION OVERVIEW
This program option prepares students in the fundamentals of 3D game/Simulation design, development and production with a focus towards control and construction of gaming components through the use of scripting and programming languages. The programming focus will concentrate on using coding language skills to animate, construct and schedule user interface actions in a game or simulation environment. Students also learn how to utilize state-of-the-art modeling software to create, construct, shape, texture and animate 3D objects and characters in a computer game environment. The program also teaches students techniques and skills required to incorporate depth, lights, textures and 3D liquids into the 3D game to simulate real-world situations. Students are also instructed in the techniques and tools of game program development, management and scheduling techniques.

CAREER OUTLOOK
Students completing this program qualify for entry level positions in local and national gaming and computer simulation companies. The career outlook for computer gaming/simulation opportunities is projected to grow at a rapid rate in the coming years. The inclusion of computer generated graphics in movies, television, educational tutorials and social media have made this career choice very attractive.

PROGRAM OVERVIEW
The Gaming/Computer Simulation in Entrepreneurship Certificate will prepare students in the fundamentals of game/simulation design, development and production and in tandem, will allow individuals to acquire practical entrepreneurial skills. Students will learn the techniques and tools of game program management and will learn to combine these skills with business skills to create opportunities for self-employment potentially leading to starting a gaming company, or the certificate will better prepare them for further career advancement and mobility within the gaming industry.

CAREER OUTLOOK
Students completing this certificate can expect to be qualified for positions in gaming companies or further, be positioned to explore the option of starting their own gaming company. The computer gaming/simulation industry is rapidly growing providing ample opportunities for the gaming professional.

For more information about our graduation rates, the median debt of students who completed the program, and other important information, please visit our website at www.bhcc.mass.edu/certificate-programs.

UPON COMPLETION OF THIS CONCENTRATION GRADUATES WILL BE ABLE TO:
- Analyze viability of business opportunities in the gaming industry from various points of view.
- Create game characters, 3D objects as game constructs, and animate the game scene.
- Develop and implement a business plan designed to manage a game development venture.
- Evaluate the feasibility of gaming ideas and identify the industry factors leading to business opportunity.
Gas Utility Technology Degree Option Program

A collaboration with Feeney Brothers Excavation, LLC

In collaboration with Feeney Brothers Excavation, LLC, 103 Clayton Street, Dorchester, MA, Bunker Hill Community College (BHCC) offers a two year accredited Associate in Science degree option with a focus on Gas Utility Technology. Students receive much of their laboratory training at Feeney Brothers Excavation’s Dorchester Training Facility. Most classroom courses will take place at BHCC. Students receive continuous hands-on training at Feeney Brothers Excavation, LLC’s labs and during a required internship.

Gas Utility Power Technology (GUT) Degree Option Program Requirements:

Students in the GUT degree option program must earn a C or higher in all the courses required by the program. Failure to meet this academic standard will result in withdrawal from the program. Courses with ENR, GUT, MAT, and PHY prefixes must be taken and completed in the sequence indicated in the program grid.

Students in this degree option program must successfully pass any pre-employment and random drug or alcohol screening tests mandated by Feeney Brothers Excavation, LLC; successfully complete all Operator Qualification Testing administered by the Northeast Gas Association; maintain safety skills per PHMSA, MUTDC, OSHA 1910 and OSHA 1926 regulations; and pass the First Aid/CPR test.

In addition to abiding by the BHCC Student Code of Conduct, GUT students must also abide by all Feeney Brothers Excavation, LLC’s policies including but not limited to the Student Progress Report, Student Guidelines for Feeney Brothers Excavation’s labs and internships, and employee policies while employed by Feeney Brothers Excavation.

In the event of dismissal from the GUT degree option program, students will immediately be denied further entry/access to Feeney Brothers Excavation, LLC’s property and any courses taught at Feeney Brothers Excavation, LLC.

Admissions Requirements:

- Students must apply to the Gas Utility Technology degree program through Enrollment Management and Admissions and: Complete a Feeney Brothers Excavation, LLC application which may be found at www.feeneybrothers.com.
- Possess a high school diploma or GED.
- Applicants must have the legal right to work in the United States.
- Complete Intermediate Algebra (MAT 099) or place into MAT 193.
- Complete Writing Skills (ENG 095) or place into College Writing I (ENG 111).
- Achieve a reading level of 10th grade or higher on the College Placement Test (CPT).
- Participating in internships as an employee of Feeney Brothers Excavation is a requirement of the program. As a result of this requirement, offers of acceptance into the program are conditioned on successfully passing a Criminal Offender Record Information (CORI) check and pre-employment drug and alcohol test conducted by Feeney Brothers Excavation.
- Qualified applicants must interview with Feeney Brothers and Bunker Hill Community College staff and pass additional physical and mechanical testing before being accepted into the program.

Continued on following page
OPTION OVERVIEW
The Gas Utility Technology Degree Option Program (GUT) is comprised of courses that will prepare students to obtain a laborer position with utility firms doing business in Massachusetts as well as out-of-state utility firms. In addition to lectures by subject area experts, the GUT courses include a lab component that provides hands-on demonstrations and opportunities to perform industry specific tasks to demonstrate competency under the supervision of faculty mentors. Students are exposed to the local, state and federal regulations and laws governing the utilities industry. Throughout the curriculum, students are required to successfully complete gas specific performance skills testing, proctored by the National Gas Association, leading to the acquisition of 43 - 50 Operator Qualifications. Additionally, students will be required to ensure job safety through safe housekeeping practices and the successful completion of a CPR/First Aid license exam.

To ensure students are prepared for advancement in the utility industry, a leadership course is required to complete the program.

Upon completion of the program, students will be prepared to enter the workforce as laborers in the utility industry.

CAREER OUTLOOK
Workforce shortages are predicted to occur both in Massachusetts and at out-of-state utilities. Based on the student’s grades, skills, and attitude, employment opportunities exist with Feeney Brothers Excavation LLC and other utility companies upon graduation. Current starting salary for laborers ranges from $32,000 - $45,000, and overtime is also compensated. There are opportunities for advancement to Gas Utility Operator ($46,000-$80,000), Gas Utility Foreman ($50,000-$90,000) and Gas Utility Supervisor ($52,000-$95,000).

UPON COMPLETION OF THIS CONCENTRATION GRADUATES WILL BE ABLE TO:

• Explain the history and current state of the communication (fiber optics), electric, natural gas, steam and condensate, and water and sewer utilities.
• Demonstrate safe operation of heavy duty equipment and specialized tools through knowledge acquired in the lab.
• Successfully complete gas specific performance skills testing leading to the acquisition of 43 - 50 Operator Qualifications.
• Successfully complete an examination for CPR/First Aid.
• Demonstrate the ability to work in teams to accomplish a firm’s objectives.
• Apply local, state and federal regulations and statutes to ensure regulatory compliance at job sites.
• Identify hazards and unsafe conditions at a job site and initiate corrective action in a timely manner.
• Utilize an understanding of electricity by applying risk assessment and taking remedial action as appropriate in situational analysis.
• Conduct research on current events, create a PowerPoint presentation, and articulate in a clear and concise manner how natural gas is transforming the way the world uses energy.
• Demonstrate the ability to use critical thinking skills, communicate effectively and collaborate with team members to

*Note: New students enrolled in 9 credits or more must take a Learning Community Seminar or a Learning Community Cluster within their first year.

Students should consult their intended transfer institution to determine appropriate electives for this program. A two-semester language sequence is recommended for two of the electives.

**CONCENTRATION OVERVIEW**

This concentration prepares students who have not yet chosen a major field of study to transfer to four-year colleges or universities. The college encourages students to take electives in disciplines in which they may major at a four-year institution. Graduates of this concentration may qualify to transfer using benefits of MassTransfer to a four-year state college or University of Massachusetts campus.

For current information on eligible programs, visit www.mass.edu/masstransfer.

**CAREER OUTLOOK**

Graduates of this concentration qualify for a variety of careers depending upon the chosen major. A bachelor’s degree is the usual minimum requirement for entry into most fields. Graduate work may be necessary, as well.

**UPON COMPLETION OF THIS CONCENTRATION GRADUATES WILL BE ABLE TO:**

- Describe the interaction of history, culture, literature, economics, and science as studied within a broad liberal arts curriculum.
- Demonstrate skills as critical thinkers, readers, and writers.
- Demonstrate competence in basic computer use.
- This program also is available through the Weekend College Program.

Students enrolling in this degree program can earn World Studies Emphasis certification simultaneously. See page 214.

General Sonography Option

Continued from previous page

OPTION OVERVIEW
This program prepares students to pursue careers and registry status in diagnostic medical sonography through comprehensive instruction and clinical experience. The program covers ultrasound physics, abdominal sonography, obstetrical and gynecological sonography, sonographic subspecialties, and cross-sectional anatomy.

CRIMINAL OFFENDER RECORD INFORMATION AND SEX OFFENDER REGISTRY INFORMATION CHECKS
As a prerequisite for a clinical placement in the General Sonography Option, all students must undergo a Criminal Offender Record Information (CORI) check and a Sex Offender Registry Information (SORI) check. These checks are required due to potential unsupervised contact with children, the disabled, or the elderly during a clinical experience. Students found to have certain criminal convictions or pending criminal actions will be presumed ineligible for clinical placement. The College is authorized by the Commonwealth’s Department of Criminal Justice Information Services, pursuant to Massachusetts General Laws, Chapter 6, Sections 167-178B, to access CORI records. Sex Offender checks shall be performed pursuant to Massachusetts General Laws, Chapter 6, Sections 178C-178P.

For more information regarding the College’s CORI/SORI check process, please contact the College CORI/SORI Officer at 617-228-2193.

CAREER OUTLOOK
Graduates of this option qualify for employment in hospitals, HMOs, clinics, doctors’ offices, mobile units, community health agencies, equipment/film companies, and/or as application specialist sales representatives.

UPON COMPLETION OF THIS CONCENTRATION GRADUATES WILL BE ABLE TO:
• Recognize and identify the sonographic appearance of normal anatomic structures and Doppler flow patterns.
• Utilize ultrasound equipment to obtain an image and provide physicians with diagnostic information for treatment.
• Understand the role of ultrasound in patient management and discuss the biologic effects of ultrasound.
• Apply to take the national registry exam (ARDMS).

**OPTION OVERVIEW**

This program introduces students to the aesthetics, materials, and methods of effective visual communication for commercial art and design. The program combines theoretical elements with practical experience, up-to-date technologies, and professional equipment to give students a complete knowledge and understanding of career options, requirements, and responsibilities. Students may take elective courses in options other than their own, as scheduling permits. Because courses are offered sequentially, students must take courses in the appropriate semester.

**CAREER OUTLOOK**

Graduates of this program qualify for job opportunities in advertising, communications, marketing, packaging, publishing, and in companies using printed and electronic materials in their product or in the promotion of that product.

**UPON COMPLETION OF THIS CONCENTRATION GRADUATES WILL BE ABLE TO:**

- Demonstrate proficiency in basic visual design skills and production skills.
- Demonstrate proficiency in basic computer operation and page layout software applications.
- Demonstrate proficiency in drawing and image software applications.
- Use the Internet and integrate Internet text and images in media.
- Demonstrate their understanding of paper, finishing, printing processes, and the distribution or delivery process.

*******Note: CIT279 is the equivalent to Cisco’s CCNA Security

**Program Overview**

In addition to the BHCC CCNA R and S (Cisco Certified networking Associate - Routing and Switching) certificate courses, students earn an advanced BHCC Cisco networking certificate. Students will enhance their core routing and switching skills and gain the networking and security skills needed to work in industry and the health care fields. The Health Information Networking certificate program is designed for students who hope to expand their networking skills with healthcare information and communication technology (ICT) and for students seeking career-oriented, entry-level networking and security specialist skills.

**Career Outlook**

The Health Information Networking Program helps students prepare for entry-level specialized ICT and networking careers in the healthcare industry, including network administrator and health network technician, careers in physician offices and hospitals, and with third-party contractors and healthcare providers. Students also gain the knowledge and skills needed to prepare for entry-level security specialist careers and networking careers in industry and will be prepared to take multiple industry certificate exams.

For more information about our graduation rates, the median debt of students who completed the program, and other important information, please visit our website at www.bhcc.mass.edu/certificate-programs.

**Upon Completion of this Concentration Graduates will be able to:**

- Apply for entry-level networking positions.
- Apply for entry-level network security specialist careers.
- Apply for entry-level network and network security positions in the healthcare industry.
- Prepare to take the Cisco CCNA R and S Certification Examination(s).
- Prepare to take the Comp TIA A+ Certification Examination(s).
- Prepare to take the Cisco IOS® Network Security (IINS) Certification Examination.

**PROGRAM OVERVIEW**

The Health Information Technology (HIT) Certificate Program is designed for students who wish to enter the Healthcare IT field and for current healthcare workers who wish to apply Healthcare IT competencies to their current position. The program will provide students with the knowledge and skills concerning Healthcare IT privacy, security, networking, and mobility to successfully understand the Healthcare IT industry and provide hardware and software support in the healthcare environment. Students will also gain the skills in health information management and workflow analysis needed to utilize Healthcare IT effectively to manage patient care, improve communications, and support information sharing. The Health Information Technology (HIT) Certificate Program is designed to be "Stackable", allowing students to apply completed courses to IT degrees and additional IT certificates, such as the Health Information Networking Certificate.

**CAREER OUTLOOK**

The Health Information Technology Certificate Program prepares students for entry-level Healthcare IT careers in a variety of healthcare settings including physician offices, clinics, hospitals, and with third-party contractors. Students also gain the knowledge and skills needed to achieve the national Health Information Technology competencies and will be prepared to take multiple IT certification exams. For more information about our graduation rates, the median debt of students who completed the program, and other important information, please visit our website at www.bhcc.mass.edu/certificate-programs.

**UPON COMPLETION OF THIS PROGRAM, GRADUATES WILL BE ABLE TO:**

- Apply for entry-level Healthcare IT positions.
- Apply for entry-level Healthcare IT Systems Support positions.
- Apply for entry-level Healthcare Hardware/Software Support positions.
- Apply for entry-level Healthcare Network Support positions.
- Achieve the national Healthcare Technology and Information Management competencies.
- Apply Healthcare IT competencies to current Healthcare positions.
- Prepare to take the CompTIA A+ Certification Examination(s).
- Prepare to take the Cisco CCENT Certification Examination.

History and Government Concentration

Continued from previous page

CONCENTRATION OVERVIEW

This concentration prepares students to transfer to four-year colleges or universities and provides a foundation for advanced studies for students who major in history or political science. Graduates of this concentration may qualify to transfer using benefits of MassTransfer to a four-year state college or University of Massachusetts campus.

For current information on eligible programs, visit www.mass.edu/masstransfer.

CAREER OUTLOOK

Graduates of this concentration may qualify to transfer to four-year colleges or universities as juniors. The concentration is excellent preparation for careers in law, teaching, government, museums, or similar public service fields.

A bachelor’s degree is the minimum requirement for entry into many of these fields.

Graduate work may be necessary, as well.

UPON COMPLETION OF THIS CONCENTRATION GRADUATES WILL BE ABLE TO:

- Understand how societies change over time and the implications for today.
- Understand the social, political and economic developments of specific societies at specific moments in history.
- Use the critical thinking and writing skills developed in the classroom in a variety of academic and employment situations.

Students enrolling in this degree program can earn World Studies Emphasis certification simultaneously. See page 214.

PROGRAM OVERVIEW

The mission of the Hospitality Management programs is to be a leader in programs providing education for entry level careers in Hotel and Restaurant Management and Meeting and Event Planning Management. In addition, Preparation for transfer to four year, higher education programs and opportunities for professional development will be provided. Students will develop technological, communicative, critical thinking, quantitative, and interpersonal skills.

This option prepares students in skills training and decision making in such crucial areas as guest services, human resources, and hotel and restaurant operations. A variety of teaching methods lead students to a better understanding of the importance of the hotel and restaurant industry as an economic growth vehicle and as a method of working with a culturally diverse workforce.

CAREER OUTLOOK

Graduates of this option qualify for entry level managerial positions as well as for management training programs in hotels and restaurants. Students also qualify to transfer all credits to the Associate in Science Degree in Hotel and Restaurant Management.

For more information about our graduation rates, the median debt of students who completed the program, and other important information, please visit our website at www.bhcc.mass.edu/ certificate-programs.

UPON COMPLETION OF THIS CONCENTRATION GRADUATES WILL BE ABLE TO:

- Perform technical skills in basic cooking and kitchen operations, basic skills in front desk, reservations and housekeeping procedures.
- Perform administrative skills in basic business bookkeeping procedure, business cost controls, and planning and coordinating hotel and restaurant operations.
- Demonstrate conceptual skills necessary to understanding the needs of the hotel and restaurant industry.

Hotel/Restaurant Management Option

Continued from previous page

This program prepares students in three options: Hotel and Restaurant Management, Management of Assisted Living and Institutional Facilities and Meeting and Event Planning. The program prepares students in a variety of industry-oriented learning settings and a variety of teaching and learning environments that reflect the unique circumstances of the hospitality industry. Well-trained graduates are in great demand, with opportunities to advance, based upon their technical and critical thinking skills.

OPTION OVERVIEW

The mission of the Hospitality Management programs is to be a leader in programs providing education for entry level careers in Hotel and Restaurant Management and Food Service Management. In addition, preparation for transfer to four-year, higher education programs and opportunities for professional development are provided. Students develop technological, communicative, critical thinking, quantitative, and interpersonal skills.

This option prepares students in skills training and decision making in such crucial areas as guest services, human resources, and hotel and restaurant operations. A variety of teaching methods lead students to a better understanding of the importance of the tourism industry as an economic growth vehicle and as a method of working with a culturally diverse workforce.

CAREER OUTLOOK

Graduates of this option qualify for many supervisory and managerial positions as well as for management training programs in nationally recognized hotels and restaurants. Students also qualify to transfer to four-year college or university programs in Hotel/Restaurant Management.

UPON COMPLETION OF THIS CONCENTRATION GRADUATES WILL BE ABLE TO:

- Perform technical skills in basic cooking and kitchen operations, basic skills in front desk, reservations and housekeeping procedures.
- Perform administrative skills in basic business bookkeeping procedure, business cost controls, and planning and coordinating hotel and restaurant operations.
- Demonstrate conceptual skills necessary to understanding the interrelationship of the component parts of the travel and tourism/hospitality industry.

*Note: New students enrolled in nine credits or more must take a Learning Community Seminar or a Learning Community Seminar within their first year.

Career Electives: HSV215, HSV219, PSY233, AHE104, PSY227 or INT123

**Note: A placement experience in a human service agency is required by the course following a C.O.R.I. background check. The prerequisite for Associate degree students is a grade of C or better in College Writing II and a minimum of 27 credits completed toward the A.S. in Human Services including, at a minimum, a grade of C or better in HSV101, HSV112, PSY215, and PSY224. Also, HSV216 is to be taken the semester before enrolling in HSV220.
Human Services Program

Continued from previous page

PROGRAM OVERVIEW
Early Childhood Education and Human Services Department’s mission statement and goals state two primary purposes:

To provide knowledge, training and skill development for persons interested in working in the area of social services with specific educational opportunities for those interested in early childhood development, human services, and education, and

To serve the community as an information and knowledge-base in the area of social service, with specific expertise in early childhood education and development, human services, and education.

This program prepares students as assistants and paraprofessionals in careers that direct the delivery of services to people.

CRIMINAL OFFENDER RECORD INFORMATION AND SEX OFFENDER REGISTRY INFORMATION CHECKS
As a prerequisite for a clinical placement in the Human Services Program, all students must undergo a Criminal Offender Record Information (CORI) check and a Sex Offender Registry Information (SORI) check. These checks are required due to potential unsupervised contact with children, the disabled, or the elderly during a clinical experience. Students found to have certain criminal convictions or pending criminal actions will be presumed ineligible for clinical placement. The College is authorized by the Commonwealth’s Department of Criminal Justice Information Services, pursuant to Massachusetts General Laws, Chapter 6, Sections 167-178B, to access CORI records. Sex Offender checks shall be performed pursuant to Massachusetts General Laws, Chapter 6, Sections 178C-178P.

For more information regarding the College’s CORI/SORI check process, please contact the College CORI/SORI Officer at 617-228-2193.

CAREER OUTLOOK
Graduates of this program qualify for careers in social welfare, mental health, community development, public administration, youth work, work with elderly, family counseling and social service agencies.

UPON COMPLETION OF THIS CONCENTRATION GRADUATES WILL BE ABLE TO:
• Use formal and informal assessment practices to respond to the needs, desires, and interests of participants receiving information and support from a Human Service organization, enhancing the persons’ ability to lead a self-determining life.
• Communicate effectively and demonstrate skills needed to establish collaborative relationships with participants receiving services.
• Demonstrate knowledge about formal and informal supports available, as well as diverse challenges facing participants, using advocacy strategies to overcome these challenges by mobilizing resources to reach participant goals.
• Demonstrate knowledge and skill in handling crisis prevention, intervention, and resolution techniques with detailed documentation of the work in a human services agency.
• Understand the mission and practices of human services organizations, fully participating in the life of the agency as a professional and be able to identify areas of self-improvement and professional development needed for future goal attainment.

TOTAL CREDITS 17

CIT110 Applications/Concepts or CIT113 IT Problem Solving is recommended for non-IT professions

*Note: Grade of “C” or higher required in MIG131 to enroll in MIG133

Imaging Informatics, or Picture Archival and Communication Systems, is designed for experienced computer science or medical imaging professionals seeking to enter the field of Imaging Informatics Administration. This program provides relevant knowledge of both IT and Medical Imaging concepts in a web-based format for the working adult. This is a full-time, two semester program. Many of the courses are offered each semester, and through the summer for flexibility, and the program may be extended to a third semester if necessary. Students are responsible for finding a host hospital in which to complete the 100 hour internship in which relevant skills will be reinforced. Students must earn a numerical grade of 80 or higher in all courses. Failure to meet internship objectives or failure to obtain a numerical course grade of 80 or better constitutes failure in that course. Students may apply for readmission to the program one time.

All Imaging Informatics students are required to undergo a physical examination; complete the necessary immunization forms, including three (3) Hepatitis B immunization series; have malpractice and health insurance and undergo a Criminal Offender Record Information (CORI) check and a Sex Offender Registry Information (SORI) check.

ADMISSION REQUIREMENTS:
Students may apply to the program through Admissions and Enrollment Services and:
Have a degree in a computer science field, extensive experience as determined by the Chair of the CIT Department, or be a graduate of an accredited Medical Imaging Program and be credentialed with a recognized national agency.
Submit an application with high school and college transcripts.
Submit a letter of interest with professional resume and references.
Attend an on-site or phone interview.
Admission is selective. Completed applications will be reviewed by the Medical Imaging and CIT Department Chairs in April and July for a September start.

CAREER OUTLOOK
Hospitals across the country are in the process of migrating their medical imaging department to a filmless state due to digital technology. Imaging Informatics technology is growing laterally. Every hospital will need at least one Imaging Informatics administrator, and many will need more than one.

For more information about our graduation rates, the median debt of students who completed the program, and other important information, please visit our website at www.bhcc.mass.edu/certificate-programs.

CRIMINAL OFFENDER RECORD INFORMATION AND SEX OFFENDER REGISTRY INFORMATION CHECKS
As a prerequisite for a clinical placement in the Imaging Informatics Certificate Program, all students must undergo a Criminal Offender Record Information (CORI) check and a Sex Offender Registry Information (SORI) check. These checks are required due to potential unsupervised contact with children, the disabled, or the elderly during a clinical experience. Students found to have certain criminal convictions or pending criminal actions will be presumed ineligible for clinical placement. The College is authorized by the Commonwealth’s Department of Criminal Justice Information Services, pursuant to Massachusetts General Laws, Chapter 6, Sections 167-178B, to access CORI records. Sex Offender checks shall be performed pursuant to Massachusetts General Laws, Chapter 6, Sections 178C-178P.

For more information regarding the College’s CORI/SORI check process, please contact the College CORI/SORI Officer at 617-228-2193.

UPON COMPLETION OF THIS CONCENTRATION GRADUATES WILL BE ABLE TO:
- Manage medical image databases, and interact with other information system databases used in healthcare facilities.
- Evaluate and implement practical operational strategies that will make the workflow more efficient.
- Function as an entry-level Imaging Informatics Administrator.

OIM103 is a prerequisite or co-requisite to program, which should be taken prior to or during the first semester. An exemption exam is available through the Center for Self-Directed Learning in the H-Building, Charlestown Campus, for students who type 40 words per minute or more with accuracy and know MS Word and document format.

Bunker Hill Community College is currently not accepting students into this program as of the 2014-2015 academic year.

**PROGRAM OVERVIEW**

This certificate program provides students with the practical skills needed to work in an executive office environment. The option focuses on MS Office applications including security issues and either database or spreadsheet applications.

**CAREER OUTLOOK**

Graduates of this program qualify for entry-level positions such as receptionists, data-entry clerks, information processing specialists, office assistants, or customer service representatives in a wide variety of businesses and corporations. All courses in this certificate program may be applied to any option in the Associate in Science Degree: Office and Information Management Program.

For more information about our graduation rates, the median debt of students who completed the program, and other important information, please visit our website at www.bhcc.mass.edu/certificate-programs.

**UPON COMPLETION OF THIS CONCENTRATION GRADUATES WILL BE ABLE TO:**

- Demonstrate proficiency in computer operations and software applications.
- Use the complete range of Microsoft applications effectively and efficiently.
- Demonstrate proficiency in office operations and communication media.

## Program Overview

 Designed for the IT technician or professional seeking new and updated skills in the area of information security and assurance, this basic level certificate will enhance existing knowledge for increased job opportunities and employment growth. The Information Technology Security + Essentials Certificate aligns with the COMPTIA National Standards for Security + Certification. It will prepare students to be responsible for desktop security support contained within a networked environment.

## Career Outlook

This entry level certificate provides the skills necessary to provide basic security support for networked computers. It is an entry point into the field of Information Security. This option is designed to provide alignment with the entry level National Institute of Technology and Standards’ (NITS) National Initiative for Cybersecurity Education and Workforce Framework to ensure consistent, current, and flexible training in the growing technology field of Information Security. Graduates of this option will qualify for positions as entry level information security desktop support technicians.

For more information about our graduation rates, the median debt of students who completed the program, and other important information, please visit our website at www.bhcc.mass.edu/certificate-programs.

## Upon Completion of This Concentration Graduates Will Be Able To:

- Secure a desktop computer connected to a network.
- Install and configure security software.
- Analyze potential security threats.
- Delineate differences between various operating system security issues.
- Define the types of malicious software found.

**OPTION OVERVIEW**

This option prepares students to support the security of networks, systems located on these networks, and the data/information contained within those systems; identifying, developing, implementing and maintaining security processes throughout organizations to reduce risks, respond to incidents and limit exposure and liability; identifying, notifying, and responding to security threats to networks.

**CAREER OUTLOOK**

This option is designed to align with the National Institute of Technology and Standards’ (NITS) National Initiative for Cybersecurity Education Cybersecurity Workforce Framework to ensure consistent, current, and flexible training in the growing technology field of Information Security. Graduates of this option will qualify for positions as entry level information security professionals.

For more information about our graduation rates, the median debt of students who completed the program, and other important information, please visit our website at www.bhcc.mass.edu/certificate-programs.

**UPON COMPLETION OF THIS CONCENTRATION GRADUATES WILL BE ABLE TO:**

- Understand network protocols and routing.
- Understand commonly used network services - DNS, mail, web, etc. as well as less common network services.
- Perform packet analysis and be able to identify malformed packets.
- Understand differences between various operating systems - which OS an event came from and which OS is vulnerable to a certain attack.
- Define the types of malicious software found in modern networks.
- Explain the threats and countermeasures for physical security and social engineering.
- Perform footprinting, port scans, and enumeration on a network.
- Perform very simple programming in C, HTML, and Perl, specifically oriented towards the needs of network security professionals.
- Identify Microsoft Windows vulnerabilities and to harden systems.
- Identify Linux vulnerabilities and to protect servers.
- Describe and deploy security devices, including routers, firewalls, Intrusion Detection Systems, and honeypots.
- Describe the ethics associated with the use of hacking or penetration testing tools and techniques.

Information Technology Security Option

Continued from previous page

The Computer Information Technology Department (CIT) has a clear, well-articulated, three-pronged mission, which includes supporting the IT components of the college’s General Education offerings (across divisions, departments, and campuses, as well as through interdepartmental collaboration), preparing an IT workforce through certificate and associate degree offerings, and providing IT students with seamless transfer opportunities to related Baccalaureate Degree programs.

The Computer Technology Program offers many courses that apply to other options to afford students the opportunity to explore the many career tracks in Information Technology before selecting a career in Computer Support, Data Base or Networking. The Department’s goals are in concert with the College’s goals. Using input from its Industry Advisory Committees and internship course, the Department is continually updating and fine tuning its programs of study.

OPTION OVERVIEW
This option prepares students to support the security of networks, systems located on these networks, and the data/information contained within those systems; identifying, developing, implementing and maintaining security processes throughout organizations to reduce risks, respond to incidents and limit exposure and liability; identifying, notifying, and responding to security threats to networks.

CAREER OUTLOOK
The option is designed to align with the National Institute of Technology and Standards’ (NITS) National Initiative for Cybersecurity Education Cybersecurity Workforce Framework to ensure consistent, current, and flexible training in the growing technology field of Information Security. Graduates of this option will qualify for positions as entry-level information security professionals.

UPON COMPLETION OF THIS CONCENTRATION GRADUATES WILL BE ABLE TO:
• Understand network protocols and routing.
• Understand commonly used network services - DNS, mail, web, etc. as well as less common network services.
• Perform packet analysis and be able to identify malformed packets.
• Understand differences between various operating systems - which OS an event came from and which OS is vulnerable to a certain attack.
• Define the types of malicious software found in modern networks.
• Explain the threats and countermeasures for physical security and social engineering.
• Perform footprinting, port scans, and enumeration on a network.
• Perform very simple programming in C, HTML, and Perl, specifically oriented towards the needs of network security professionals.
• Identify Microsoft Windows vulnerabilities and to harden systems.
• Identify Linux vulnerabilities and to protect servers.
• Describe and deploy security devices, including routers, firewalls, Intrusion Detection Systems, and honeypots.
• Describe the ethics associated with the use of hacking or penetration testing tools and techniques.

* Note: Students testing out of College Algebra for STEM (MAT194) will be required to take an additional elective. \n
** Note: Students entering UMB through the College of Management may choose to complete the Calculus for Management Sciences course at UMB and therefore should take an elective at BHCC.  

Information Technology Transfer Option

Continued from previous page

The Computer Information Technology Department (CIT) has a clear, well-articulated, three-pronged mission, which includes supporting the IT components of the college’s General Education offerings (across divisions, departments, and campuses, as well as through interdepartmental collaboration), preparing an IT workforce through certificate and associate degree offerings, and providing IT students with seamless transfer opportunities to related Baccalaureate Degree programs.

The Computer Technology Program offers many courses that apply to other options to afford students the opportunity to explore the many career tracks in Information Technology before selecting a career in Computer Support, Data Base or Networking. The Department’s goals are in concert with the College’s goals. Using input from its Industry Advisory Committees and internship course, the department is continually updating and fine tuning its programs of study.

OPTION OVERVIEW
This program is designed to meet the needs of our Information Technology students who wish to pursue a Baccalaureate Degree. This program will allow our students to move seamlessly to colleges offering Baccalaureate Degrees in Information Technology. This program provides a core foundation in the major pillars of information technology and will allow a student to concentrate in one of the areas before transferring.

CAREER OUTLOOK
Graduates of this program can transfer to bachelor’s programs at four-year colleges.

UPON COMPLETION OF THIS CONCENTRATION GRADUATES WILL BE ABLE TO:
• Demonstrate an understanding of the major pillars of Information Technology.
• Demonstrate the ability to solve technical programs and to apply critical thinking principles to Information Technology issues.
• Demonstrate an upper level understanding of networking, programming, database, or other technology fields.

**Note:** Transfer track students must take VMA207. Career track students must take VMA299G.
**Select the career elective from VMA courses.

OPTION OVERVIEW
This program introduces students to the aesthetics, materials, interactive applications and platforms, and methods of effective visual communication for commercial art and design. The program combines theoretical elements with practical experience, up-to-date technologies, and professional equipment to give students a complete knowledge and understanding of career options, requirements, and responsibilities. Students may take elective courses in options other than their own, as scheduling permits. Because courses are offered sequentially, students must take courses in the appropriate semester.

CAREER OUTLOOK
Graduates of this program qualify for job opportunities in graphic design for online and interactive media, advertising, communications, marketing, packaging, publishing, and in companies using printed, online, interactive media, and electronic materials in their product or in the promotion of that product.

UPON COMPLETION OF THIS CONCENTRATION GRADUATES WILL BE ABLE TO:
- Demonstrate proficiency in basic visual design skill and production skills.
- Demonstrate proficiency in basic computer operation and page layout software applications.
- Demonstrate proficiency in drawing and image software applications.
- Use the Internet and integrate Internet text and images in media.
- Demonstrate their understanding of online and interactive media graphic formats, creation and optimization graphic images for those applications, and the distribution or delivery process.
- Demonstrate an ability to use design processes and principles to create visual products that convey a specific message to a targeted audience.
- Demonstrate an awareness of the varied career paths within the graphics industry including, but not limited to, art direction, illustration, project design, production art, gaming, interactive development, graphic design and media direction.
Law Enforcement Certificate Program

Program Overview
Developed in cooperation with the Massachusetts Chiefs of Police Association, the Law Enforcement Certificate Program has been approved by the Massachusetts Department of Higher Education for participation in the Police Career Incentive Program (PCIP-Quinn Bill). The certificate combines specialized criminal justice and general education coursework to provide students with the knowledge and skills they need to compete for entry into the Massachusetts law enforcement field. All of the credits earned in the certificate program can be applied to a Quinn Bill eligible Associate in Science degree in Criminal Justice.

Career Outlook
The certificate program has been ratified by the Massachusetts Chiefs of Police Association’s Training and Education Committee as an important step in their goal to have a better-educated and more professional workforce. Although the certificate is not yet a requirement in the hiring and training procedures, it is anticipated that it will substitute for a significant part of the Massachusetts Training Council curriculum in the future. Since the Law Enforcement Certificate Program will only be offered at PCIP approved colleges, all courses qualify students for the pay incentives once they earn the A.S. degree in Criminal Justice.

For more information about our graduation rates, the median debt of students who completed the program, and other important information, please visit our website at www.bhcc.mass.edu/certificate-programs.

Course Title | Course Number | Semester Taken | Credits | Prerequisites
--- | --- | --- | --- | ---
Introduction to Criminal Justice | CRJ101 | 3 | ENG095 and RDG095, or ESL098
Criminal Law | CRJ103 | 3 | ENG095 and RDG095, or ESL098
Evidence and Court Procedure | CRJ202 | 3 | ENG111, CRJ101, CRJ103, and CRJ208 or Instructor permission
Policing in a Democratic Society | CRJ220 | 3 | ENG111, CRJ101, CRJ103, or Instructor permission
College Writing I | ENG111 | 3 | ENG095 and ESL098 or RDG095 or placement
Principles of Sociology | SOC101 | 3 | ESL098 or RDG095 or placement
Principles of Psychology | PSY101 | 3 | ESL098 or RDG095 or placement
Criminology | SOC207 | 3 | PSY101 or SOC101
Oral Communication | ENG171 | 3 | 27

Upon completion of this concentration graduates will be able to:
- Demonstrate enhanced cultural awareness and interpersonal communication skills.
- Demonstrate specific content knowledge of criminal justice and criminal law.

</tbody>
</table>

This Magnetic Resonance (MR) Certificate Program is designed for experienced medical imaging professionals seeking to enter the field of MR imaging. The didactic and clinical content is structured to meet the content requirements of the American Registry of Radiologic Technologists (ARRT) Post-primary Registry Examination in MR, and will help professionals prepare for the examination. Didactic courses are delivered online in an interactive format to accommodate the working adult student. Students are responsible for finding a host hospital in which to complete the 100 hour clinical internship in which relevant skills will be reinforced. Students must earn a numerical grade of 80 or higher in all courses. Failure to meet internship objectives or failure to obtain a numerical course grade of 80 or better constitutes failure in that course. Students may apply for readmission to the program one time.

All MR students are required to undergo a physical examination; complete the necessary immunization forms, including three (3) Hepatitis B series; have malpractice and health insurance, and undergo a Criminal Offender Record Information (CORI) check and a Sex Offender Registry Information (SORI) check. These checks are required due to potential unsupervised contact with children, the disabled, or the elderly during a clinical experience. Students found to have certain criminal convictions or pending criminal actions will be presumed ineligible for clinical placement. The College is authorized by the Commonwealth’s Department of Criminal Justice Information Services, pursuant to Massachusetts General Laws, Chapter 6, Sections 167-178B, to access CORI records. Sex Offender checks shall be performed pursuant to Massachusetts General Laws, Chapter 6, Sections 178C-178P.

**ADMISSION REQUIREMENTS:**

Student must apply to the program through Admissions and Enrollment Services and:

- Present a completed application with fee.
- Submit a copy of the current ARRT card.
- Submit a letter of interest.
- Submit a letter of recommendation from a supervisor, including guarantee of a clinical site for the clinical internship.

Admission is selective. Completed applications will be reviewed by the Medical Imaging Department in April and July for a September start.

**PROGRAM OVERVIEW**

This certificate helps to prepare students for the American Registry of Radiologic Technologists’ (ARRT) Post-primary Registry Examination in Magnetic Resonance, as well as for entry-level MR positions. It is intended for ARRT registered imaging professionals.

**CRIMINAL OFFENDER RECORD INFORMATION AND SEX OFFENDER REGISTRY INFORMATION CHECKS**

As a prerequisite for a clinical placement in the Magnetic Resonance Certificate Program, all students must undergo a Criminal Offender Record Information (CORI) check and a Sex Offender Registry Information (SORI) check. These checks are required due to potential unsupervised contact with children, the disabled, or the elderly during a clinical experience. Students found to have certain criminal convictions or pending criminal actions will be presumed ineligible for clinical placement. The College is authorized by the Commonwealth’s Department of Criminal Justice Information Services, pursuant to Massachusetts General Laws, Chapter 6, Sections 167-178B, to access CORI records. Sex Offender checks shall be performed pursuant to Massachusetts General Laws, Chapter 6, Sections 178C-178P.

**CAREER OUTLOOK**

It is expected that the number of positions in this modality will continue to grow in the near future. Opportunities exist in hospitals, outpatient clinics and free-standing medical imaging facilities.

For more information about our graduation rates, the median debt of students who completed the program, and other important information, please visit our website at www.bhcc.mass.edu/certificate-programs.

**UPON COMPLETION OF THIS CONCENTRATION GRADUATES WILL BE ABLE TO:**

- Demonstrate competence in the essential aspects of MR imaging at the entry-level.
- Understand the importance of life-long continuing education in the field of MR imaging.
This Mammography Certificate Program is designed for experienced medical imaging professionals seeking to enter the field of mammography. The didactic and clinical content is structured to meet the content requirements of the American Registry of Radiologic Technologists (ARRT) Post-primary Examination in Mammography, and will help professionals prepare for the examination. Didactic courses are delivered online in an interactive format to accommodate the working adult student. Students are responsible for finding a host hospital in which to complete the 100 hour clinical internship in which relevant skills will be reinforced. Students must earn a numerical grade of 80 or higher in all courses. Failure to meet internship objectives or failure to obtain a numerical course grade of 80 or better constitutes failure in that course. Students may apply for readmission to the program one time.

All mammography students are required to undergo a physical examination; complete the necessary immunization forms, including three (3) Hepatitis B series; have malpractice and health insurance, and undergo a Criminal Offender Record Information (CORI) check and a Sex Offender Registry Information (SORI) check. These checks are required due to potential unsupervised contact with children, the disabled, or the elderly during a clinical experience. Management of Assisted Living and Institutional Facilities Option

Continued from previous page

This program prepares students in three options: Hotel and Restaurant Management, Management of Assisted Living and Institutional Facilities and Meeting and Event Planning. The program prepares students in a variety of industry-oriented learning settings and a variety of teaching and learning environments that reflect the unique circumstances of the hospitality industry. Well-trained graduates are in great demand, with opportunities to advance, based upon their technical and critical thinking skills.

OPTION OVERVIEW
This option prepares students in various aspects of the management of assisted living communities. Managing an assisted living complex requires skills in many areas. The director of a facility is comparable in scope to that of the general manager at a resort hotel. Your guests, however, are long term instead of transient. This creates a different focus in terms of both sales and service.

Day to day management of the facility and its programs has many similarities to Hospitality Management, the ability to maintain the highest level of service being imperative. The terms ‘Guest’ and ‘Resident’ become interchangeable within this segment of the industry. Management must provide hotel based services including dining room service, housekeeping and entertainment in order to meet guest needs. The medical and social requirements of residents demand a strong understanding of geriatric care in order to manage healthcare providers.

CAREER OUTLOOK
According to the Assisted Living Federation of America there are 36,000 assisted living communities nationwide serving more than one million senior citizens. Forty-one states, including Massachusetts, allow low-income residents to live in assisted living. The 74 million boomers who are now considering this option for their parents will be the next generation of assisted living residents, making it the most preferred and fastest growing longterm care option for seniors. The career outlook is very good in the underserved, almost non-existent field of Assisted Living Management. The industry is experiencing rapid growth and there are very few programs preparing skilled managers able to meet the diverse needs of the market. These factors combine to provide a strong job market for graduates.

UPON COMPLETION OF THIS CONCENTRATION GRADUATES WILL BE ABLE TO:
• Recognize and respond to the needs of a geriatric resident population.
• Guide financial health of an Assisted Living facility.
• Properly staff all areas of operations.
• Understand the responsibilities in the areas of Sales and Marketing, Food Service, Health Services and Engineering.
• Manage staff in areas of Sales and Marketing, Food Service, Health Services and Engineering.
• Coordinate staffing responsibilities between departments to create a seamless resident experience.
• Respond to crises in an appropriate manner.

Management Option

Continued from previous page

This program prepares students for employment and for transfer to four-year colleges and universities. The College has transfer articulation agreements with many of the four-year colleges and universities in the area. The College encourages students to meet with their advisors for additional information. This program makes a concentrated effort to demonstrate how the subject matter relates to the cultures of our diversified student population. The program places emphasis on student participation and creates an interactive forum in which to learn.

The Business Administration Department at Bunker Hill Community College is a collegial, student-centered learning community dedicated to providing an innovative, creative, and relevant education in business disciplines to a diverse student population. We strive to maximize student success by placing graduates in a competitive position when seeking employment in a business environment or upon transfer to a four-year academic institution, ultimately empowering them to compete responsibly and successfully in a global business environment.

The Management Seminar in this program is a Capstone course. It should be taken the student’s final semester, and is offered only in the spring semester.

OPTION OVERVIEW

This option prepares students with a solid foundation of managerial principles and concepts that are standard practice in business. The upper-level management courses focus on the case study approach, allowing students to analyze and solve realistic management problems. The college has transfer articulation agreements with many of the four-year colleges and universities in the area, allowing students to transfer in this option. Students should speak with the Department chair for specific transfer information.

CAREER OUTLOOK

This option qualifies graduates to enter the workforce as productive entry-level managers.

UPON COMPLETION OF THIS CONCENTRATION GRADUATES WILL BE ABLE TO:

• Apply the concepts needed to direct, plan, organize, and control the operations of a business.
• Demonstrate the necessary leadership skills to mobilize and motivate employees to accomplish business goals.
• Employ effective decision-making techniques in the workplace.
• Utilize human relations techniques when working with individuals or groups to help meet business objectives and resolve conflicts.

**Note:** All science, engineering, and math courses that are pre or co-requisites of other science and engineering courses require a grade of C+ or better. **Note:** New students enrolled in 9 credits or more must take a Learning Community Seminar or a Learning Community Cluster within their first year.

## CONCENTRATION OVERVIEW

This concentration prepares students to transfer to four-year colleges or universities to seek bachelor’s degrees in mathematics. After transferring, students study to become more proficient in areas such as abstract algebra, complex variables, vector calculus, number theory and partial differential equations. Graduates of this concentration may qualify to transfer using benefits of MassTransfer to a four-year state college or University of Massachusetts campus. For current information on eligible programs, visit www.mass.edu/masstransfer.

## CAREER OUTLOOK

Graduates of this concentration should transfer to a four-year college or university, as most entry-level employment opportunities in industry require a minimum of a bachelor’s degree. Professional positions in education and research fields usually require a minimum of a master’s degree.

## UPON COMPLETION OF THIS CONCENTRATION GRADUATES WILL BE ABLE TO:

- Analyze and solve quantitative problems.
- Reason logically from hypothesis to conclusion.
- Understand and appreciate an analytical approach to problem solving.

Students enrolling in this degree program can earn World Studies Emphasis certification simultaneously. See page 214.

Continued on following page
Media Communication Option

OPTION OVERVIEW

The Media Communication Program provides a well-integrated learning environment to prepare students for careers as professional digital media producers and well-informed mass media consumers. Our mission is to lay the foundation for professional careers as digital media producers, managers, and technical staff through extensive academic and technical experiences related to digital media industries and production, including video and audio production, Web page design, and multimedia programs. The Media Communication Program promotes creativity, independence, and critical thinking as valuable life skills in a fast-changing and technology-driven world. This program seeks to promote creative problem-solving skills as well as a thorough technical background aimed at providing students with educational and professional career opportunities in both artistic and commercial settings. Courses in theory, organization, and applications complement the lab courses. In addition to basic program requirements, students participate in an internship in a commercial setting and take a course in career-related electives appropriate to career goals.

CAREER OUTLOOK

Graduates of this program qualify to continue their education in programs leading to a bachelor’s degree. Graduates also qualify for employment in educational media centers, media service organizations, corporate media departments, cable television, libraries, and hospitals.

UPON COMPLETION OF THIS CONCENTRATION GRADUATES WILL BE ABLE TO:

- Write clearly and intelligently about mass media issues.
- Demonstrate an understanding of the processes involved in planning, scripting, shooting, and editing a media production.
- Demonstrate an understanding of the basic technical aspects of the video camera, lighting for video, audio recording, videotape recording and digital editing.
- Demonstrate a basic level of skill in using the video camera, various kinds of microphones, a lighting kit and nonlinear editing systems.
- Demonstrate a knowledge, understanding and basic skill in the use of audio production elements.
- Demonstrate a knowledge, understanding and basic skill in the production of multimedia projects using various computer software programs.

* Prerequisite for AHE201 is AHE112 for students in the Medical Assistant Certificate Program.

This program is offered on the Chelsea Campus each Fall and Spring semester. Applicants to this program are required to undergo a Criminal Offender Record Information (CORI) check and a Sex Offender Registry Information (SORI) check. Admission to an Allied Health program does not guarantee clinical placement. The outcome of the CORI/SORI check may impact the student’s ability to participate in the clinical experience. For further information, see the Department Chair. Students must maintain a grade of B- or better in AHE110 and AHE112 in order to continue into the second semester.

ADMISSION REQUIREMENTS:
To be admitted to this program, students must apply to the program through Admissions and Enrollment Services and:
- Possess a high school diploma or GED certification.
- Attend an information session.
- Provide evidence of health insurance, complete a health form and submit proof immunization.
- Place out of or complete ENG095 and RDG095 with a grade of C or better.

PROGRAM OVERVIEW
This program prepares students to function as members of a health care delivery team and to perform administrative and clinical duties. The program prepares students in Healthcare Provider CPR, EKG, and phlebotomy.

CRIMINAL OFFENDER RECORD INFORMATION AND SEX OFFENDER REGISTRY INFORMATION CHECKS
As a prerequisite for a clinical placement in the Medical Assistant Certificate Program, all students must undergo a Criminal Offender Record Information (CORI) check and a Sex Offender Registry Information (SORI) check. These checks are required due to potential unsupervised contact with children, the disabled, or the elderly during a clinical experience. Students found to have certain criminal convictions or pending criminal actions will be presumed ineligible for clinical placement. The College is authorized by the Commonwealth’s Department of Criminal Justice Information Services, pursuant to Massachusetts General Laws, Chapter 6, Sections 167-178 B, to access CORI records. Sex Offender checks shall be performed pursuant to Massachusetts General Laws, Chapter 6, Sections 178C-178P.

For more information regarding the College’s CORI/SORI check process, please contact the College CORI/SORI Officer at 617-228-2193.

CAREER OUTLOOK
Graduates of this program qualify for employment in hospitals, clinics, health maintenance organizations, and physicians’ offices as multi-skilled workers, medical assistants, medical aides, clinical assistants, and clinical practice assistants.

For more information about our graduation rates, the median debt of students who completed the program, and other important information, please visit our website at www.bhcc.mass.edu/certificate-programs.

UPON COMPLETION OF THIS CONCENTRATION GRADUATES WILL BE ABLE TO:
- Assist with the examination and treatment of patients in clinical areas, phlebotomy, and EKG.
- Perform computer and medical office tasks.
OIM103 is a prerequisite or co-requisite to program, which should be taken prior to or during the first semester. An exemption exam is available through the Center for Self-Directed Learning (H-165) for students who type 40 words per minute or more with accuracy and know MS Word and document format.

*Note: NHP180 course description is found under the Surgical Technology heading.

PROGRAM OVERVIEW
This certificate program is designed to prepare students to work as professionals within a medical office environment. Students learn basic medical terminology, which is then applied using MediSoft patient accounting software, a patient accounting software package. It also prepares students in third-party billing and coding. All program requirements may be applied to the Associate in Science Degree: Office and Information Management Program.

CAREER OUTLOOK
Graduates of the program qualify for job opportunities in physicians’ and dentists’ offices, clinics, HMOs, community health agencies, long-term care facilities, and hospitals. They also qualify for jobs within large corporations that provide on-site health services, engage in medical research, or produce medical products. Graduates will qualify for entry-level positions such as medical receptionists, medical records management specialists, patient service representatives, and medical administrative assistants. Students also may qualify for at-home opportunities as medical transcriptionists.

For more information about our graduation rates, the median debt of students who completed the program, and other important information, please visit our website at www.bhcc.mass.edu/certificate-programs.

UPON COMPLETION OF THIS CONCENTRATION GRADUATES WILL BE ABLE TO:
• Demonstrate proficiency in computer operations and the software applications unique to a medical setting.
• Demonstrate proficiency in understanding and using medical terminology.
• Use the complete range of Microsoft applications effectively and efficiently.
• Have demonstrated proficiency in medical office operations and communication media.

Continued on following page
OPTION OVERVIEW
The Office and Information Management Department’s mission is to provide industry-identified knowledge, skills, and abilities to prepare students for entry-level careers within office administration and/or medical office administration fields. For individuals already employed within these fields, professional development can be obtained through the more advanced courses. In addition, transfer to four-year programs is possible. The Department offers a capstone internship program for all degree students.

The Medical Information Management Option prepares students to work as professionals within a medical office environment. The option prepares students in basic medical terminology, which is then applied using MediSoft computer applications, a patient accounting software package. It also prepares students in third-party billing and coding. Students participate in an internship in a medical office setting during their last spring semester to reinforce skills learned.

CRIMINAL OFFENDER RECORD INFORMATION AND SEX OFFENDER REGISTRY INFORMATION CHECKS
As a prerequisite for a clinical placement in the Medical Information Management Option, all students must undergo a Criminal Offender Record Information (CORI) check and a Sex Offender Registry Information (SORI) check. These checks are required due to potential unsupervised contact with children, the disabled, or the elderly during a clinical experience. Students found to have certain criminal convictions or pending criminal actions will be presumed ineligible for clinical placement. The College is authorized by the Commonwealth’s Department of Criminal Justice Information Services, pursuant to Massachusetts General Laws, Chapter 6, Sections 167-178B, to access CORI records. Sex Offender checks shall be performed pursuant to Massachusetts General Laws, Chapter 6, Sections 178C-178P.

For more information regarding the College’s CORI/SORI check process, please contact the College CORI/SORI Officer at 617-228-2193.

CAREER OUTLOOK
Graduates of this option qualify for job opportunities in physicians’ and dentists’ offices, clinics, HMOs, community health agencies, long-term care facilities, and hospitals. Students also qualify for jobs in large corporations that provide on-site health services, engage in medical research, or produce medical products. Graduates qualify for entry-level positions such as medical receptionists, medical records management specialists, medical office managers, patient service representatives, and medical administrative assistants. Students also may qualify for at-home opportunities as medical transcriptionists.

UPON COMPLETION OF THIS CONCENTRATION GRADUATES WILL BE ABLE TO:
• Demonstrate proficiency in computer operations and software applications unique to a medical setting.
• Demonstrate proficiency in understanding and using medical terminology.
• Use the complete range of Microsoft applications effectively and efficiently.
• Demonstrate proficiency in medical office operations and communication media.
A grade of B- or better in the Medical Interpreting I course is required for progression in the program.

This program is offered on the Chelsea Campus as a part-time evening program each fall semester.

Applicants to this program are required to undergo a Criminal Offender Record Information (CORI) check and a Sex Offender Registry Information (SORI) check. The outcome of the CORI/SORI check may impact the student’s ability to participate in the clinical experience.

**ADMISSION REQUIREMENTS:**

Students must apply to the program through Admissions and Enrollment Services and:

- Possess a High School Diploma or GED Certification.
- Be invited to a language assessment.
- Attend an information session.
- Place out of, or complete, ENG 095 and RDG 095.
- Be literate in their native language.
- Be fluent in English.
- Provide evidence of health insurance and complete a health form.

**PROGRAM OVERVIEW**

This program prepares students, through lectures and hospital-based clinical experience, to be medical interpreters in a variety of health care settings.

**CRIMINAL OFFENDER RECORD INFORMATION AND SEX OFFENDER REGISTRY INFORMATION CHECKS**

As a prerequisite for a clinical placement in the Medical Interpreting Certificate Program, all students must undergo a Criminal Offender Record Information (CORI) check and a Sex Offender Registry Information (SORI) check. These checks are required due to potential unsupervised contact with children, the disabled, or the elderly during a clinical experience. Students found to have certain criminal convictions or pending criminal actions will be presumed ineligible for clinical placement. The College is authorized by the Commonwealth’s Department of Criminal Justice Information Services, pursuant to Massachusetts General Laws, Chapter 6, Sections 167-178 B, to access CORI records. Sex Offender checks shall be performed pursuant to Massachusetts General Laws, Chapter 6, Sections 176C-178P.

For more information regarding the College’s CORI/SORI check process, please contact the College CORI/SORI Officer at 617-228-2193.

**CAREER OUTLOOK**

Graduates of this program qualify for employment in hospitals, clinics, chronic care facilities, and health maintenance organizations as medical interpreters.

For more information about our graduation rates, the median debt of students who completed the program, and other important information, please visit our website at www.bhcc.mass.edu/certificate-programs.

**UPON COMPLETION OF THIS CONCENTRATION GRADUATES WILL BE ABLE TO:**

- Take the certification examination offered by the National Board of Certification for Medical Interpreters.
- Assist the health care team by serving as a certified medical interpreter between the patient or the patient’s family and the health care provider.

*Continued on following page*
For this program, students must earn a numerical grade of 77 or higher in all Biology, Chemistry, and Medical Laboratory Technician courses. Either failure to meet clinical objectives or failure to obtain a numerical course grade of 77 or better constitutes failure in that course. Students may apply for readmission to the program.

All Medical Laboratory Technician students are required to: undergo a physical examination, complete the necessary immunization forms, including the three (3) dose Hepatitis B immunization series; carry malpractice and health insurance; and undergo a Criminal Offender Record Information (CORI) check and a Sex Offender Registry Information (SORI) check.

PREREQUISITES FOR THE MEDICAL LABORATORY TECHNICIAN PROGRAM
• Attend a mandatory information session.
• Possess a high school diploma or GED certificate.
• Achieve a reading level of 10.0 or higher on the College Placement Test (CPT).
• Complete the following courses with a C or better: • Statistics (MAT181) • College Writing (ENG111) • Anatomy/Physiology I and Lab (BIO 203) (credits for Anatomy and Physiology I/Lab that were earned more than five (5) years prior to enrollment in the medical laboratory technician program are not accepted).

After all prerequisites are completed, students must apply through Admissions and Enrollment Services.

PROGRAM OVERVIEW
This program prepares students through lectures, laboratory activities and hospital-based clinical experience to become Medical Laboratory Technicians. Students will acquire the skills and knowledge essential to working in a medical laboratory and performing tests that aid in the diagnosis and treatment of disease and the maintenance of health.

CRIMINAL OFFENDER RECORD INFORMATION AND SEX OFFENDER REGISTRY INFORMATION CHECKS
As a prerequisite for a clinical placement in the Medical Laboratory Technician program, all students must undergo a Criminal Offender Record Information (CORI) check and a Sex Offender Registry Information (SORI) check. These checks are required due to potential unsupervised contact with children, the disabled, or the elderly during a clinical experience. Students found to have certain criminal convictions or pending criminal actions will be presumed ineligible for clinical placement. The College is authorized by the Commonwealth’s Department of Criminal Justice Information Services, pursuant to Massachusetts General Laws, Chapter 6, Sections 167-178B, to access CORI records. Sex Offender checks shall be performed pursuant to Massachusetts General Laws, Chapter 6, Sections 178C-178P.

For more information regarding the College’s CORI/SORI check process, please contact the College CORI/SORI Officer at 617-228-2193.

CAREER OUTLOOK
Graduates of this program are eligible to take the CLT/MLT certification exam administered by the American Society of Clinical Pathology. Graduates are then qualified for employment in hospitals, clinics and health maintenance organizations.

PROGRAM ACCREDITATION
The Program is accredited by the National Accrediting Agency for Clinical Laboratory Science (NAACLS), 5600 North River Rd. Suite 720, Rosemont, IL 60018, telephone 773-714-8880. Graduates of the Program are eligible to take national certification exams.

UPON COMPLETION OF THIS CONCENTRATION GRADUATES WILL BE ABLE TO:
• Collect and prepare clinical specimens for analysis.
• Operate laboratory instruments.
• Prepare a variety of diagnostic analyses according to prescribed methodology.
• Relate test results to other patient information to the extent required for understanding the analyses.

**OPTION OVERVIEW**

This option prepares students to perform entry level diagnostic examinations on patients utilizing analog and digital technology to produce diagnostic images in a diverse healthcare environment. The field of radiography includes general radiography, computed tomography (CT), magnetic resonance imaging (MRI), mammography, and cardiovascular and interventional technology.

**CRIMINAL OFFENDER RECORD INFORMATION AND SEX OFFENDER REGISTRY INFORMATION CHECKS**

As a prerequisite for a clinical placement in Medical Radiography, all students must undergo a Criminal Offender Record Information (CORI) check and a Sex Offender Registry Information (SORI) check. These checks are required due to potential unsupervised contact with children, the disabled, or the elderly during a clinical experience. Students found to have certain criminal convictions or pending criminal actions will be presumed ineligible for clinical placement. The College is authorized by the Commonwealth’s Department of Criminal Justice Information Services, pursuant to Massachusetts General Laws, Chapter 6, Sections 167-178B, to access CORI records. Sex Offender checks shall be performed pursuant to Massachusetts General Laws, Chapter 6, Sections 178C-178P.

For more information regarding the College’s CORI/SORI check process, please contact the College CORI/SORI Officer at 617-228-2193.

**CAREER OUTLOOK**

Graduates of this option qualify for employment in hospitals, HMOs, clinics, doctors’ offices, mobile units, community health agencies, industrial x-ray, and equipment/film companies. Successful graduates will qualify to take the American Registry of Radiologic Technologists Registry Examination and the State of Massachusetts Licensing Examination for entry-level Radiologic Technologists.

**UPON COMPLETION OF THIS CONCENTRATION GRADUATES WILL BE ABLE TO:**

- Demonstrate clinical competence.
- Apply critical thinking skills.
- Demonstrate communication skills.
- Model professionalism.

PROGRAM OVERVIEW
The mission of the Hospitality Management programs is to be a leader in programs providing education for entry level careers in Hotel and Restaurant Management and Meeting and Event Planning Management. In addition, preparation for transfer to four year, higher education programs and opportunities for professional development will be provided. Students will develop technological, communicative, critical thinking, quantitative, and interpersonal skills.

This option prepares students in skills training and decision making in such crucial areas as guest services, event planning, and meeting management. A variety of teaching methods lead students to a better understanding of the importance of the meeting and event planning industry as an economic growth vehicle and as a method of working with a culturally diverse workforce.

CAREER OUTLOOK
Graduates of this option qualify for entry level managerial positions as well as for management training programs in hotels, restaurants, corporate offices, and conference centers. Students also qualify to transfer all credits to the Associate in Science Degree in Meeting and Event Planning Management.

For more information about our graduation rates, the median debt of students who completed the program, and other important information, please visit our website at www.bhcc.mass.edu/certificate-programs.

UPON COMPLETION OF THIS CONCENTRATION GRADUATES WILL BE ABLE TO:
• Perform administrative skills in basic business bookkeeping procedure, business cost controls, and planning and coordinating hotel and restaurant operations.
• Demonstrate conceptual skills necessary to understanding the needs of the hotel, conference center, corporate office, and restaurant industry.
• Demonstrate the skills necessary to perform the various functions related to the needs of the meeting and event planning industry.

*Note: Select the career elective from HRT112 or HRT131 or CUL111

This program prepares students in three options: Hotel and Restaurant Management, Management of Assisted Living and Institutional Facilities and Meeting and Event Planning. The program prepares students in a variety of industry-oriented learning settings and a variety of teaching and learning environments that reflect the unique circumstances of the hospitality industry. Well-trained graduates are in great demand, with opportunities to advance, based upon their technical and critical thinking skills.

OPTION OVERVIEW

The mission of the Hospitality Management programs is to be a leader in programs providing education for entry level careers in Hotel and Restaurant Management, Meeting and Event Planning Management and Assisted Living. In addition, preparation for transfer to four year, higher education programs and opportunities for professional development will be provided. Students will develop technological, communicative, critical thinking, quantitative, and interpersonal skills.

This option prepares students in skills training and decision making in such crucial areas as guest services, event planning, and meeting management. A variety of teaching methods lead students to a better understanding of the importance of the meeting and event planning industry as an economic growth vehicle and as a method of working with a culturally diverse workforce.

CAREER OUTLOOK

Graduates of this option qualify for entry level managerial positions as well as for management training programs in hotels, restaurants, corporate offices, and conference centers. Students also qualify to transfer to four year college or university program.

UPON COMPLETION OF THIS CONCENTRATION GRADUATES WILL BE ABLE TO:

- Perform administrative skills in basic business bookkeeping procedure, business cost controls, and planning and coordinating hotel and restaurant operations.
- Demonstrate conceptual skills necessary to understanding the needs of the hotel, conference center, corporate office, and restaurant industry.
- Demonstrate the skills necessary to perform the various functions related to the needs of the meeting and event planning industry.
- Demonstrate skills acquired through course work relative to planning and executing all types of meetings and events in both the public and private sector.

## PROGRAM OVERVIEW

This certificate prepares students for entry level positions in Microsoft personal computer desktop applications support. Recommended non-credit industry certification courses offered through the College's Community Education Office are optional, but will greatly enhance employment prospects. The CIT internship and entrepreneurship courses are also optional.

## CAREER OUTLOOK

Graduates completing this certificate may find employment in information support services departments in organizations large and small as applications support and/or “Help Desk” specialists.

For more information about our graduation rates, the median debt of students who completed the program, and other important information, please visit our website at www.bhcc.mass.edu/certificate-programs.

## UPON COMPLETION OF THIS CONCENTRATION GRADUATES WILL BE ABLE TO:

- Understand in-depth and support the most common desktop Office Applications.
- Understand and support the Integration features among all Microsoft Office applications.
- Set-up, support and conduct on-line meetings.
- Troubleshoot end-user Office application problems.
- Demonstrate good communication skills and professional behavior while working with customers.
- Qualify to take the Microsoft Office Word, Excel & Outlook Certification Examinations.

*Note: See the Department Chair for substitute course. **Note: New students enrolled in 9 credits or more must take a Learning Community Seminar or a Learning Community Cluster within their first year.

**CONCENTRATION OVERVIEW**
This concentration prepares students in the foundations of music theory, history, and practice. It prepares students to transfer to four-year colleges or universities to seek bachelors’ degrees in music. It also helps students develop skills in music for their personal enrichment. Graduates of this concentration may qualify to transfer using benefits of MassTransfer to a four-year state college or University of Massachusetts campus. For current information on eligible programs, visit www.mass.edu/masstransfer.

**CAREER OUTLOOK**
Graduates of this concentration qualify for entry-level positions in the music field. Depending on electives selected, students begin work toward a career in music education, performance, or music management. Graduates of this concentration qualify to transfer to four-year colleges or universities for bachelors’ degrees in music.

**UPON COMPLETION OF THIS CONCENTRATION GRADUATES WILL BE ABLE TO:**
- Create or analyze work that has aesthetic value.
- Explain personal preferences and interpret the underlying meanings of music as expressed in a specific historical period or contemporary popular culture.
- Demonstrate knowledge of musical expression and identify unifying factors.
- Examine and compare various modes of musical expression.

Students enrolling in this degree program can earn World Studies Emphasis certification simultaneously. See page 214.
Program Overview

This program prepares students to maintain network hardware and software so that people within the organization receive timely and accurate information. The program prepares students to connect users to the company’s computer system, by using cable, fiber optics, or wireless communications. It prepares students to identify, document, solve problems, and recommend system improvements, based on user needs and technological advances.

Career Outlook

Graduates of this program may qualify to become network administrators, responsible for day-to-day network operations, and for other entry-level network positions. For more information about our graduation rates, the median debt of students who completed the program, and other important information, please visit our website at www.bhcc.mass.edu/certificate-programs.

Upon Completion of This Concentration Graduates Will Be Able To:

- Set up, maintain, and support networks for small and medium sized businesses.
- Qualify to take the Microsoft Certified Professional (MCP) Examination, the Comp TIA Network+ and Comp TIA A+ Certification examinations, the Cisco Certified Network Administrator (CCNA) examination and the Certified Wireless Network Administrator (CWNA) examination.

The Computer Information Technology Department (CIT) has a clear, well-articulated, three-pronged mission, which includes supporting the IT components of the college’s General Education offerings (across divisions, departments, and campuses, as well as through inter-departmental collaboration), preparing an IT workforce through certificate and associate degree offerings, and providing IT students with seamless transfer opportunities to related Baccalaureate Degree programs.

The Computer Technology Program offers many courses that apply to other options to afford students the opportunity to explore the many career tracks in Information Technology before selecting a career in Computer Support, Data Base or Networking. The Department’s goals are in concert with the College’s goals. Using input from its Industry Advisory Committees and internship course, the department is continually updating and fine tuning its programs of study.

**OPTION OVERVIEW**
This option prepares students to maintain network hardware and software so that people within the organization receive timely and accurate information. Using cable, fiber optics, or wireless communications, the option prepares students to configure, manage and maintain a company’s computer networking infrastructure. The option emphasizes networking technology for local area networks (LANs), and for connecting to larger networks (WANs) and to the Internet.

**CAREER OUTLOOK**
Graduates of this option may qualify as network administrators, responsible for day to day network operations as well as for entry level networking positions, that may include hardware support and troubleshooting, software installation, and maintenance of a network.

**UPON COMPLETION OF THIS CONCENTRATION GRADUATES WILL BE ABLE TO:**
- Have knowledge of the latest versions of Network Operating Systems (NOS) including UNIX, Linux and Microsoft Windows.
- Set up and configure a network. Set up user accounts and profiles to protect the network’s integrity and security.
- Qualify to take the Microsoft Certified Professional (MCP) Examination, the Comp TIA Network+ and Comp TIA A+ Certification examinations, the Cisco Certified Network Administrator (CCNA) examination and the Certified Wireless Network Administrator (CWNA) examination.

Note: For waiver of computer course prerequisite(s) see the Computer Science Advisor.

PROGRAM OVERVIEW
This certificate prepares students with in-depth knowledge of object oriented programming and design. Within two semesters of entering the program, students are expected to demonstrate acceptable keyboarding proficiency.

CAREER OUTLOOK
Graduates of this certificate qualify as entry-level programmers who can analyze complex problems and design, implement, and run viable solutions using any of the most common object oriented languages.

For more information about our graduation rates, the median debt of students who completed the program, and other important information, please visit our website at www.bhcc.mass.edu/certificate-programs.

UPON COMPLETION OF THIS CONCENTRATION GRADUATES WILL BE ABLE TO:
- Design, implement, and maintain software solutions for realistic problems by applying principles of object oriented programming.
- Write sophisticated and efficient code using the latest object oriented programming languages such as C++ and Java.
- Work in both Unix and Windows environments.

PROGRAM OVERVIEW

This program introduces students to paralegal practice and procedures. Students develop paralegal skills and knowledge that enables them to assist lawyers in conducting research and in preparing legal documents. The program is intended for students with an associate or bachelor’s degree.

CAREER OUTLOOK

Paralegals typically find jobs with law firms, corporations, government offices, non-profit entities, banks, health care organizations, bio-tech companies and financial institutions. Areas of specialization include litigation, corporate law, criminal law, regulatory compliance, intellectual property, bankruptcy, labor law, immigration, family law, and real estate.

The number of jobs in the paralegal field is expected to grow much faster than average through 2016, and the position of paralegal is consistently ranked among the best jobs in America. Boston is home to one of the top legal markets in the United States and BHCC’s main campus is minutes away from many courthouses, law schools, law firms, and government offices.

For more information about our graduation rates, the median debt of students who completed the program, and other important information, please visit our website at www.bhcc.mass.edu/certificate-programs.

UNAUTHORIZED PRACTICE OF LAW STATEMENT:

A Legal Studies graduate may work as a paralegal only under the supervision of an attorney and is not authorized to engage in the practice of law. The ABA (American Bar Association) defines a paralegal or legal assistant as “a person, qualified by education, training or work experience who is employed or retained by a lawyer, law office, corporation, governmental agency or other entity and who performs specifically delegated substantive legal work for which a lawyer is responsible.”

Upon completion of this concentration graduates will be able to:

- Understand the legal process and the nature of law practice.
- Construct and evaluate logical arguments in support of specific positions.
- Conduct effective legal research and oversee legal projects.
- Understand, identify and resolve legal and ethical issues associated with the paralegal profession.

Paralegal Studies Program

Program Overview

This program prepares students for legal employment by training them to assist lawyers in gathering and analyzing factual data, drafting correspondence, researching legal questions, and preparing legal documents. Paralegal employment provides flexibility (full-time, part-time, per diem, temporary or freelance) and the opportunity to enter the legal field without first obtaining a law degree. Graduates of the program may directly enter the work force or opt to continue their education and pursue a four year degree.

Career Outlook

Paralegals typically find jobs with law firms, corporations, government offices, non-profit entities, banks, health care organizations, bio-tech companies and financial institutions. Areas of specialization include litigation, corporate law, criminal law, regulatory compliance, intellectual property, bankruptcy, labor law, immigration, family law, and real estate.

The number of jobs in the paralegal field is expected to grow much faster than average through 2016, and the position of paralegal is consistently ranked among the best jobs in America. Boston is home to one of the top legal markets in the United States and BHCC’s main campus is minutes away from many courthouses, law schools, law firms, and government offices.

Upon completion of this concentration graduates will be able to:

- Understand the legal process and the nature of law practice.
- Construct and evaluate logical arguments in support of specific positions.
- Conduct effective legal research and oversee legal projects.
- Understand, identify and resolve legal and ethical issues associated with the paralegal profession.

Unauthorized Practice of Law Statement:

A Legal Studies graduate may work as a paralegal only under the supervision of an attorney and is not authorized to engage in the practice of law. The ABA (American Bar Association) defines a paralegal or legal assistant as “a person, qualified by education, training or work experience who is employed or retained by a lawyer, law office, corporation, governmental agency or other entity and who performs specifically delegated substantive legal work for which a lawyer is responsible.”

**PROGRAM OVERVIEW**

This fifteen-month program prepares the student through lectures, laboratory activities, hospital-based hands on clinical experience and a field internship to evaluate, treat and care for patients experiencing medical emergencies or trauma. Paramedic students work under the direction of a nurse, nurse practitioner, physician, physician assistant and/or experienced Paramedics in a variety of healthcare settings such as acute care hospitals and on Advanced Life Support Paramedic Ambulances. The program begins in the fall semester with the didactic and clinical educational components correlated to provide reinforcement in the clinical setting of skills learned in the classroom.

All paramedic students are required to undergo a physical examination; complete the necessary immunization forms, including but not limited to the three (3) dose Hepatitis B, immunization series, proof of immunity against measles, tetanus, mumps, rubella and chicken pox; current proof of freedom from tuberculosis, and any other immunization(s) that clinical or field sites require. Students will undergo and pass a drug screening analysis in order to be able for placement in a clinical facility or field internship as well as be required to undergo and pass random drug screening analysis as required by a clinical facility or field internship ambulance service.

**ADMISSION REQUIREMENTS:**

- Students must apply to the program through Admissions and Enrollment Services
- Attend a mandatory information session with the Program Director
- Possess a high school diploma or GED certificate
- Possess a valid Driver’s license
- Possess a current American Heart Association, Basic Life Support Health Care Provider Card
- Complete a minimum of one (1) year experience as an Emergency Medical Technician
- CORI & SORI Report
- Prerequisites: Human Biology/Lab (BIO108) & College Writing I (ENG111)

**CRIMINAL OFFENDER RECORD INFORMATION AND SEX OFFENDER REGISTRY INFORMATION CHECKS**

As a pre-requisite for a clinical and field placement in the Emergency Medical Technician Paramedic Studies Certificate Program, all students must undergo a Criminal Offender Record Information (CORI) check and a Sex Offender Registry Information (SORI) check. These checks are required due to potential unsupervised contact with children, the disabled, or the elderly during a clinical or field experience. Students found to have certain criminal convictions or pending criminal actions will be presumed ineligible for clinical or field placement. The College is authorized by the Commonwealth’s Department of Criminal Justice Services, pursuant to Massachusetts General Laws, Chapter 6, Sections 167-178B, to access CORI Records. Sex Offender checks shall be performed pursuant to Massachusetts General Laws, Chapter 6, Sections 178C-178P.

For more information regarding the College’s CORI/SORI check process, please contact the College CORI/SORI Officer at 617-228-2193.
CAREER OUTLOOK
The U.S. Bureau of Labor Statistics predicts that employment of emergency medical technicians (EMTs) and paramedics will grow nine percent between 2008 and 2018, which is about as fast as the average percentage for all occupations (www.BLS.gov). As our population ages and individuals face increased medical concerns, the likelihood of medical emergencies will increase; thus increasing the need for EMTs and paramedics. In addition emergency rooms are frequently overcrowded, which increases the amount of time that the EMTs and paramedics must spend with each patient. This is also likely to increase the number of potential positions. Job prospects are expected to be good since paid employees are needed to replace volunteers who have a high turnover rate.

For more information about our graduation rates, the median debt of students who completed the program, and other important information, please visit our website at www.bhcc.mass.edu/certificate-programs.

UPON COMPLETION OF THIS PROGRAM, GRADUATES WILL BE ABLE TO:
- After successful completion of the program, the student will receive a Certificate of Completion enabling him or her to apply for and take the National Registry of Emergency Medical Technicians (NREMT) Paramedic written and practical examinations.
- Participants who successfully pass the NREMT certification examination may go onto practice with fire departments, private ambulance services, third service ambulance services, hospital emergency departments, and various clinical settings where advanced emergency care is required.

• Participants who successfully pass the NREMT certification examination may go onto practice with fire departments, private ambulance services, third service ambulance services, hospital emergency departments, and various clinical settings where advanced emergency care is required.
Pastry Arts Certificate Program

PROGRAM OVERVIEW
This program prepares students with the basic skills and knowledge required for entry-level positions in the baking and pastry industry. This two semester, 29 credit program is scheduled from September through May.

CAREER OUTLOOK
Graduates of this program qualify for a variety of entry-level positions in retail bakeries, pastry shops and related pastry production facilities. Students also qualify to transfer most credits to the Associate in Science Degree in Culinary Arts.

For more information about our graduation rates, the median debt of students who completed the program, and other important information, please visit our website at www.bhcc.mass.edu/certificate-programs.

UPON COMPLETION OF THIS CONCENTRATION GRADUATES WILL BE ABLE TO:
- Demonstrate practiced an acquired technical skills in the usage of tools and equipment found in a typical bakery or commercial pastry production facility.
- Demonstrate the necessary administrative skills common to basic cost control and planning methods found in a typical commercial pastry shop.
- Demonstrate conceptual skills acquired through course work relative to operating a successful pastry shop or bakery facility.

*Prerequisite for AHE201 is AHE111 for students enrolled in the Patient Care Technician Program.

This program is offered on the Chelsea Campus each fall and spring semester.

Applicants to this program are required to undergo a Criminal Offender Record Information (CORI) check and a Sex Offender Registry Information (SORI) check. The outcome of the CORI/SORI check may impact the student’s ability to participate in the clinical experience. Admission to an Allied Health program does not guarantee clinical placement. For further information, see the Department Chair. Students must maintain a grade of B- or better in AHE110 and AHE111 in order to continue into the second semester.

**ADMISSION REQUIREMENTS:**

To be admitted to this program, students must apply to the program through Admissions and Enrollment Services and:

- Possess a high school diploma or GED certification.
- Attend an information session.
- Complete college placement tests in reading and English.
- Provide evidence of health insurance, complete a health form and submit proof of immunization.
- Place out of or complete ENG095 and RDG095 with a grade of C or better.

**PROGRAM OVERVIEW**

This program prepares students to deliver direct patient care through classroom teaching, lab practice, and actual clinical experience in hospitals and long-term care facilities. The program prepares students for a variety of positions in the health care field.

**CRIMINAL OFFENDER RECORD INFORMATION AND SEX OFFENDER REGISTRY INFORMATION CHECKS**

As a prerequisite for a clinical placement in the Patient Care Technician Certificate Program, all students must undergo a Criminal Offender Record Information (CORI) check and a Sex Offender Registry Information (SORI) check. These checks are required due to potential unsupervised contact with children, the disabled, or the elderly during a clinical experience. Students found to have certain criminal convictions or pending criminal actions will be presumed ineligible for clinical placement. The College is authorized by the Commonwealth’s Department of Criminal Justice Information Services, pursuant to Massachusetts General Laws, Chapter 6, Sections 167-178 B, to access CORI records. Sex Offender checks shall be performed pursuant to Massachusetts General Laws, Chapter 6, Sections 178C-178P.

For more information regarding the College’s CORI/SORI check process, please contact the College CORI/SORI Officer at 617-228-2193.

**CAREER OUTLOOK**

Graduates of this program qualify for employment in hospitals, clinics, chronic care facilities, and the home environment as multi-skilled workers, patient care technicians, patient care associates, medical aides, certified nursing assistants, and home health aides. The program prepares students in Healthcare Provider CPR Certifications. Graduates are eligible to sit for certification exams for State Nurse Aide and Home Health Aide.

For more information about our graduation rates, the median debt of students who completed the program, and other important information, please visit our website at www.bhcc.mass.edu/certificate-programs.

**UPON COMPLETION OF THIS CONCENTRATION GRADUATES WILL BE ABLE TO:**

- Perform direct patient care competently.
- Perform basic computer skills.

**PROGRAM OVERVIEW**

This certificate prepares students for entry level positions in personal computer hardware support. Recommended noncredit industry certification courses offered through the College’s Community Education Office are optional, but will greatly enhance employment prospects. The CIT internship and entrepreneurship courses are also optional.

**CAREER OUTLOOK**

Graduates completing this certificate may find employment in information support services departments in firms large and small as well as other companies specializing in personal computer maintenance support.

For more information about our graduation rates, the median debt of students who completed the program, and other important information, please visit our website at www.bhcc.mass.edu/certificate-programs.

**UPON COMPLETION OF THIS CONCENTRATION GRADUATES WILL BE ABLE TO:**

- Describe, remove, and replace select components of desktop and laptop personal computers; upgrade components based on customer needs and perform preventive maintenance and troubleshooting.
- Understand the basics of the most common desktop Office applications.
- Explain, install, and navigate the most common personal computer operating systems; upgrade components based on customer needs and perform preventive maintenance and troubleshooting.
- Demonstrate good communication skills and professional behavior while working with customers.
- Qualify to take the COMPTIA A+ Essentials Certification Examination.
- Qualify to take the NETWORK+ Certification Examination.

PROGRAM OVERVIEW
Through classroom teaching and practical experience in one or more pharmacy settings, the student will be prepared to work in teams supervised by a pharmacist to prepare prescriptions; provide customer service and perform inventory control, record keeping and the packaging of drugs. Courses in this 16-credit program include the following topics: Pharmacy Operations, Pharmaceutical Calculations, Pharmacology and Pharmacy Law. Students also participate in a 150 hour Internship in a pharmacy.

CRIMINAL OFFENDER RECORD INFORMATION AND SEX OFFENDER REGISTRY INFORMATION CHECKS
As a prerequisite for placement in a clerkship site, to take the PTCB examination, and for registration as a technician with the Board of Pharmacy, all students must undergo a Criminal Offender Record Information (CORI) check. The College is authorized by the Commonwealth's Department of Criminal Justice Information Services pursuant to Massachusetts General Laws, Chapter 6 Sections 167 – 178B, to access CORI records.

For more information regarding the College’s CORI check process, please contact the College CORI Officer at 617-228-2193.

CAREER OUTLOOK
According to the Bureau of Labor and Statistics (BLS), employment of pharmacy technicians is expected to increase by more than 20 percent by 2022.

For more information about our graduation rates, the median debt of students who completed the program, and other important information, please visit our website at www.bhcc.mass.edu/certificate-programs.

UPON COMPLETION OF THIS CONCENTRATION GRADUATES WILL BE ABLE TO:
- Upon completion of the certificate program and after attaining a 75% or better score on the Board of Pharmacy Qualification Exam, the student will be able to apply and be licensed as a Pharmacy Technician in Massachusetts.
- Graduates are prepared to apply and sit for the National Pharmacy Technician Certification Board (PTCB).
- Upon passing the National PTCB Exam graduates will be able to be registered as a Pharmacy Technician in Massachusetts.

This workforce solution is 100% funded by a grant awarded by the U.S. Department Labor, Employment and Training Administration, TAACCCT grant agreement # TC-22505-11-60-A25. *Note: All science, engineering, and math courses that are pre or co-requisites of other science and engineering courses require a grade of C+ or better.

**CONCENTRATION OVERVIEW**

This concentration prepares students to transfer to four-year colleges or universities to seek bachelor’s degrees in physical science or physics. After transferring, students study to become more proficient in one or more of the divisions of the physical sciences; e.g., theoretical physics, particle physics, astrophysics, biophysics, or applied physics. Graduates of the concentration may qualify to transfer using benefits of MassTransfer to one of the Massachusetts State Universities or the University of Massachusetts. For current information on eligible programs, visit www.mass.edu/masstransfer.

**CAREER OUTLOOK**

Graduates of this concentration should transfer to a four-year college or university because employment opportunities in physical science such as lab technicians usually require a minimum of a bachelor’s degree. Professional positions such as researchers or college instructors usually require a minimum of a master’s degree.

**UPON COMPLETION OF THIS CONCENTRATION GRADUATES WILL BE ABLE TO:**

- Demonstrate the connections between the major concepts and theories in the field of physics.
- Analyze and create solutions for problems involving principles of physics.
- Apply mathematical techniques in scientific problem solving.
- Properly report on the findings of a designed experiment.

Students enrolling in this degree program can earn World Studies Emphasis certification simultaneously. See page 214.

PROGRAM OVERVIEW

This program includes 33 credits of practical nursing theory and clinical practice in health care facilities. PNP111 (Fundamentals), requires clinical practice six (6) hours per week. PNP112 (Medical Surgical) and PNP 113 (Geriatrics, Pediatrics, Maternal/Child Health) both require clinical practice eighteen (18) hours per week. Students must earn a numerical grade of 78 or higher in all PNP courses with the exception of NUR100, in which students must earn a numerical grade of 80 or higher. Students who fail to meet either the clinical objective or the grade requirement of a PNP course fail that course. To ensure currency, credits for BIO203 and BIO204 earned more than five years prior to enrollment in the practical nursing clinical sequence are not accepted. Note that there are many prerequisites that must be met for acceptance into the Practical Nursing Certificate Program.

CRIMINAL OFFENDER RECORD INFORMATION AND SEX OFFENDER REGISTRY INFORMATION CHECKS

As a prerequisite for a clinical placement in the Nursing program, all students must undergo a Criminal Offender Record Information (CORI) check and a Sex Offender Registry Information (SORI) check. These checks are required due to potential unsupervised contact with children, the disabled, or the elderly during a clinical experience. Students found to have certain criminal convictions or pending criminal actions will be presumed ineligible for clinical placement. The College is authorized by the Commonwealth’s Department of Criminal Justice Information Services, pursuant to Massachusetts General Laws, Chapter 6, Sections 167-178 B, to access CORI records. Sex Offender checks shall be performed pursuant to Massachusetts General Laws, Chapter 6, Sections 178C-178P.

For more information regarding the College’s CORI/SORI check process, please contact the College CORI/SORI Officer at 617-228-2193.

CAREER OUTLOOK

Graduates of this program qualify for employment in hospitals, long-term care facilities, HMO’s clinics, doctors’ offices, and other community health agencies. For more information about our graduation rates, the median debt of students who completed the program, and other important information, please visit our website at www.bhcc.mass.edu/certificate-programs.

UPON COMPLETION OF THIS CONCENTRATION GRADUATES WILL BE ABLE TO:

- Demonstrate successful completion of course work and to prepare for licensure exam and entry level employment.
- Apply the nursing process in the delivery of holistic nursing care within the scope of practice of the practical nurse.
- Apply scientific knowledge and technology in the delivery of holistic nursing care.
- Integrate the roles of the practical nurse in health settings where predictable outcomes are expected.
- Communicate effectively with individuals, families, and groups within the health care system.
- Integrate cultural competence in the delivery of nursing care to a transcultural, diverse population throughout the lifespan.
- Integrate principles of teaching/learning in the delivery of holistic nursing care.
- Integrate the legal, ethical standards within the scope of practice of the practical nurse.
- Demonstrate accountability in delegation and leadership within the scope of practice of the practical nurse.
- Demonstrates responsibility for self-improvement and uses resources for lifelong learning.
- Integrates public policy that promotes and protects the healthcare system.

This workforce solution is 100% funded by a grant awarded by the U.S. Department Labor, Employment and Training Administration, TAACCCT grant agreement # TC-22505-11-60-A25. The solution was created by the grantee and does not necessarily reflect the official position of the U.S. Department Labor. The Department of Labor makes no guarantees, warranties, or assurances of any kind, express or implied, with respect to such information, including any information on linked sites and including, but not limited to, accuracy of the information or its completeness, timeliness, usefulness, adequacy, continued availability, or ownership. Massachusetts Community Colleges are equal opportunity employers. Adaptive equipment available upon request for persons with disabilities.

**TOTAL CREDITS** 27

*Note: Select the career elective from AHE104, HSV215, HSV219 or PSY233.

Due to the prerequisite requirements, it may not be possible to complete this certificate program in one year.

**PROGRAM OVERVIEW**

This certificate prepares students for direct service jobs in human services providing the delivery of services to participants in human service organizations.

**CRIMINAL OFFENDER RECORD INFORMATION AND SEX OFFENDER REGISTRY INFORMATION CHECKS**

As a prerequisite for a clinical placement in the Professional Human Services Work Certificate Program, all students must undergo a Criminal Offender Record Information (CORI) check and a Sex Offender Registry Information (SORI) check. These checks are required due to potential unsupervised contact with children, the disabled, or the elderly during a clinical experience. Students found to have certain criminal convictions or pending criminal actions will be presumed ineligible for clinical placement. The College is authorized by the Commonwealth’s Department of Criminal Justice Information Services, pursuant to Massachusetts General Laws, Chapter 6, Sections 167-178B, to access CORI records. Sex Offender checks shall be performed pursuant to Massachusetts General Laws, Chapter 6, Sections 178C-178P.

For more information regarding the College’s CORI/SORI check process, please contact the College CORI/SORI Officer at 617-228-2193.

**CAREER OUTLOOK**

Students completing the Professional Human Services Work Certificate Program qualify for generalist careers in social welfare, mental health, community development or other similar human service organizations in the community serving families and children, adolescents, elders or other specific populations in need of services through community programming.

For more information about our graduation rates, the median debt of students who completed the program, and other important information, please visit our website at www.bhcc.mass.edu/certificate-programs.

**UPON COMPLETION OF THIS CONCENTRATION GRADUATES WILL BE ABLE TO:**

- Use assessment practices to respond to the needs of participants and enhance these individuals in leading a life that involves self-empowerment, assertiveness, and strong decision-making skills.
- Communicate effectively and establish collaborative relationships to allow planning, implementation of support services, and interventions with participants, agency supports, and other community resources.
- Demonstrate knowledge of supports available, while understanding the challenges facing participants, assist in gaining resources for aid, advocate by overcoming challenges and providing supports through community and educational resources.
- Demonstrate skill in handling crisis prevention, intervention and resolution techniques to solve problems and keep detailed documentation of the process and outcome of each situation.
- Participate in the life of a human services agency, being familiar with the mission and “best” practices of human services organizations, demonstrating these skills in professional activities.

Select the career elective from PSY, HSV, or ECE courses. The Department encourages students to take a computer course for one of the three electives.

*Note: A Social Science elective is highly recommended in order to comply with MassTransfer guidelines. **Note: Human Growth and Development (PSY213) does not satisfy the A.A. Psychology concentration requirements. It is offered only to non-Psychology majors. ***Note: New students enrolled in 9 credits or more must take a Learning Community Seminar or a Learning Community Cluster within their first year. ****Note: Sequence courses in a foreign language starting at 102 levels are highly recommended as most four-year colleges require intermediate proficiency in a foreign language.

*****Note: PSY101 must be completed with a C or better.
CONCENTRATION OVERVIEW
The Department of Behavioral Sciences aspires to develop and foster a passion for lifelong learning and academic excellence. The department integrates students’ diverse backgrounds into the teaching and learning experience, creating a civically engaged community of learners who are able to think critically of current issues in our complex world. Graduates of the program will carry with them a strong sense of collegiality and responsibility that will help them succeed in their long-term academic, professional and personal goals.

The vision of our department is carried out through our mission of:
• teaching foundational behavioral science courses that support the general education mission of the college and engage our students in the broad domains and applications of Psychology, Sociology and Cultural Anthropology;
• offering concentration courses that help our students develop a firm understanding of the various fields within a specific behavioral science discipline;
• engaging our students in research that allows them to apply critical thinking skills using scientific approaches;
• supporting our majors as they prepare to transfer to four-year institutions and/or successfully navigate the professional world through the application of the principles, concepts and theories that they have learned from the program;
• supporting our students to apply what they have learned towards becoming civically engaged and lifelong learners.

CAREER OUTLOOK
Graduates of this concentration should plan to transfer to a four-year college or university because entry-level positions in the general field of psychology require a bachelor’s degree. Career positions generally require a master’s degree.

UPON COMPLETION OF THIS CONCENTRATION, GRADUATES WILL BE ABLE TO DEMONSTRATE:
• a basic knowledge and understanding of the different principles and concepts of Psychology (foundational knowledge)
• the ability to apply learned concepts to the intrapersonal and interpersonal experiences embedded within diverse cultural contexts
• the ability to evaluate, compare and contrast, critique various theoretical perspectives and complex/definable and current issues as they relate to the various domains of Psychology
• the ability to use learned knowledge to actively engage in and produce scientific research.

Students enrolling in this degree program can earn World Studies Emphasis certification simultaneously. See page 214.
Associate in Science Degree: Registered Nursing Program

This program prepares students to become nurses at the associate’s degree level and prepares students to become eligible to take the National Council Licensure Exam for Registered Nurses (NCLEX-RN). The Accreditation Commission for Education in Nursing (ACEN) 3343 Peachtree Road NE, Suite 850, Atlanta, GA 30326, 404-975-5000, accredits the Nursing program and the Massachusetts Board of Registration in Nursing approves it. In order to provide a sound theoretical base for the practice of nursing, the curriculum offers general education courses concurrently with nursing courses. Students begin clinical learning experiences in the first semester and the clinicals continue throughout the program. The program curriculum begins with the fall and spring semesters. Due to the nature of clinical placements, students in any nursing program option may complete their clinical experience in day, evening or weekend hours. Students are responsible for their own transportation to clinical sites.

Students must earn a numerical grade of 78 or higher in all nursing courses and a grade of C or higher in all science courses. Either failure to meet clinical objectives or failure to obtain a numerical course grade of 78 or better constitutes failure in that course. Students may apply for readmission to the program one time.

All nursing students are required to: undergo a physical examination; complete the necessary immunization forms, including, but not limited to the three (3) dose Hepatitis B immunization series; proof of immunity against measles, mumps, rubella and chicken pox; current proof of freedom from tuberculosis and any other immunization(s) that clinical sites require. Students must complete all health requirements prior to entering any clinical experience. Students who do not complete health requirements will not be allowed to enter the clinical component and may jeopardize their standing in the nursing program. All nursing students must have current American Heart Association CPR certification for the Healthcare Provider, carry malpractice and health insurance; and undergo a Criminal Offender Record Information (CORI) check and a Sex Offender Registry Information (SORI) check. Individuals with previous court convictions also must meet eligibility requirements of the Massachusetts Board of Registration in Nursing for licensure. Answering yes to any of the following questions may impact upon a person’s ability to meet good moral character requirements specified by the Massachusetts Board of Registration in Nursing, be eligible to sit for the NCLEX-RN examination, and ultimately to practice as a registered nurse in Massachusetts:

• Has any disciplinary action ever been taken against you by a professional and/or trade licensing/ certification board located in the United States or any country/foreign jurisdiction, including removal from a long-term care nursing aide registry program?
• Are you the subject of pending disciplinary action by a professional and/or trade licensing/ certification board located in the United States or any foreign country/foreign jurisdiction?
• Have you ever applied for, and been denied, a professional and/or trade license/certification in the United States or any other country/foreign jurisdiction?
• Have you ever surrendered or resigned a professional and/or trade license/certificate in the United States or any other country/foreign jurisdiction?
• Have you ever been convicted of a felony or misdemeanor in the United States or any other country/foreign jurisdiction?

For further information, please see the Department Chair. This is a full-time two and one half-year program. Students may select either day, evening, or alternative program options.

Prerequisites for the Nursing Program:

1. Attend one MANDATORY information session.
2. Possess a high school diploma or GED certificate.
3. Achieve a reading level of 10th grade or higher on the College Placement Test (CPT).
4. Complete the following courses:
   • One year of high school chemistry with lab or one semester of college chemistry with lab with a grade of C or better.
   • MAT097 Fundamentals of Algebra or placement above MAT097.
   • BIO203 Anatomy and Physiology I/Lab with a grade of C or better. (credits for Anatomy and Physiology/Lab that were earned more than five (5) years prior to enrollment in the nursing program are not accepted).
   • ENG111 College Writing I with a grade of C or better.
   • NUR100 Drug Calculations with a grade of B- or better.

Continued on following page
Associate in Science Degree: Registered Nursing Program

Continued from previous page

After all prerequisites are completed:

- Prospective students must apply through Admissions and Enrollment Services during enrollment periods. Approximate dates are Fall Program: September-December; Spring Program: May - August. Check with this office for exact dates.
- After applying, qualified applicants will be invited to take the Nursing admissions test: Test of Essential Academic Skills V (TEAS V).
- Applicants must score at least 47.6 percent in reading, 46.7 percent in math and 37.5 percent in science on the test to be considered for the nursing program.
- Admission to the Nursing Program will be based on a ranking system that includes student performance on the TEAS as well as performance in other courses in the nursing curriculum.
- Applicants are accepted into the Nursing Program after evaluation of the applicant’s record by the Nurse Education Admissions Committee. Applicants who are not selected for admission to the Nursing Program must meet with a member of the advising staff before reactivating their application.

Costs of the Nursing Program year I and II:
Costs associated with the nursing program are different than other programs at Bunker Hill Community College and include:

Tuition and fees:

- For Massachusetts Residents ................................................................. $11,100.00
- For Non-Mass Residents/International Students ........................................... $25,300.00
- Uniforms ......................................................................................... $200.00
- Malpractice/Liability Insurance 10/1-9/30.................................................. $15.00 yearly
- Books/ ATI Materials ............................................................................. $1,500.00
- Nursing Pin ............................................................................................ $60.00
- Licensure Application/Exam Fees ......................................................... $430.00

NOTE: Costs are estimates and may change

*Note: PSY101 and PSY213 must be completed prior to NUR211.

**OPTION OVERVIEW**

This program includes 39 credits of nursing theory and clinical practice in health care facilities. NUR111, Nursing I, requires clinical practice six (6) hours per week. NUR112, NUR211 and NUR212, Nursing II, III and IV, each require clinical practice twelve (12) hours per week. Students must earn a grade of 78 or higher in all NUR courses with the exception of NUR100, in which students must earn a grade of 80 or higher. Students who fail to meet either the clinical objective or the grade requirement of an NUR course fail that course. To ensure currency, credits for BIO203, 204 and 205 earned more than five years prior to enrollment in the nursing clinical sequence are not accepted. Note

that there are many requirements that must be met for acceptance to the nursing programs. These requirements are spelled out in detail in the Associate in Science Degree: Nursing Program description preceding this grid.

**CRIMINAL OFFENDER RECORD INFORMATION AND SEX OFFENDER REGISTRY INFORMATION CHECKS**

As a prerequisite for a clinical placement in the Nursing program, all students must undergo a Criminal Offender Record Information (CORI) check and a Sex Offender Registry Information (SORI) check. These checks are required due to potential unsupervised contact with children, the disabled, or the elderly during a clinical experience. Students found to have certain criminal convictions or pending criminal actions will be presumed ineligible for clinical placement. The College is authorized by the Commonwealth’s Department of Criminal Justice Information Services, pursuant to Massachusetts General Laws, Chapter 6, Sections 167-178 B, to access CORI records. Sex Offender checks shall be performed pursuant to Massachusetts General Laws, Chapter 6, Sections 178C-178P.

For more information regarding the College’s CORI/SORI check process, please contact the College CORI/SORI Officer at 617-228-2193.

Registered Nursing Program: Day/Evening/Alternative Options

Continued from previous page

CAREER OUTLOOK
Graduates of this option qualify for employment in hospitals, long-term care facilities, HMOs, clinics, doctors’ offices, and other community health agencies.

UPON COMPLETION OF THIS CONCENTRATION GRADUATES WILL BE ABLE TO:

• Apply the nursing process and critical thinking in the delivery of holistic nursing care in a variety of settings.
• Apply scientific knowledge and technology in the delivery of holistic nursing care.
• Integrate the roles of the associate degree nurse into nursing practice.
• Communicate effectively with individuals, families, and groups within the health care system.
• Integrate cultural competence in the delivery of nursing care to a transcultural, diverse population throughout the lifespan.
• Integrate principles of teaching/learning in the delivery of holistic nursing care.
• Integrate the legal, ethical, and professional standards in the delivery of care.
• Demonstrate accountability as a manager of care utilizing delegation and leadership skills.
Associate in Science Degree: Respiratory Therapy Program

This program prepares students to become respiratory therapists at the associate degree level and prepares students to be eligible to take the CRT Examination offered by the National Board for Respiratory Care (NBRC). The Commission on Accreditation for Respiratory Care (CoARC) accredits the Respiratory program. Refer to the BHCC Accreditation Statements in the front of this catalog for contact information for each of the accrediting agencies. The program begins in the fall semester, and didactic and clinical education is carefully correlated to provide reinforcement in the clinical setting of skills learned in the classroom.

All respiratory students are required to: undergo a physical examination; complete the necessary immunization forms, including, but not limited to the three (3) dose Hepatitis B immunization series; proof of immunity against measles, mumps, rubella and chicken pox; current proof of freedom from tuberculosis and any other immunization(s) that clinical sites require. Students must complete all health requirements prior to entering any clinical experience. Students in the program must earn a grade of C or better in all respiratory classes. All students are required to undergo a Criminal Offender Record Information (CORI) check and a Sex Offender Registry Information (SORI) check.

PREREQUISITES FOR RESPIRATORY THERAPY:
- Attend one MANDATORY information session. (Refer to BHCC website for dates.)
- Possess a high school diploma or GED certificate.
- Take college placement test (CPT), or LOEP for ESL students.
- Complete the following courses with a grade of C or better prior to applying to the program:
  - One semester of College Algebra (MAT194) or equivalent;
  - One semester of college level Anatomy/Physiology I/Lab (BIO203) (must be completed within five years of application unless currently working in related healthcare position).
  - One semester of college level Anatomy/Physiology II/Lab (BIO204) (must be completed within five years of application unless currently working in related healthcare position).
  - One semester of college level Microbiology (BIO205) or equivalent.
- One semester of college level writing (ENG111) or equivalent.

AFTER ALL PREREQUISITES ARE COMPLETED:
- Prospective students must apply through Admissions and Enrollment Services during the enrollment period. Check with this office for exact dates.
- After applying qualified applicants will be invited to take the Test of Essential Academic Skills (TEAS).
- Applicants must score at least 47.6 percent in reading, 46.7 percent in math, 37.5 percent in science on the Test of Essential Academic Skills V (TEAS V) to be considered for the program.
- Admission to the Respiratory Therapy Program will be based upon a ranking system that includes student performance on the TEAS V as well as performance in the prerequisite courses.

**BUNKER HILL COMMUNITY COLLEGE WILL NO LONGER BE ACCEPTING STUDENTS INTO THIS PROGRAM AS OF THE 2013-2014 ACADEMIC YEAR.**

**PROGRAM OVERVIEW**

This 21-month respiratory therapist program prepares students through lectures, laboratory activities and hospital based hands-on clinical experience, to evaluate, treat and care for patients with breathing disorders. Respiratory students work under the direction of a physician in a variety of health care settings, such as acute hospitals, long term facilities, neonatal and pediatric care specialties, pulmonary rehabilitation and home care.

**CRIMINAL OFFENDER RECORD INFORMATION AND SEX OFFENDER REGISTRY INFORMATION CHECKS**

As a prerequisite for a clinical placement in the Respiratory Therapy program, all students must undergo a Criminal Offender Record Information (CORI) check and a Sex Offender Registry Information (SORI) check. These checks are required due to potential unsupervised contact with children, the disabled, or the elderly during a clinical experience. Students found to have certain criminal convictions or pending criminal actions will be presumed ineligible for clinical placement. The College is authorized by the Commonwealth’s Department of Criminal Justice Information Services, pursuant to Massachusetts General Laws, Chapter 6, Sections 167-178 B, to access CORI records. Sex Offender checks shall be performed pursuant to Massachusetts General Laws, Chapter 6, Sections 178C-178P.

Continued on following page
Respiratory Therapy Program

For more information regarding the College’s CORI/SORI check process, please contact the College CORI/SORI Officer at 617-228-2193.

CAREER OUTLOOK
This program prepares students to pursue careers as respiratory therapists at the associate degree level and prepares students to be eligible to take the CRT Examination offered by the National Board for Respiratory Care (NBRC). Having successfully earned the CRT credential the graduate is eligible to take the advanced-level NBRC Registry examinations to earn the RRT credential. Respiratory care practitioners are licensed in the state of Massachusetts.

UPON COMPLETION OF THIS CONCENTRATION GRADUATES WILL BE ABLE TO:
• Administer oxygen and other medical gases.
• Administer humidification and aerosol therapy, including aerosolized medications.
• Interpret and report tests in diagnosing lung and breathing disorders and recommending treatment methods.
• Manage mechanical ventilators and artificial airway devices for patients who can’t breath normally on their own.
• Perform postural drainage, bronchopulmonary hygiene, breathing exercises, pulmonary rehabilitation, and cardiopulmonary resuscitation.
• Educate patient and families about lung conditions so they can maximize their recovery.

*Note: A Social Science elective is highly recommended in order to comply with MassTransfer guidelines.

**Note: SOC101 and ENG111 must be completed with a C or better.

***Note: New students enrolled in 9 credits or more must take a Learning Community Seminar or a Learning Community Cluster within their first year.

****Note: Behavioral Science or Foreign Language elective is recommended. For students who choose to take a Foreign Language elective, sequence courses starting at 102 levels are highly recommended (e.g., SPN102, SPN201) as most four-year colleges require intermediate proficiency in a foreign language.
Sociology Concentration
Continued from previous page

CONCENTRATION OVERVIEW
The Department of Behavioral Sciences aspires to develop and foster a passion for lifelong learning and academic excellence. The department integrates students' diverse backgrounds into the teaching and learning experience, creating a civically engaged community of learners who are able to think critically of current issues in our complex world. Graduates of the program will carry with them a strong sense of collegiality and responsibility that will help them succeed in their long-term academic, professional and personal goals.

The vision of our department is carried out through our mission of: teaching foundational behavioral science courses that support the general education mission of the college and engage our students in the broad domains and applications of Psychology, Sociology and Cultural Anthropology; offering concentration courses that help our students develop a firm understanding of the various fields within a specific behavioral science discipline; engaging our students in research that allows them to apply critical thinking skills using scientific approaches; supporting our majors as they prepare to transfer to four-year institutions and/or successfully navigate the professional world through the application of the principles, concepts and theories that they have learned from the program; supporting our students to apply what they learn towards becoming civically engaged and lifelong learners.

CAREER OUTLOOK
Graduates of this concentration qualify for entry-level positions in the general field of Sociology. Students will be able to choose which career track they intend to pursue by taking classes that are relevant to their interest. Graduates may wish to transfer to a four-year college or university, or will be able to work in the community with an associate's degree.

UPON COMPLETION OF THIS CONCENTRATION, GRADUATES WILL BE ABLE TO DEMONSTRATE:
• a basic knowledge and understanding of the different principles and concepts of Sociology (foundational knowledge)
• the ability to apply learned concepts to intrapersonal experiences, social institutions, and social issues embedded within diverse cultural contexts
• the ability to evaluate, compare and contrast, critique various theoretical perspectives and complex/debatable and current issues as they relate to the various domains of Sociology
• the ability to use learned knowledge to actively engage in and produce scientific research

Through these learning outcomes, students will be empowered individuals who will effectively navigate their academic, professional and personal goals.

Students enrolling in this degree program can earn World Studies Emphasis certification simultaneously.

**CERTIFICATE OVERVIEW**

This certificate will introduce students to the principles and concepts of sport management operations. It will provide a foundation for students interested in this field. The discipline specific courses will provide students with an introduction to areas that are critical for success in the sport management industry.

Students will gain specific competencies in management, marketing, communications and operations as they relate to the sport and leisure industry. Students will have the foundation to continue their education whether it is to complete their A.S. degree or seek entry-level positions in the field.

**CAREER OUTLOOK**

This option prepares students to seek employment in many entry-level positions in the areas of health and fitness, sport and leisure, park and recreation and the professional sport industry including opportunities in the management of professional, college, secondary school and community sports.

For more information about our graduation rates, the median debt of students who completed the program, and other important information, please visit our website at www.bhcc.mass.edu/certificate-programs.

**UPON COMPLETION OF THIS CONCENTRATION GRADUATES WILL BE ABLE TO:**

- Apply the foundational concepts of managerial, marketing and leadership skills to a sport management enterprise/environment.
- Understand the basic principles of sport management and apply research and theory to solve sport and event management issues.
- Integrate principles of management to organize people and resources to succeed in the sport management industry.

The Business Administration Department at Bunker Hill Community College is a collegial, student-centered learning community dedicated to providing an innovative, creative and relevant education in business disciplines to a diverse student population. We strive to maximize student success by placing graduates in a competitive position when seeking employment in a business environment or upon transfer to a four-year academic institution, ultimately empowering them to compete responsibly and successfully in a global business environment.

OPTION OVERVIEW
This option introduces students to the principles and concepts of sport management operations. The program provides students with a comprehensive foundation in business management along with specialized courses in the areas that are critical for success in the sport management industry. Students will gain a comprehensive business foundation combined with specific competencies in management, marketing, communications and operations as they relate to the sport and leisure industry. Students will have the foundation to continue their education at a four-year institution or seek entry-level positions in the field.

CAREER OUTLOOK
This option prepares students to seek employment in many entry-level positions in the areas of health and fitness, sport and leisure, park and recreation and the professional sport industry including opportunities in the management of professional, college, secondary school and community sports.

UPON COMPLETION OF THIS OPTION, GRADUATES WILL BE ABLE TO:
- Integrate principles of management to organize people and resources to succeed in the sport management industry.
- Apply the concepts needed to plan, lead, organize, control and staff the operations of a sport management enterprise.
- Understand the basic principles of sport management as they relate to legal issues, managing and marketing a sports organization, communications and administration.

This program is offered on the Chelsea Campus.

Students must maintain a grade of C or better in all surgical technology courses. Applicants to this program are required to undergo a Criminal Offender Record Information (CORI) check and a Sex Offender Registry Information (SORI) check.

The outcome of the CORI check may impact the student’s ability to participate in the clinical experience. For further information, see the Department chair.

**ADMISSION REQUIREMENTS:**

Students must apply to the program through Admissions and Enrollment Services and:

- Possess a high school diploma or GED certificate.
- Attend an information session.
- Complete Writing Skills II (ENG095) with a grade of C or better or place into College Writing I (ENG111).
- Complete Foundations of Mathematics (MAT093) with a grade of C or better or place above Fundamentals of Mathematics (MAT093) on the college placement test.
- Complete the college placement tests in reading, math, and English (10th grade reading level preferred).

When they have completed the admission requirements, qualified applicants will be invited for an interview.

**PROGRAM OVERVIEW**

Through classroom teaching, lab observation and practice, and clinical experience, this full-time, 11-month certificate program prepares students to work closely with surgeons, anesthesiologists, registered nurses, and other surgical personnel to deliver patient care in the operating room. The program prepares students to handle the instruments, supplies and equipment necessary during the surgical procedure; to understand the procedures being performed and anticipate the needs of the surgeon; to have the necessary knowledge and ability to provide quality patient care during the operative procedure and to maintain sterile technique. Students spend two days per week in area hospitals during spring semester and work full-time during June and July.

**CRIMINAL OFFENDER RECORD INFORMATION AND SEX OFFENDER REGISTRY INFORMATION CHECKS**

As a prerequisite for a clinical placement in the Surgical Technology Certificate Program, all students must undergo a Criminal Offender Record Information (CORI) check and a Sex Offender Registry Information (SORI) check. These checks are required due to potential unsupervised contact with children, the disabled, or the elderly during a clinical experience. Students found to have certain criminal convictions or pending criminal actions will be presumed ineligible for clinical placement. The College is authorized by the Commonwealth’s Department of Criminal Justice Information Services, pursuant to Massachusetts General Laws, Chapter 6, Sections 167-178B, to access CORI records. Sex Offender checks shall be performed pursuant to Massachusetts General Laws, Chapter 6, Sections 178C-178P.

For more information regarding the College’s CORI/SORI check process, please contact the College CORI/SORI Officer at 617-228-2193.

**CAREER OUTLOOK**

Graduates of this program qualify for surgical technologist positions in hospitals. The prospect for jobs is very good at the present time as the cost of health care rises. Graduates of the program qualify to take the certification exam after a few months of on-the-job experience.

For more information about our graduation rates, the median debt of students who completed the program, and other important information, please visit our website at www.bhcc.mass.edu/certificate-programs.

**UPON COMPLETION OF THIS CONCENTRATION GRADUATES WILL BE ABLE TO:**

- Assist the operative team during the pre-operative, intra-operative, and post-operative phases of surgery.
- Prepare equipment and supplies for use during surgery.
- Function as “first scrub” on most surgical procedures.

The Business Administration at Bunker Hill Community College is a collegial, student-centered learning community dedicated to providing an innovative, creative and relevant education in business disciplines to a diverse student population. We strive to maximize student success by placing graduates in a competitive position when seeking employment in a business environment or upon transfer to a four-year academic institution, ultimately empowering them to complete responsibility and successfully in today’s global business environment.

**OPTION OVERVIEW**

The Taxation Certificate Program prepares students with an intensive, practical application of skills and decision making demanded by the taxation and auditing profession. Students will develop technical, communications, critical thinking, quantitative, and human relation skills needed to be competitive in this field. This option provides students with the skills needed for entry level positions found in the taxation and auditing field. Students will participate in a hands-on internship experience at the Massachusetts Department of Revenue, affording them a first-hand look at the inner workings of the taxation and auditing profession.

The program is intended for students with an associate or bachelor’s degree.

**CAREER OUTLOOK**

This option qualifies graduates to seek employment with businesses conducting taxation and auditing operations that correspond to the required career electives. For more information about our graduation rates, the median debt of students who completed the program, and other important information, please visit our website at www.bhcc.mass.edu/certificate-programs.

**UPON COMPLETION OF THIS PROGRAM, GRADUATES WILL BE ABLE TO:**

- Build an understanding of steps required to perform both internal and independent audits;
- Understand the workings and concepts of tax law as it pertains to the business transactions of varied business entities;
- Identify the conditions that lead to the detection of fraud;
- Demonstrate competencies regarding the auditor’s objectives and procedures in selected areas of the audit, emphasizing the business cycles;
- Recognize and apply the general rules of accounting related to taxation and auditing;
- Demonstrate a mastery of design of audit programs for financial statement audits;
- Demonstrate conceptual and analytical skills acquired through course work and relate to thoughtful analysis of financial and non-financial data;
- Understand the legal and ethical challenges faced by auditors and remedies for these situations.

This workforce solution is 100% funded by a grant awarded by the U.S. Department of Labor, Employment and Training Administration, TAACCCT grant agreement # TC-22505-11-60-A25. The solution was created by the grantee and does not necessarily reflect the official position of the U.S. Department of Labor. The Department of Labor makes no guarantees, warranties, or assurances of any kind, express or implied, with respect to such information, including any information on linked sites and including, but not limited to, accuracy of the information or its completeness, timeliness, usefulness, adequacy, continued availability, or ownership. Massachusetts Community Colleges are equal opportunity employers. Adaptive equipment available upon request for persons with disabilities.

The Business Administration Department at Bunker Hill Community College is a collegial, student-centered learning community dedicated to providing an innovative, creative, and relevant education in business disciplines to a diverse student population. We strive to maximize student success by placing graduates in a competitive position when seeking employment in a business environment or upon transfer to a four-year academic institution, ultimately empowering them to compete responsibility and successfully in today’s global business environment.

OPTION OVERVIEW

The Associate in Science Degree: Business Administration Program, Taxation Option prepares students with an intensive, practical application of skills and decision making demanded by the taxation and auditing profession. Students will develop technical, communications, critical thinking, quantitative, and human relation skills needed to be competitive in this field.

This option provides students with the skills needed for entry-level positions found in the taxation and auditing field and will also position them to transfer to a four-year degree program. Students will participate in a hands-on internship experience at the Massachusetts Department of Revenue, affording them a first-hand look at the inner workings of the taxation and auditing profession.

CAREER OUTLOOK

This option qualifies graduates to seek employment with businesses conducting taxation and auditing operations that correspond to the required career electives.

UPON COMPLETION OF THIS CONCENTRATION GRADUATES WILL BE ABLE TO:

- Build an understanding of steps required to perform both internal and independent audits;
- Understand the workings and concepts of tax law as it pertains to the business transactions of varied business entities;
- Understand the legal and ethical challenges faced by auditors and the resolution approaches for these situations;
- Demonstrate competencies regarding the auditor’s objectives and procedures in selected areas of the audit, emphasizing the business cycles;
- Recognize and apply the general rules of accounting related to taxation and auditing;
- Demonstrate a mastery of design of audit programs for financial statement audits;
- Demonstrate conceptual and analytical skills acquired through course work and relate to thoughtful analysis of financial and non-financial data.

This program prepares students for employment and for transfer to four-year colleges and universities. The college has transfer articulation agreements with many of the four-year colleges and universities in the area. The College encourages students to meet with their advisors for additional information. This program makes a concentrated effort to demonstrate how the subject matter relates to the cultures of our diversified student population. The program places emphasis on student participation and creates an interactive forum in which to learn. The Business Administration Department at Bunker Hill Community College is a collegial, student-centered learning community dedicated to providing an innovative, creative, and relevant education in business disciplines to a diverse student population. We strive to maximize student success by placing graduates in a competitive position when seeking employment in a business environment or upon transfer to a four-year academic institution, ultimately empowering them to compete responsibly and successfully in a global business environment.

This program is offered under an agreement with the New England Laborers Union. Students will transfer college credit for courses successfully completed during a New England Laborers Union Training Apprenticeship. College credits must be approved by the American Council on Education (ACE) and it is the responsibility of the student to obtain ACE approval.

### OPTION OVERVIEW

This option allows individuals in the vocational field to build on their apprenticeship training to earn a college degree. Students can earn transfer credit for courses that are approved by the American Council on Education. Students learn business skills that could be combined with their specialized skills to create opportunities for self-employment or for career advancement and career mobility.

### CAREER OUTLOOK

This option prepares graduates to start and manage a small business, and to move into management and supervisory positions.

**UPON COMPLETION OF THIS CONCENTRATION GRADUATES WILL BE ABLE TO:**

- Develop and implement a business plan.
- Prepare a set of financial statements for a service, merchandising or manufacturing business that is structured as a sole proprietorship, partnership or a corporation.
- Analyze a set of financial statements to determine the strengths or weaknesses of the business. Understand the basic principles of business law, contracts and agency.
- Demonstrate proficiency in spreadsheet and software applications.
- Examine management theory and practice, and explain basic business methodology and management issues.
- Be able to identify and analyze the marketing strategies of an organization that can be used to advance its mission.

*Note: See the Department Chair for substitute course. **Note: New students enrolled in 9 credits or more must take a Learning Community Seminar or a Learning Community Cluster within their first year.

**CONCENTRATION OVERVIEW**
This concentration prepares students to transfer to four-year colleges or universities to seek bachelor’s degrees in theatre arts, theatre education (elementary or secondary), early childhood education, literature/drama, public speaking, or communication. Students should complete requirements for the associate’s degree before transferring to a four-year institution for the bachelor’s degree. Graduates of this concentration may qualify to transfer using benefits of MassTransfer to a four-year state college or University of Massachusetts campus. For current information on eligible programs, visit www.mass.edu/masstransfer.

**CAREER OUTLOOK**
Graduates of this concentration with a strong theatre background qualify for careers in all aspects of print and broadcast journalism; radio/TV production; dance and expressive movement; art and art therapies, as they are related to counseling and psychology; elementary and secondary teaching; communication; and literature.

**UPON COMPLETION OF THIS CONCENTRATION GRADUATES WILL BE ABLE TO:**
- Demonstrate familiarity with the components necessary to produce a play.
- Know and understand theatre history and literature.
- Demonstrate practical experience in producing a play from planning to performing.

Students enrolling in this degree program can earn World Studies Emphasis certification simultaneously. See page 214.
Program Overview

This program provides students with a sound basis for employment in the field of Web Development. The program trains students in the concepts and applications of leading-edge web delivery mechanisms. This program would also be beneficial to professionals with degrees in other disciplines who are seeking new career options.

In addition, the knowledge gained can be applied toward the pursuit of Webmaster Certification through a certification agency.

Career Outlook

Graduates of this program will qualify as entry-level web developers and web development support personnel.

For more information about our graduation rates, the median debt of students who completed the program, and other important information, please visit our website at www.bhcc.mass.edu/certificate-programs.

Upon Completion of This Concentration Graduates Will Be Able To:

- Design, implement, publish, and maintain websites in support of creating a web presence for businesses and organizations.
- Create animated, event driven multimedia content for web delivery.
- Construct, extract, transform, and present database resident content directly into a web delivery mechanism.
- Construct event driven action scripts within a web page to respond to user stimulations and provide dynamic results in a real time environment.

PROGRAM OVERVIEW

The Web Development In Entrepreneurship Certificate will provide students with a sound basis of knowledge of web-based delivery and development of products, services and web technologies and will allow individuals to acquire practical entrepreneurial skills. Students will learn leading edge web delivery mechanisms and will learn to incorporate these skills with practical business skills to create opportunities for self-employment potentially leading to starting their own business, or will better prepare them for further career advancement and mobility.

CAREER OUTLOOK

Students completing this certificate can expect to be qualified for positions as web developers and also be positioned to explore the option of starting their own web design company. Students will be prepared to utilize their knowledge towards the pursuit of eventual Webmaster certification and ultimately, their own web development consulting business.

For more information about our graduation rates, the median debt of students who completed the program, and other important information, please visit our website at www.bhcc.mass.edu/certificate-programs.

UPON COMPLETION OF THIS CONCENTRATION GRADUATES WILL BE ABLE TO:

- Design implement, publish and maintain websites in support of creating a web presence for businesses and organizations.
- Develop and implement a business plan designed to create a web development venture.
- Evaluate the feasibility of web development ideas and identify the industry factors leading to business opportunity.

CAREER OUTLOOK
Graduates of this program will qualify as web developers and for web development support positions, and will have a solid basis for pursuing certification as a Webmaster.

UPON COMPLETION OF THIS CONCENTRATION GRADUATES WILL BE ABLE TO:
- Design, implement, publish, and maintain websites in support of creating a web presence for businesses and organizations.
- Create animated, event driven multimedia content for web delivery.
- Construct, extract, transform, and present database resident content directly into a web delivery mechanism.
- Construct event driven action scripts within a web page to respond to user stimulations and provide dynamic results in a real time environment.

The Computer Media Technology program provides students in the design, development, and production skills necessary for entry into the Computer Gaming Industry and the Computer Simulation industry. Students will satisfy the requirements of this program by completing a succession of General Education courses and Gaming/Simulation specific courses as well as elective courses from within the program disciplines. Graduates of this program will qualify for entry-level positions in the computer Gaming and Computer Simulation industries.

OPTION OVERVIEW
This program prepares students for entry-level positions in firms that specialize in web-based delivery and development of products, services, and web technologies. Additionally, students may fill entry-level positions in businesses that employ in-house staff to support and develop their own web delivery mechanisms for such support services as company directories and realtime content presentation. The program also provides students with a sound basis to enter the ever-growing opportunities available for independent web development consulting. Students are trained in the concepts and applications of leading-edge web delivery mechanisms such as XML (Extensible Markup Language), XML Transformation languages, ASP.net, advanced graphical techniques and database incorporation into web delivery technologies. The program prepares students to apply their knowledge towards the pursuit of Webmaster certification through a certification agency.

*Note: Prior to enrolling in course, student must see Department Chair.

**TOTAL CREDITS** 15-16

World Studies Emphasis certification is an additional credential to the Associate in Arts degree. It cannot be taken as a standalone program. Students must choose five courses from only three of the seven areas listed in the grid.

**CREDENTIAL OVERVIEW**

This emphasis certification enables students enrolled in Associate in Arts degree programs to obtain World Studies Emphasis certification with no additional coursework through careful selection of general education and elective courses needed to fulfill their degree requirements. World Studies Emphasis certification is an additional credential to demonstrate acquired knowledge, skills, and competencies needed to live and work in a globally interdependent world. Students must complete five courses from the World Studies Emphasis menu. The common objective of these courses is to foster an ability to appreciate, analyze, and deal constructively with historical/contemporary experiences of diversity in the United States and other parts of the world. The menu includes courses in the areas of history, sociology, geography, science, religion, language, and literature.

**CAREER OUTLOOK**

Graduates who transfer to four-year colleges or universities with a major in international studies, geography, history, literature, languages, education, classics, sociology, anthropology, religion, or a regional studies program such as Middle East Studies, find World Studies Emphasis certification to be an asset. Graduates with World Studies Emphasis certification enhance their future employability because business, government, non-profit, and education leaders now seek employees with an understanding of world issues and the capacity to work in a multicultural environment.

**UPON COMPLETION OF THIS CONCENTRATION GRADUATES WILL BE ABLE TO:**

- Demonstrate an understanding of the geographical, political, and social issues of a country or region other than their own.
- Understand the impact of historical events, culture, political structures, religion, and/or geography on world events.
- Demonstrate open-mindedness and curiosity with respect to other countries and cultures.
- View global issues from multiple perspectives
Accounting

ACC-101 Principles of Accounting I 3 Credits
After a brief consideration of the meaning and purpose of accounting, this course explores the basic statements of an accounting system: the balance sheet, the income statement and the statement of owner's equity. Students will examine the accounting cycle with an emphasis on the methods of accumulating and summarizing data generated by business transactions. Students will apply their manual accounting skills to an automated accounting system using general ledger software. Areas of concentration will include adjusting entries, closing process, inventory analysis, merchandising transactions, cash control procedures, receivables, and payables. Prerequisite: Academic Reading III (ESL098) or Reading Skills II (RDG095).

ACC-102 Principles of Accounting II 3 Credits
This course will expand upon the basic concepts and theories that students learned in the Principles of Accounting I course. Students will be expected to apply their knowledge in a managerial decision-making mode. Areas studied include, but not limited to, the following: examine long-term assets and liabilities; financial statement analysis; transactions unique to the corporate business structure; bonds payable; planning and controlling using master budgets and cost behavior recognition utilizing cost-volume analysis as well as gaining exposure to accounting for manufacturers. Prerequisite: Principles of Accounting I (ACC101).

ACC-104 Introduction to Accounting Software 1 Credit
This course introduces students to Accounting Software with an emphasis on specific applications for accounting and bookkeeping. The modules covered include, among other topics: general ledger, report writing, invoicing, purchasing, inventory control, accounts receivable, accounts payable, cash receipts, cash disbursements, payroll, and spreadsheet application. Prerequisites: Writing Skills II (ENG095) or placement and Academic Reading III (ESL098) or Reading Skills II (RDG095).

ACC-105 Accounting Information Systems 3 Credits
This course introduces students to Accounting Information Systems. The course focuses upon integrated systems, set up, and applications. The modules covered include, among other topics: general ledger, report writing, invoicing, purchasing, inventory control, accounts receivable, accounts payable, cash receipts, cash disbursements, payroll, and spreadsheet application. Prerequisites: Writing Skills II (ENG095) or placement and Academic Reading III (ESL098) or Reading Skills II (RDG095).

ACC-107 Accounting Forensics 3 Credits
This course introduces students to the auditing process and prepares them to perform forensic audit and examination in conformance with pertinent industry standards. Students will learn comprehensive perspectives and skills in regards to computer fraud and the technicality of fraud examination including searching accounting information, obtaining documentary evidence, interviewing witnesses and potential suspects, and preparing basic document examination. This course will also provide electronic techniques required to audit. Prerequisite: Principles of Accounting II (ACC102).

ACC-201 Intermediate Accounting I 3 Credits
This course covers, in detail, financial accounting, and generally accepted accounting principles. After a review of the accounting cycle, issues in revenue recognition and the time value of money are discussed. The four main financial statements are studied. Specific accounting issues pertaining to various current assets are covered. Prerequisite: Principles of Accounting II (ACC102).

ACC-202 Intermediate Accounting II 3 Credits
A continuation of Intermediate Accounting I (ACC201), this course discusses accounting problems for long-term assets, current, and long-term liabilities. Issues in investments leases, employee compensation, and taxes are covered. Accounting for shareholder equity and earnings per share are covered. The preparation of the Statement of cash flow is studied. Prerequisite: Intermediate Accounting I (ACC201).

ACC-203 Personal Income Tax 3 Credits
This course provides a comprehensive explanation of tax principles dealing with individuals and small businesses. The course covers modules in federal and state income tax processes, concepts, and applications as well as other topics. Prerequisite: Principles of Accounting II (ACC102).

ACC-204 Business Income Tax 3 Credits
A continuation of Federal Income Tax I (ACC203), this course discusses the theoretical tax concepts that are applicable to corporations, partnerships, and trusts. The course covers both effective tax research and planning techniques for these types of entities. Prerequisite: Personal Income Tax I (ACC203).

ACC-205 Volunteer Income Tax Assistance 3 Credits
This VITA internship provides an opportunity for students to perform a community service in cooperation with the Internal Revenue Service and the Massachusetts Department of Revenue. The course trains students to assist taxpayers in filling out tax returns. There are several mandatory trainings that take place prior to the start of classes. Please get more information in room C309. Prerequisite: Personal Income Tax I (ACC203).

ACC-207 Cost Accounting 3 Credits
After an introduction to the nature of cost accounting and key definitions, this course covers the accumulation of costs through a job order process. It also covers the accounting for and control of materials, labor, and factory overhead. Prerequisite: Principles of Accounting II (ACC102).

ACC-216 Managerial Accounting 3 Credits
This course examines the needs of management and provides students with the necessary analytical skills that become critical to the financial decision-making process. The course covers such areas as budgetary planning and control, cost information, management decision-making, cost volume profit analysis, capital budgeting decisions, and control of decentralized organizations. Prerequisite: Cost Accounting I (ACC207).

ACC-217 Mass Tax Law I 3 Credits
After an introduction to the Massachusetts General Laws relating to taxation and the organization and role of the Massachusetts Department of Revenue, this survey course will focus on the Massachusetts statutory provisions relating to miscellaneous excises, the taxation of individuals and corporations, including the administration and enforcement of these provisions by the Massachusetts Department of Revenue. Other areas of study covered in this course include: filing requirements for major tax types; assessment and collection of taxes; examination and abatement. This course is critical for students to gain an understanding of specific taxation laws that pertain to the Commonwealth of Massachusetts. Prerequisite: Business Income Tax (ACC204).

ACC-299 Mass Dept of Revenue Internship 3 Credits
This course enhances the academic experience for students. All internships take place at the Massachusetts Department of Revenue field office. Students will engage in activities that improve knowledge of the practical world of taxation and auditing and help them gain professional experience. The intern gathers and applies resources gained from students’ program of study to improve the quality of their contributions to the employer. Students are responsible for following all guidelines in the BHCC Internship Handbook. Prerequisite: Mass Tax Law I (ACC217) and permission of the Department Chair or Dean.

Allied Health

AHE-095 Topics in Health Care 3 Credits
This course increases understanding across a broad spectrum of health care topics using readings and writings as related to the core curriculum.

AHE-101 Medical Interpreting I 3 Credits
This course is designed for bilingual students interested in becoming integral members of the health care team in bridging the language and cultural gap between patients and providers. Students will examine issues related to interpreter ethics and the role of the interpreter in a variety of clinical settings. Topics include anatomy and physiology, pathophysiology, diagnoses, and medical treatments. Activities are designed to develop listening, memory, language-switching skills, and decision-making. This course will familiarize students with the cultural dimensions of health and illness in preparation for their being assigned to an internship where they perform live interpreting under the direct supervision of a professional mentor. Note: A grade of B- or better in this course is required for progression in the program. Prerequisites: Writing Skills II (ENG095) and Reading Skills II (RDG095) or placement.

AHE-102 Medical Interpreting II 2 Credits
A continuation of Medical Interpreting I, this course includes an in depth discussion of cross-cultural communication including values and attitudes toward non-traditional health beliefs. Students will examine issues such as giving bad news to patients and dealing with difficulties between patients and health care providers. Other topics of discussion include prescription medicines, measurements
Allied Health

for medical dosages, therapies and treatments, and medical insurance verbiage. Finally, chronic conditions such as asthma/COPD, HIV and diabetes as well as medical specialties such as mental health and obstetrics/gynecology are discussed. Prerequisite: Medical Interpreting I (AHE101).

AHE-104 Vital Signs: Understanding Human Behavior for the Health Care Professional 3 Credits
This course introduces students to the challenges and responsibilities of healthcare professionals and college students. Discussions center on cross-cultural issues, human growth and development; psychological and sociological factors involved in the patient healthcare professional relationship.

AHE-106 CNA Practicum Patient Care 1 Credit
This course consists of a clinical practicum of 21 hours at a skilled nursing facility to fulfill the State Nurse Aide Certification requirement. Additional expenses may include supplies, equipment, and/or uniforms. Corequisites: Principles of Clinical Practice (AHE110) and Patient Care Skills (AHE111).

AHE-108 CNA/Home Health Aide 7 Credits
This course provides the training and skills necessary to take the Certified Nurse Aide and Home Health Aide exams. The course includes CPR training. There is a 21-hour clinical practicum at a long-term care facility, which may be scheduled on Saturdays and/or evenings. The course requires health clearance forms. (Students must assume responsibility for CNA testing.) Additional expenses may include supplies, equipment, and/or uniforms. Prerequisites: Writing Skills I (ENG090) and Reading Skills I (RDG090).

AHE-110 Principles of Clinical Practice 3 Credits
This course includes topics in the anatomy and physiology of body systems, diseases and conditions, ethics in health care, communications, medical terminology and abbreviations, standard and transmission-based precautions, CPR, and selected clinical skills. Additional expenses may include supplies, equipment, and/or uniforms. The course is open to Allied Health certificate program students only.

AHE-111 Patient Care Skills 3 Credits
This course, taken with CNA Practicum (AHE106) and Principles of Clinical Practice (AHE110), covers the patient care theory and skills required to take the Certified Nurse Aide and Home Health exams. Corequisites: CNA Practicum (AHE106) and Principles of Clinical Practice (AHE110).

AHE-112 Medical Assistant Skills 3 Credits
This course covers the skills and theory necessary for medical assistants in hospitals and clinics. Topics include setting up and assisting for physical and specialty examinations, minor surgical procedures, routine laboratory tests, and related medical terminology and abbreviations. Corequisite: Principles of Clinical Practice(AHE110).

AHE-115 Phlebotomy/Medical Lab Theory 3 Credits
This course teaches anatomy and physiology of the circulatory system and the process of collecting blood samples. This course meets the requirements necessary to sit for a phlebotomy certification exams offered by several private certification groups. Certification is the responsibility of the student. Prerequisites: Writing Skills I (ENG090), Foundations of Mathematics (MAT093), and Reading Skills I (RDG090). Corequisite: Principles of Clinical Practice (AHE110) and Medical Assistant Skills (AHE112).

AHE-117 Communication Skills for Health Care 3 Credits
This course provides the student with the skills to communicate effectively as an Allied Health Professional. The course includes discussions of verbal and non-verbal communication, professional communication and behavior, interviewing techniques, adapting communication to a patient’s ability to understand, patient education, cultural sensitivity, electronic communication, and fundamental writing skills.

AHE-201 Advanced Clinical Skills 3 Credits
This course covers advanced theory and skills for the patient care technician and medical assistant. Students are cross-trained in EKG and Phlebotomy. Prerequisites: Patient Care Skills (AHE111) or Medical Assisting Skills (AHE112).

AHE-204 Patient Care Technician 3 Credits
This course consists of a clinical practicum at local health care facilities. Students keep a daily journal and complete a work portfolio. Additional expenses may include supplies, equipment, and/or uniforms. Prerequisite: Patient Care Skills (AHE111). Corequisite: Advanced Clinical Skills (AHE201).

AHE-205 Practicum Medical Assistant 3 Credits
This course consists of a clinical practicum at local health care facilities. Students keep at daily journal and complete a work portfolio. Additional expenses may include supplies, equipment, and/or uniforms. Prerequisite: Medical Assisting Skills (AHE112).Corequisite: Advanced Clinical Skills (AHE201).

AHE-206 Practicum Phlebotomy Technician 3 Credits
This course consists of a clinical practicum at local health care facilities. Students keep a daily journal and complete a work portfolio. Additional expenses may include supplies, equipment, and/or uniforms. Prerequisites: Principles of Clinical Practice (AHE110) and Phlebotomy/Laboratory Theory (AHE115).

AHE-209 Allied Health Practicum Seminar 1 Credit
This seminar is an inter-disciplinary course that provides a broad overview of the medical workplace. Taken concurrently with an Allied Health Practicum, it includes discussions of the internship experience, employment opportunities as well as job search skills. Corequisite: Practicum Patient Care Assistant (AHE204) or Practicum Medical Assistant (AHE205) or Practicum Phlebotomy Technician (AHE206) or Practicum Laboratory Assistant (AHE207).

AHE-299 Medical Interpreting Internship 1 Credit
Students will be placed in a 30-hour internship to be completed over the course of the semester at a local healthcare facility under the direct supervision of a professional interpreter and mentor. This internship will consist entirely of active interpreting. Corequisite: Medical Interpreting II (AHE102).

Arabic
ARB-101 Elementary Arabic I 3 Credits
This course is a beginning class in modern standard Arabic. The course begins with exposure to the alphabet, basic vocabulary, and expressions of greetings. The course then focuses on the spoken and written language used in contemporary life in Arab countries. The course works on all skill areas: listening, speaking, reading, and writing presenting pertinent grammar in context. The course is not intended for native speakers or students who have studied this language within the last three years.

ARB-102 Elementary Arabic II 3 Credits
A continuation of Elementary Arabic I (ARB101), this course emphasizes conversational skills and sentence structure. The course stresses practical applications of the Arabic language. The course meets General Education ‘Humanities’ Requirement Area 6. Prerequisite: Elementary Arabic I (ARB101).

Astronomy
AST-102 Astronomy/Lab 4 Credits
This course covers an introductory study of basic astronomy, including the planets, the apparent motions of celestial objects, the seasons, constellations, comets and meteors, stars, galaxies, and the large-scale structure of the universe. The course includes current events in space exploration. The course meets General Education Science and Technology Requirement Area 5. Course meets: 3 hrs. lecture; 1.5 hrs. lab. Prerequisites: Writing Skills II (ENG095) and a grade of C or better in Foundations of Algebra (MAT097) or placement equivalency.

Biology
BIO-105 Introduction to Biology 4 Credits
This course will investigate the major biological concepts that connect all forms of life and are designed for students with little or no background in science. Topics will include the process of scientific inquiry, the cell as the basic unit of life, metabolism, cellular reproduction, genetics, evolutionary theory and principles of ecology. Laboratory work will introduce students to the basic investigative techniques used to study life’s processes. There will be no animal dissection in this course. This course will satisfy the General Education Science & Technology Area 5 requirement for all programs and may be used to satisfy the biology prerequisite for Anatomy and Physiology I (BIO203). This course will not satisfy the general biology requirement of the Associate in Science: Biological Science program. Prerequisites: Writing Skills (ENG095), a grade of C or better in Foundations of Mathematics (MAT093), and Reading Skills II (RDG095) or placement equivalency.

BIO-108 Human Biology/Lab 4 Credits
This course is designed to introduce students pursuing careers in the health fields to the structure and function of the human body. It is
intended to help students with a limited scientific background grasp the fundamental concepts of biology as well as human anatomy and physiology. Pathophysiology, genetics, and related clinical aspects are discussed with each system so that students can apply their clinical learning. This course does not substitute for programs that require BIO101 and BIO204. Open to all students and satisfies General Education Science and Technology Requirement Area 5. Course meets 3 hrs. lecture; 1.5 hrs. lab. Note: May be used as a prerequisite for Anatomy & Physiology I/Lab (BIO203). Prerequisites: Writing Skills II (ENG095), a grade of C or better in Foundations of Mathematics (MAT093), and Reading Skills II (RDG095) or placement equivalent.

**BIO-111 Food/Nutrition** 3 Credits

This course covers a study of plant and animal sources of human food, their nutritional values, and the way they are utilized by the body in health and disease. Topics include the selection of an adequate diet, evaluation of nutrition status, nutrition and growth, nutrition in infancy and in aging, weight control, alternate food patterns, ethnic foods, and nutrition-related health problems. The department recommends this course for students in Allied Health programs. The course is offered in the Center for Self-Directed Learning only.

**BIO-115 Nutrition Science and Lab** 4 Credits

This course covers a study of plant and animal sources of human food, their nutritional values, and the way they are utilized by the body in health and disease. Topics include chemistry and biology of food, personal nutrition evaluation, nutrition-related health problems, and global food and nutrition issues. Laboratory exercises introduce students to the diagnostic procedures used by nutritionists and to reinforce learning of nutritional theory. A background in biology or chemistry is not required. The course meets General Education Science and Technology Requirement Area 5. Course meets: 3 hrs. lecture; 1.5 hrs. lab. Prerequisites: Writing Skills II (ENG095), a grade of C or better in Foundations of Mathematics (MAT093), Academic Reading III (ESL098) or Reading Skills II (RDG095) or placement equivalency.

**BIO-120 Introduction to Biotechnology** 4 Credits

This course offers an introduction to the field of biotechnology. General principles of biology, recombinant DNA technology, and the applications of biotechnology will be presented. The medical, social, political and ethical implications of recombinant DNA technology and the Human Genome Project will be discussed. Work practices and career opportunities in the biotechnology industry will also be outlined. Students will be introduced to industry specific laboratory skills and basic investigative techniques and procedures used in research through labs designed to reinforce lecture concepts. Class meets: 3 hrs. lecture; 3 hrs. lab. Prerequisites: Writing Skills II (ENG095), Intermediate Algebra (MAT099), and Reading Skills (RDG095) or Academic Reading III (ESL098) or placement equivalency.

**BIO-195 General Biology I and Lab** 4 Credits

This course will examine the cell as the basic unit of life. Topics will include cell chemistry, cell structure and function, metabolism, cellular respiration, photosynthesis, and cell division. The course will conclude with an examination of the genetic and chromosomal basis of inheritance. Laboratory work will provide students with the basic skills necessary to work in advanced biology laboratory courses. This is the first required biology course in the AS Biological Science program. Students planning to enroll in a health science program should enroll in Principles of Biology I/Lab (BIO101) or Human Biology/Lab (BIO108). This course covers General Education Science and Technology Requirement Area 5. Prerequisites: Writing Skills II (ENG095) and Reading Skills II (RDG095) or placement and a grade of C or better in College Algebra-STEM (MAT194).

**BIO-196 General Biology II and Lab** 4 Credits

As a continuation of General Biology I/Lab (BIO195), the course begins with a study of chemical basis of inheritance and protein synthesis. The course then investigates the mechanisms of adaptive evolution, speciation, phylogeny, and the history of life on earth. The course concludes with a survey of the three domains of life and an introduction to the structure of populations and ecosystems. Laboratory work will prepare students for the genetic research opportunities in Principles of Biology II/Lab (BIO101) and student’s critical thinking and problem solving skills. Prerequisite: Grade of C or better in General Biology I/Lab (BIO195).

**BIO-203 Anatomy/Physiology I and Lab** 4 Credits

This is the first course in a two-semester sequence that will examine the systems of the human body using an integrated approach. Areas of study will include the structure and function of cells, histology, the physiological and anatomical aspects of support and movement systems and the nervous system. Laboratory activities will enhance the students’ comprehension of the structure and function of the human body. Course meets: 3 hrs. lecture; 3 hrs. lab. Prerequisite: Grade of C or better in Principles of Biology I/Lab (BIO101), Human Biology (BIO108) or General Biology I/Lab (BIO195).

**BIO-204 Anatomy/Physiology II and Lab** 4 Credits

As a continuation of Anatomy/Physiology I (BIO203), this course will again use an integrated approach to examine the human systems not covered in Anatomy/Physiology I. Areas of study will include the endocrine system, the cardiovascular system, lymphatic and immune systems, respiratory system, the digestive system, urinary system, and reproductive system. Laboratory activities will enhance the students’ comprehension of the structure and function of the human body. Course meets: 3 hrs. Lecture; 3 hrs. lab. Prerequisite: Grade of C or better in Anatomy/Physiology I/Lab (BIO203).

**BIO-205 Microbiology and Lab** 4 Credits

This course is intended for students entering health care careers and the biotechnology industry. This course will provide a solid foundation of basic physiological and biochemical activities of bacteria, viruses, fungi, and protozoa. The fundamentals of microbial physiology, genetics, and microbiology will be presented with emphasis placed on virulence factors and the mechanisms in which these microorganisms establish disease. Microbiology in the workplace will be covered through discussions of methods of physical and chemical control of microorganisms, microbial growth and enumeration. The use of anti-viral drugs, and antibiotics, the host immune response to infection, and the effectiveness of various vaccination strategies will also be discussed. The course will be completed by investigating the importance of human pathogens in patient care and nosocomial infection while looking at several major diseases. Exercises in the laboratory portion of the course deal with aseptic techniques, microbial cultivation and growth characteristics, stains, and bacterial isolation techniques, differential biochemical tests, identification of unknown bacterial species, and testing effectiveness of antimicrobial agents. Course meets 3 hrs lecture and 3 hrs. lab. Prerequisite: Anatomy and Physiology I/Lab (BIO203) or General Biology I/Lab (BIO195) or admission to the Nursing Program.

**BIO-207 Cell Biology and Lab** 4 Credits

A study of cell structure and function including the following topics: organelles, membrane function, metabolism, gene action, communication, and regulation of growth. Some specialized cells will be discussed. The laboratory will include biotechnological, molecular, and cellular experiments. Class meets: 3 hrs. lecture; 3 hrs. lab. Prerequisite: A grade of C or better in Introduction to Biotechnology/Lab (BIO120), and a grade of C or better in General Biology I/Lab (BIO195), or a grade of C or better in General Biology II/Lab (BIO196) and General Biology II/Lab (BIO198) or permission of the science and engineering department.

**BIO-208 Genetics and Lab** 4 Credits

This course offers a broad understanding of classical, molecular and evolutionary genetics. Highlighted topics will include the molecular and chromosomal basis of inheritance, extranuclear inheritance, gene mapping and analysis, control of gene expression in pro- and eukaryotes, Chi square analysis, probability theory, DNA mutation and repair, genetics of cancer, population and human genetics. Experimental work will focus on the theory and practice of current techniques in genetics. Prerequisite: A grade of C or better in General Biology II/Lab (BIO196) or permission of the science and engineering department.

**BIO-210 Population Ecology and Lab** 4 Credits

This course is designed to give students an overview of the science of population biology. The course covers topics related to: distribution and abundance of species; mathematical models of logistic and exponential growth; the application of the Hardy-Weinberg principle to describe changes in gene frequencies via natural selection or other processes on populations; life-history strategies, inter specific interactions; population regulation and sustainable ecosystems, and human impact on the sustainability of wild populations. Laboratory activities include basic field techniques for collection and estimation of populations, basic statistical analysis, computer simulation, and formal lab exercises. Lab experiments are designed to facilitate an understanding of basic scientific field research and principles of population ecology. This course is designed for advanced science students and may be taken as an elective for the general biology transfer program. Prerequisite: General Biology II/Lab (BIO196) or permission of the science and engineering department.

**BIO-211 Environmental Microbiology/Lab** 4 Credits

Environmental Microbiology introduces students to the diversity of microbial populations and their ecological roles in terrestrial, aquatic, and marine environments. The course will also cover the use of industrial microbiology and the relationships of microbes to urban communities. Microbial community ecology and interactions with plants and animals will also be covered. Students will explore...
Biomedical Engineering

how microbial activities sustain natural ecosystems, contribute to environmental quality, and how these functions are harnessed to support and manage artificial systems. Laboratory investigations will introduce students to the standard experimental procedures used to study microbes. This course will satisfy the microbiology requirement for healthcare arts and nursing students. Students in health related programs should enroll in Microbiology & Lab (BIO205). Prerequisite: C or better in General Biology & Lab (BIO195). Completion or concurrent enrollment in General Biology II & Lab (BIO196) recommended. 3 hours lecture - 3 hours lab.

BIO-260 Molecular Biotechnology 5 Credits

This capstone course presents the major concepts of molecular biology and their relationship to the field of biotechnology. The course will focus on recombinant DNA technology, genetically engineered organisms, sequencing, gene expression in prokaryotes and eukaryotes, protein expression and analysis, and genomics. Advanced topics will include Bioinformatics, Protein engineering, RNA interference and biological products as therapeutic agents. The course will also focus on career opportunities and hiring trends in the biotechnology industry and require that students work on their job readiness skills. Upon completion of this course, students will be qualified for entry level employment or internships in the biotechnology industry. Class meets: 3 hrs. lecture, 4 hrs. lab. Prerequisite: Grade of C or better in Introduction to Biotechnology (BIO120), Cell Biology and Lab (BIO207), and Genetics and Lab (BIO208) or department approval.

BIO-261 Advanced Laboratory Techniques in Biotechnology 3 Credits

Laboratory activities will emphasize proper laboratory protocol and documentation, inquiry based investigations, formal laboratory report writing, and standard laboratory skills used in biotechnology research. The course will also focus on career opportunities and hiring trends in the biotechnology industry and require that students work on their job readiness skills. Upon completion of this course, students will be qualified for entry level employment or internships in the biotechnology field. Depending on the college, both BIO261 and BIO262 may need to be completed for credits to transfer. Course meets: 1 hr lecture/2.5 hrs. lab. Prerequisite: Grade of C or better in Biotechnology (BIO260), Cell Biology and Lab (BIO207), Cell Biology and Lab (BIO208), and Genetics and Lab (BIO208) or department approval.

BIO-270 Biotechnology Laboratory Simulations 4 Credits

This multidisciplinary laboratory course will focus on providing theoretical and hands-on experience in advanced laboratory techniques and technologies such as High Pressure Liquid Chromatography (HPLC), Polymerase Chain Reaction (PCR), Real-Time PCR and bioreactors. This course will include laboratory simulations that will mimic a real-world work experience. Laboratory activities will reinforce an understanding of theory and basic principles as well as method development, operations, applications and instrumentation. Key industry skills including documentation, current Good Manufacturing Practices (cGMP), Standard Operating Procedures (SOPs) and Validation will be emphasized and reinforced. Advanced scientific writing and oral presentation skills will also be developed. Course meets: 6 hrs lab. Prerequisite: Grade of C or better in Cell Biology Laboratory Techniques in Biotechnology (BIO260), Genetics and Lab (BIO208), and Advanced Laboratory Techniques (BIO261). Principles of Molecular Biotechnology (BIO262) must be taken either as a prerequisite or as a corequisite or departmental approval.

Biomedical Engineering

BME-100 Biomedical Engineering I 4 Credits

A first course in Biomedical Engineering (BME), this course introduces students to preliminary Biomedical Engineering topics. Topics include the BME profession, morals and ethics, anatomy and physiology, static biomechanics, rehabilitation engineering, static bioinstrumentation, biosensors, biosignal processing, and models of neurons. MATLAB is used for ease in problem solving. Laboratory involves using a virtual instrument (Biopac) to record and analyze signals from the body. Class meets: 3 hrs. lecture, 2 hrs. laboratory. Prerequisites: Grade of C or better in Calculus I (MAT281) and a grade of C or better in General Chemistry I/II (CHM201). Corequisite: Calculus II (MAT282).

BME-200 Biomedical Engineering II 3 Credits

This course explores the techniques for analysis and modeling of biomedical systems with applications of advanced mathematics including Differential Equations, Difference Equations, State-Variables, and computer-aided methods to study problems at the interface of engineering and biology. Other topics include elements of physiological modeling and the solution of the transient and forced response for a variety of biomaterials and bioelectrical systems. Class meets: 3 hrs. lecture. Prerequisites: Grade of C or better in Biomedical Engineering I (BME100) and a grade of C or better in Calculus II (MAT282).Corequisite: Calculus III (MAT283).

Business

BUS-103 Principles of Retailing 3 Credits

This course provides an interdisciplinary overview of the retailing industry. Primary focus will be on the customer-facing activities of retailers, including assortment planning, private label development, and the management of in-store operations, and the back-door activities (forecasting and supply-chain management) that support customer interaction. In addition, current issues facing retailing, such as customer relationship management, and supplier relations, will be explored. This course will also survey topics in finance and operations and information technology as they relate to retail. Prerequisites: Foundations of Algebra (MAT094) and Application/Concepts (CIT110). Pre/Corequisite: Principles of Marketing (MAN105).

BUS-106 International Business I 3 Credits

This course is an introduction to the environments, institutions, systems and operations involved in international business. Students will learn how different economic, legal, political and cultural forces influence the conduct of international trade and investment and how international competitive strategies, firm operations and organizational structures contribute to business success or failure in the global marketplace. The impact of international trade and investment on economies, businesses and consumers will also be examined. Prerequisite: Microeconomics (ECO201) or Microeconomics (ECO202).

BUS-108 Exporting/ Importing 3 Credits

This course presents an overview of the steps involved in international movement of goods and services from the point of origin to their final destination. In addition to providing a working knowledge of the various terms and techniques essential to the export/import process, the course includes an introduction to the role of important organizations such as the freight forwarder, the international banker, the freight carrier, the insurance company, and U.S. Customs. The course also includes tariff regulations and documentation. Prerequisite: International Business (BUS106).
BUS-111 Globalization 3 Credits
This course is an exploration of the nature, reasons for and consequences of globalization. Subjects such as global economic integration, cultural convergence, global institutions, multinational corporations and global business will be discussed. Students will acquire an understanding of globalization’s key aspects and trends in history, geography, politics, culture, and technology, as well as its impact on labor, standards of living and the environment. This course will also enable students to explore career options in international business, define a career path, and make connections between classroom learning and the larger business community. This course will fulfill the learning community seminar requirement for first time, full time, students, to assist the student in making a successful transition from our unique urban community into an academic environment. The course will aid students in learning insights, skills, and attitudes necessary to develop academic success strategies for personal and career goals achievement. Prerequisite: A grade of C or better in Academic Reading (ESL098) and Academic Writing III (ESL099) or Reading Skills II (RDG095) and Writing Skills I (ENG090) or placement.

BUS-112 International Logistics 3 Credits
This course presents the various functions, practices, and principles of freight forwarding. Specific topics include government regulations, maritime laws, and transportation agreements as they influence traffic movement by water, air, motor, and rail. Prerequisite: International Business (BUS106).

BUS-201 Business Law I 3 Credits
In this introductory study of the law and its application to the individual, students learn to evaluate and analyze legal problems and systems. The course emphasizes business situations. Topics include procedural law, contracts, torts, consumer law, and related areas. Prerequisites: Writing Skills II (ENG095) or placement and Academic Reading Skills III (ESL098) or Reading Skills II (RDG095) or placement.

BUS-202 Business Law II 3 Credits
This concentrated course reviews and emphasizes corporate and basic contract law, product liability, sales, warranties, bankruptcy, repossession, sale and transfer, foreclosure, insurance, trusts, and wills. Prerequisite: Business Law I (BUS201).

BUS-207 Professional Communication 3 Credits
This course gives students a comprehensive understanding of the use and importance of effective communication in business. Students study types of written, oral, and electronic communication and develop a variety of professional communication skills essential to success in business. The course also addresses ethical and cultural issues associated with business communications. Prerequisite: Grade of C or better in College Writing I (ENG111).

BUS-224 Merchandising 3 Credits
General retail and merchandise policies are considered in this course, including types of firms and store organization. Selecting merchandise, buying, planning price lines and price line adjustments; assortment planning, display, and inventory and budget control. Prerequisite: Foundations of Algebra (MAT097) or placement and Academic Reading II (ESL098) and Academic Writing III (ESL099) or Reading Skills II (RDG095) and Writing Skills I (ENG090) or placement.

Chemistry

CHM-120 Principles of Inorganic Chemistry and Lab 4 Credits
This course is an introduction to the basic concepts of inorganic chemistry. Topics include measurement theory, methods of scientific investigation, atomic theory, nuclear radiation, compound formation, chemical nomenclature, chemical reactions, the mole concept, solution chemistry, acid-base chemistry, and the relevance of chemistry in health professions. Laboratory work will introduce students to basic laboratory techniques, safety regulations, and chemical hygiene. This course does not satisfy the chemistry requirement of the AS Biological Sciences or AS Engineering programs or the AA Chemistry/Physics concentrations. Course meets 3 hrs. lecture; 3 hrs. lab. Prerequisites: Writing Skills II (ENG095), Reading Skills II (RDG095), and Foundations of Algebra (MAT097) or placement equivalencies.

CHM-121 Principles of Organic and Chemistry w/Lab 4 Credits
This course serves as an introduction to organic and biochemistry. The topic and reactivity patterns of common organic functional groups will be presented. A study of biochemistry will introduce students to the chemical structures and reactions of lipids, carbohydrates, proteins, and nucleic acids and their role in metabolism. The standard length three hour laboratory session will serve to reinforce the concepts discussed during lectures and will provide students with practical experience in organic synthesis reactions and organic compound identification methods. This course does not satisfy the Organic Chemistry requirement of the AA Chemistry Concentration. Prerequisites: Grade of C or better in Chemical Science I & Lab (CHM110) or Principles of Inorganic Chemistry & Lab (CHM120).

CHM-151 Basic Chemistry (Non-Lab) 3 Credits
This course is an introduction to basic concepts of inorganic chemistry. The course is designed primarily for students who have not previously studied chemistry. Topics, which are presented in a multi-media, modular format, include measurement, chemical symbols and equations, physical and chemical properties, atomic structure, chemical compounds, solutions, and an overview of chemical reactions. The course is offered in the Center for Self-Directed Learning only. Prerequisite: A grade of C or better in Foundations of Algebra (MAT097).

CHM-201 General Chemistry I and Lab 4 Credits
This course is a rigorous introductory course as part of a two-semester sequence that studies the chemical principles. Topics include atomic structure, reaction types and equations, stoichiometry, gas laws, thermochemistry and bonding theory. Students are required to purchase approved safety goggles. Course meets: 3 hours lecture; 3 hours lab. Prerequisite: Grade of C or better in Precalculus (MAT197) or exemption by placement testing and a grade of C or better in College Writing I (ENG111). Note: This course is intended for students planning to major or transfer as science or engineering majors. Pre-allied health students or students requiring a one semester overview of chemistry should enroll in Principles of Inorganic Chemistry and Lab (CHM120).

CHM-202 General Chemistry II and Lab 4 Credits
This course is a continuation of General Chemistry I and Lab (CHM201). Topics include solids, solutions, kinetics, equilibrium, acid-base and solubility equilibria, thermodynamics, and electrochemistry. Students are required to purchase approved safety goggles. Course meets: 3 hours lecture; 3 hours lab. Prerequisite: Grade of C or better in General Chemistry I and Lab (CHM201).

CHM-251 Organic Chemistry I and Lab 4 Credits
This course studies the chemistry of carbon compounds including nomenclature, molecular structure and functional groups. Topics include the reactivity and properties of saturated and unsaturated hydrocarbons, stereochemical relationships and nucleophilic substitution and elimination reactions. Mechanisms are presented as a unifying principle for these reactions. Students are required to purchase approved safety goggles. Course meets: 3 hours lecture; 3 hours lab. Prerequisites: Grade of C or better in General Chemistry II and lab (CHM202) and a grade of C or better in College Writing II (ENG112).

CHM-252 Organic Chemistry II and Lab 4 Credits
This course is a continuation of Organic Chemistry I and Lab (CHM251). Topics include aromatic substitution reactions, carbonyl addition reactions, acid derivatives, amines, and carbohydrates. Both the laboratory and lecture use instrumental methods for the structural analysis of organic compounds. Students are required to purchase approved safety goggles. Course meets: 3 hours lecture; 3 hours lab. Prerequisite: Grade of C or better in Organic Chemistry I and lab (CHM251).

Chinese

CHN-101 Elementary Mandarin I 3 Credits
A beginning level course in modern standard Mandarin Chinese, mainly for students with no experience in the language. The goal of the course is to develop in the students through a multi-approach the four basic skills in the Mandarin language: listening, speaking, reading, and writing. The course content is geared to use in real life, and the teaching method emphasizes mutual understanding and appreciation of cultures that differ from one’s own and draws on the experiences and backgrounds of both the instructor and students. After a semester’s study in this course, students are expected to have achieved a general understanding of the speaking and writing systems of the Mandarin language, and be able to communicate, both in oral and written forms (speaking, listening, reading, and writing), with some simple and daily Mandarin.

CHN-102 Elementary Mandarin II 3 Credits
The course builds on the basic skills learned in Mandarin I. It is designed for students who might be planning to visit China for business, pleasure or for further study, and it will teach students some of the unique cultural practices of the country, from the forms of courtesy to the way of asking
Computer Information Technology

Questions. The objective of the course will be to sharpen students’ oral and written communication skills. We will focus on everyday situations and combine practice in speaking with exercises in writing. The course will stress clarity in writing, and the course will teach students how to think critically in formulating statements and understanding meaning. Prerequisite: Grade of C or better in Elementary Mandarin I (CHN101) or by permission of instructor.

Computer Information Technology

CIT-101 Computer Essentials 3 Credits
This introductory course is intended for students with little to no computer experience. Students in developmental mathematics, reading and English as well as English as a Second Language (ESL) should consider this for their first computer course. This course starts with an introduction to the Windows environment and covers operating system topics appropriate for beginners, keyboarding, document processing and productivity skills necessary to function in today’s electronic office environment. The course requires other skills necessary to use a personal computer as a tool for academic success. Utilizing the college’s computer laboratories students get extensive hands-on personal computer experience in MS WORD as well as E-Mail, INTERNET, and World Wide Web (WWW) access and use. Students emerge from this course with an understanding of essential computer concepts and terminology, use and application of the INTERNET, keyboarding proficiency, and a high degree of competence with personal computer hardware and software. All Learner Outcomes and Competencies in this course are based on accepted, published ICT Industry Standards. For additional information and/or a course syllabus contact CITDepartment@bhcc.mass.edu.

CIT-112 Information Technology Fundamentals 3 Credits
This is a survey course covering major aspects of the Information Technology (IT) industry and provides students with an overview and introduction to the core aspects of Information Technology including Network and Infrastructure Systems, Information Support and Services Interactive Media and Programming and Software Development. This course focuses on an understanding and appreciation of the field of information technology professionals and how each IT area related to and interacts with the others. Upon completion of this course students will have the knowledge necessary to take education for a continued study in IT as well as understanding of the impact of technology on society and organizations of all types. Students taking this course are expected to have a solid knowledge of basic computer terminology, internet navigation and e-mail, operating system and file Management skills. All Skill and Knowledge Statements in the course are published and approved by the Massachusetts Department of Education Vocational Technical Education. Frameworks for the Information Technology Service cluster. These frameworks are published at http://www.mass.org/frameworks. This course is eligible for Massachusetts Tech Prep advanced placement credit. Prerequisite: Academic Reading III (ESL098) or Reading Skills II (RDG095) or placement. For additional information and/or a course syllabus contact CITDepartment@bhcc.mass.edu

CIT-113 Information Technology Problem Solving 3 Credits
This course will give students hands-on experience in a wide-range of modern information technology. Several IT concepts will be introduced that will provide a basis for further study in Information Technology. Students will work on a number of projects that will give perspectives on areas of IT including but not limited to: visual and/or robotic programming, social networking tools, web design and networking. Issues of security, privacy and ethics will also be examined. Students will leave the course with an understanding of the components of modern IT systems and the scope of knowledge needed to become an IT professional. Students are expected to have access to computer with internet access outside of class as there is a major web component to the course. Designed for first-time, full-time Computer Technology students, this course will fulfill the Learning Community Seminar requirement for the Computer Information Technology Department. First year students registering for this course should not register for Computer Applications/Concepts (CIT110). This course is not for Computer Science Transfer, Graphics and Multimedia Design or Computer Information Technology. Prerequisite: Academic Reading III (ESL098) or Reading Skills I (RDG095) or placement (ENG090), and Reading Skills I (ENG095) or placement. For additional information and/or a course syllabus contact CITDepartment@bhcc.mass.edu

CIT-114 Principles of Internet and Info Security 3 Credits
This is a course in Internet and Information Security which introduces students to all major areas related to securing both personal and organizational information in the Internet Age. Beginning with an introduction to physical and electronic security issues, students proceed to topics related to legal and ethical and professional issues in information and Internet security. Topics covered include, but are not limited to, identity theft, phishing and other email scams, personal and corporate identity theft, and virus scanning software, chat rooms, Internet crimes against children, cyber predators, digital computer forensics, wired and wireless home & organization networks, cyber terrorism, and cyber vandalism. Students gain practical experience in Internet security considerations through a capstone Security Project. Students completing the course also attain the i-SAFE.org certification. Prerequisite: Applications/Concepts (CIT110) or IT Problem Solving (CIT113) or Introduction to Computer Science & OOP (CIT120), equivalent experience or permission of the department chairperson. For additional information and/or a course syllabus contact CITDepartment@bhcc.mass.edu

CIT-120 Intro to Computer Science and Object Oriented Programming 4 Credits
This is a first course in Object Oriented Programming (OOP) theory and practice. Taught in the College’s hands-on computer classrooms, this course emphasizes the program design and development process including concepts of variables and flow control, objects, classes, methods, and polymorphism. Students will use an Object Oriented Programming language as they design code, debug and implement several programs covering the topics presented. Students taking this course are expected to have solid knowledge of basic computer terminology, internet navigation and email, operating system and file management skills. Strong analytical skills are recommended for students enrolling in this course. Please note that this course is a four credit course with six contact hours and analogous homework. This course fulfills the Learning Community Seminar requirement for students in AA Computer Science, AS Computer Science, and AS Computer Engineering areas of study. Other departments may allow this course to be used as a learning community seminar for their students. Students in majors other than the ones listed above should obtain their advisor’s or the leading faculty members approval before registering in this course. Prerequisite: Intermediate Algebra-STEM (MAT194). For additional information and/or a course syllabus contact CITDepartment@bhcc.mass.edu

CIT-121 Introduction to Computer Forensics 3 Credits
This is an introductory course in Computer Forensics. Forensics Computing, Digital Forensics, or Computer Forensics is a newly emerging field of study and practice that incorporates many areas of expertise. Some of these areas have been called network security, intrusion detection, incident response, infrastructure protection, disaster recovery, continuity planning, software engineering, cyber security, and computer crime investigation. It is an area of practice in public and private sectors at the local, state and national levels that deals with cybercrime, cyber vandalism, cyber predators, and cyber terrorism. In the private sector, it deals with critical infrastructure such as business, hospitals, utilities transportation, finance, education, and other key industries. Training in the College’s hands-on laboratory students will gain an in-depth knowledge of the principles, procedures, and techniques used in digital forensic analysis.
CIT-128 Database Design with MS Access
3 Credits
This is a comprehensive course in the use and application of databases in computer applications based on the most current version of Microsoft Access. The course covers all aspects of database design including entity relationship modeling, tables, reports, queries, forms and other database objects. All MS Access functionality including Internet applications and integration with the Web and other software programs are covered. Students gain some experience using Structured Query Language (SQL) and Visual Basic for Applications (VBA) in the final component of the course. Microsoft Corporation has approved this course material as courseware for the Microsoft Business Certification (MBC) Program and students may choose to take the MBC ACCESS Certification Examination upon completion of this course. Prerequisite: Applications/Concepts (CIT110) or IT Problem Solving (CIT113) or Introduction to Computer Science & Object Oriented Programming (CIT120) or permission of the department chair.

CIT-129 Mobile App Development
3 Credits
This course introduces application development for mobile devices such as Android, Apple, Windows, and web. Students will program simple apps on multiple devices, using standard development environments commonly used professionally, using a series of skill-based lessons. Prerequisites: Writing Skills I (ENG90) and Reading Skills I (RDG90).

CIT-131 Introduction to Creating Mobile Apps
3 Credits
This course is designed for individuals with no experience with programming languages or previous experience creating mobile applications. The course uses a graphical-user interface blocks editor for students to build their own Android based mobile apps. The course offers reading user interface design for mobile apps, programming concepts, tutorial walk through assignments within the editor, and assessments which require students to build unique apps based on the tutorials so that they can demonstrate their understanding and knowledge of what they have learned. Specific programming concepts covered includes design logic, programming conditions, variables, procedures, branching and looping. Specific app functionality covered includes sprite animation, multiple screens, and integration with device sensors, texting, databases, video, and other web APIs. Prerequisites: Writing Skills I (ENG90) and Reading Skills I (RDG90) or placement.

CIT-133 Introduction to Microsoft Office
3 Credits
This introductory course covers the use and application of integrated PC applications software based on the most current version of Microsoft Office. It is initially oriented toward the Windows skills necessary to complete the course. Using the hands-on college computer laboratory, the course covers the following applications in detail: Word, Processing, Spreadsheet, Database, Presentation Graphics, and Desktop Information Management. The course emphasizes Internet applications relating to the Microsoft Office Applications. Microsoft Corporation has approved this course material as courseware for the Microsoft Business Certification (MBC) Program and students may choose to take the Microsoft Certification Examination(s) upon completion of this course. For additional information and/or a course syllabus contact CITDepartment@bhcc.mass.edu.

CIT-135 Design for Mobile Devices
3 Credits
This course introduces the central components of user interface design for mobile devices (phones, tablets, and other). Students will learn how to prototype user interface designs using a series of scaffolded, skill-based lessons culminating in a mobile interface application. Prerequisites: Writing Skills I (ENG90) and Reading Skills I (RDG90) or placement.

CIT-137 Intro to Big Data with R and R-Studio Studio
4 Credits
This course provides practical foundation level training that enables immediate and effective participation in big data and other analytics projects. It includes an introduction to big data and the Data Analytics Lifecycle to address business challenges that leverage big data. The course provides grounding in basic and advanced analytic methods and an introduction to big data analytics technology and tools, including MapReduce and Hadoop. Labs offer opportunities for students to understand how these methods and tools may be applied to real world business challenges by providing data science scientists with Talend Open, or technology-neutral approach, and includes a final lab which addresses a big data analytics challenge by applying the concepts taught in the course in the context of the Data Analytics Lifecycle.

CIT-162 Introduction to Networking
3 Credits
This course introduces students to fundamental networking concepts and technologies. The material in this course encompasses a broad range of technologies that facilitate how people work, live, play, and learn by communicating with voice, video, and other data. First, you will examine human versus network communication and see the parallels between them. Next, you will be introduced to the two major models used to plan and implement networks: OSI and TCP/IP. You will gain an understanding of the layers that comprise networks and examine the OSI and TCP/IP layers in detail to understand their functions and services. You will become familiar with the various network devices, network addressing formats, the types of media used to carry data across the network. In this course, you will gain experience using networking utilities and tools, such as Packet Tracer and Wireshark, to explore networking protocols and concepts. These tools will help you to develop an understanding of how data flows in a network. A special model Internet is also used to provide a test environment where a range of network services and data can be observed and analyzed. Prerequisites: Computer Applications/Concepts (CIT110) or Information Technology Fundamentals (CIT112) or IT Problem Solving (CIT113) or Intro to Computer Science & Object Oriented Programming (CIT120) or permission of the department chair. For additional information and/or a course syllabus contact CITDepartment@bhcc.mass.edu.

CIT-167 Routers and Routing Basics
3 Credits
The primary focus of this course is on routing and routing protocols. The goal is to develop an understanding of how a router learns about remote networks and determines the best path to those networks. This course includes both static routing and dynamic routing protocols. By examining multiple routing protocols, you will gain a better understanding of each of the individual routing protocols and a better perspective of routing in general. Learning the configuration of routing protocols is fairly simple. Developing an understanding of the routing concepts themselves is more difficult, yet is critical for configuring, verifying, and troubleshooting routing operations. Each static routing and dynamic routing protocol chapter uses a single topology throughout that chapter. You will be using that topology to configure, verify, and troubleshoot the routing operations discussed in the chapter. The labs and Packet Tracer activities used in this course are designed to help you develop an understanding of how to configure routing operations while reinforcing the concepts learned in each chapter. Prerequisite: Introduction to Networking (CIT162).

For additional information and/or a course syllabus contact CITDepartment@bhcc.mass.edu.

CIT-182 PC Hardware and Software
3 Credits
This course provides an excellent, interactive exposure to personal computers, hardware, and operating systems. Students completing this course
will be able to describe the internal components of a personal computer, assemble a system, install an operating system, and troubleshoot using system tools and diagnostic software. They will also be able to connect computers to the Internet, share resources in a networked environment and develop greater skills and confidence in working with desktop computers. Students participate in hands-on activities and lab-based learning to become familiar with various hardware and software components and discover best practices in maintaining, repairing and securing. Topics covered include: laptops and portable devices, wireless connectivity, safety, security and environmental issues. Standalone virtual learning tools supplement classroom instruction and provide opportunities for interactive hands-on learning. For additional information and/or a course syllabus contact CITDepartment@bhcc.mass.edu.

CIT-184

Healthcare IT Concepts I

This course will provide students with the knowledge and skills to successfully understand the Healthcare IT industry and to adequately prepare for Healthcare IT Hardware/Software Support positions. Topics include privacy, wireless, mobility and security concepts, networking, and systems management. Students will gain experience working to provide hardware and software support in healthcare environments, including physician offices, clinics, hospitals, and third-party contractors. Students will enhance their CompTIA A+ certification skills and acquire the knowledge and skills needed to implement, deploy, troubleshoot and support healthcare IT systems in clinical settings. Students will also understand healthcare technical workflow and the Healthcare IT operational and regulatory concepts while adhering to security best practices. Hands-on activities, labs, and web-based activities will provide a deeper understanding of the material. Prerequisite: Applications/Concepts (CIT110) or CIT113 or CIT120 or permission of Department Chair. Pre/corequisite: PC Hardware and Software (CIT121) or permission of department chair.

CIT-211

System Analysis and Design

This first course in computer information systems development introduces students to the tools and techniques available to the systems analyst and designer. The course covers phases of the systems development cycle with emphasis on analysis and design. A major component of the course includes an understanding of structured analysis and design techniques and the transition from structured analysis to Object Oriented Analysis. The course covers Language (UML) and Entity Relationship Diagrams (ERD). The department strongly suggests that students complete or take concurrently College Writing I (ENG111). Prerequisites: Applications/Concepts (CIT110) or IT Problem Solving (CIT113) or Introduction to Computer Science & Object Oriented Programming (CIT120) or permission of Department Chair. Pre/corequisite: PC Hardware and Software (CIT121) or permission of department chair.

CIT-216

Visual Basic

This course covers an introduction to computer programming using Visual Basic. The course provides students with hands-on exposure to object-oriented programming techniques and emphasizes programming logic, using the event-driven components of Visual Basic. Using laboratory case assignments, students learn design, and create their own Windows applications. They learn how to create a user interface, set control properties, design the logic structures of the project and write the associated Visual Basic code. Topics covered include variables and mathematical operations, decision and looping structures, procedures and functions and string manipulation. Prerequisite: Applications/Concepts (CIT110), IT Problem Solving (CIT113) or Introduction to Computer Science and OOP (CIT120). For additional information and/or a course syllabus contact CITDepartment@bhcc.mass.edu.

CIT-218

Intermediate Visual Basic

Expanding on the principles of object oriented and visual programming contained in Visual Basic (CIT216), this intermediate-level course provides students with additional in-depth use of the Visual Basic language. Students gain experience working with VB arrays and data interfaces, combination controls and functions, menu design and database interfaces. Multiple Classes and Inheritance will be covered as part of the continuing exposure to object oriented programming. The course emphasizes the incorporation of databases within a Visual Basic Project. Prerequisite: Visual Basic (CIT216) or permission of the instructor and/or department chairperson. For additional information and/or a course syllabus contact CITDepartment@bhcc.mass.edu.

CIT-219

Information Security and Assurance

Emphasis in this course in Information Security and Assurance will be placed on understanding the key issues associated with protecting information, the technical practices behind security and the subsequent detection and response to security incidents. Topics will include inspection of information assets, detection of and reaction to threats to information assets, and the investigation of pre- and post-incident procedures, technical responses and an overview of the Information Security Planning functions. You will complete a hands-on lab component required for this course. Students taking this course will be required to sign The White Hat Oath, a Code of Ethics formal The White Hat Oath, a Code of Ethics formal. Prerequisites: Windows Operating Systems (CIT268). For additional information and/or a course syllabus contact CITDepartment@bhcc.mass.edu.

CIT-220

Directed Study in Digital and Computer Forensics

1 Credit

Students in this course will be assigned a special Forensics research topic from either the technical or legal side of digital and computer forensics or cybersecurity or an internship, when possible, or a combination of a special research topic and a short term job shadowing assignment. Prerequisite: Advanced Computer Forensics (CIT221). For additional information and/or a course syllabus contact CITDepartment@bhcc.mass.edu.

CIT-221

Advanced Computer Forensics

3 Credits

This course provides advanced work in computer and digital forensic analysis. Emphasis in this course will be placed on file system forensic recovery, analysis and reporting, intrusion detection and analysis, and advanced use of computer forensics tools. Topics covered in Introduction to Computer Forensics (CIT212) will be expanded upon especially in the areas of file system analysis, drive imaging and cloning, malware analysis, and digital evidence. Prerequisite: Introduction to Computer Forensics (CIT212).

CIT-223

Special Topics in Digital and Computer Forensics

3 Credits

This course is designed to cover emerging and forensics changing issues in Computer and digital Forensics. Issues covered in this course could include but will not be limited to testing as an expert technical witness, mobile device forensics, and new legal issues pertaining to digital evidence. Topics covered will be adjusted as the curriculum needs of the field change. Pre/ corequisite: Advanced Computer Forensics (CIT221). For additional information and/or a course syllabus contact CITDepartment@bhcc.mass.edu.

CIT-225

Advanced Python Programming

3 Credits

This is an advanced course designed for any student interested in learning advanced computer programming concepts in the context of the Python programming language. In this course students will explore classes, object oriented programming, plotting, sampling and statistical thinking, using randomness to solve non-random problems, statistical thinking, graphs, dynamic programming. Students will complete hands-on individual projects, individual assignments, group projects, and exams to assess student engagement and achievement of the course outcomes. Prerequisite: Python Programming (CIT125) or equivalent experience with Python Programming. For additional information and/or a course syllabus contact CITDepartment@bhcc.mass.edu. All prerequisites must be completed with a C or better.

CIT-229

Programming with Android I

3 Credits

This course introduces the central components of Android programming. Students will learn how to program in Java using the Android Development Tools using a series of scaffolded, skill based lessons culminating in a mobile application which can be exported and placed on a device. Prerequisites: Writing Skills I (ENG090) and Reading Skills I (RDG090), or Mobile App Development (CIT129).

CIT-230

Help Desk Techniques

3 Credits

This course provides students with an overview of the design, implementation, and management of a computer help desk or customer support center. Course topics include customer service skills, troubleshooting tools and methods, problem-solving strategies for common support problems, the incident management process, and user needs analysis and assessment. The course also covers industry certifications, professional associations, and standards of ethical conduct for help desk personnel. Prerequisites: Applications/Concepts (CIT110) or Chair approval. For additional information and/or a course syllabus contact CITDept@bhcc.mass.edu.

CIT-233

Advanced Microsoft Office

3 Credits

This advanced course covers the use and application of integrated PC applications software based on the most current version of Microsoft Office. It covers the following applications in detail: Advanced Word Processing, Spreadsheet, Database, Presentation Graphics and Desktop Information Management applications. The course emphasizes Internet applications including on-line collaboration using MS Office. It also stresses integration of the MS Office applications. MicroSoft Corporation has approved this course material as courseware for the Microsoft Business Certification (MBC) Program and...
students may choose to take the MBC Certification Examination(s) upon completion of this course. Prerequisite: Applications/Concepts (CIT110) or IT Problem Solving (CIT113) or Introduction to MS Office (CIT133) or equivalent experience or permission of the department chairperson. For additional information and/or a course syllabus contact CITDepartment@bhcc.mass.edu.

CIT-234  
Decision Support Using MS Excel  
3 Credits  
This comprehensive course covers the use and application of Decision Support using spreadsheet software based on the most current version of Microsoft Excel. The applications include basic spreadsheet operations, charting, web queries, multiple sheet workbooks, macros, advanced functions, and data base features. The course emphasizes applications involving financial decision-making, financial planning and what-if analysis as they relate to various business and organizational models. Internet applications of MS Excel and integration of the other MS Office programs are also covered. Microsoft Corporation has approved this course material as coursework for the Microsoft Business Certification (MBC) Program and students may choose to take the MBC Excel Certification Examination upon completion of this course. Prerequisite: Applications/Concepts (CIT110) or Introduction to Computer Science & OOP (CIT120) or equivalent experience or permission of the department chairperson. For additional information and/or a course syllabus contact CITDepartment@bhcc.mass.edu.

CIT-236  
SQL Programming  
3 Credits  
This course introduces students to the fundamentals and functions of Structured Query Language (SQL), including relational database, table creation, updating, and manipulation concepts. Using a live data base, students learn SQL basics and then move on to the more sophisticated and challenging aspects of SQL. Students get in-depth knowledge of the language through extensive use of Internet based, industry standard SQL programming and certification testing engines. Upon completion of this course, students have the skills and competencies required to program in SQL and the background necessary to continue to intermediate and advanced courses in database procedural programming and database administration. Prerequisite: Computer Applications/Concepts (CIT110) or IT Problem Solving (CIT113) or Introduction to Computer Science and Object Oriented Programming (CIT120), or permission of the department chairperson. For additional information and/or a course syllabus contact CITDepartment@bhcc.mass.edu.

CIT-237  
C++ Programming  
4 Credits  
In this course, students who already have been exposed to programming and Object Oriented thinking, develop the ability to correctly analyze a variety of problems and generate appropriate algorithmic solutions using the C++ Programming Language. The course emphasizes the principles of top-down structured design and Object Oriented thinking. Topics include but are not limited to branching and looping mechanisms; arrays, functions and function overloading, arguments by reference and by value as well as optional arguments; recursion; pointers, creating libraries and namespaces, structures and classes, constructors and other methods, overloaded operators, file I/O; inheritance and polymorphism. Strong analytical skills are recommended for students enrolling in this course. Prerequisite: Writing Skills II (ENG095), College Algebra-STEM (MAT194) and Introduction to Computer Science & Object Oriented Programming (CIT120) with grade C or better or equivalent experience with permission of the department chairperson. For additional information and/or a course syllabus contact CITDepartment@bhcc.mass.edu. All prerequisites must be completed with a C or better.

CIT-239  
JAVA Programming  
4 Credits  
In this course, students who already have been exposed to programming and Object Oriented thinking, develop the ability to correctly analyze a variety of problems and generate appropriate algorithmic solutions using the Java Programming Language. The course emphasizes the principles of top-down structured design and Object Oriented thinking. Topics include but are not limited to branching and looping mechanisms; arrays, functions and function overloading, arguments by reference and by value as well as optional arguments; recursion; creating packages, structures and classes, constructors and other methods, file I/O; inheritance and polymorphism. Strong analytical skills are recommended for students enrolling in this course, plus familiarity and experience with basic HTML tags. The course covers creating both Java Applications and Java Applets including event handling and audio. Prerequisite: Writing Skills II (ENG095), College Algebra-STEM (MAT194) and Introduction to Computer Science & Object Oriented Programming (CIT120) with grade C or better or equivalent experience with permission of the department chairperson. For additional information and/or a course syllabus contact CITDepartment@bhcc.mass.edu. All prerequisites must be completed with a C or better.

CIT-240  
Database Programming  
3 Credits  
This is an intermediate course in procedural programming for databases and database systems. Topics in this course include: anonymous and named blocks, named procedures and functions, cursors, triggers, collections and the creation and manipulation of temporary tables. Students perform mid-to-advanced level manipulation of databases required for logical processing and user interaction with relational databases. Prerequisite: SQL Programming (CIT235) and permission of department chair. For additional information and/or a course syllabus contact CITDepartment@bhcc.mass.edu.

CIT-242  
Data Structures  
3 Credits  
This course prepares students to understand the fundamentals of data structures with emphasis on software engineering. Topics include multidimensional arrays, records, dynamic memory allocation, stacks, queues, lists, trees, graphs, and others. The department strongly recommends that students achieve a grade of B- or better in Java Programming (CIT239), Prerequisite: Java Programming (CIT239) and Precalculus (MAT197). For additional information and/or a course syllabus contact CITDepartment@bhcc.mass.edu.

CIT-243  
Android Development for Java Programmers  
3 Credits  
This course is for students who are already experienced Java Programmers. It discusses not only the introduction of Android app development, but publishing in the Market place and monetizing the apps through fee, in-app advertising or in-app billing of selling virtual goods. Topics include but are not limited to: mobile game design principles, tools and terminology, AndEngine framework, Java/ Dalvik and Android SDK, rendering images, using sprite sheets, creating animations, sound, creating an effective game interface, resource files, working with maps, notifications, building customer UI elements. APs (Application Programming Interfaces) and SDK (Software Development Kit) for phones and tablets will be used. Prerequisites: Grade C or better in Java Programming (CIT239) and Precalculus (MAT197). Prereq/corequisite: Advanced Java Programming (CIT285).

CIT-245  
Database Administration  
3 Credits  
This course is designed to introduce students to the fundamentals of Relational Database Administration, using the most current versions of the Oracle RDBMS engine. Students will learn the basics of database management including installing and configuring the database, controlling the data dictionary, managing the database tables including constraints, indexes and user roles. Students gain extensive real-world experience utilizing the DBA tools associated with Oracle. Students will present the material covered in the Database Fundamentals I Oracle Certification Exam #1Z0-031. Students will also be provided with the personal edition of the Oracle software, Programming for database management (CIT236), equivalent experience or permission of the department chair. For additional information and/or a course syllabus contact CITDepartment@bhcc.mass.edu.

CIT-250  
Collaboration, Communication, and Integrating  
3 Credits  
This is a course in modern office technology which introduces students to all major areas of personal and organizational collaboration, communication and integration of MS OFFICE applications. Building on students' basic knowledge of the most current version of the core MS OFFICE applications, the course proceeds to cover in detail, the integration among OFFICE applications, including Office Linking & Embedding (OLE), On-Line Meeting, document sharing, and the other collaboration features of MS OFFICE. Using WORD as the core application, students gain practical experience in moving and linking data among all applications: WORD, EXCEL, ACCESS, POWERPOINT and OUTLOOK. Advantages and limitations of Voice over IP (VoIP) and video conferencing, along with the importance of security and other considerations involved in implementing these technologies are also covered. Students also gain experience in web enabling and publishing as well as knowledge of the principles, best practices, procedures and techniques used in implementing all of these applications in offices large and small. Microsoft Corporation has approved this course material as coursework for the Microsoft Business Certification (MBC) Program and students may choose to take the MBC Certification Examination(s) upon completion of this course. Prerequisite: Computer Applications/Concepts (CIT110) or IT Problem Solving (CIT113) or equivalent course or experience or permission of department chairperson. For additional information and/or a course syllabus contact CITDepartment@bhcc.mass.edu.

CIT-262  
Wireless Technology  
3 Credits  
This course introduces students to the fundamentals of planning, installing, maintaining and troubleshooting a network supported by unbound media. It is assumed that students have no prior knowledge of wireless networks and devices. Hence, this course permits students to learn how to apply and support wireless technology in personal,
LAN, MAN, CAN and WAN networks. The course is divided into two sections, one that teaches the wireless skills required to take and pass your Certified Wireless Network Administration (CWNA) exam and the other educates students on how many different wireless devices work. Prerequisite: Introduction to Networking (CIT162).

**CIT-264 Networking Security** 3 Credits

The goal of this course is to provide you with a fundamental understanding of network security principles and implementation. You will learn about the technologies used and principles involved in creating a secure computer networking environment. You will learn about the authentication, the types of attacks and malicious codes that may be used against your network, the threats and countermeasures for email, Web applications, remote access, and file and print services. A variety of security topologies are discussed as well as technologies and concepts used for providing secure communications channels, secure intranet communications, and secure network communications. Further, you will learn about intrusion detection systems, firewalls, and physical networking security concepts. In addition, security policies, disaster recovery, and business continuity plans are covered. Aside from learning the technologies involved in security, you will get to understand the daily tasks involved with managing and troubleshooting those technologies. You will have a variety of hands-on and case project assignments that reinforce the concepts you read in each chapter. Prerequisite: Introduction to Networking (CIT162).

**CIT-270 Linux Administration/Lab** 4 Credits

This course introduces students to the fundamentals of creating and maintaining a network supported by Linux clients and servers. It is assumed that students already have a grasp of the basic Linux commands hence the focus will be on system administration tasks included but not limited to installation, distributed computing, system administration tools and tasks, files, system printing, send mail, NIS, NFS, DNS/BIND and setting up a firewall. Prerequisite: CIT167. For additional information and/or a course syllabus contact CITDept@bhcc.mass.edu.

**CIT-271 Batch File Programming** 1 Credit

This course teaches students how to create batch files to automate repetitive commands. Students will be able to write and use batch files for complex tasks, to use batch file subcommands, to halt the execution of a batch file and to write batch files using replaceable parameters and environment variables. Prerequisite: Linux Administration/Lab (CIT270). Pre/corequisite: Windows Operating Systems (CIT268). For additional information and/or a course syllabus contact CITDept@bhcc.mass.edu.

**CIT-273 Ethical Hacking** 4 Credits

This course introduces the information technology security specialist to the various methodologies for attacking a network. The student will be introduced to the concepts, principles and techniques, supplemented by hands-on exercises, for attacking and disabling a network. These methodologies are presented within the context of properly securing the network. The course will emphasize network attack methodologies with emphasis on student use of network attack techniques and tools and appropriate defenses and counter measures. Students will receive course content information through a variety of methods: lecture and demonstration of hacking tools will be used in addition to a virtual environment. Students will receive a hands-on practical approach in terms of their personal network environment and material hacking. There is an ethics requirement for this course and students will be required to sign the White Hat Oath. Students are expected to have access to a computer with internet access outside of class as there is a major web component to the course. Prerequisite: Windows Operating Systems (CIT268) or Linux Administration/Lab (CIT270) or permission of the department chairperson.

**CIT-274 WAN Technologies** 3 Credits

The primary focus of this course is on accessing wide area networks (WAN). The goal is to develop an understanding of various WAN technologies to connect small- to medium-sized business networks. The course introduces WAN converged applications and quality of service (QoS). It focuses on WAN technologies including PPP, Frame Relay, and broadband links. WAN security concepts are discussed in detail, including types of threats, how to analyze network vulnerabilities, general methods for mitigating common security threats and types of security appliances. The course then explains the principles of traffic control and access control lists (ACLs) and describes how to implement IP addressing services for an Enterprise network, including how to configure NAT and DHCP. IPv6 addressing concepts are also discussed. During the course, you will learn how to use Cisco Router and Security Device Manager (SDM) to secure a router and implement IP addressing services. Finally, students learn how to detect, troubleshoot and correct common Enterprise network implementation issues. The labs and Packet Tracer activities used in this course are designed to help you develop an understanding of how to configure routing operations while reinforcing the concepts learned in each chapter. Prerequisite: Switching Basics & Intermediate Routing (CIT267), Wireless Operation Systems (CIT268), and Switching Basics and Intermediate Routing (CIT267). For additional information and/or a course syllabus contact CITDepartment@bhcc.mass.edu.

**CIT-275 Information Security Seminar** 3 Credits

This course enables the security specialist to employ the various methodologies, tools, and techniques acquired in earlier coursework to analyze network vulnerabilities, general methods for mitigating common security threats and types of security appliances. The course introduces LAN switching and wireless access control lists (ACLs) and describes how to implement IP addressing services for an Enterprise network, including how to configure NAT and DHCP. IPv6 addressing concepts are also discussed. During the course, you will learn how to use Cisco Router and Security Device Manager (SDM) to secure a router and implement IP addressing services. Finally, students learn how to detect, troubleshoot and correct common Enterprise network implementation issues. The labs and Packet Tracer activities used in this course are designed to help you develop an understanding of how to configure routing operations while reinforcing the concepts learned in each chapter. Prerequisite: Switching Basics & Intermediate Routing (CIT267), Wireless Operation Systems (CIT268), and Switching Basics and Intermediate Routing (CIT267). For additional information and/or a course syllabus contact CITDepartment@bhcc.mass.edu.

**CIT-276 Windows Operating Systems** 3 Credits

This course provides students with in-depth, hands-on experience with the most commonly used versions of the Windows operating systems. Students gain experience using system file managers, utilities, set-up procedures, and other major components of the operating systems. In addition, the course emphasizes gaining an understanding of device drivers, link libraries, memory management, multi-tasking requirements, and multi-media considerations. Upon completion of the course, students have a high degree of competence in the application and use of these Windows operating systems such as Windows, DOS, and Linux. Prerequisites: Computer Applications/Concepts (CIT110), IT Problem Solving (CIT113) or Intro to Computer Science/Object Oriented Programming (CIT210) or permission of the department chairperson. For additional information and/or a course syllabus contact CITDept@bhcc.mass.edu.
emphasizes practical experience. CCNA Security aims to develop an in-depth understanding of network security principles as well as the tools and configurations available. The following tools are covered: Protocol sniffers/analyzers, TCP/IP and common desktop utilities, Cisco IOS Software, Cisco VPN client, Packet Tracer (PT), and Web-based resources. Prerequisite: Routers and Routing Basics (CIT167). For additional information and/or a course syllabus contact CITDepartment@bhcc.mass.edu.

CIT-282 MS Windows Administration/Lab Network 4 Credits
This course provides students with the necessary knowledge and hands-on skills required to manage the most current and industry-accepted version of Microsoft Windows. The course tailors information to requirements necessary to complete the Microsoft Certified Professional (MCP) exam required by industry. Topics include, but are not limited to, installation, managing users and groups, managing domains via an overview of the Active Directory Service, print services, disk storage, remote access, managing and monitoring the network, the Registry and troubleshooting techniques. Course labs challenge students to piece together new and old networking concepts that reinforce each topic. Prerequisite: Introduction to Networking (CIT162). Pre/corequisite: Windows Operating Systems (CIT268). For additional information and/or a course syllabus contact CITDdept@bhcc.mass.edu.

CIT-284 Advanced C++/OOP 3 Credits
This course covers intermediate-level programming. Students learn advanced topics of C++, dynamic memory, allocation, pointers, etc., and OOP, function and operator overloading, class design and object abstraction, ADT design, templates, inheritance, and polymorphism. Students learn to analyze a variety of problems and generate appropriate object oriented solutions. The department recommends that students taking this course have no less than a grade of B in the prerequisite course. Prerequisite: C++ Programming (CIT237) and College Algebra STEM (MAT194) or permission of the department chairperson. For additional information and/or a course syllabus contact CITDepartment@bhcc.mass.edu.

CIT-285 Advanced Java Programming 3 Credits
This course thoroughly examines many of the sophisticated features of the Java programming language, including interfaces, advanced graphics, some data structures, file I/O techniques, multithreading, advanced JDBC Servlets, and Java Server Pages. Students demonstrate their mastery of the material through a series of graded projects and examinations that challenge at an extremely high level. The course content only instructs in the preparation of applications and applets that focus on business-related topics, but also teaches JAVA in an internet-based, integrative environment that utilizes cross-platform tools. Prerequisites: Java Programming (CIT239) and Precalculus (MAT197). For additional information and/or a course syllabus contact CITDepartment@bhcc.mass.edu.

CIT-287 Survey of New Popular OOP for for Programmers 3 Credits
This course is for students who already have deep knowledge of an object Oriented Language (Advanced java or Advance C+). This course will cover in depth three of the most commonly requested OOPL in the job market, C#, Visual Basic.NET and Python (languages covered may change depending on the current job market needs). The course will focus on the idiosyncrasies of the different new languages. Knowledge of programming structures and ability to implement lengthy and complex programming solutions, use of the debuggers and ease to adapt in different IDEs is assumed. Long capstone-like projects will be required for each language examined and students will be responsible to analyze and solve the problems by applying the good programming practices and styles already learned in prior semesters. Prerequisites: Grade of C or better in Advanced Java programming (CIT285) or Advanced C++ (CIT284), and Precalculus (MAT197).

CIT-288 Healthcare IT Concepts II 3 Credits
Students will apply concepts from Healthcare IT objectives learned in the Healthcare IT Concepts I course for effective real-world application. Students will achieve the national Healthcare Technology Specialist competencies and the national Healthcare Information Management competencies. The course prepares students to demonstrate proficiency in Healthcare IT workforce roles integral to the implementation and management of electronic health information systems. Students will demonstrate competencies in health IT professions to assess workflows, select hardware and software, work with vendors, install and test systems, diagnose IT problems, and train other staff on healthcare systems. Virtual labs and web-based stimulation will provide a practical understanding of the material. Pre/corequisite: Healthcare IT Concepts I (CIT183) or permission of the department chair.

CIT-299C Computer Technology Internship 3 Credits
This course enhances the academic experience for students. All internships take place at pre-approved sites. The course allows students enrolled in computer technology courses to apply what they have learned in the real world environment. Students must follow an on-campus seminar. Students must comply with the internship requirements, as stated in the Internship Handbook, before registering for the course. In all cases, students need permission of the department chairperson to register for this course.

CIT-299N Networking Internship 3 Credits
This course provides students with hands-on experience in networking. The course is divided into three sections, one that teaches the concepts for building and maintaining a networking career, another introduces guest lecturers from industry and finally either an internship, job shadowing, or team walk through approach to learning. This course provides a solid foundation to understanding the types of jobs available to students with network administration skills, what it is like to work in the networking field, and students will acquire a perspective of employer’s expectations. Students will become more successful with the interview process since they will have had real world experience and/or understanding of what will be expected of them when they begin their networking career. Prerequisite: Permission of department chairperson.

COURSE DESCRIPTIONS

Computer Information Technology

CMT-101 Game Development Essentials 3 Credits
This course will present the principles, concepts, and components all of games and the gaming industry’s processes, methodologies, and principles associated with the design, development, and distribution of computer-based games and computer-based simulations. This course is designed to provide the student with an overall comprehension of all the precepts and building blocks that are essential to every computer-based game and simulation. This course fulfills the Learning Community Seminar requirement for students in Computer Media Technology. Prerequisites: Writing Skills II (ENG095) and Reading Skills II (RDG095) or placement.

CMT-103 Managing Game Development 3 Credits
This course will cover the concepts and application of management tools and philosophies incorporated in today’s game development climate for the purposes of effectively managing game production scenarios. The student will be introduced to the tasks associated with the development of a game or simulation projects and the constraints, effects, and ramifications affecting the project components. Additionally, the student will be taught critical project management analysis techniques such as resource allocation, estimating obstacles and opportunities and how to exploit them to the project’s advantage. Prerequisites: Writing Skills II(ENG095) and Reading Skills II (RDG095).

CMT-111 HTML and Dreamweaver 3 Credits
This course teaches the student the principles and concepts of designing and creating WEB pages in an HTML format. The course is designed to expose the student to the constructs of HTML tags, the attribute modification of HTML tags, the incorporation of CSS tags, CSS pseudo tags, dynamic effects using styles, and class assignments. Additionally, the course will teach the student the utilization of graphics and dynamic graphics used in Web design. Also included will be content presentation control via HTML tables, HTML layers, and HTML frames. The course will explore the requirements, tools and controls used in WEB page development by lecture, in-class practical exercises, and home study exercises. The course will also teach the student to create WEB sites using Dreamweaver as a state-of-the-art web authoring tool to enable rapid deployment of WEB development projects.

CMT-113 JavaScript 3 Credits
This course teaches students the concepts and practical application of JavaScript programming language as a WEB authoring tool. Students learn to program WEB pages to perform such tasks as forms and form validation, image swapping, auto-scrolling text, browser detection and control and time and date extraction and conversion. The course explores designing and developing JavaScript functions using iteration loops, conditional statements, switch statements, parameter redirection, in-line JavaScript and remote access JavaScript utilization. Prerequisites: Computer Applications/Concepts (CIT110) and HTML & Dreamweaver (CMT111).
CMT-115
Flash
3 Credits
Flash is a vector based animation and web authoring tool that provides the capability to design and develop animated graphics, animated movies, animated buttons, and interactive navigation menus that are a predominant part of modern day WEB design strategies. Flash is the technology behind on-line interactive training programs, student lessons, tutorial movies, advertising delivery programs, music players, and corporate presentations across the internet. Flash provides a web message delivery medium that is unique, attention grabbing, and very effective when viewed. Its incorporation as a web design skill can be considered as part of an image development strategy. Prerequisite: JavaScript (CMT113).

CMT-117
XML
3 Credits
This course introduces the student to writing Extensible Markup Language documents for the Web, using custom markup tags, Cascading Style Sheets and Extensible Style Language Style sheets. Students will create a Document Type Definition (DTD) for validating their documents with an XML parser. Students will also learn how to transform XML documents into other formats for computers that are not capable of viewing XML format documents. Prerequisite: HTML and Dreamweaver (CMT111).

CMT-119
The Human Character
3 Credits
This course will present concepts in the creation of 3D human character and object modeling using detailed structures based on polygon modeling design tools such as patch modeling, image planes, planar projections, and curve projections. This course will also cover in-depth NURBS modeling of 3D characters and conversion from NURBS to polygonals. These skills are requisite skills for the successful design and implementation of 3D game design and computer simulation projects. Most of these techniques were employed in the Sony Pictures animated short film The ChubbChubbs. Prerequisite: Game Development Essentials (CMT101).

CMT-121
Maya Foundations
3 Credits
This course will present the principles of designing gaming and computer simulation using the same Autodesk Maya techniques and principles as were used in the Sony Pictures feature film Open Season. This course will cover the fundamentals of three dimensional (3D) object creation, 3D object shading, shape texturing, scene and object lighting, and simple animations. Prerequisite: Writing Skills II (ENG095) or placement and Academic Reading III (ESL098) or Reading Skills II (RDG095).

CMT-123
Maya Character Modeling
3 Credits
This course will present advanced concepts in the creation of 3D character and object modeling using detailed structures based on polygon modeling design tools such as patch modeling, image planes, planar projections, and curve projections. This course will also cover in-depth NURBS modeling of 3D characters and conversion from NURBS to polygonals. These skills are requisite skills for the successful design and implementation of 3D game design and computer simulation projects. Most of these techniques were employed in the Sony Pictures animated short film The ChubbChubbs. Prerequisite: Maya Foundations (CMT101).

CMT-125
Cascading Style Sheets
3 Credits
This course will cover the incorporation of modern web design controls for the formatting: structure, dynamics, interactive functionality, and animation web page content with CSS. CSS is the primary technology in use today in the fastest paced world of web design and is used to present web content in a standardized manner that far exceeds the capabilities of the HTML language. CSS is in use in almost every one of the millions of web pages published in today's world and is a multi-browser, multi-language coding technology. CSS is found at all levels of the web design process and lends itself being incorporated as an in-line component, and embedded component, and a remote component on every HTML, JavaScript, XML ASP.NET, PHP, and Ruby pages written. It is prevalent and used in IE Explorer, Firefox, Mozilla, Safari, Opera, and Netscape browsers. CSS can be used to create a myriad of functions from the simple coloring of text content to the dynamics of drop-down expandable menus to the inclusion of voice content. It is a technology that has rapidly replaced the traditional name-pair attribute coding scheme of the previous web design technology. Corequisite HTML & Dreamweaver (CMT111).

CMT-129
Photoshop for Gaming
3 Credits
This course will cover Adobe Photoshop techniques as used in a 3D production pipeline. Students will learn the creative and technical processes of creating 2D concept art and illustrations for objects, environments, creatures and characters. Students will also learn how to create and use various texture maps such as color, bump, luminosity, secularity, and transparency. In combination, these maps will be used to create sophisticated materials (shaders) that can be applied to 3D objects. On completion of the course, students will have a solid foundation and understanding of how Photoshop is used in 3D game and film production. Prerequisites: Writing Skills II (ENG095) and Foundations of Mathematics (MAT093).

CMT-211
XSLT Extensible Stylesheet Transformation
3 Credits
This course is designed to add a new dimension to the students XML Web Design learning foundation by introducing them to the XML style sheet and transformation language. XSL is a specialized formatting and manipulation that is uniquely applicable to the XML markup language which enables the developer of XML Web content to perform such tasks as contextual formatting, conditional selection of Web content from a data source, sorting of content on a Web page, dynamic counting, dynamic summarization, attribute processing, and creating dynamic document-wide numbering schemes. Prerequisites: HTML & Dreamweaver (CMT111) and XML (CMT117).

CMT-215
ASP.NET
3 Credits
This course will teach the student the concepts and practical applications of the web-to-database interface. ASP.net is a powerful web technology that permits the construction of web sites that extract data from server side databases and present the data to the user dynamically. The ASP.net language is comprehensive and incorporates SQL server and scripting languages as part of its construction. ASP.net technology is widespread in use and is the technology behind many on-line-commerce sites today. Prerequisite: JavaScript(CMT113).

CMT-217
3D Modeling and Sculpting
3 Credits
This course will teach the student the processes and techniques of modeling and sculpting 3D characters and objects using Autodesk Mudbox software. The student will be taught the skills required to create production-ready 3D digital artwork for the game, film, television, and design industries. The student will be taught how to paint directly onto high-resolution 3D models, paint multiple material channels, execute texture baking, create accurate normal, displacement, and ambient occlusion maps, render quality results directly in the viewport, and to employ endless interaction with the 3D application. Prerequisites: Maya Foundations (CMT112).

CMT-223
Maya Character Animation
3 Credits
This course will present advanced concepts in the creation of 3D character animation from simple joint movement to complete synchronized character movement. This course will also cover blend shaping, skinning techniques, joint constraints and their effect on skinning. These skills are requisite skills for the successful design and implementation of 3D game design and computer simulation projects. Most of these techniques were employed in the Sony Pictures animated short film The ChubbChubbs. Prerequisite: Maya Character Modeling (CMT123).

CMT-229
Creating 3-D Special Effects
3 Credits
This course will present advanced concepts in the creation and implementation of special effects, shadings, caustics, global illumination, mental ray rendering, and lighting, shadows, and cameras. These skills are requisite skills for the successful design and implementation of 3D game design and computer simulation projects. Most of these techniques were employed in the Sony Pictures animated short film The ChubbChubbs. Prerequisite: Maya Foundations (CMT112).

CMT-231
Mel Scripting in Maya
3 Credits
The course will cover the process of using Maya Embedded Language to manipulate and animate characters, objects, and object interactions into a complete animation scenario. MEL scripting incorporates traditional programming constructs such as loops, conditional, functions, expressions, and nodes. In addition to traditional constructs this course will introduce specific animation and gaming constructs such as particle dynamics control, user input selection dialog, solid body dynamics, and crowd systems. Prerequisite: Creating 2-D Special Effects (CMT229).

CMT-232
Game Engines
3 Credits
This course will present the concepts and methods associated with utilizing Game Engines as the finished product tool for creating and delivering computer-based games and simulations. Game Engines bring together the ability to deliver real-time rendering with the added flexibility to control the game/simulation lighting ambience, terrains, physics, audio integration, programming, and real-time networking. Prerequisite: Mel Scripting in Maya (CMT231) or Department Chair approval.
COURSE DESCRIPTIONS

CMT-233
Game Programming
3 Credits
The course will cover the beginning phases of programming content and movement as a component of the entire game development and managed code process. The course will be taught using the C++ programming language and will be developed in the Microsoft Video Studio.Net Code development environment. The student will learn the fundamentals of C++ programming as they are applied to the creation and control of computer games. Prerequisite: Mel Scripting in Maya (CMT231).

CMT-241
PHP/MySQL
3 Credits
PHP/MySQL is a web development programming language that is used to provide dynamic interaction between web content pages and databases. PHP techniques will enable developers to retrieve and maintain real-time information for presentation across the web delivery medium. The objectives of this course are to teach the student the skills required to effectively construct real-time web sites for the purposes of e-commerce and real-time information delivery. The student will learn how to design and publish web pages that interact with push/pull actions that interact directly with on-line databases. Prerequisites: HTML & Dreamweaver (CMT111) and SQL Programming (CIT236).

CMT-249
3D Liquids Simulation
3 Credits
This course will instruct the student in the techniques and processes required to simulate computer generated liquids and liquid flows. The student will be taught the techniques used in the generation of large scale simulations such as floods, oceans, and breaking waves. The student will also be taught the principles and processes for small scale liquid simulations such as waters splashes, pouring liquids, animated contained liquids, and molten materials. Additionally the student will study and design realistic interactions, splashes, and redirections that occur between liquids and solid objects. Prerequisite: Creating 3D Special Effects (CMT229).

CMT-299
Web Development Internship
3 Credits
This course provides students with hands-on experience in Web Development. The course is an internship approach to learning. It provides a solid foundation to understanding the types of jobs available to students with Web Development skills and what it is like to work in the Web Development field. Students will acquire a first-hand perspective of employer's expectations and levels of satisfaction. Students will become more successful with the interview process since they will have had real world experience and/or understanding of what will be expected of them in the pursuit of a web development career.

Criminal Justice

CRJ-101
Introduction to Criminal Justice
3 Credits
A survey of the history, development and the role of American Criminal Justice System are presented. Included are the organizations and jurisdictions of the various agencies, a review of the court process, professional orientation, and the current trends in the criminal justice system. The course will offer students the ability to use state of the art technology and interactive instruction. It stresses the application of knowledge learned to real-life situations. Ethical behavior issues will be raised and students will develop strategies to set boundaries, understand different cultures among people, develop professional codes of conduct and behavior, and develop a professional moral code of conduct. The course fulfills the Learning Community Seminar requirement for students in AS Criminal Justice. Prerequisites: Writing Skills II (ENG095), Academic Reading III (ESL098) or Reading Skills II (RDG095), or placement.

CRJ-102
Delinquency, Adjudication, and Correction
3 Credits
This course examines the causative factors in the development of youthful offenders, the civil and new criminal procedures used in juvenile court, and the history of the development of the juvenile courts and juvenile justice. The course presents an overview of the institutional response to the problems of juvenile delinquency, along with status offenders, gender specific offenders, special needs offenders and a focus on dependent/neglected and abused children. It emphasizes the police, court, correctional, and child protective agencies that process young offenders. Prerequisites: Writing Skills II (ENG095), Academic Reading III (ESL098) or Reading Skills II (RDG095), or placement.

CRJ-103
Criminal Law
3 Credits
This course examines the substantive law of crimes including the general and social parts of criminal law; classification of crimes against persons, property, and the public welfare; nature of crime; criminal liability; elements of crimes; and jurisdiction. Through case studies, the course emphasizes matters affecting law enforcement. Prerequisites: Writing Skills II (ENG095), Academic Reading III (ESL098) or Reading Skills II (RDG095), or placement.

CRJ-104
American Legal System
3 Credits
This introductory course covers American law. The course examines the origins of the American legal system through an analysis of its function, its sources, and its varied aspects. It explores the uniqueness of the American legal system through a thorough analysis of due process. The course covers the myths versus the realities of law.

CRJ-106
Principles of Security Management
3 Credits
This course covers the organization and administration of security and loss prevention programs in industry, business, and government. This course emphasizes the protection of assets, personnel and facilities, and the concept of risk management. It focuses on physical security methods, the development and implementation of security policies and procedures, and the use of security officers. Prerequisites: Writing Skills II (ENG095), Academic Reading III (ESL098) or Reading Skills II (RDG095), or placement.

CRJ-107
Introduction to Corrections
3 Credits
This course covers the correctional process from arrest to probation or parole. The course provides students with an understanding of corrections as an essential component in the criminal justice system and gives an orientation to current correctional concepts and various correctional institutions. Prerequisites: Writing Skills II (ENG095), Academic Reading III (ESL098) or Reading Skills II (RDG095), or placement.

CRJ-108
Street Law
3 Credits
This course examines the origins of the American Legal System through an analysis of its function, sources and its varied aspects. This course introduces students to fundamental criminal law and constitutional law principles and provides a platform for guided discussions of important public policy issues concerning, crime, discrimination, healthcare, and immigration. The course uses the latest instructional technology including e-portfolios, case studies, simulated legal exercises, small group exercises and analytical thought problems to develop higher level thinking skills that prepare students for other course work in criminal justice, law, sociology, and history and government.

CRJ-201
Management in Criminal Justice
3 Credits
This course presents the principles of administration and management of criminal justice agencies. It examines organizational structure, responsibilities, and the interrelationships of administrative, line, and staff services in police, security, court, and correctional facilities. Prerequisites: A grade of C or better in College Writing I (ENG111), Introduction to Criminal Justice (CRJ101), Criminal Law (CRJ103), Criminal Investigation I (CRJ208) or instructor approval.

CRJ-202
Evidence/Court Procedures
3 Credits
This course covers rules of evidence in law enforcement procedures from investigations to courtroom hearings. It examines burden of proof, judicial notice, and admissibility of testimonial and documentary evidence, relevancy, materiality, and competency. The course analyzes state and federal court cases as well as trial techniques and presentation of evidence. Prerequisites: A grade of C or better in College Writing (ENG111), Introduction to Criminal Justice (CRJ101), Criminal Law (CRJ103), Criminal Investigation I (CRJ208), or instructor approval.

CRJ-203
Rehabilitation of the Offender
3 Credits
This course covers an examination of current programs and services available in the corrections component of the criminal justice system. It examines contemporary practices in corrections such as the community-based work-release programs, furloughs, halfway houses, and individual treatment services. The course includes an examination of alternatives to incarceration. Prerequisites: A grade of C or better in College Writing I (ENG111), Introduction to Criminal Justice (CRJ101) and Criminal Law (CRJ103), Criminal Investigation I (CRJ208), or instructor approval.

CRJ-208
Criminal Investigation I
3 Credits
This course examines the corruption of the criminal justice system. It includes fundamentals and theory of an investigation, crime scene procedures, report writing, collection and preservation of evidence, methods of gathering information, and specialized and scientific methods. Prerequisite: Grade of C or better in College Writing I (ENG111), Introduction to Criminal Justice (CRJ101) and Criminal Law (CRJ103) or instructor approval.
CRJ-210
Cultural Issues American Criminal Justice System
3 Credits
This course examines the impact of the policies, procedures, and interpretation of data concerning the American criminal justice system across ethnic, racial, sexual, and cultural lines. It examines cross-cultural interaction within the system and the history and institutional attitudes concerning multicultural issues. Prerequisites: a grade of C or better in College Writing I (ENG111), Introduction to Criminal Justice (CRJ101) and Criminal Law (CRJ103) or instructor approval.

CRJ-211
Criminal Procedure
3 Credits
This course explores constitutional issues related to criminal justice. Students learn the Incorporation Doctrine and the views of Justices Black and Frankfurter concerning this doctrine. In addition, the course examines the nuances of search and seizure under the 4th Amendment, 5th Amendment self-incrimination issues, 6th Amendment right to counsel issues, as well as the use of informants and electronic interceptions. Prerequisites: a grade of C or better in College Writing I (ENG111), Introduction to Criminal Justice (CRJ101) and Criminal Law (CRJ103) or instructor approval.

CRJ-212
Community Corrections
3 Credits
This survey course covers the history, development, trends, and role of the community-based correction program in the American criminal justice system. The course includes therapeutic, support, and supervision programs for offenders. It examines pretrial release, detention, and community services, as well as innovative programs. Students must make site visits. Prerequisites: Grade of C or better in College Writing I (ENG111) and Introduction to Criminal Justice (CRJ101) and Criminal Law (CRJ103) or instructor approval.

CRJ-214
Negotiations and Mediations
3 Credits
This course examines skills needed to negotiate and mediate in the criminal justice system. It provides strategies to achieve settlements and to intervene in disputes. Students conduct actual negotiations and mediations. Students critique and videotape both of these activities. Prerequisites: Introduction to Criminal Justice (CRJ101) and Criminal Law (CRJ103) or instructor approval.

CRJ-215
Terrorism
3 Credits
This course examines terrorism from both a philosophical and historic perspective. It covers right and left wing organizations, international and domestic groups as well as the ways terrorism relates to the business community. Prerequisites: Writing Skills II (ENG099) or placement and Academic Reading III (ESL098) or Reading Skills II (RDG095) or placement.

CRJ-216
Street Drugs and Pharmaceuticals
3 Credits
This survey course covers the manner in which the criminal justice system deals with drug use and abuse in our society. Topics include the psychosocial aspects of drugs, the pharmacology of drugs, street names, cost, and current rehabilitation practices. The course analyzes prevention programs in light of what works and what doesn’t as well as the cost of drugs to society. Prerequisites: Introduction to Criminal Justice (CRJ101) and Criminal Law (CRJ103) or instructor approval.

CRJ-218
Information and Electronic Security
3 Credits
This course introduces crimes involving the use of computers, the federal and state laws addressing them, and the preventive and investigative methods used to secure computers and defend and prosecute offenders. Part of information security is the electronics and technology needed to provide protection. Topics include budgeting, vendor selection, and security systems (biometrics, access control, closed circuit television, etc.) to meet organizational needs. Prerequisites: Introduction to Criminal Justice (CRJ101) and Criminal Law (CRJ103) or instructor approval.

CRJ-220
Policing in a Democratic Society
3 Credits
This course covers an introduction to the philosophy and techniques of contemporary policing including the history, traditions, and social developments that have resulted in the present system. The course emphasizes the effects of economics, social developments, and Supreme Court decisions on the evolution of the modern system. Discussion focuses on police accountability and the measurement of effectiveness of operations. The course traces the shift from traditional policing to community and problem-solving policing. Prerequisites: Introduction to Criminal Justice (CRJ101) and Criminal Law (CRJ103) or instructor approval.

CRJ-228
Criminal Investigation II
3 Credits
This course examines the techniques of analyses conducted on crime scene evidence, their value, and limitations. It covers the evidentiary value of the following types of evidence: glass, soil, hairs and fibers, firearms, tool marks, and questioned documents. This course also covers forensic concepts, methods of collecting samples, and the value of blood distribution patterns, bloodstains and other bodily fluids. Prerequisites: Introduction to Criminal Justice (CRJ101) and Criminal Law (CRJ103) or instructor approval.

CRJ-230
American Drug Law
3 Credits
This course explores the problems with drugs, illicit and lawful, and the ways the laws in the United States relate to drugs, their users and distributors. Students learn the manner in which federal and state laws differ in terms of punishment. The course analyzes the dichotomy in the federal treatment of crack cocaine as opposed to powder cocaine and the attendant affect this policy has on communities of color. The course also examines the minimum, mandatory drug sentencing laws and their impact on the criminal justice system. Students also learn about the major worldwide drug smuggling routes through the Balkans, South East Asia, and South and Central America, and the way United States inspection policies affect smuggling. Prerequisites: Introduction to Criminal Justice (CRJ101) and Criminal Law (CRJ103) or instructor approval.

CRJ-232
Civil Rights and Civil Liberties
3 Credits
This course gives students an overview of the ethical dilemmas facing criminal justice professionals in American society. It aids students in the comprehension and retention of diverse ethical issues by analyzing the aspects of ethical behavior and decision-making in law enforcement, court procedure and operations, and corrections. Prerequisites: Introduction to Criminal Justice (CRJ101) and Criminal Law (CRJ103) or instructor approval.

CRJ-245
Cyber Crime in Today’s Society
3 Credits
This course will focus on the issues, trends and problems associated with crimes perpetrated over the Internet or other telecommunications networks. This course will discuss crimes ranging from embezzlement to auction fraud and social engineering to digital warfare and cyber terrorism. Investigative techniques and issues will also be presented. Prerequisites: a grade of C or better in College Writing I (ENG111), Introduction to Criminal Justice (CRJ101) and Criminal Law (CRJ103) or instructor approval.

CRJ-299
Criminal Justice Internship
3 Credits
Students work 150 hours in a criminal justice facility, probation department, juvenile detention center, or house of corrections, as assigned by the contract advisor. Students work under an assigned criminal justice professional, participate actively in the preparation of pre-sentence reports, and conduct intake and post conviction interviews. Students learn how to perform record checks and prepare probation recommendations, etc. Students work on inmate classification, work release programs, and in educational settings. Students may assist counselors and other staff, depending upon the type of facility to which the student is assigned. Through active participation in online functions of the criminal justice agency, students gain knowledge and understanding. The contract advisor and the assigned criminal justice officer evaluate students’ work. Students meet bi-weekly with their advisors to prepare papers and work on related projects. Students are responsible for following all guidelines in the BHCC Internship Handbook. Prerequisite: Permission of the instructor.

Computed Tomography

CTC-111
Computed Tomography I
3 Credits
This interactive, web-based course presents principles and physics on conventional as well as spiral/helical CT. It begins with descriptions of the hardware configurations, and progresses to include the computer science of the system, including digital image processing, data acquisition, display, and reconstruction methods. Technical factors affecting image quality, artifact, recognition and reduction, quality control and patient doses will be discussed. Multi-slice technology will have particular emphasis, and 3D applications, CT angiography, CT fluoroscopy and other advanced applications will be presented. Radiology and contrast agents will also be included in this course. Prerequisite: Acceptance into CT Certificate Program.
CUL-101 Culinary Arts Seminar: If You Can’t Stand the Heat 3 Credits
This course introduces students to the challenges and responsibilities encountered by culinary arts students. It provides students with an in depth knowledge of the options available within the culinary arts industry. The course prepares students with skills necessary to prepare a resume, gain interview skills and become familiar with all of the resources that the college has to offer. Topics covered will include: preparing for a career in the food service field, resume preparation, career options and specific skills necessary to create a successful resume, and discovering the best use of resources available to students at BHCC. For Culinary Arts students only.

CUL-108 Basic Baking Skills 4 Credits
This course will teach the fundamentals of bakeshop production. It will introduce the student to a variety of baking techniques and skills. Emphasis will be placed on the different skills needed for immediate employment in the pastry field. Students will be introduced to the math skills necessary to understand the weights and measures, as well as to comprehend conversion skills. Students will become competent in the basics of yeast bread production, quick breads, and basic dessert production. Additional expenses may include supplies, equipment, and/or uniforms.

CUL-111 Food Service Sanitation and Skills 3 Credits
Food Service Sanitation is an introduction to food production practices governed by changing federal and local regulations. Topics to be covered include prevention of food-borne illness through proper handling of potentially hazardous foods, HACCP procedures, legal guidelines, kitchen safety, facility sanitation, and guidelines for safe food preparation, storing, and reheating. Students will also take the National Restaurant Association ServSafe examination.

CUL-113 How Baking Works: the Science of Baking 3 Credits
This course explores the theory and science of baking. Students will learn how different ingredients affect a baked product. Students will explore the changes that take place during the baking process, using recipes and formulas as experiments, and will discuss these outcomes. This course is taught in the bakeshop. Additional expenses may include supplies, equipment, and/or uniforms.

CUL-115 Introduction to Culinary Arts 4 Credits
This course introduces students to the theory behind cooking. The class covers the history of cuisine as well as the terminology, equipment use, cooking techniques, and ordering and receiving procedures. The course also emphasizes the techniques and skills needed to work in a commercial kitchen. The course introduces students to basic menu and food presentation. Students become proficient in the use of tools and equipment. Additional expenses may include supplies, equipment, and/or uniforms. Corequisite: Principles of Baking (CUL125). This course is for Culinary Arts students only or by permission of the department chairperson.

CUL-116 Basic Culinary Skills 4 Credits
This course will provide students with the knowledge in the use of tools, equipment, and knives while learning basic skills and procedures related to the preparation of food and cooking procedures. Students will become familiar with spices, and ingredients and lean basic menu construction and presentation used in a professional food service facility. The course is designed to emphasize proper terminology, equipment use, cooking techniques, use of commercial equipment as well as professional tools. Students will learn correct knife skills and become proficient in their knife skills. Additional expenses may include supplies, equipment, and/or uniforms.

CUL-119 Cake Decorating 3 Credits
This course takes the student through the basics of cake decorating. The students will refine their cake decorating skills. The course introduces the students to the techniques used to decorate iced cakes, calligraphy, writing with chocolate and gels, as well as working with the different mediums used to decorate special occasion cakes. Students will learn the basic techniques used for royal icing, color flow and rolled fondant. Additional expenses may include supplies, equipment, and/or uniforms. Corequisite: Principles of Baking (CUL125). This course is for Culinary Arts students only or by permission of the department chairperson.

CUL-125 Principles of Baking 4 Credits
This production lab course covers the fundamentals of baking. It introduces students to the methods and procedures for producing a variety of baked goods, including yeast products, quick-breads, general desserts, and pastry products. Students follow a standard recipe, do basic conversions, and apply the fundamentals of math as they pertain to the food service industry. The course places emphasis on their knowledge of weights and measures. The course focuses on the bakeshop and receiving areas of the kitchen. Additional expenses may include supplies, equipment, and/or uniforms. Corequisite: Introduction to Culinary Arts (CUL115). This course is for Culinary Arts students only or by permission of the department chairperson.

CUL-127 Cafe and Bistro Cuisine 4 Credits
This seven-week course introduces students to the procedures of the art of Garde Manger and cold food preparation. The course covers the basic techniques of making cold appetizers and the chemistry of cooking. The course teaches students to become responsible for menu preparation and production of the daily meal in a cafe environment. The hands-on production lab teaches students to prepare various types of basic stocks, soups, sauces, salads, and sandwiches throughout the course. Additional expenses may include supplies, equipment, and/or uniforms. Prerequisites: Introduction to Culinary Arts (CUL115) and Principles of Baking (CUL125). Corequisite: Advanced Desserts and Pastries (CUL145).

CUL-145 Advanced Desserts and Pastries 4 Credits
This seven-week course takes students beyond the basics of pastry-making. Students learn basic cake decorating and advanced pastry production techniques. The course introduces students to the proper application of mixes, laminated dough, fillings, and choux pastries. Additional expenses may include supplies, equipment, and/or uniforms. Prerequisites: Introduction to Culinary Arts (CUL115) and Principles of Baking (CUL125). Corequisite: Cafe and Bistro Cuisine (CUL138).

CUL-208 Advanced Baking Skills 4 Credits
This course will teach advanced pastry production techniques. Students will be instructed in the application of ings, filings, laminated dough, and yeast products. Students will learn the various techniques used for artisan bread production, as well as laminated dough and their uses. Students will learn and practice basic cake decorating techniques. An introduction to some European pastries will be taught. An emphasis will be placed on timing and execution of the various pastry products, as required in a professional pasty shop. Additional expenses may include supplies, equipment, and/or uniforms. Prerequisites: Basic Baking Skills (CUL108) and Basic Culinary Skills (CUL116).

CUL-211 Menu Design and Purchasing 3 Credits
This course introduces students to various menu types and costing of menu items. Students also learn the skills necessary to purchase all food items, properly receive and store those items, conduct yield tests and become familiar with the "NAMP" grading and cutting procedures. The course emphasizes the math skills used to calculate food and beverage cost percentages.

CUL-215 Essentials of Food Production 4 Credits
This course goes beyond the basics of food production. The course introduces students to production and service of menus involving all aspects of cooking techniques as well as skills needed to execute service properly. It introduces students to various cooking techniques in an actual restaurant setting with emphasis on the timing and skills necessary to perform these tasks. Faculty demonstrates food-garminishing techniques. Additional expenses may include supplies,
**Culinary Arts**

**ECE-101 Guidance and Discipline**

This course covers the study of effective communication in guiding behavior. The course emphasizes techniques that help children build positive self-concepts and individual strengths within the context of appropriate limits and discipline. Prerequisite: Child Growth/Development (ECE103).

**ECE-103 Child Growth and Development**

This course covers the normal development of children through the age of twelve with emphasis on the physical, cognitive, social, and emotional components of development of the infant, toddler, preschool, and school age child. The course meets Department of Early Education and Care guidelines for child growth and development. Prerequisites: Grade of C or better in Academic Reading III (ESL098) or Reading Skills II (RDG095) and Writing Skills II (ENG 095) or exemption from reading and writing requirements by placement testing.

**ECE-104 Curriculum in Early Childhood Education**

This course is the study of early childhood education programs with emphasis on curriculum development in areas such as art, music, science, literature, math, language arts, and dramatic play. Prerequisite: Child Growth/Development (ECE103).

**ECE-106 Program Environments**

This course covers the study of setting up and maintaining a program environment with emphasis on health and safety concerns, nutritional considerations, space utilization, equipment needs and material usage. Prerequisites: Grade of C or better in Academic Reading III (ESL098) or Reading Skills II (RDG095) and Writing Skills II (ENG 095) or exemption from reading and writing requirements by placement testing.

**ECE-108 Infant/Toddler Curriculum Development**

This course is the study of the aspects of planning and implementing group care for infants and toddlers, including developmental issues, routines and transitions in care-giving, curriculum activities, environmental designs, equipment and materials, guiding behavior including limit setting and developing security through behavioral management, and working with parents.
course meets Department of Early Education and Care requirements for Infant/Toddler Lead Teacher certification. Prerequisites: Child Growth/Development (ECE103) and a grade of C or better in Academic Reading III (ESL098) or Reading Skills II (RDG093) and Writing Skills II (ENG 095) or exemption from reading and writing requirements by placement testing.

ECE-151
Respecting the Infant-Toddler Child
1 Credit
This course will explore the importance of building positive relationships with infants and toddlers through responsive, respectful and reciprocal interactions that follow developmentally appropriate best practices and extend the infant and toddler’s learning. Prerequisite: Grade of C or better in Child Growth and Development (ECE103) or equivalent.

ECE-152
Language and Infant-Toddler
Why and How?
1 Credit
This course focuses on the development of language for infants and toddlers, how the brain growth plays an important role in language and how to help children move towards their potentials for optimal growth and development. Students will learn the reasons why this is so critical and how to engage children with language before they can even talk. Prerequisite: Grade of C or better in Child Growth and Development (ECE103) or equivalent.

ECE-153
Expanding the Infant/Toddler Connections
1 Credit
This course addresses the capacity for the rapid learning by the infant-toddler child and explores how this growth is enhanced through daily experiences and supportive relationships. Students will learn ways to expand these connections and to nurture the infant-toddler through curriculum and supportive relationships. Prerequisite: Grade of C or better in Child Growth and Development (ECE103) or equivalent.

ECE-154
Supervision for Team Building
1 Credit
Early care and education teachers must work closely with each other to meet the demanding needs of young children. Learn ways to build teams from diverse groups of teachers and help them work smoothly together toward shared goals. It is recommended that students be Lead Teacher certified by Department of Early Education and Care before enrolling in course. Prerequisite: Grade of C or better in Child Growth and Development (ECE103) or equivalent.

ECE-155
Trouble in the House: Handling Conflict In Supervision
1 Credit
Early care and education teachers have to serve the needs of many: children, parents, other teachers and staff, and supervisors. Yet, these caring people are often uncomfortable with conflict and handle the demands of conflict resolution poorly, causing more problems than are solved. This module will provide real ways to tackle these problems and build stronger teams through positive conflict resolution. It is recommended that students be Lead Teacher certified by Department of Early Education and Care before enrolling in course. Prerequisite: Grade of C or better in Child Growth and Development (ECE103) or equivalent.

ECE-156
Helping Adult Learners Move Forward
1 Credit
The early care and education teacher is an adult learner with his her own personal and professional goals. This module explores the ways for supervisors to help their teachers to grow and develop to meet their goals while strengthening the program at the same time. It is recommended that students be Lead Teacher certified by Department of Early Education and Care before enrolling in course. Prerequisite: Grade of C or better in Child Growth and Development (ECE103) or equivalent.

ECE-157
What/How of Emergent Curriculum and the Project Approach of ECE
1 Credit
Emergent curriculum and the project approach go beyond the traditional way of planning program activities and curriculum for young children in the classroom. Using the newest understandings to incorporate children’s interests into program curriculum, this module examines the what’s and how’s of emergent curriculum. Recommended: Curriculum in Early Childhood Education (ECE104) prior to enrolling in course. Prerequisite: Grade of C or better in Child Growth and Development (ECE103) or equivalent.

ECE-158
Project Planning Emergent
1 Credit
Figuring out children’s interests requires observation and reflection. Teachers must be attentive to what is happening around children and what they are excited by, frightened of, and curious about. Where to begin the project approach is all about the skills of observing the children around the classroom. Recommended: Curriculum in Early Childhood Education (ECE104) prior to enrolling in course. Prerequisite: Grade of C or better in Child Growth and Development (ECE103) or equivalent.

ECE-159
Project Planning- Pushing Beyond Beginnings
1 Credit
Considering how long a project should last is tricky. How to keep the children interested and how to end the project are also essential ingredients of a successful project. How does a classroom document the learning that children have obtained? Prerequisite: Curriculum in Early Childhood Education (ECE104) prior to enrolling in course. Prerequisite: Grade of C or better in Child Growth and Development (ECE103) or equivalent.

ECE-160
Language and Literacy: Why so Important?
1 Credit
Language development is a critical skill needed by every young child. This module will look at the emergence of Language skills, brain development and the need for stimulation from the people and environments interacting with the child. Ways to evaluate the needs of young Children and counter challenges with strong literacy environments will be addressed. Prerequisite: Students must have a grade of C or better in Child Growth and Development (ECE103) or equivalent prior to enrolling in the courses in this series. Recommended: Curriculum in Early Childhood Education (ECE104) prior to taking these courses for better understanding of material.

ECE-161
Reading, Writing, Listening, Speaking – Pushing it Beyond the Basics
1 Credit
Language Development begins with listening skills and moves through speaking, pre reading and pre writing skills. This module will consider these areas of need and ways to help children grow and develop in their skills in all areas. Prerequisite: Students must have a grade of C or better in Child Growth & Development (ECE103) or equivalent prior to enrolling in the courses in this series. Recommended: Curriculum in Early Childhood Education (ECE104) Prior to taking these courses for better understanding of material.

ECE-162
Dual Language Learners: the Challenges
1 Credit
Because language development is so critical to growth and development of the young child, those children who are dual language learners need particular attention to help them reach their potential for strong development in all areas. Ways to address these concerns in the classroom will be a focus. Prerequisite: Students must have a grade of C or better in Child Growth and Development (ECE103) or equivalent prior to enrolling in the courses in this series. Recommended: Curriculum in Early Childhood Education (ECE104) Prior to taking these courses for better understanding of material.

ECE-163
Science and Nature with Young Children In Supervision
1 Credit
Through environmental education children experience a growing awareness about nature and the earth. The modules in this course study the importance of this learning in nature through play and exploration during the early childhood years. Using science concepts and learning with emphasis on curriculum development for young children, the modules will incorporate science into outdoor play to allow for meaningful experiences of every young child. Prerequisite: Grade of C or better in Child Growth and Development (ECE103). Recommended: ECE 104 prior to taking these courses for better understanding of material.

ECE-164
Using Nature and Science to Plan In Supervision
1 Credit
Science seems scary and foreign to many teachers and children. Figuring out what to do and how to understand ways to pique children’s interests requires observation and reflection. Teachers must be attentive to what is happening around children and what they are excited by, frightened of, and curious about. Where to begin with nature study and science learning is all about the skills of observing the children around the classroom. Prerequisite: Grade of C or better in Child Growth and Development (ECE103) or equivalent. Recommended: Curriculum in ECE (ECE104) prior to taking these courses for better understanding of material.

ECE-165
Pushing the Plan Beyond the Simple In Supervision
1 Credit
Considering what projects to plan and how long a project should last is tricky. How to keep the children interested and how to develop the project are also essential ingredients of a successful project. How do we help children document their ideas and go beyond the simple plans to more complex thinking and activity? Prerequisite(s). Grade of C or better in Child Growth and Development (ECE103)
Economics

or equivalent. Recommended: Curriculum in ECE (ECE104) prior to taking these courses for better understanding of material.

ECE-166
The Law, the Realities, Identification and Care
1 Credit
Children with special needs, diverse abilities and atypical behavior require additional consideration when including them into traditional and typical classrooms. The law is clearly stated as to what is required for children to be included as they move to public school. But, what is the responsibility of those in programs for younger children? How does the teacher meet these requirements and help with identification and care of all children? Prerequisite: Grade of C or better in Child Growth and Development (ECE103). Recommended: Young Children with Special Needs (ECE211) prior to taking these courses for better understanding of material.

ECE-167
Observations and then Curriculum Considerations
1 Credit
Figuring out children's needs and the ways in which they learn requires observation and reflection. Teachers must be attentive to what is happening around children and what they are excited by, frightened of, and curious about. Parents and family members must be consulted to see how to best meet the needs of all children. Prerequisite: Grade of C or better in Child Growth and Development (ECE103). Recommended: Young Children with Special Needs (ECE211) prior to taking these courses for better understanding of material.

ECE-168
Observations and then Relational Connections
1 Credit
Children with special needs have social and emotional needs just like all other children. Their needs for relational skill development are sometimes quite challenging. How do we handle this in our classrooms? How to help other children to be accepting and helpful? Prerequisite: Grade of C or better in Child Growth and Development (ECE103). Recommended: Young Children with Special Needs (ECE211) prior to taking these courses for better understanding of material.

ECE-202
Issues in Early Childhood Education
3 Credits
(Formerly ECE102) This course is a study of early childhood education programs. The course includes the history of childcare, regulation, types of programs, and current trends and issues in early care and education. The needs of children and families and components of quality programs with emphasis on social, political, and economic influences on professional issues and career opportunities in the field are covered. Prerequisites: Grade of C or better in Academic Reading III (ESL098) or Reading Skills II (RDG095) and Writing Skills II (ENG 095) or exemption from reading and writing requirements by placement testing.

ECE-207
Literacy Development and Learning for Children
3 Credits
(Formerly ECE107) This course is a study of concept development and learning in early childhood education programs and curriculum development in the area of literacy development for young children. Prerequisites: Child Growth/Development (ECE103) or its equivalent and Curriculum in Early Childhood Education (ECE104) or Child Growth/Development (ECE103) and Introduction and Foundations of Education (EDU101).

ECE-209
Math Concepts and Learning for Children
3 Credits
(Formerly ECE109) This course is a study of concept development and learning in early childhood education programs with emphasis on curriculum development in the area of math for young children. Prerequisite: Child Growth & Development (ECE103) (or its equivalent) and Curriculum in Early Childhood Education (ECE104) or Child Growth & Development (ECE103) and Introduction and Foundations of Education (EDU101).

ECE-210
Science Concepts and Learning for Children
3 Credits
This course is a study of concept development and learning in early childhood education programs with emphasis on curriculum development in the area of science for young children. Prerequisites: Child Growth & Development (ECE103) and Curriculum in Early Childhood Education (ECE104) or Child Growth & Development (ECE103) and Introduction and Foundations of Education (EDU101).

ECE-211
Young Children With Special Needs
3 Credits
(Formerly ECE111) This course covers the study of children with physical, social, emotional and/or cognitive disabilities with emphasis on techniques for mainstreaming and inclusion of these children into existing early childhood programs. Prerequisites: Child Growth/Development (ECE103) plus three (3) ECE or EDU courses.

ECE-212
Families/Community in Early Childhood Ed
3 Credits
(Formerly ECE212) This course is the study of the relationship of parents and communities to early childhood programs. The course emphasizes parental needs for early care and education, parenting skills and need for communication with parents, challenges of dealing with diverse populations and multiple family structures using an anti-bias approach which respects diversity and encourages collaborative efforts in caring for children. Prerequisites: Child Growth/Development (ECE103) plus three (3) ECE or EDU courses.

ECE-213
Child Care Administration I
3 Credits
(Formerly ECE213) This course covers the study of program management in early childhood education, including planning, implementing, and evaluating programs. The course emphasizes financial, legal, personnel, and program aspects of program administration. It meets Department of Care and Education and Certification requirement. Prerequisite: Lead teacher qualifications or permission of department chair prior to enrollment.

ECE-215
Supervision in Early Childhood Education
3 Credits
This course covers the study of child-care management with an emphasis on staffing and personnel functions within an early care and education programs. Areas of study include organizational development, staffing, personnel practices, leadership, and mentoring. The course meets Department of Early Education and Care Director II certification requirements. Prerequisite: Lead teacher qualifications or Chair approval prior to enrollment.

ECE-217
Observation/Recording Behavior
3 Credits
(Formerly ECE117) This course is the study of observing and recording behavior of children with emphasis on child study in all areas of development using a variety of observational tools and recording techniques with children from birth to age twelve. Prerequisite: Child Growth/Development (ECE103).

ECE-220
Practicum in Early Childhood Education I
3 Credits
(Formerly ECE120) This practicum experience in an early childhood setting must be completed during the final two semesters of study. The department assigns and/or approves student placement settings. Students must make application for placement and enrollment one semester prior to registration. Acceptance into the Early Childhood Development program does not assure permission to enroll in the course or a placement assignment. For complete course requirements and application procedures, contact the department chair. The course is graded on a pass-fail scale. The course is open only to students matriculated in the Associate in Science Degree: Early Childhood Concentration. Prerequisite: Permission of department chair.

ECE-221
Practicum/Early Childhood Education II
3 Credits
(Formerly ECE121) This practicum experience in an early childhood setting must be completed during the final two semesters of study. The department assigns and/or approves student placement settings. Students must make application for placement and enrollment one semester prior to registration. Acceptance into the Early Childhood Development program does not assure permission to enroll in the course or a placement assignment. For complete course requirements and application procedures, contact the department chair. The course is graded on a pass-fail scale. The course is open only to students matriculated in the Associate in Science Degree: Early Childhood Development Program. Prerequisite: Permission of department chair.

ECE-223
CDA Professional Portfolio
3 Credits
The Child Development Association National Credentialing Program (CDA) will assist each student in developing their reflective Professional Portfolio as it relates to the 13 functional areas required by CDA and specific to the early childhood program in which the student is employed (family child care, infant/toddler or preschool care). This course is designed to expand the scope and level of each student's work capability as they develop their competency in these 13 functional areas. Each area will require the development of evidence to show competency through the preparation of a portfolio used for earning their CDA credential. Students will be eligible to apply for the CDA once completing all the requirements of the Council on Professional Recognition. Note: An application and credentialing fee is required by the council and will be the student's responsibility. For information about the CDA process visit the CDA website at www.cdacouncil.org. Prerequisites: Admission to the Early Childhood Development Certificate with Child Development Associate Credential and ECE101, 103, 104, 106, and ENG111 plus a Learning Community Seminar. (These are the course requirements for completion of the Early Childhood Development Certificate).
Emergency Studies

EMS-205 Principles of Paramedicine I 10 Credits
This course is the first of nine courses designed for Emergency Medical Technicians, Basic or Advanced, with at least one year of experience desiring to obtain Paramedic Certification/Licensure. Areas of study will include, Introduction to Advanced Pre-hospital Care, Well Being of the Paramedic, EMS Systems, Roles and Responsibilities, Illness and Injury Prevention, Stress Management, Anatomy & Physiology, Documentation, Communications, Therapeutic Communications, Medical/Legal Aspects and Ethical Considerations, Basic and Advanced Airway Management & Ventilation, Wave Form Capnography, Patient Assessment, Trauma & Medical Physical Exam Techniques, Obstetric & Gynecological Emergencies, Pathophysiology of Shock and Intraoperative Access and Mathematics for Medications. Students will demonstrate knowledge and perform manipulative skills under the supervision of the course instructor, program director, medical director, and/or skilled preceptor. The student must demonstrate current licensure/certification as an Emergency Medical Technician (EMT). Adherence to the attendance policy and a minimum final course grade of B- must be achieved in order to advance in the program. Prerequisites: Human Biology/Lab (BIO108) or equivalent and College Writing I (ENG111). Corequisite: Paramedic Clinical Rotation I (EMS209).

EMS-206 Principles of Paramedicine II 4 Credits
This course builds upon the knowledge and skills learned in Principles of Paramedicine I. Topic: Pharmacology. The course presents an introduction to the fundamental principles of basic and clinical pharmacology at the molecular level, cellular, organ and whole body levels. It will cover the biochemical and physiological basis for drug actions and affects, therapeutic uses and adverse reactions with emphasis on autonomic nervous system pharmacology. Drug classifications, methods of administration, and aspects of patient education are discussed. Drug calculations, memorization of specific emergency drugs are expected. Student will demonstrate knowledge and perform manipulative skills under the supervision of the course instructor, program director, medical director, and/or skilled preceptor. Adherence to the attendance policy and minimum final course grade of B- must be achieved in order to advance in the program. Prerequisites: Principles of Paramedicine I (EMS205) and Paramedic Clinical Rotation I (EMS214). Corequisite: Paramedic Clinical Rotation II (EMS215).

EMS-207 Principles of Paramedicine III 4 Credits
This course builds upon the knowledge and skills learned in Principles of Paramedicine I & II. Topic: Cardiology. This course reviews the anatomy & physiology of the cardiovascular system and introduces cardiovascular electrophysiology, electrocardiographic monitoring, rhythm analysis, 12-lead electrocardiogram morphology and interpretation, assessment of the cardiovascular patient, pathophysiology of cardiovascular disease and techniques including appropriate pharmacologic agents, electrical therapy, and the American Heart Association, Advanced Life Support (ACLS) certification. Students will demonstrate knowledge and perform manipulative skills under the supervision of the course instructor, program director, medical director, and/or skilled preceptor. Adherence to the attendance policy and minimum final course grade
of B- must be achieved in order to advance in the program. Prerequisites: Principles of Paramedicine II (EMS206) and Paramedic Clinical Rotation II (EMS215). Corequisite: Paramedic Clinical Rotation III (EMS216).

EMS-208 Principles of Paramedicine IV 10 Credits
This course builds upon the knowledge and skills learned in Principles of Paramedicine I, II, & III. Topics: Management of Medical Emergencies, Assessment of the Pediatric Patient, American Heart Association, Pediatric Life Support (PALS) certification, Assessment of the Geriatric Patient, International Trauma Life Support (ITLS) certification, Hazardous Materials incidents, Responding to Terrorist Attacks, Rescue Awareness, Medical Incident Command, Abuse & Assault, Crime Scene Response, EMS Risk Management, Ambulance Operations and Acute Interventions for Chronic Care Patients. Students will demonstrate knowledge of and perform manipulative skills under the supervision of the course instructor, program director, or skills preceptor. Adherence to the attendance policy and a minimum final course grade of B- must be achieved in order to advance in the program. Prerequisites: Principles of Paramedicine III (EMS207) and Paramedic Clinical Rotation III (EMS216). Corequisite: Paramedic Clinical Rotation IV (EMS217).

EMS-214 Paramedic Clinical Rotation I 3 Credits
Work-based learning experience conducted in a hospital/clinical setting that enables the paramedic student to apply specialized occupational theory, concepts, and skills learned in Principles of Paramedicine I (EMS201). Students will complete a minimum of 150 hours in this clinical practicum. Students will integrate instruction with clinical experience under the supervision of a preceptor. Clinical rotations will be conducted in a variety of medical-related facilities to include, emergency divisions, respiratory therapy, anesthesia, surgical units, and labor and delivery. Students will be required to document all clinical time and complete required program requirements for patient assessments, intubations, medication administrations, IV Bolus, infusions, live births, and cannulations. Adherence to the program requirements, attendance policy, and receipt of satisfactory clinical evaluations must be achieved in order to advance in the program. Students are required to take and pass a terminal skill competency practical conducted by the Program Director and/or the medical director. Prerequisites: Principles of Paramedicine I (EMS205), Principles of Paramedicine II (EMS206), and Principles of Paramedicine III (EMS207). Corequisite: Principles of Paramedicine I (EMS205).

EMS-217 Paramedic Clinical Rotation IV 3 Credits
This course is a continuation of Paramedic Clinical Rotation III (EMS216). It is a work-based learning experience conducted in a hospital/clinical setting that enables the paramedic student to apply specialized occupational theory, concepts, and learning skills in Principles of Paramedicine I (EMS205), Principles of Paramedicine III (EMS206), and Principles of Paramedicine IV (EMS208). Students will complete 150 hours in this clinical practicum. Students will be required to document all clinical time and complete program requirements for ECG interpretations including 12 lead, Advanced Cardiac Life Support (ACLS), patient assessments in pediatric, geriatrics. Adherence to the program requirements, attendance policy, and receipt of satisfactory clinical evaluations must be achieved in order to advance in the program. Students are required to take and pass a terminal skill competency practical conducted by the Program Director and/or the medical director. Prerequisites: Principles of Paramedicine II (EMS206) and Paramedic Clinical Rotation II (EMS215). Corequisite: Principles of Paramedicine III (EMS207).

EMS-218 Paramedic Field Internship 3 Credits
Students will apply theory and acquired clinical skills while performing pre-hospital treatment under the supervision of experienced, certified paramedics. Upon successful completion of the course, students will have a working knowledge of and become competent in paramedic skills, hospital/clinical operations and requisite field experience. At the conclusion of the course, students will have a terminal competency assessment which will be conducted by the program coordinator and/or medical director. Students will complete a minimum of 100 hours during this internship. Students must meet the minimum patient contacts set forth by the Massachusetts Office of Emergency Medical Services and/or the Committee on Accreditation of Education Programs for the Emergency Medical Services Professionals (CAEMS). Adherence to the program requirements, attendance policy, and receipt of satisfactory field internship evaluations, and a final overall course grade of B- must be achieved in order to begin eligibility to sit for the National Registry of Emergency Medical Technicians, Paramedic written and practical exam. Prerequisites: Principles of Paramedicine IV (EMS208), Paramedic Clinical Rotation IV (EMS217), and permission of the Paramedic program director and/or medical director.

Emergency Medical Technician

EMT-103 Emergency Medical Technician 7 Credits
This course covers the rendering of emergency care to the sick and injured promptly and efficiently. Prerequisite: to the EMT-B natural science curriculum, as adopted by the Commonwealth of Massachusetts, and is a prerequisite for taking the state EMT Exam. Students are responsible for taking the certification examination for EMT. Additional expenses may include supplies, equipment, and/or uniforms.

English
ENG-090 Writing Skills I 3 Credits
The first part of a two-semester basic writing sequence, this course develops writing skills needed to begin work in the College Writing program. The course places primary emphasis on the development of good sentence writing skills through frequent practice. Such practice may take the form of writing journals, paragraphs, and short essays. Faculty provide attention to difficult concepts, grammar, punctuation, and spelling primarily on an individual basis. The course does not satisfy any part of the College Writing requirement for graduation. Placement is determined by assessment testing or faculty referral. Upon completion of Writing Skills I (ENG090) with a grade of C or better, students enroll in Writing Skills II (ENG095).

ENG-095 Writing Skills II 3 Credits
This course develops language skills needed to communicate effectively in college study, in the professions, and in the business world. The course includes sentence formation, applied grammar, spelling, mechanics, and paragraph development. Note: Students must pass the Basic Writing Competency Exam in order to receive a passing grade for this course. The course does not satisfy the college writing requirement for graduation. Prerequisite: Grade of C or better in Writing Skills I (ENG095) or placement.

ENG-111 College Writing I 3 Credits
This course emphasizes writing as a process, from planning and drafting through revising and editing. Using personal experience, readings, and other sources, students write unified, coherent, well-developed essays and practice paraphrasing, summarizing, and using sources responsibly. To
be eligible to take College Writing II (ENG112), students must pass the College Writing Exam and earn a grade of C or better for this course. The course meets General Education College Writing Requirement Area 1. Prerequisite: Grade of C or better in Writing Skills II (ENG095) and Academic Reading III (ESL098) or Reading Skills II (RDG095) or placement.

ENG-112
College Writing II
3 Credits
This course focuses on the research paper, the longer essay, argumentation, critical writing, and reading. The course meets General Education College Writing Requirement Area 1. Prerequisite: Grade of C or better in College Writing I (ENG111).

ENG-115
Writing Tutor Seminar
3 Credits
This course prepares skilled writing students to work as peer tutors in the college's Writing Place. It provides advanced instruction in grammar and composition, with special emphasis on the writing process. Through the weekly seminar and tutoring sessions, students develop teaching strategies, problem-solving skills, and greater understanding of composition theory and practice. Prerequisite: Permission of the instructor.

ENG-171
Oral Communication
3 Credits
This course develops students' pose and self-confidence through oral expression. The course emphasizes presentation of individual talks and participation in class discussions.

ENG-203
Creative Writing Workshop
3 Credits
This course introduces students to the writing of poetry, short stories, plays, and autobiographies. The course includes some model readings, but the main work is student writings in all four genres. Prerequisite: Writing Skills II (ENG095) or placement in College Writing I (ENG111).

ENG-241
Journalism I
3 Credits
This course combines class discussions of journalistic principles with practice in writing news stories. The course then shifts emphasis to field work for a newspaper. In this phase, students follow news leads, evaluate them, compose better ones, and check copy for accuracy and clarity. The course encourages students to proofread, edit, sell ads, and lay out final copy for the printer. Prerequisite: Writing Skills II (ENG095).

ENG-242
Journalism II
3 Credits
This course combines class discussions of journalistic principles with practice in writing news stories. The course then shifts emphasis to field work for the student newspaper, The Third Rail, or another newspaper. In this phase, students follow news leads, evaluate them, compose better ones, and check copy for accuracy and clarity. The course encourages students to proofread, edit, sell ads, and lay out final copy for the printer. Prerequisite: Writing Skills II (ENG095).

Engineering

ENR-101
Introduction to Engineering/Lab
4 Credits
This course provides an overview of the engineering profession. Topics to be discussed include fields of study within engineering; the engineering profession, including engineering ethics; and engineering design and problem-solving. Emphasis is on team-building and teamwork approach to engineering projects. Course meets 3 hrs. lecture - 3 hrs. lab. Prerequisite: Grade of C or better in College Algebra for STEM (MAT194).

ENR-103
Fundamentals of Computer-Aided Drawing And Design
3 Credits
This course will introduce students to the use of computer software for creating engineering drawings and developing engineering design and design models. Students will use the AUTOCAD software package as they learn standard views and dimensions for engineering drawings, replicate standard geometrical models, and create models and drawings for selected 2D and 3D engineering designs and projects. Pre/corequisite: Intro to Engineering (ENR101).

ENR-260
Engineering Statics
3 Credits
This course will apply the laws of Newtonian mechanics to help students attain the basic engineering science concepts that serve as the building block for further courses in engineering analysis and design. The course develops the equations of mechanics to the general engineering sciences, including solid, fluid mechanics, and materials, thereby contributing to the success of students as practicing engineers after graduation. Course meets: 3 hrs lecture. Prerequisite: Grade of C or better in College Physics I/Lab (PHY251). Pre/corequisite: Grade of C or better in Calculus II (MAT282).

ENR-265
Engineering Dynamics
3 Credits
The course covers Kinematics and Kinetics of particles and rigid bodies, with the application of Newton's Second Law and the principles of work-energy and impulse. The course enables students to distinguish statics problems from dynamics problems and to identify inertial effects. The course also enables students who are interested in Engineering Mechanics or related disciplines to comprehend the vast applications of the principles of dynamics ranging from structural design of vehicles, electro-mechanical devices such as motors and moveable tools, biomedical devices such as artificial heart and bladder, to predictions of the motions of satellites, spacecraft, etc. Course meets 3 hrs lecture. Prerequisite: Grade of C or better in Engineering Statics (ENR260). Corequisite: Ordinary Differential Equations (MAT285).

ENR-270
Strength of Materials
3 Credits
The course extends the equilibrium analysis covered in statics to deformable bodies, especially to various members that make up structures and machines. Students will learn the three fundamental concepts in this course, i.e. Equilibrium, Force-Temperature-Deformation Behavior of Materials, and Geometry of Deformation. The course includes the following concepts: stress and strain, stress transformation, temperature stresses, stress and deformation in bodies under axial, shearing, flexural, torsional and combined loadings, shear and bending moment diagrams, and Euler's columns. Course meets: 3 hrs lecture. Prerequisite: Grade of C or better in Engineering Statics (ENR260). Corequisite: Ordinary Differential Equations (MAT285).

Environmental Science

ENV-105
Environmental Science I/Lab
4 Credits
This course covers an introduction to the physical and biological structure of the natural environment within a global perspective. The course emphasizes both a local and global perspective on the study of natural systems and the role of science and technology in society on these systems. Topics include: ecosystem dynamics, international conservation biology, biodiversity, evolution and adaptation, population dynamics, climate, and the role of science and technology in business and society, and sustaining ecosystems and wildlife. Laboratory investigations develop critical thinking and formal report writing skills. The department recommends this course for A.S. degree students as the General Education Science and Technology Requirement Area 5. Course meets 3 hrs. lecture, 1.5 hrs. lab. Prerequisites: Writing Skills II (ENG095), a grade of C or better in Foundations of Mathematics (MAT093), and Reading Skills II (RDG095) or placement.

ENV-106
Environmental Science II/Lab
4 Credits
This course examines the global and local impact of human culture upon the natural systems. Students investigate both destructive and constructive elements of human action within the natural environment. Also, students learn the role of science and technology in business and society. Topics include: air and water pollution; toxicity; ozone depletion; global warming; hazardous waste; the role of science and technology in business and society; and renewable and nonrenewable energy resources. Laboratory investigations develop students' critical thinking skills and formal report writing skills. Course meets 3 hrs. lecture, 1.5 hrs. lab. Prerequisites: Writing Skills II (ENG095), a grade of C or better in Foundations of Math (MAT093) or placement and Academic Reading III (ESL098) or Reading Skills II (RDG095), or placement.

ENV-110
Sustainable Resource Conservation
4 Credits
This course is an introduction to fundamental concepts of sustainability and resource conservation as related to environmental policy and environmental management. Through lectures, laboratories, and dialogue, students develop literacy in sustainability topics including environmental values and ethics; natural resource economics; environmental policies and regulations; sustainability management; sustainable development; ecosystem resources and management, biodiversity and wildlife conservation; forest and soil conservation, water conservation and quality, air quality, climate change and climate actions planning. This course meets the General Education Requirement Area 5. Course meets 3 hours lecture; 1.5 hours lab. Prerequisites: Writing Skills II (ENG095), Foundations of Math (MAT093), and Reading Skills II (RDG095) or placement.

ENV-111
Survey of Renewable Energy
4 Credits
This course investigates the potential of renewable energy technologies to help solve environmental and economic problems within society. Areas of investigation include solar energy, wind power, hydropower, geothermal, fuel cells, biomass, ocean wave power, and alternative transportation options. Also addressed are conventional energy sources including oil, coal, natural gas, and nuclear energy. Consideration will be given to related issues such as costs, externalities, system efficiencies, emissions and other environmental impacts, financing.
English as a Second Language

Incentives, and the regulatory and market forces impacting the alternative energy industry. Students will learn how to assess the viability of incorporating renewable technology, such as solar or wind power, for residential and commercial applications. Course meets 3 hours lecture; 1.5 hours lab. This course meets General Education Science and Technology Area 5 requirement. Prerequisites: Foundations of Mathematics (MAT093), Writing Skills II (ENG095), Reading Skills II (RDG095) or placement equivalency.

ENV-113
Introduction to Oceanoigraphy/Lab
(4 Credits)
This course integrates the physical, chemical, geological, and biological characteristics of the world's oceans with emphasis on the New England coast and Boston Harbor. Topics include plate tectonics and evolution of ocean basins, ocean sediments, coastal processes and landforms, physical and chemical properties of sea-water, atmospheric and oceanic circulation, the origins and dynamics of waves and tides, the coastal ocean, marine life, ocean productivity and resources, marine environmental concerns, marine policy and cutting-edge marine technologies. Laboratory activities offer hands-on experiences about real-world oceanographic issues using oceanographic materials and techniques in both the laboratory and the field. Course meets 2.5 hours lecture; 1.5 hours lab. Prerequisites: Writing Skills II (ENG095), Foundations of Mathematics (MAT093), and Reading Skills II (RDG095) or placement.

ENV-115
Earth Science
(4 Credits)
A study of the materials, principles, and processes that define and govern the Earth system. This course covers the fundamentals of geology: rocks, minerals, the rock cycle, geologic time, plate tectonics, earthquakes, volcanoes, geologic structures, weathering and erosion, hydrologic cycle, groundwater, glaciers and geologic hazards. Laboratory activities include mineral and rock identification, geologic structure and landform identification, interpretation of geologic maps and cross-sections, field geology, and other fundamentals topics. Prerequisites: Writing Skills II (ENG095), a grade of C or better in Foundations of Mathematics (MAT093), and Reading Skills II (RDG095) or placement.

ENV-120
Tropical Field Studies
(4 Credits)
This course is an investigation of the ecology, conservation, and diversity of tropical ecosystems. As part of a study-abroad student team, students will learn and participate in scientific field research methods on location in a tropical country. By participating in field research and activities, students will also investigate the interrelationship of local culture, ecotourism, and conservation. Students will be required to complete a self-designed scientific field research project and participate in a community service project while in the country of study. Past studies have occurred in Costa Rica and Nicaragua but future trips are not limited to these two tropical countries. Course requires additional travel fees and purchase of personal field supplies. Course meets General Education Science and Technology Requirement Area 5. Study-Abroad scholarships are available for qualified students. Prerequisite: submission of study-abroad application and approval of the science and engineering department.

Electric Power Utility

EPU-101
DC Circuit Theory and Lab
(4 Credits)
This course provides an introduction to the nature of electricity in general, in-depth coverage of direct current electrical theory and laboratory practices. Topics covered include static electricity, the Bohr Atom, Ohm's Law, Kirchhoff's Law, network theorems, and magnetism. Course meets: 3 hrs. lecture; 3 hrs. lab. Prerequisite: Topics of Algebra/Trigonometry (MAT193) or may be taken concurrently.

EPU-104
AC Circuit Theory/Lab
(4 Credits)
This course provides in-depth coverage of alternating current electrical theory. Topics covered include inductance, transformers, capacitance, reactance, impedance, and resonance. The j-operator is employed. Course meets 3 hrs. lecture/3 hrs. lab. Prerequisite: DC Circuit Theory/Lab (ETT101).

EPU-151
Fundamentals of Single Phase and Polyphase Metering
(4 Credits)
This course introduces students to the fundamentals of Single Phase & Polyphase Metering, such as terminology and basic principles of meters. Students review basic math specific to metering, and gain knowledge of basic electricity and magnetism principles. Students will be introduced to meter testing equipment, meter diagrams and standards, and learn technical data and how to read watt-hour and demand meter schematics. They will also learn about power factor analyzers, high amperage current transformer cabinets, meter demand theory and demand registers. Students are introduced to various instrument transformers, their design, application and troubleshooting. They learn about high voltage metering equipment and how to safely install the equipment. In addition all students will learn how to connect electrical secondary services up to 600 volts from the pole to the house working off a ladder. Prerequisite: Admittance into the Electric Power Utility Program.

EPU-203
Intro to Underground Operations
(4 Credits)
This course introduces students to the basic operation of underground systems. Through classroom instruction and extensive hands-on experience, students will become familiar with the underground network electrical system and the various job responsibilities of underground personnel. Students will learn how to use the power formula to determine wire sizes. Correct manhole entry/exit procedures will be demonstrated. Underground safety issues including emergency rescue procedures will be covered. The sizing, installing and splicing of underground cables will be taught. An equipment orientation will be performed to provide students with a basic understanding of all underground apparatus/Note: This course covers many of the same topics as EPU153, Underground and Substation Operations, but in greater detail and with more depth and hands-on practice.) Prerequisite: Acceptance into Electric Power Utility Program General Worker Option.

EPU-207
Introduction to Overhead Linework
(4 Credits)
This course introduces students to the basic fundamentals of overhead linework, and installation techniques. During this intensive training period students will learn to become comfortable working with the tools and equipment used to build an overhead distribution system. Students will be introduced to and become familiar with important sections of Safety in the utility industry including the effects of electrical shock and burns. Basic hand tools will be assigned and students will learn how to care for and use the equipment. Students will also be trained in CPR- AED and OSHA 10. Students will be trained in the use of company derricks and buckets. For those students who express a desire to learn to climb utility poles, instruction will be provided. Prerequisite: Acceptance into the Electric Power Utility Program- General Worker Option.

EPU-251
Electric Power/Utility Tech Internship
(3 Credits)
This course will cover a variety of topics that consist of practical work experience in the EVERSOURCE workforce environment involving working on line trucks and learning and performing all of the tasks of an overhead line worker. The course will also cover the instruction and practical exercise of soft skills in today's work environment. Soft skills are those skills used every day in the workplace to assist in making assigned tasks easier to accomplish through teamwork and collaboration in a multi-cultural environment. Soft skills are increasingly being incorporated in job descriptions throughout the workforce as companies and institutions seek to employ students that have had successfully incorporated soft skills as part of their curriculum. Prerequisites: College Writing I (ENG111), Foundations of Single Phase and Polyphase Metering (EPU151), Underground & Substation Operations (EPU153), and Group Dynamics (PSY107).

EPU-257
Power and Distribution Systems
(3 Credits)
This course introduces the basic concepts of electrical power systems. Subject areas include on electrical power generation, transmission, and distribution. Distribution system layout, distribution transformers, transmission line design, and transmission and transmission line protection will also be covered. Prerequisite: AC Circuit Theory (EPU104).

ESL-074
Listening Comprehension and Discussions
(3 Credits)
In this low-intermediate course students develop academic listening skills and participate in small group and whole class discussions based on articles,
lectures, and multi-media sources. Students will learn grammar and vocabulary in the context of the materials used for listening, speaking, reading, and writing activities. Students must earn a C or better in order to pass the course. Prerequisite: Placement into ESL level I.

ESL-075 Grammar Structures and Editing 3 Credits
This low-intermediate course focuses on improving grammar and editing skills through weekly grammar lessons, writing assignments, class discussions and assessments. Students will develop their ability to compose grammatically correct and comprehensible sentences and short writings. Students receive individual feedback that targets their needs. Students must earn a C or better in order to pass the course. Prerequisite: Placement into ESL Level I.

ESL-078 Academic Reading I 3 Credits
In this low-intermediate course, students learn pre-reading skills, organizational styles, academic vocabulary, dictionary use, referents, critical reading, basic verb tenses and parts of speech, and how to summarize, paraphrase, and identify main ideas and supporting details. Students will learn to complete homework assignments in basic MLA format. Students must earn a C or better in order to pass the course. Prerequisite: Placement into ESL Level I.

ESL-079 Academic Writing I 3 Credits
In this low-intermediate course, students learn to write paragraphs and short essays through an academic writing process in a variety of rhetorical styles using basic MLA format. Student will write from personal experience and respond to reading by paraphrasing and quoting. Students will learn to write different sentence types, using coordinators and subordinators. Punctuation and grammar will be taught, and students will apply their knowledge by revising and editing their papers. Students must pass the ESL079 Writing Competency Exam and earn a C or better in order to pass the course. Prerequisite: Placement into ESL Level I.

ESL-083 Pronunciation for Academic and Professional Success 3 Credits
This course for non-native speakers of English focuses on the pronunciation, rhythm and intonation of the English language to enable clearer, more effective, and native-like pronunciation in English. The course is designed for students who have a least intermediate fluency in English, but who require considerable accent reduction for academic and professional purposes. Students may be required to complete assignments in the Language Lab. Prerequisites: placement in Academic ESL Level I or higher.

ESL-085 Intermediate Grammar and Editing 3 Credits
This course is an integrated skills course for intermediate ESL students and focuses on improving grammar and editing skills. Instruction focuses on clauses and sentence variety in paragraphs and essays. Students receive individual feedback that targets their needs. Students must earn a C or better in order to pass the course. Prerequisite: a grade of C or better in ESL075 or placement.

ESL-086 Academic Listening and Note-Taking 3 Credits
This high-intermediate course focuses on listening and note-taking skills. Students develop a system for note-taking and learn how to use their notes to answer comprehension questions as well as to complete writing assignments. All listening and note-taking activities include reading and writing exercises. Students learn grammar in the context of the materials used for listening activities and student generated writing. Students must earn a C or better in order to pass the course. Prerequisites: Grade of C or better in ESL074, ESL075, ESL078, and ESL079, or placement.

ESL-087 Contemporary Issues and Conversations 3 Credits
In this high-intermediate course, students practice and demonstrate effective speaking functions in small-group and whole-class discussions of academic reading materials. Students develop a method for delivering an oral presentation to a large group. All speaking activities are organized around reading and writing exercises. Students learn grammar and build their level-appropriate academic vocabulary in the context of speaking, in the context of the reading materials, and in the context of student generated writing. Students must earn a C or better in order to pass the course. Prerequisites: Grade of C or better in ESL074, ESL075, ESL078, and ESL079, or placement.

ESL-088 Academic Reading II 3 Credits
In this high-intermediate course, students increase their level-appropriate vocabulary and develop their reading skills and strategies as they analyze, discuss, and write about longer readings. Students are also introduced to critical thinking skills such as drawing inferences, understanding idioms and figures of speech, and recognizing purpose and perspective. Students learn grammar in the context of the reading materials and in student generated writing. Students must earn a C or better in order to pass the course. Prerequisites: Grade of C or better in ESL074, ESL075, ESL078, and ESL079, or placement.

ESL-089 Academic Writing II 3 Credits
In this high-intermediate course, students develop their writing skills with a focus on the process of college writing from planning and drafting to revising and editing. Students demonstrate their critical thinking skills by writing paragraphs and essays from their personal experience and from readings of moderate complexity. Students practice correct grammar and mechanics in the context of the readings and their own writing. Students must pass the ESL089 Writing Competency Exam and earn a grade of C or better in order to pass the course. Students must earn a C or better in order to pass the course. Prerequisites: Grade of C or better in ESL074, ESL075, ESL078, and ESL079, or placement.

ESL-095 Advanced Grammar and Editing 3 Credits
This course is for advanced ESL students and focuses on improving and refining grammar and editing skills. Students review points covered in lower-level grammar courses and further develop their ability to compose grammatically correct and comprehensible sentences, paragraphs, and essays. Topics include various clause types, conditionals, indirect speech, passive voice, and perfect modals. Students receive individual feedback that targets their needs. Students must earn a C or better in order to pass the course. Prerequisite: Grade of C or better in ESL085 or placement.

ESL-096 Lecture Comprehension and Academic Vocabulary 3 Credits
In this advanced course, students develop an academic note-taking system as they listen to lectures and authentic sources. Students practice using their notes to answer comprehension questions, write summaries of sources, and compose responses to critical thinking questions. Students learn advanced academic vocabulary and grammar in the context of advanced level readings, websites, and lectures. Students must earn a C or better in order to pass the course. Prerequisites: Grade of C or better in ESL086, ESL087, ESL088, and ESL089 or placement.

ESL-097 Academic Discussions and Presentations 3 Credits
This advanced course focuses on the communication skills necessary in an academic setting. Students develop and improve a method for delivering an oral presentation to a large group using effective delivery, visual aids, secondary sources, and level-appropriate academic vocabulary. Students practice comprehensible pronunciation along with stress and intonation patterns. All speaking activities are organized around academic reading materials which students will write about and discuss in small groups. Students must earn a C or better in order to pass the course. Prerequisites: Grade of C or better in ESL086, ESL087, ESL088, and ESL089 or placement.

ESL-098 Academic Reading III 3 Credits
This advanced course focuses on the critical and analytical reading skills necessary for success with college level materials. Students demonstrate comprehension of level-appropriate readings through class discussions, writing assignments, and other assessments. Students also develop critical (higher order) thinking skills by interacting with the readings and by summarizing, paraphrasing, quoting, responding to, and evaluating readings. Students do extensive work on understanding and analyzing main ideas and supporting details of articles and essays. Students learn grammar and academic vocabulary in the context of the reading materials. Students must earn a C or better in order to pass the course. Prerequisites: Grade of C or better in ESL086, ESL087, ESL088, and ESL089 or placement.

ESL-099 Academic Writing III 3 Credits
This advanced course focuses on the academic writing skills necessary for success in college content courses. Students develop their abilities with sentence structure, paragraph writing, and essay writing through extensive practice with multiple drafting, revising, editing, and proofreading. Students write from personal experience, answer essay questions from readings of substantial complexity, and write essays using research sources. Students learn grammar in the context of the readings and student generated writing. Students must pass the ESL099 Writing Competency Exam and earn a C or better in order to pass the course. Prerequisites: Grade of C or better in ESL086, ESL087, ESL088, and ESL089 or placement.

Energy Sustainability Management
Energy Sustainability Management

ESM-105 Green Buildings 3 Credits
This course provides a framework for making practical design and construction decisions that are environmentally responsible by focusing on LEED (Leadership in Energy and Environmental Design) building standards. After completing the course, students will have the ability to sit for the LEED Green Associate Exam. Topics include trends in green building, costs and benefits of green buildings, third party certifications and rating systems, site selection and orientation, sustainable landscapes, storm water management, water efficiency, energy demand, energy efficiency, renewable energy in buildings, ongoing building performance, waste management, building materials, and indoor air quality. Prerequisites: Foundations of Mathematics (MAT093), Writing Skills II (ENG095), Reading Skills II (RDG095), or placement equivalency.

ESM-115 Sustainable Facilities Management 3 Credits
This course highlights the responsibilities, policies, and practices involved with managing the built environment to achieve sustainable goals. Students will gain an understanding of facilities operation, maintenance, architectural blueprint interpretation, health & safety awareness, and occupant engagement. Students will learn how to select and assess energy systems, electrical systems, lighting systems, and heating systems. Course content will center on facilities management as a process, and its relationship to other functions within an organization. Students will explore the most current strategies and issues in the industry today, including sustainability, productivity, green buildings, as well as human and environmental factors. This course will utilize a combination of classroom techniques (presentation, discussion, team projects, case studies, and guest speakers) to give the students a full understanding of the issues and complexities of sustainable facilities management. Prerequisites: Foundations of Mathematics (MAT093), Reading Skills II (RDG095), and Writing Skills II (ENG095) or placement.

ESM-205 Green Existing Buildings: Operation and Maintenance 3 Credits
This course is designed for ESM students and professionals who are looking to gain project experience on existing Leadership in Energy and Environmental Design (LEED) projects. This course is for students interested in enhancing operations and maintenance in existing buildings. Students will learn the requirements and calculations required for the following LEED credits: Sustainable Sites, Water Efficiency, Energy & Atmosphere, Materials & Resources, and Indoor Environmental Quality. Students may accrue continuing education units that are required to advance to the LEED AP level, or maintain their accreditation by achieving mandatory Credentialing Maintenance Program hours by using BHCC’s Health and Wellness Center which earned LEED Gold certification under version 2.2 of the green building Council’s green building program. Students may learn to manage LEED project details, complete documentation requirements for LEED credits and prerequisites, upload supporting files, submit applications for review, track their certification process using LEED-Online, a primary resource for managing the LEED documentation process. This course will help prepare students to sit for the LEED AP existing Building Operations and Maintenance Exam. This course is ideal for developers, contractors, architects, lawyers, builders, engineers, product representatives, real estate brokers, and anyone interested in understanding green building principles. Prerequisite: Green Buildings (ESM105) or possession of LEED GA accreditation with approval of program director.

ESM-211 Project Management and Finance for Energy 3 Credits
This course examines the theory and practice of Project Management as applied to renewable energy and energy efficiency projects. The course also explores financial considerations for sustainable energy projects, as well as a variety of funding mechanisms. Special focus will be applied to project life-cycles, planning, controlling, and coordinating efforts of multiple individuals and/or working groups. Students will gain an understanding of financial measures of project performance, budgeting, feasibility, and explore various funding mechanisms including government incentives, specialized loans, and performance contracts through case studies. Prerequisite: Survey of Renewable Energy/Lab (ENW111).

ESM-299 Energy and Sustainability Internship 3 Credits
This course provides relevant field and/or research experience integrating theory and practice while providing opportunities to develop skills, explore career options, and network with professionals and employers in the clean energy and sustainability management fields. Prerequisites: Enrollment in the Energy and Sustainability Management Program, have completed a minimum of 10 credits in ESM courses with a B average or higher, or approval or EMS program directors. Students who do not meet attendance standards for the ESM program may not be eligible to participate in the internship.

Finance

FIN-106 Introduction to Corporate Finance 3 Credits
This course is an introduction to corporate finance. The objective of the course is to introduce concepts and techniques of finance. This course will provide an introduction to present value techniques, capital budgeting principles, asset valuation, the operation and efficiency of financial markets, the financial decisions of firms, and international finance. This course is open to all majors.

FIN-111 Investments 3 Credits
Students will be introduced to the dynamic world of investing by evaluating strategies endorsing the value of money, investments, insurance, retirement, and other long-term planning and their tax ramifications. It is intended for students at all levels and for all programs of study.

FIN-210 Financial Management 2 Credits
This course uses the tools of financial analysis such as ratios, budgets, forecasting techniques, present value concepts, and cash flow. The course also explores short, intermediate, and long-term sources and uses of cash. Prerequisite: Principles of Accounting II (ACC102).

FIN-211 Money and Banking 3 Credits
This course covers an economic analysis of financial institutions and markets in the world economy. It covers institutional and economic factors in the determination of the money supply. The course includes the commercial banking system and the money and capital markets. Current policy issues are debated. Prerequisites: Macroeconomics (ECO201) and Microeconomics (ECO202).

FIN-213 Mutual Fund Industry 3 Credits
This course introduces the myriad aspects of the mutual fund business including the way mutual funds are structured, regulated, marketed, and distributed. In addition, the course explores shareholder serving systems and technology. Prerequisites: Principles of Accounting II (ACC102) and Investments (FIN111).

Film

FLM-101 Film As Art 3 Credits
This course covers film techniques, terminology, and criticism, using a variety of recent popular films on television and videotape as the subject for discussion and analysis. This course meets General Education Humanities Requirement Area 6. Pre/corequisite: College Writing I (ENG111).

FLM-102 American Cinema 3 Credits
This course brings Hollywood film making into clear focus as an art form, as an economic force, and as a system of representation and communication. The course probes the deeper meaning of American movies through encounters with the works of famous directors such as John Ford, Howard Hawks, and Martin Scorsese. This course meets General Education Requirement Humanities Area 6. Pre/corequisite: College Writing I (ENG111).

Fire Protection and Safety

FPS-107 Fire Company Officership 3 Credits
This course examines the scope and functions of the fire company officer. Topics include the role of the fire service, departmental organization, administrative and management procedures, training, public relations, tactics, and strategy, and fire prevention.

FPS-111 Fire Service, This Century and the Next, What Should We Expect? 3 Credits
This course provides students with the history of the fire service and its culture. The student
will research the ways that the fire service has changed over the past century and how it is expected to change in the next century. Topics will include the history for the fire service, changes in the fire service past and future, the evolution of equipment in the fire service, firefighter deaths and statistics as they pertain to the National Fallen Firefighters Foundation and its 16 Firefighter Life Safety Initiatives, as well as a field trip to the NFPA (National Fire Protection Association) and the role of the state training centers and a field trip to the Massachusetts Firefighting Academy in Stow, MA. These topics will be discussed with particular focus on the National Fire Administration’s Fire and Emergency Services Higher Education (FESHE) Professional Development Model and its explanation of how education, training, experience and individual development is needed for a successful job in the fire service. This course incorporates the learning outcomes of BHCC’s Learning Community Seminar and fulfills the Seminar’s requirements for first-time, college students.

**FPS-119 Principles of Fire and Emergency Services Safety and Survival**  
3 Credits  
This course introduces the basic principles and history related to the national firefighter life safety initiatives, focusing on the need for cultural and behavior change throughout the emergency services. Prerequisites: A grade of C or better in Writing Skills II (ENG095) and Academic Reading III (ESL098) or Reading Skills II (RDG095) or exemption by placement testing.

**FPS-123 Principles of Emergency Services**  
3 Credits  
This course provides an overview to fire protection and emergency services; career opportunities in fire protection and related fields; culture and history of emergency services; fire loss analysis; organization and function of public and private fire protection services; fire departments as part of local government; laws and regulations affecting the fire service; fire service nomenclature; specific fire protection functions; basic fire chemistry and physics; introduction to fire protection systems; introduction to fire strategy and tactics; life safety initiatives. Prerequisites: A grade of C or better in Writing Skills II (ENG095) and Academic Reading III (ESL098) or Reading Skills II (RDG095) or exemption by placement testing.

**FPS-125 Hazardous Materials Chemistry**  
3 Credits  
This course provides basic chemistry relating to the categories of hazardous materials including recognition, identification, reactivity, and health hazards encountered by emergency service. Prerequisites: A grade of C or better in Writing Skills II (ENG095) and Academic Reading III (ESL098) or Reading Skills II (RDG095) or exemption by placement testing.

**FPS-127 Fire Protection Hydraulics and Water Supply**  
3 Credits  
This course provides a foundation of theoretical knowledge in order to understand the principles of the use of water in fire protection and to apply hydraulics principles to analyze and to solve water supply problems. Prerequisites: A grade of C or better in Writing Skills II (ENG095) or by placement testing; a grade of C or better in Academic Reading III (ESL098) or Reading Skills II (RDG095) or by placement testing; and a grade of C or better in Foundations of Algebra (MAT097) or by placement testing.

**FPS-133 Fire Protection Systems**  
3 Credits  
This course provides information relating to the features of design and operation of fire alarm systems, water-based fire suppression systems, special hazard fire suppression systems, water supply for fire protection and portable fire extinguishers. Prerequisites: A grade of C or better in Writing Skills II (ENG095) and Academic Reading III (ESL098) or Reading Skills II (RDG095) or exemption by placement testing.

**FPS-135 Fire Behavior and Combustion**  
3 Credits  
This course explores the theories and fundamentals of how and why fires start, spread, and are controlled. Prerequisites: A grade of C or better in Writing Skills II (ENG095) and Academic Reading III (ESL098) or Reading Skills II (RDG095) or exemption by placement testing.

**FPS-139 Fire Prevention Services Safety and Survival**  
3 Credits  
This course provides fundamental knowledge relating to the field of fire prevention. Topics include: history and philosophy of fire prevention; organization and operation of a fire prevention bureau; use and application of codes and standards; plans review; fire inspections; fire and life safety education; and fire investigation Prerequisites: A grade of C or better in Writing Skills II (ENG095) and Academic Reading III (ESL098) or Reading Skills II (RDG095).

**FPS-221 Strategy and Tactics**  
3 Credits  
This course provides the principles of fire ground control through utilization of personnel, equipment, and extinguishing agents. Prerequisites: Principles of Emergency Services (FPS123) and a grade of C or better in Writing Skills II (ENG095) and Academic Reading III (ESL098) or Reading Skills II (RDG095) or exemption by placement testing.

**FPS-223 Building Construction for Fire Protection**  
3 Credits  
This course provides the components of building construction related to firefighter and life safety. The elements of construction and design of structures are shown to be key factors when inspecting buildings, preplanning fire operations, and operating at emergencies. Prerequisites: A grade of C or better in Writing Skills II (ENG095) and Academic Reading III (ESL098) or Reading Skills II (RDG095) or exemption by placement testing and Principles of Emergency Services (FPS123) or instructor approval.

**French**

**FRE-101 Elementary French I**  
3 Credits  
This course introduces students to the sounds and structures of French with emphasis on the acquisition of a limited but useful vocabulary and is offered for students with little or no previous knowledge of French. The course is not intended for native speakers or for students who have studied this language within the last three years.

**FRE-102 Elementary French II**  
3 Credits  
This course covers a continuation of Elementary French I (FRE101) and places emphasis on speaking and reading skills. The course meets General Education Humanities Requirement Area 6. Prerequisite: Elementary French I (FRE101) or one year of high school French.

**FRE-201 Intermediate French I**  
3 Credits  
This course is a review of basic language skills with emphasis on conversational skills and graded reading selections for the acquisition of a broad, active vocabulary. Prerequisite: Elementary French II (FRE102) or two years of high school French.

**FRE-202 Intermediate French II**  
3 Credits  
This course is a continuation of Intermediate French I with emphasis on self-expression through speaking and writing. Prerequisite: Intermediate French I (FRE201) or three years of high school French.

**Geography**

**GEO-101 World Regional Geography**  
3 Credits  
This course examines the geographical context of major social, cultural, economic, and political issues in selected regions of the world and develops a mastery of maps and other graphic aids as means of learning and communication. Major regional emphases vary from semester to semester among areas of Eastern Europe, the former USSR, the Middle East, the Orient, Latin America, and Africa. The course meets World View General Education Requirement Area 3. Prerequisites: Grade of C or better in Academic Reading III (ESL098) or Reading Skills II (ENG095), or exemption by placement testing.

**German**

**GER-101 Elementary German I**  
3 Credits  
This course teaches students to read, speak, and write elementary German including mastery of approximately five hundred basic vocabulary words. The course covers the basic structure of the language. The course is offered in alternate years.

**GER-102 Elementary German II**  
3 Credits  
This course builds upon the skills learned in Elementary German I (GER101) by advancing the language structures, word forms, and vocabulary. The course meets General Education Humanities Requirement Area 6. Prerequisite: Elementary German I (GER101). This course is offered in alternate years.

**Geographic Information Systems**

**GIS-124 Intro to Geographic Information Systems**  
4 Credits  
Geographic Information Systems (GIS) are a powerful way to access, map, and analyze geographic information. This course provides an introduction to the concepts of GIS and geospatial analysis of databases. Through a series of lectures, hands-on computer based exercises, and web enhanced modules, students will learn how to use Microsoft Excel to manage database information, analyze geospatial data, and create maps using GIS tools and software. This course is designed as a core requirement for the A.S. Environmental Science
Gas Utility Technology

Government

GOV-101
Government/Politics in US
3 Credits
This course explores some questions and theories that interest political scientists and historians, and methods they use to explain governmental operations. Insight into the nature of political ideals, as embodied in the Constitution, is developed. Topics include federalism, organization and functions of the three branches of the national government, civil liberties and civil rights, public opinion and voting behavior, the media, bureaucracies, and public policy. This course meets General Education Individual and Society Requirement Area 2. Prerequisites: Grade of C or better in Academic Reading III (ESL098) or Reading Skills II (RDG095); and Writing Skills II (ENG095); or exemption by placement testing.

GOV-103
State/Local Politics
3 Credits
This course acquaints students with the history and functions of state and local governance. It includes an analysis of political organization and structure; state and local government taxing powers; economic, educational, and police powers; and public service functions of government. The course meets General Education Individual and Society Requirement Area 2. Prerequisites: Grade of C or better in Academic Reading III (ESL098) or Reading Skills II (RDG095) and Writing Skills II (ENG095); or exemption by placement testing.

GOV-211
Comparative Governments
3 Credits
This course will discuss governments and politics in a global setting. Students will consider political and social institutions in a variety of countries and then analyze issues of power and economic development in the context of globalization. Prerequisite: at least 9 college-level credits.

History

HIS-101
Western Civilization to the Renaissance
3 Credits
This course covers a survey of the evolution of Western civilization from its roots in ancient world through the medieval and early modern periods. It examines artistic, ideological, economic, social, and political questions in order to assist students to understand the development of modern Western culture. This course meets the General Education World View Area 3 requirement. Prerequisites: Grade of C or better in Academic Reading III (ESL098) and Academic Writing III (ENG095); or Reading Skills II (RDG095) and Writing Skills II (ENG095); or exemption by placement testing.

HIS-102
Western Civilization from the Renaissance
3 Credits
This course covers a survey of the major intellectual, social, economic, and political developments in Western civilization since the 17th century. It emphasizes the roots of contemporary institutional and ideological problems. The course meets General Education World View Requirement Area 3. Prerequisites: Grade of C or better in Academic Reading III (ESL098) and Academic Writing III (ENG095) or Reading Skills II (RDG095) and Writing Skills II (ENG095); or exemption by placement testing.

HIS-111
World Civilization to 1500
3 Credits
This course examines similarities and differences among the major world civilizations before the modern era. Topics include traditions of governance, art, religion and philosophy, technology, family structure, and everyday life. The course meets General Education World View Requirement Area 3. Prerequisites: Grade of C or better in Academic Reading III (ESL098) or Reading Skills II (RDG095) and Writing Skills II (ENG095); or exemption by placement testing.
HIS-112  
World Civilization From 1500  
3 Credits  
This course examines similarities and differences among the major world civilizations in the modern era. Topics include traditions of governance, art, religion and philosophy, technology, family structure, and everyday life. The course meets General Education World View Requirement Area 3. Prerequisites: Grade of C or better in Academic Reading III (ESL098) and Academic Writing III (ESL099) or Reading Skills II (RDG095) and Writing Skills II (ENG095), or exemption by placement testing.

HIS-117  
Women in U.S. History  
3 Credits  
This class will explore women’s roles in American history. It will provide a chronology of the role of women in American history. It will provide a chronology of the role of women in the development of America from colonial beginnings to the Civil War. The course devotes major attention to the people, critical issues, and significant forces that determined the course of events that shaped our civilization. The course meets General Education World View Requirement Area 3. Prerequisites: Grade of C or better in Academic Reading III (ESL098) or Reading Skills II (RDG095) and Writing Skills II (ENG095) or exemption by placement testing.

HIS-151  
US History: Colonization through the Civil War  
3 Credits  
This course traces the growth and development of America from colonial beginnings to the Civil War. The course devotes major attention to the people, critical issues, and significant forces that determined the course of events that shaped our civilization. The course meets General Education World View Requirement Area 3. Prerequisites: Grade of C or better in Academic Reading III (ESL098) or Reading Skills II (RDG095) and Writing Skills II (ENG095) or exemption by placement testing.

HIS-152  
US History: Reconstruction to the Present  
3 Credits  
This course covers the rise of the United States from the turmoil of the Civil War to superpower status. The course examines the cultural, economic, diplomatic, and political forces that have given the nation its shape. The course meets General Education World View Requirement Area 3. Prerequisites: Grade of C or better in Academic Reading III (ESL098) or Reading Skills II (RDG095) and Writing Skills II (ENG095) or exemption by placement testing.

Hospitality  

HRT-105  
Hospitality Seminar  
3 Credits  
This course provides students with an in-depth, experiential understanding of the options available within the hospitality industry. Topics covered include industry specific areas such as hotels, resorts, cruises, tours, convention and visitors bureaus and travel agencies with particular focus on the skills and abilities that each individual needs to create a successful career. Guest speakers and site visits are an integral part of this course.

HRT-109  
Hospitality Marketing Management  
3 Credits  
This course examines the market environment in which a firm operates. The course covers communications principles and their application to sales goals. It considers effective utilization of tools and techniques of merchandising in hotels and restaurants. Prerequisite: Principles of Management and Service in Hospitality (HRT121).

HRT-112  
Food and Beverage for Hospitality Prof  
3 Credits  
This course covers the operations of dining and lounge services as they relate to the tasks of effective use of dining space, job assignments, and labor cost control. The course also covers these elements in relationship with optimum staffing, scheduling and productivity analysis. In addition, students discuss and practice issues in training, supervision, and quality guest services. A special emphasis is placed on brand recognition, company philosophy, marketing, sales, and beginning hospitality accounting to include basic financial statements.

HRT-117  
Hospitality Law  
3 Credits  
This course examines the common and statutory law of the hospitality and tourism industry. The legal aspects of hotel and restaurant operations, employment law, tort liability, civil rights law and American with Disabilities Act compliance are also addressed. Prerequisite: Principles of Management and Service in Hospitality (HRT121).

HRT-119  
Basics of Meeting Management  
3 Credits  
This course covers applied knowledge and skill that students need to plan professional meetings and conferences. The course takes students through the step-by-step process that exposes them to the decisions, problems, and concerns of planning effective meetings and programs that constitute a professional conference. The class format requires students to undertake a team project based on a variety of typical professional specifications.

HRT-121  
Principles of Management and Service in Hospitality  
3 Credits  
This course introduces the principles of sound business management focusing specifically on the unique needs of service industries. Students will understand the business structures and strategies used in hospitality. Particular focus will be paid to communication skills, managing people and insuring quality service within the hospitality and travel industries.

HRT-122  
Managing Groups  
3 Credits  
This course introduces students to group sales, support and tour management. Students will learn the skills necessary to handle the management of large groups of people over different modes of travel and to different destinations. Prerequisite: Basics of Meeting Management (HRT119).

HRT-125  
Principles of Hospitality Finance and Accounting  
3 Credits  
This course encompasses basic accounting principles within the unique context of the hotel industry and financial management strategies of tourism based businesses. Emphasis is placed on how to administer accounting procedures to minimize cost and maintain a full range of customer services. Topics include: cash flow cycle, accounting principles and procedures, elements of financial statements, maintaining financial statements, and analysis of financial records. Prerequisite: Principles of Accounting I (ACC101).

HRT-131  
Front Office Operations  
3 Credits  
This course covers the responsibilities of management including principles of front-office procedures, accounting fundamentals and supervisory and communication skills as they relate to the various support departments that impact the guest cycle. It includes training on front desk software.

HRT-133  
Culinary Theory in Hospitality  
3 Credits  
Students gain knowledge in the use of tools and equipment while learning basic procedures related to preparation and cooking. Students learn basic menu construction and presentation used in the development of full menus utilized in a quantity food production facility. The course emphasizes cooking techniques, terminology, equipment use, and commercial kitchen operation, as well as proficiency in knife skills and uses of various culinary tools. Additional expenses may include supplies, equipment, and uniforms.

HRT-151  
Casino Operations Management  
3 Credits  
This course provides the student with an overview of the Casino Industry. It covers forms of gaming, gambling, destinations, and organization of a Casino Resort. The course offers students insight into the various career paths available within this unique and thriving industry.

HRT-210  
Hotel/Rest/Tour Field Exp Internship  
3 Credits  
This course integrates classroom study with practical work experience. Under the guidance of a site supervisor and a faculty member, the experience helps students to shape career goals and to gain valuable work experience. Prerequisite: Principles of Management and Service in Hospitality (HRT121).

HRT-223  
Event Planning  
3 Credits  
This course covers applied knowledge and skill that students need to plan professional and non-profit events. The course takes students through the step-by-step process and the decisions, problems, and concerns of planning special events. The class format requires students to undertake a team
Human Services

HSV-101
Intro Human Services W/Field Practice
3 Credits
This introductory course covers the historical aspects of human services, the requirements and skills of the human services worker, administration and funding of agencies, and the dynamics of work in the profession with a 15 contact hour (per semester) service learning requirement at a human service organization. Prerequisites: Grade of C or better in Academic Reading III (ESL098) or Reading Skills II (RDG095) and Writing Skills II (ENG095) or exemption from reading and writing requirements by placement testing.

HSV-112
Addiction
3 Credits
This course investigates the biological, psychological, and emotional issues involved in the addiction process. The course covers the major classes of psychoactive drugs by examining drug action, uses, and limitation. Social problems and the role of human services in prevention and intervention play an integral role in the course. Prerequisite: Principles of Psychology (PSY101) and grade of C or better in Academic Reading III (ESL098) or Reading Skills II (RDG095) and Writing Skills II (ENG095) or exemption from reading and writing requirements by placement testing.

HSV-215
Introduction to Substance Abuse Counseling
3 Credits
(Formerly HSV115) This course provides an introduction to human services and addictions, including the types of clients served, the duties of human service personnel, philosophy and dynamics of addictions treatment and an overview of state and community resources. Case studies are used to examine the development, identification, dynamics and recovery of addicts. Prerequisites: Addiction (HSV112) and Counseling (PSY215).

HSV-216
Pre-Practicum Prep With Field Experience
3 Credits
(Formerly HSV116) This course is designed to provide an orientation to practicum experiences in the human services program. Students will review the process for setting up a placement, understanding professional requirements for an interview, and complete a series of critical thinking and reflective assignments. A placement experience in a human service agency is required by the course following a C.O.R.I. background check. A grade of B or better is required in this course to allow for enrollment in further practicum coursework in the program. Prerequisites: For Associate degree students: Grade of C or better in College Writing II (ENG111) and a minimum of 27 credits completed toward the A.S. in Human Services including, at a minimum, a grade of C or better in HSV101, HSV112, PSY215 and PSY224. For Certificate students: Grade of C or better in College Writing I (ENG111) and a minimum of 15 credits completed toward the Certificate Option including, at a minimum, PSY215 and HSV112.

HSV-217
Current Issues in Human Services
3 Credits
(Formerly HSV117) This course is the study of current issues in the human services delivery system with emphasis on human, legal, and civil rights, service delivery, and resource availability. Economic, political, and social changes in society that affect the delivery of human services with particular attention to the needs of housing, employment, health, nutrition, and well-being of participants in the system will be examined. Prerequisites: Intro to the HS Profession Practicum (HSV101), Principles of Psychology (PSY101), Counseling (PSY215), and Adolescent & Adult Development (PSY224).

HSV-218
Case Management in Human Services
3 Credits
This is an introductory course on case management that uses the framework of the strengths-based model in working with different populations. Through an integration of classroom lecture and discussion with experiential learning activities, key issues will be explored and examined in-depth. Prerequisite: Counseling (PSY215) and grade of C or better in Academic Reading III (ESL098) or Reading Skills II (RDG095) and Writing Skills II (ENG095) or exemption from reading and writing requirements by placement testing.

HSV-219
Current Issues for the Community Health Worker
3 Credits
This course is designed to prepare community Health workers to effectively support and assist their communities to achieve optimal levels of health and well-being. Prerequisites: Health Employment Issues (AHE104) and Counseling (PSY215).

HSV-220
Practicum in Human Services I
3 Credits
Practicum experiences in a human services setting to be completed the final semesters of study, including the 90-hour training in the national Family Development Credentialing program. Course runs during fall, spring, and early summer semester and must be started in the fall semester. The department assigns placement settings. Students must make application for placement and enrollment spring semester prior to fall registration. Acceptance into the human services program does not assure permission to enroll in the course or a placement assignment. A Criminal Offense Records Investigation (CORI) is required of all practicum students. For complete course requirements and application procedures, contact the department chairperson of Early Childhood, Education & Human Services. Course is graded on a pass/fail scale. HSV220, 221, and 222 are to be taken in sequence beginning in the fall semester and concluding in the spring semester. Prerequisite: Permission of department chairperson and Pre-practicum Prep w/Field Experience (HSV216).

HSV-221
Practicum in Human Services II
3 Credits
(Formerly HSV121) Practicum experiences in a human services setting to be completed the final semesters of study, including the 90-hour training in the national Family Development Credentialing program. Course runs during fall, spring, and early summer semester and must be started in the fall semester. The department assigns placement settings. Students must make application for placement and enrollment spring semester prior to fall registration. Acceptance into the human services program does not assure permission to enroll in the course or a placement assignment. A Criminal Offense Records Investigation (CORI) is required of all practicum students. For complete course requirements and application procedures, contact the department chairperson of Early Childhood, Education & Human Services. Course is graded on a pass/fail scale. HSV220, 221, and 222 are to be taken in sequence beginning in the fall semester and concluding in the first term of the summer semester. Prerequisite: Practicum in Human Services I (HSV220) and permission of department chairperson.

Interdisciplinary Studies

INT-101
Introduction to Yoga Studies
3 Credits
This course explores yoga, a diverse form of artistic human expression through an interdisciplinary perspective-from its origins to present day-to the principles and the systems for mental, body, and spirit. Students will also examine multi-cultural beliefs on healing and healing traditions. Through writing assignments students will reflect critically on their own practice and on topics introduced in the readings/discussions. The course will include an in-class yoga practice that will allow students to integrate course concepts with their yoga practice on and off the mat as students will apply yoga principles to their lives through self-reflection, civic engagement and service. This course is geared to students with no prior yoga experience. Students need to wear clothing that allows for freedom of movement as there will be a physical practice in each class meeting. Prerequisites: Grade of C or better in Academic Reading III (ESL098) or Reading Skills II (RDG095) and Writing Skills II (ENG095) or exemption by placement testing.
INT-110
American Culture
3 Credits
This interdisciplinary course focuses on the historical evolution of American beliefs and values and is designed for students from other cultures. Students study the way these values have shaped U.S. contemporary institutions such as education, business, the government, and the family. The course examines extensive cross-cultural comparisons with the students’ native cultures. Materials include film, music, and short works of literature. The course meets General Education Humanities Requirement Area 6. Prerequisite: Academic Reading III (ESL098) or Reading Skills II (RDG095) or exemption from reading requirement by placement testing.

Italian
ITL-101
Elementary Italian I
3 Credits
This course introduces students to the sounds and structures of Italian with emphasis on the acquisition of a limited but practical vocabulary and is designed for students with little or no previous knowledge of Italian.

ITL-102
Elementary Italian II
3 Credits
This course is a continuation of Elementary Italian I (ITL101), emphasizing speaking and reading skills. The course meets General Education Humanities Requirement Area 6. Prerequisite: Elementary Italian I (ITL101) or one year of high school Italian. This course is offered in alternate years.

ITL-201
Intermediate Italian I
3 Credits
A review of basic language skills with increasing emphasis on conversational and readings skills. Prerequisite: Intermediate Italian II or two years of high school Italian.

ITL-202
Intermediate Italian II
3 Credits
A continuation of Intermediate Italian (ITL201) with greater emphasis on speaking, reading, and writing. Prerequisite: Intermediate Italian I (ITL201) or three years of high school Italian.

Japanese
JPN-101
Elementary Japanese
3 Credits
This course is an introduction to the sounds and structures of the Japanese language with emphasis on the acquisition of a limited but useful vocabulary. The course is designed for students who want to learn essential Japanese as quickly as and as effectively as possible. Students read and write with Hiragana and look into the world of Kanji. This course is not intended for native speakers or students who have studied this language within the last three years.

JPN-102
Elementary Japanese II
3 Credits
This course covers a continuation of the study of basic structures of the Japanese language. The course stresses additional useful vocabulary through reading, writing, and conversation. The course covers material that allows students to learn essential Japanese as quickly and effectively as possible. The course emphasizes encouraging and helping students obtain the ability to use the Japanese language in practical situations. It emphasizes student ease in interacting and communicating in an uncomplicated but adult language. Students read Kana and some basic Kanji. The course meets General Education Humanities Requirement Area 6. Prerequisite: Elementary Japanese I (JPN101).

JPN-201
Intermediate Japanese I
3 Credits
This course offers instruction in intermediate Japanese. Students will learn how to communicate and express various ideas. Students will learn how to form long and detailed sentences with emphasis on conversational skills. In addition, they will learn how to read and write some basic Kanji. Various aspects of Japanese culture and customs will be introduced and discussed throughout the semester. Prerequisite: Elementary Japanese (JPN102) or equivalent.

JPN-202
Intermediate Japanese II
3 Credits
This course turns to the basics of Japanese syntax in order to lead the student to the acquisition of increased proficiency in the modern Japanese language. The course is designed to help learners consolidate their understanding of syntactical structures through lessons that focus on how to talk about topics relevant to daily life. This will increase students’ comprehension skills, and it will lead to stronger skills in reading and writing. Students at this stage are expected to become familiar with different forms of verbs (tense and aspect, etc.), time expressions, conditional clauses and other topics that prepare them to have a solid grasp of context and speaker intent. Students also learn more Kanji. Prerequisite: Intermediate Japanese I or equivalent.

Learning Community Seminar
LCS-101
Learning Community Seminar
3 Credits
The Learning Community Seminar enables first-year students to make a successful transition to college. The seminar develops students’ abilities to reflect and assess; discover their strengths; explore career interests; set goals and problem solve; connect with peers, faculty and staff; develop critical thinking, information literacy and communication skills; collaborate in active, diverse learning environments; and make connections between classroom learning and the larger community. Each Learning Community Seminar explores a different topic. Students may choose a Seminar based on their program of study or general interests.

Literature
LIT-201
Introduction to Literature
3 Credits
This course develops students’ ability to interpret, analyze, evaluate, and respond to ideas about literature. Students explore the nature, structure, and form of poetry; short story, and drama. The course meets General Education Humanities Requirement Area 6. Prerequisite: College Writing I (ENG111).

LIT-203
Literature in America I
3 Credits
This course traces the physical, moral, and psychological development of an emerging nation through its literature. The course examines themes of sin, guilt, justice, and equality in the historical movement of the nation from colonial settlement to westward expansion. The course includes works representative of the ethnic and racial diversity of American culture. The course meets General Education Humanities Requirement Area 6. Pre/corequisite: College Writing I (ENG111).

LIT-204
Literature in America II
3 Credits
This course analyzes the crises of the nation from the Civil War through the twentieth century, as shown through its literature. The course examines the themes of progress, materialism, alienation, and corruption against the yardstick of opportunity, heroism, and individualism, which represent the traditional American dream. The course includes works representative of the ethnic and racial diversity of American culture. The course meets General Education Humanities Requirement Area 6. Pre/corequisite: College Writing I (ENG111).

LIT-207
Literature and Society I
3 Credits
This course explores the role of literature as a mirror of the values and conflicts of a changing society. It also examines stereotypes associated with minorities and illustrates the role of literature in alerting society to social and moral injustice. The course meets General Education Humanities Requirement Area 6. Pre/corequisite: College Writing I (ENG111).

LIT-211
Masterpieces of World Literature I
3 Credits
This course considers the landmarks of literature, from ancient times to the eighteenth century, which have shaped, reflected, or criticized Western thought. The faculty select readings from Homer, Greek Drama, the Bible, Dante, Medieval Romance, and Shakespeare. Faculty may couple these readings with their contemporary versions or transformations by such twentieth century writers as Sartrre, O’Neill, MacLeish, Stoppard, and Joyce. The list may vary. The course meets General Education Humanities Requirement Area 6. Pre/corequisite: College Writing I (ENG111).

LIT-212
Masterpieces of World Literature II
3 Credits
This course continues the examination of the great works of the humanist tradition. Faculty select readings from the eighteenth century to the twentieth century from Moliere, Swift, Voltaire, Chekhov, Ibsen, Tolstoy, Conrad, Turgenev, Zola, Kafka, Singer, Bellow, Mishima, Orwell, and Eliot. The list may vary. The course also includes an international studies module of the contemporary literature of Africa, Asia, and Latin America. The course meets General Education Humanities Requirement Area 6. Pre/corequisite: College Writing I (ENG111).

LIT-217
Children’s Literature I
3 Credits
This course introduces students to children’s literature in all its forms, from fables to fairy tales, from realistic fiction to fantasy, from nonsense to narrative poetry. The course covers works both classic and contemporary. The course meets General Education Humanities Requirement Area 6. Pre/corequisite: College Writing I (ENG111).
LIT-218  
Children's Literature II  
3 Credits  
As follow-up to Children's Literature I (LIT217), this course focuses on one of the most significant themes in literature, particularly in works written for children and young adults: the search for identity. The course examines full-length works, classics, contemporary novels and works of fantasy that explore this theme. Discussion topics may include: hero-worship, self-reliance, society's view of the child, the impact of environment, and peer pressure. The course closely examines narrative techniques, especially point of view. The department recommends that students complete Children's Literature I (LIT217) prior to taking this course. The course meets General Education Humanities Requirement Area 6. Pre/corequisite: College Writing I (ENG111).

LIT-219  
African Literature  
3 Credits  
This survey course of contemporary African literature exposes students to the diversity of the themes, styles and modes of expression peculiar to the enormous continent of Africa. Students study the oral tradition as it is reflected in folktales, stories, and poems. In addition to reading essays and articles about social and historical conditions that affect the literature of the continent, students read numerous short stories and at least three novels, each reflecting the culture of a different region of the continent. The course meets General Education Humanities Requirement Area 6. Pre/corequisite: College Writing I (ENG111).

LIT-221  
Latin American Literature  
3 Credits  
This course examines the uniqueness of the Latin American experience as expressed in its literature. The course gives particular attention to those works that reflect the social, political, ethnic, or cultural values of Latin America. The course also examines the impact of Latin American themes and literary techniques on contemporary world literature. The course meets General Education Humanities Requirement Area 6. Pre/corequisite: College Writing I (ENG111).

LIT-223  
Immigrant Experience in Literature  
3 Credits  
The course explores the experience and contributions of the many ethnic groups who have shaped American culture. Short stories, novels, plays, essays, and poems present the bi-cultural American story told by both those whose roots have been long established in this country and by those who have more recently arrived. The course meets General Education Humanities Requirement Area 6. Pre/corequisite: College Writing I (ENG111).

LIT-225  
Introduction to Dramatic Literature  
3 Credits  
This course examines selected plays in an historical context to provide students with a basic awareness of theater development from ancient Greek drama to contemporary plays. The selection may vary from semester to semester. The course meets General Education Humanities Requirement Area 6. Pre/corequisite: College Writing I (ENG111).

LIT-227  
African-American Literature  
3 Credits  
This course is an introduction to the study of African American literature from slave narratives to classic twentieth century novels to contemporary poetry and short stories. The course meets General Education Humanities Requirement Area 6. Pre/corequisite: College Writing I (ENG111).

LIT-229  
Sophocles and Shakespeare  
3 Credits  
Through an exploration of plays by Sophocles and Shakespeare and critical readings based on the plays, the course will focus on themes that include prophecy and free will; speaking the truth to power; defining evil; and, finally, confronting evil. This is an Honors course and is an Honors requirement for students in the Commonwealth Honors Program. Prerequisite: College Writing I(ENG111) with a grade of B or better or permission of the instructor.

LIT-231  
Mystery and Detective Fiction  
3 Credits  
The course will introduce students to the art and mystery and detective fiction, surveying the short story and novel form from its Edgar Allan Poe roots through contemporary developments in the genre. It will include works by well-known mystery writers such as Arthur Conan Doyle, Raymond Chandler, Agatha Christie, Sara Paretsky and Walter Mosely as well as literary authors whose work shares elements of the mystery genre. The course meets General Education Humanities Requirement Area 6. Pre/corequisite: College Writing I.

LIT-241  
Supernatural and Horror Literature  
3 Credits  
This course will analyze short and long works that deal with a variety of aspects of the supernatural. Students will read both classic and contemporary works by authors such as Bram Stoker, Robert Bloch, Ira Levin, Mary Wollstonecraft Shelley, Henry James, Edgar Allen Poe, Stephen King, Shirley Jackson and H.P. Lovecraft. The course explores the metaphorical roles that belief in and interest about the supernatural play in our culture and in our lives. The course meets General Education Humanities Requirement Area 6. Pre/corequisite: College Writing I (ENG111).

MAC-111  
Mammography Principles I  
3 Credits  
This interactive, web-based course presents the concepts of equipment design, technical factors and compares analog to digital mammography equipment and techniques. Quality assurance and special patient situations, as well as interventional procedures will also be discussed. Prerequisite: Acceptance into Mammography Certificate Program.

MAC-111  
Mammography Clinical Internship  
3 Credits  
This 100-hour clinical introduction will enhance the academic experience for students by introducing them to the clinical practice of mammography. Students are responsible for providing their own clinical site. Clinical sites must be pre-approved by program faculty. Students must comply with the clinical policies, as stated in the Student Manual, before attending clinical. Criminal Offender Record Information (CORI) checks will be conducted on all students before placement, and the outcome may impact the student’s ability to participate in the internship experience. Health clearance is also required prior to participation. Prerequisite: Permission of department chair. Pre/corequisite: Mammography Principles II (MAC521).

Management  
MAN-105  
Principles of Marketing  
3 Credits  
This course is a study of the basic principles of marketing and the application of these principles in today's changing competitive environment. The focus of this course is on the behavior of the consumer market and the product, pricing, promotion and distribution decisions employed to create consumer satisfaction. Prerequisites: Academic Reading III (ESL098) or Reading Skills II (RDG090) or placement and Writing Skills I (ENG090) or placement.

MAN-106  
International Marketing  
3 Credits  
This course covers the study of marketing strategies adapted to fit the special requirements of international marketing structures, as well as the differing cultural, political, and legal environments. Students examine the marketing forces that play an important role in deciding the feasibility of internationalizing a product. Prerequisite: Principles of Marketing (MAN105).

MAN-107  
Introduction to Entrepreneurship  
3 Credits  
This is an introductory course for those interested in starting or running their own business. Students will assess how technology and innovation, demographics, economics and social changes create business opportunities. Students will evaluate the feasibility of business ideas based on strengths, weaknesses, financial goals and competitive threats. Students will also identify admirable characteristics of leading entrepreneurs to identify skills and behaviors which lead to success. Prerequisites: Writing Skills II (ENG095), Academic Reading III (ESL098) or Reading Skills II (RDG090) or placements.

MAN-111  
Principles of Management  
3 Credits  
The skills and functions, theories and principles of management are studied in respect to the socio-cultural environment within which a firm operates. An emphasis on decision-making, organizational strategies, planning and system design provides a framework for examining the application of management concepts in the modern business world and the evaluation of organization problems and solutions. Prerequisites: Introduction to Business (BUS101) for Business Concentration, Management and Finance options only. A grade of C or better in Academic Reading III (ESL098) and Academic Writing III (ESL099) or Reading Skills II (RDG090) and Writing Skills I (ENG090) or exemption from reading or writing requirements by placement testing.

MAN-112  
Organizational Behavior/Design  
3 Credits  
Organizational behavior and design, social systems and contemporary management issues
are explored, experienced with an emphasis on interrelationship of culture, organizational structure and policies upon individual, group and organizational performance. Topic coverage includes: leadership styles; learning; motivation; group structure; decision-making; group dynamics and problem solving. Concepts and issues of power, conflict, change and organizational processes that impact interpersonal or social settings, group interactions or the workplace environment are examined. This course meets General Education Individual/Society Requirement Area 2 for A.A. and A.S. Business Administration students except for the A.S. International Business option. Prerequisite: ESL098 or RDG095 and ESL099 or ENG090.

MAN-201 Management Seminar
3 Credits
Engaged in diagnosing business issues and managerial problems posed through actual real life case studies, students conduct strategic analysis in a variety of individual and competitive situations. Teams identify strategic issues; propose workable plans of action; explain, present and defend their assessments; where applicable, drawing upon prior course study/life experiences and library and Internet research to convert a sound industry/ business analysis into a sound, realistic, action agenda supported by evidence. Note: This course is a Capstone course and should be taken in the student’s final semester. Prerequisite: Principles of Management (MAN111) and Principles of Marketing (MAN105).

MAN-202 Supervisory Management
3 Credits
This course covers an introduction to first-level supervision (operating management). Readings and case studies focus on superior/subordinate relationships, discipline, daily direction, labor relations, and operation control.

MAN-204 Entrepreneurship and Innovation
3 Credits
In this course, students develop the skills and creativity to cultivate and market innovative ventures. This course uses an experiential approach to provide students with a foundation for innovative thinking and to prepare them for entrepreneurial projects. The class examines entrepreneurial thinking, practices and thought processes. In critical thinking exercises, students examine the difference between entrepreneurship and innovation. Through case study reviews and other activities, the class evaluates the viability of new business enterprises and develops strategies to market them successfully. Prerequisite: Introduction to Entrepreneurship (MAN107) or instructor approval.

MAN-207 Small Business Management
3 Credits
Starting and managing a small business requires strong leadership capabilities and unique business and management skills. The purpose of this course is to introduce students to the issues small business owners must understand to become a successful start-up or to manage an existing business successfully. This practitioner oriented course focuses on helping students understand their businesses and to compare their capabilities with the necessary requirements. Students will prepare a business plan to help understand the importance of effective planning and conduct a field study that involves surveying successful small business owners to understand how these owners successfully manage their businesses will also be requirements of the course. Prerequisite: Principles of Accounting II (ACC102) or Accounting Information Systems (ACC105), Principles of Management (MAN111), Principles of Marketing (MAN105) or permission of instructor.

MAN-212 Operations Management for Business
3 Credits
This course provides an introduction to the opportunities and benefits of applying operations management concepts to problems that typical businesses face. The objective is to improve the efficiency, effectiveness and ultimate profitability and sustainability. The course covers the application of operations management concepts to key decisions during the various stages of business operation, including facility size, location, and layout; demand forecasting; production and workforce planning; inventory management; supply chain management; customer relationship management; quality control; and product and service design. Prerequisite: Principles of Management (MAN111), Contemporary Math II (MAT173) or Statistics I (MAT181) or Statistics I/Lab (MAT183); and Introduction to MS Office (CIT133) or Applications/Concepts (CIT110).

MAN-215 Project Management
3 Credits
This course examines concepts and applied techniques for cost-effective management of both long-term development programs and smaller short-term projects. Special focus on planning, controlling, and coordinating efforts of multiple individuals and/or working groups, such as those found in large scale software and engineering programs, and in critical research and development projects. Case studies and classroom simulations are used extensively to teach students the effective integration of analytical/technological tools and organizational design and supervisor approaches. Prerequisites: Application/Concepts (CIT110), Fundamental of Algebra (MAT094), and Principles of Management (MAN111).

MAN-217 E-Commerce Marketing Management
3 Credits
This course provides an overview of the way E-Commerce is conducted, marketed, and managed, and describes its major opportunities, limitations, issues, and risks. E-Commerce is an interdisciplinary topic and, therefore, is of interest to managers and professional people in any functional area of the business world. The course describes the manner in which transactions take place over networks, mostly the Internet. The course covers discussions and descriptions of the process of electronically buying and selling goods, services, and information. It introduces specific applications, such as buying and selling stocks or books on the Internet, which are growing at a rate of several hundred percent a year. Prerequisite: Principles of Marketing (MAN105).

MAN-299 Business Internship
3 Credits
This course enhances the academic experience for students. All internships take place at pre-approved sites. Students engage in activities that improve knowledge of the practical world of work and help them gain professional experience. The internship experience applies resources gained from students’ study to improve the quality of their contributions to the employer. A faculty coordinator supervises and grades all courses. Students are responsible for following all guidelines in the BHCC Internship Handbook. Prerequisite: Permission of the department chair.

Mathematics

MAT-093 Foundations of Mathematics
3 Credits
Topics include solving applied problems with whole numbers, decimals and fractions; ratios and proportions; rates; percentages and applications in sales tax, interest, commissions, and discounts; determining numerical averages and medians; exponents and square roots; measurement; and geometry. Technology is incorporated to facilitate problem solving. This course does not satisfy degree requirements. Course may require an additional lab hour. Upon completion of this course with a grade of C or better, students enroll in Foundations of Algebra (MAT097).

MAT-097 Foundations of Algebra
3 Credits
This course is a continuation of Foundations of Math (MAT093). Topics include algebraic expressions, solving and graphing linear equations and inequalities, exponents and scientific notation, introduction to polynomials, and systems of linear equations and their graphs. Technology is incorporated to facilitate problem solving. This course does not satisfy degree requirements. Prerequisite: Grade of C or better in Foundations of Mathematics (MAT092) or placement. Course may require an additional lab hour.

MAT-099 Intermediate Algebra
3 Credits
This course is a continuation of Foundations of Algebra (MAT097). Topics in this course include polynomial arithmetic, introduction to functions, factoring, roots and radicals, rational expressions, absolute value inequalities, quadratic equations and the quadratic formula, and solving applied problems. This course does not satisfy degree requirements. Prerequisite: Grade of C or better in Foundations of Algebra (MAT097) or placement. Course may require an additional lab hour.

MAT-100 Topics in Career Math
3 Credits
This course applies basic arithmetic techniques to the following business topics: percentage, trade and cash discounts, merchandising, depreciation, simple and compound interest, and present value. The course covers additional topics that faculty choose from taxes, payroll, statistics, insurance, notes and drafts, installment buying, checking accounts, inventories, costing out, and the metric system. This course is appropriate only for Associate in Science students in Culinary Arts. Prerequisite: Grade of C or better in Foundations of Mathematics (MAT093) or placement.

MAT-133 Introduction to Metric System
1 Credit
This course enables students to recognize and use metric terms, roughly measure using body parts, and use estimation within the metric system.

MAT-171 Finite Mathematics
3 Credits
Set theory, coordinate systems and graphs, matrices and linear systems, linear programming, and probability are considered in this course. Applications to business and the social sciences are emphasized. This course meets General Education Quantitative Thought Requirement Area 4. Prerequisite: Grade of C or better in Foundations of Algebra (MAT097).
MAT-194 College Algebra for STEM 4 Credits
This course is designed for science, technology, engineering, computer science, and mathematics students and provides a solid preparation for precalculus. The course covers systems of linear equations, matrices, partial fractions, linear programming, algebra of functions, quadratic equations, polynomials, rational and radical functions, complex numbers, exponential and logarithmic functions, maximum and minimum problems, symmetry, lines, conic sections, graphs of relations and functions, and applications. A graphing calculator is required for this course. This course meets General Education Quantitative Thought Requirement Area 4. Prerequisite: Grade C or better in Intermediate Algebra (MAT099) or a grade of B or better is recommended or placement.

MAT-197 Precalculus 4 Credits
This course covers the following topics: functions and their graphs, polynomial functions, rational and radical functions, exponential and logarithmic functions, elements of trigonometry and trigonometric functions, analytic geometry, and sequence and series notation. Graphing calculator is required. Prerequisite: Grade of C or better in College Algebra-STEM (MAT194) or placement.

MAT-231 Calculus for Management Science 4 Credits
This one-semester course covers topics designed for students in business, economics, and the social sciences. Topics include limits, differentiation and integration of algebraic, exponential and logarithmic functions, optimization, and other applications. Graphing calculator is required. Prerequisite: Grade of C or better in Foundations of Algebra (MAT097) or placement.

MAT-172 Contemporary Math I 3 Credits
This course covers varied mathematical topics that have applications in contemporary society. Topics include number theory (divisibility, Fermat’s Theorem, characterization of primes, Diophantine equations), mathematical systems (base n and modular arithmetic, groups, rings, fields), logic (simple and compound statements, conditionals, biconditional, logic, truth tables), and patterns and symmetries (Fibonacci sequence, Golden Ratio, natural and artistic illustrations, fractals). The course encourages students to interpret, analyze, and evaluate from a mathematical perspective. The course meets General Education Quantitative Thought Requirement Area 4. Prerequisite: Grade of C or better in Foundations of Algebra (MAT097) or placement.

MAT-173 Contemporary Math II 3 Credits
This course covers varied mathematical topics that have applications in contemporary society. Topics include statistics (sampling, measures of central tendency, measures of variation, normal distribution, frequency distributions and histograms), graph theory (modeling), Eulerian and Hamiltonian graphs, directed graphs, optimization procedures), calculators (specialized functions, number patterns, use in problem-solving), consumer math (payroll, investments, financial budgeting, computers (algorithms, flowcharts, application to the course’s other topics). The course encourages students to interpret, analyze, and evaluate from a mathematical perspective. The course meets General Education Quantitative Thought Requirement Area 4. Prerequisite: Grade of C or better in Foundations of Algebra (MAT097) or placement.

MAT-181 Statistics I 3 Credits
This course covers statistical concepts and methods. Topics include data organization, averages and variation; elementary probability; binomial, normal, and t-distributions; estimation and hypothesis testing; and linear correlation and regression. The course meets General Education Quantitative Thought Requirement Area 4. Prerequisite: Grade C or better in Foundations of Algebra (MAT097) or placement.

MAT-193 Topics in Algebra/Trigonometry 3 Credits
This course provides an intensive one-semester survey of topics in algebra and trigonometry. Topics include powers of ten, formulas, graphs, simultaneous equations, logarithms, right triangle trigonometry, vectors, sine waves, and complex numbers. Topics are illustrated by applications from electronics and other fields. Use of scientific calculator is required. Prerequisite: Placement or grade of C or better in Fundamentals of Algebra (MAT094).

MAT-194 College Algebra for STEM 4 Credits
This course is designed for science, technology, engineering, computer science, and mathematics students and provides a solid preparation for precalculus. The course covers systems of linear equations, matrices, partial fractions, linear programming, algebra of functions, quadratic equations, polynomials, rational and radical functions, complex numbers, exponential and logarithmic functions, maximum and minimum problems, symmetry, lines, conic sections, graphs of relations and functions, and applications. A graphing calculator is required for this course. This course meets General Education Quantitative Thought Requirement Area 4. Prerequisite: Grade C or better in Intermediate Algebra (MAT099) or a grade of B or better is recommended or placement.

MAT-281 Calculus I 4 Credits
This course reviews concepts of functions, graphs and trigonometry to support the exploration of limits, derivatives, and basic integration. Topics will include limits, continuity, algebraic and trigonometric differentiation, applications of the derivative, the definite and indefinite integral, methods of integration, application of integration to determination of area, the Fundamental Theorem of Calculus and integration by substitution. Graphing calculator required. Prerequisite: Placement or grade of C or better in Precalculus (MAT197).

MAT-282 Calculus II 4 Credits
This course is a continuation of Calculus I (MAT281) and begins with a study of numerical integration. Techniques of integration are applied to the following topics: transcendental functions (including their derivatives), area of region between two curves, volume, integration by parts, trigonometric substitution, partial fractions, and improper integrals. Sequences and series are examined with an emphasis on determining convergence or divergence. Taylor and Maclaurin series will also be studied. Graphing Calculator is required. Prerequisite: Grade of C or better in Calculus I (MAT281) or placement.

MAT-283 Calculus III 4 Credits
This course is a continuation of Calculus II (MAT282) and includes plane curves, parametric equations, vectors, vector-valued functions, tangent and normal vectors, arc-length and curvature, functions of several variables, directional derivatives, gradients, extrema of functions of several variables, Lagrange multipliers, line integrals, Green’s Theorem, surface integrals, the Divergence Theorem, Stokes’ Theorem, and applications to physical sciences and engineering. Graphing Calculator is required. Prerequisite: Grade of C or better in Calculus II (MAT282) or placement.

MAT-285 Ordinary Differential Equations 4 Credits
This course will include first and higher order differential equations and applications, series solutions of differential equations, Laplace transforms, systems of linear first order differential equations and numerical solutions of ordinary differential equations. Emphasis will be placed on analytical techniques and engineering applications aided by the use of computer software. Material on linear systems will be incorporated. Prerequisite: Grade of C or better in Calculus II (MAT282).

MAT-291 Linear Algebra 4 Credits
This course will include linear systems of equations, matrix operations, determinants, linear dependency, vector spaces, linear transformations, eigenvalues and eigenvectors. Proofs by mathematical induction and contradiction will be incorporated. Emphasis will be placed on mathematical structure and axiomatic reasoning aided by the use of computer software. Prerequisite: Grade of C or better in Calculus I (MAT281).

Medical Imaging
MIG-101 Introduction to Ultrasound 2 Credits
This course provides introductory exposure to the field of diagnostic medical sonography. The course covers the history and development of the modality as well as relevant medical terminology and vocabulary will be presented. Other topics discussed include caring for patients across cultural lines, the role of a sonographer in the medical field, and the prevention of repetitive strain injuries. Prerequisite: Admission into the Cardiac or General Sonography programs.

MIG-105 Ultrasound Physics and Instrumentation 3 Credits
This course provides students with the theory of ultrasound physics and instrumentation. Topics will include the characteristics of sound waves and the way in which ultrasound is utilized in imaging. Propagation of sound, attenuation and acoustic impedance as well as reflection and scattering will be discussed. Ultrasound equipment components, including transducer construction and recording devices will be covered in great detail. Doppler principles including color Doppler will be examined. Prerequisite: Admission into the Cardiac or General Sonography Program.

MIG-107 Introduction to Medical Radiography 2 Credits
This course covers introductory exposure to the fields of medical radiography and ultrasound. The course covers the history of development of the two modalities, as well as an introduction to radiation protection. The importance of communication between the radiographer and the patient in a diverse environment will be stressed. Other topics will include legal and ethical issues in radiography and medical terminology. This will be a hybrid course, with a web-delivered component. Prerequisite: Admission to the Medical Radiography Program.

MIG-109 Patient Care for Medical Imaging 4 Credits
This lab course covers organization and standards of the medical establishment: basic patient care procedures including vital signs, safety, immobility, body mechanics, and medical asepsis; CPR, and basic EKG, oxygen administration, and venipuncture skills. The importance of communication between the radiographer and the patient will be stressed. Simulated laboratory sessions offer students an
opportunity to return demonstrated techniques. Corequisite: Introduction to Medical Radiography (MIG107) or Introduction to Ultrasound (MIG101).

MIG-111 Imaging Technology I
3 Credits
This course covers topics in physics of special significance in radiography. Specific areas include Newton’s laws, and the concepts of mass force, energy, work, and power. It includes heat and its transmission and transfer. It emphasizes the physics of wave motion. The course covers some general concepts of modern physics including Einstein’s energy equation, the Heisenberg Principle, and quantum concepts. A computer component introduces students to the principles and background of computers. Prerequisite: Fundamentals of Algebra (MAT094) or placement.

MIG-112 Echo I
3 Credits
This course covers an introductory study of adult echocardiography. It begins with an introduction to cardiac embryology, M-mode, two-dimensional and Doppler, and color Doppler techniques. The course also covers transducer orientation and ultrasound appearance of the normal heart and abnormal echo findings in such conditions as valvular heart disease, protesthetic heart valves, pericardial disease, and cardiac tumors. Prerequisite: Introduction to Ultrasound (MIG101).

MIG-115 Interpretation I
4 Credits
This course covers an integrated approach to the echocardiography technique. Students view Mayo Clinic tapes and discuss the basic anatomy, transducer positions, and patient preparation that are necessary in the performance of these examinations. Students practice their skill in a hands-on setting and relate this experience to the didactic material presented in their echo classes. Prerequisite: Patient Care for Medical Imaging (MIG109).

MIG-119 Echo II
3 Credits
This course is a continuation of the material presented in Echo I. It deals specifically with left ventricular function, cardiomyopathies, CAD, color Doppler, and imaging technique used to aid in the demonstration of these diseases states. The course also includes the technique of transesophageal, stress, and contrast echo technique. Prerequisite: Echo I (MIG112).

MIG-120 Radiologic Imaging I
3 Credits
Using lecture and lab sessions, this course presents an introduction to the basic elements necessary for the production of the radiographic image. Course content will include but not be limited to: the role of the radiologic technologist in the healthcare team, the function of the PACS in today’s digital department, digital image receptors (CR, indirect and direct DR), analog imaging systems, latent image formation, processing, filtration and beam restrictors, and technique. Prerequisite: Introduction to Medical Radiography (MIG107).

MIG-121 Related Procedures in Pharmacology
2 Credits
This course provides students with knowledge of diagnostic cardiac procedures, emphasizing indications, utility, and limitation of these procedures. The course also provides students with a basic knowledge and understanding of clinical pharmacology as it relates to cardiovascular disease and echocardiography. Prerequisite: Interpretation I (MIG115).

MIG-122 Positioning I
3 Credits
This course covers basic principles of patient positioning as applied to medical radiography. The course also covers both lecture and lab experiences to help students achieve competency in radiographic examination of the chest, abdomen, and upper and lower extremities. Corequisite: Full-Time Medical Radiography Clinical I (MIG124F) or Part-Time Medical Radiography Clinical I (MIG124P).

MIG-124A FT Medical Radiography Clinical I
2 Credits
This course introduces students to the hospital and its radiology department. The course centers activities on observation and assisting with various basic radiographic procedures. Students begin to develop competency in the performance of radiographic examinations of the chest, abdomen, and upper and lower extremities. Additional expenses may include supplies, equipment, online tracking software, and/or uniforms. Course meets two (2) days/week with 16 hours of clinical practice weekly.

MIG-124P Part Time Medical Radiography Clinical I
1 Credit
This course introduces students to the hospital and its radiology department. The course centers activities on observation and assisting with various basic radiographic procedures. Students begin to develop competency in the performance of radiographic examinations of the chest, abdomen, and upper extremities. Additional expenses may include supplies, equipment, online clinical tracking software, and/or uniforms. Course meets two (2) evenings/week with 8 hours of clinical practice weekly.

MIG-126 Positioning II
3 Credits
This course introduces students to the hospital and its radiology department. The course centers activities on observation and assisting with various basic radiographic procedures. Students begin to develop competency in the performance of radiographic examinations of the chest, abdomen, and upper extremities. Additional expenses may include supplies, equipment, online clinical tracking software, and/or uniforms. Course meets two (2) evenings/week with 8 hours of clinical practice weekly.

MIG-128 Full Time Medical Radiography II
2 Credits
This course covers a continuation of the clinical experience. Students assist in and observe an increasing number of different radiographic examinations as studied in Positioning I (MIG122). Additional expenses may include supplies, equipment and/or uniforms. Course meets two (2) days/week, with 16 hours of clinical practice weekly. Prerequisite: Full-Time Medical Radiography Clinical I (MIG124). Prerequisite: Full-Time Medical Radiography Clinical II (MIG128P).

MIG-128P Part Time Medical Radiography Clin II
1 Credit
This course covers a continuation of the clinical experience. Students assist in and observe an increasing number of different radiographic examinations as studied in Positioning I (MIG122). Additional expenses may include supplies, equipment and/or uniforms. Course meets two (2) evenings/week with 8 hours of clinical practice weekly. Prerequisite: Part-Time Medical Radiography Clinical I (MIG124P).

MIG-131 Imaging Informatics I
4 Credits
This is an introductory course covering the major concepts of state-of-the-art imaging informatics and Picture Archiving and Communication Systems (PACS) administration. Topics presented include but are not limited to: DICOM, DICOM associations, ACR guidelines, the PACS system components, functions and required infrastructure, modality integration, security, and HIPAA compliance. The integration of the PACS systems with the Hospital Information (HIS) and Radiology Information (RIS) Systems, and the perspective of various stakeholders of the Imaging Informatics/PACS enterprise environment will be a major focus of this course, with a particular emphasis on the responsibilities of the PACS administrator. Upon completion of this course the student will have the basic knowledge, skills and competencies necessary to administer a PACS system at a fundamental level. Corequisite: Intro to Diagnostic Imaging and PACS (MIG16).

MIG-133 Imaging Informatics II
4 Credits
This hybrid course covers the more complex aspects of Imaging Informatics/Picture Archiving & Communication Systems and proceeds to advanced topics including but not limited to: Data management and image distribution, teleradiology, PACS system security, clinical PACS acceptance, implementation, monitoring and evaluation, common pitfalls and challenges, loading of software onto client servers, archive back-up, disaster recovery, DICOM-based Medical Imaging Informatics, the Electronic Health Record, Computer Aided Diagnosis and integration with PACS, training considerations for staff, and new directions in PACS and imaging informatics. This course continues to focus on the duties of PACS administration professionals and covers in more depth the relation to and interaction with the Hospital Information (HIS) and Radiology Information (RIS) Systems as well as PACS Internet applications. Upon completion of this course students will have the knowledge, skills and competencies necessary to administer PACS systems. Prerequisite: a grade of C or better in Imaging Informatics I (MIG131).

MIG-161 Introduction to Diagnostic Imaging and PACs
3 Credits
Designed for students with previous experience in Medical Imaging or Computer Science who wish to pursue a career in PAC’s administration, this course introduces the student to the history of medical imaging with a focus on state-of-the-art diagnostic imaging, the DICOM standard, and the clinical relevance of PACs to the members of the Radiology Department, referring physicians, the overall delivery of healthcare. For additional information and/or syllabus contact CITDepartment@bhcc.mass.edu. Prerequisite: Admission to PACs certificate program.

MIG-201 Echo III
4 Credits
This continuation course of Echo I and II covers advanced cardiac interpretation and echo features of coronary artery disease and valvular heart disease. Students discuss a basic overview
of pediatric echo and congenital heart disease. The course reviews related echo material before placement in the clinical sites. Prerequisite: Echo II (MIG119).

MIG-203 Interpretation II 3 Credits
This continuation course of Interpretation I covers an integrated approach to the echocardiographic technique. Students study the Mayo Clinic tapes and discuss the development of skill necessary to exercise independent judgment and discretion in the performance of echocardiographic examinations. Students review and critique weekly case studies. The class uses group demonstrations to highlight the patient/sonographer/physician interactions. Students learn pathologic processes in order to build on their knowledge base in the interpretation of normal and abnormal echo features. Prerequisite: Interpretation I (MIG115).

MIG-205 Vascular Ultrasound 3 Credits
This course covers an introduction to the fundamentals of vascular ultrasound. It includes hemodynamic, Doppler spectral analysis, and duplex visualization of the cerebrovascular system. It also covers carotid, venous, and transcranial Doppler techniques. Prerequisite: Echo II (MIG119) for Cardiac Sonography Option. Corequisite: General Sonography Clinical II (SON123) for General Sonography Option.

MIG-207 Ultrasound Physics and Instrumentation for the Cardiac Sonographer 2 Credits
This course is a continuation of Ultrasound for the Cardiac Sonographer Physics and Instrumentation and is designed for the cardiac sonography student to integrate their knowledge of ultrasound physics and instrumentation with clinical practice of actually producing a high quality diagnostic image. Image quality will be stressed throughout this course through the use of hands-on applications in the ultrasound lab. Additional topics discussed will include: Spectral display, image artifacts, bioeffects and safety as well as discussions relating to 3D ultrasound and contrast agents. Prerequisite: Ultrasound Physics and Instrumentation (MIG105) and Echo II (MIG119).

MIG-211 Cardiac Sonography Clinical I 3 Credits
This course covers the development of students’ skills in the performance of echocardiograms at the clinical sites. Under supervision of their clinical instructor and the BHCC clinical coordinator, students gain knowledge through scanning patients in the clinical setting. Students’ performances are evaluated through clinical competencies in each related echo area. Additional expenses may include supplies, uniforms, and/or uniforms. Course meets: three (3) days/week. Prerequisite: Echo II (MIG119), Corequisite: Echo III (MIG201).

MIG-213 Cardiac Sonography Clinical II 4 Credits
This course covers a continuation of clinical practical experience in echocardiography and further refines students’ skills in the performance of echocardiograms. Under supervision of their clinical instructor and the BHCC clinical coordinator, students continue to integrate skills while continuing hands-on experience at the clinical sites. Students’ performances are evaluated through clinical competencies in related echo area. Additional expenses may include supplies, equipment, and/or uniforms. Course meets: four (4) days/week. Prerequisite: Medical Radiography Clinical I (MIG211), Corequisite: Echo IV (MIG215).

MIG-215 Echo IV/Interpretation 4 Credits
This course covers a continuation of Echo I, II, and III, and deals with advanced echo technique and interpretation. The course covers related procedures such as angio, thallium, muga studies, EKG, and coronary artery sonography. Students compile a folder of exams, videos, and related medical findings to present in class. The class focuses on helping students coordinate the multi-facets of an examination including the interpersonal relationships and professional or ethical situations that may arise. Prerequisite: Interpretation II (MIG203).

MIG-216 Advanced Interpretation Seminar 2 Credits
This is an interactive course that provides the cardiac sonography student an opportunity to enhance their cardiac sonography interpretation skills through the use of slides, videos, and ASDM registry exam questions. A review of cardiovascular physiology and instrumentation will occur and the student will participate in mock registry question sessions through the use of ASDM registry preparation material. Prerequisites: Cardiac Sonography Clinical I (MIG111) and Cardiac Sonography Clinical II (MIG203). Corequisite: Echo IV/Interpretation (MIG215).

MIG-217 Cardiac Sonography Clinical III 4 Credits
This course covers a continuation of clinical practical experience in echocardiography. Under supervision of the clinical instructor and the BHCC clinical coordinator, students enhance their skills in performing echocardiograms. Faculty evaluate students’ performances through clinical competencies in each related echo area. Students gain competency in the performance of echoangiograms. Students also obtain related experience in examinations such as stress echo and transesophageal. Additional expenses may include supplies, equipment, and/or uniforms. Course meets: five (5) days/week. Prerequisite: Cardiac Sonography Clinical II (MIG213).

MIG-220 Positioning III 2 Credits
This course applies the fundamentals of Positioning I and II to advanced level radiographic examinations. Lecture and lab sessions cover anatomy and radiography of the skull, facial bones, and sinuses, TMJ, mastoids, and other advanced skull exams. The course provides an introduction to advanced exams including arthograms and myelograms. Prerequisite: Positioning II (MIG126).

MIG-222F Full-Time Medical Radiography Clin V 3 Credits
This course allows students to develop additional experience in the materials covered in Positioning I, Positioning II, and Positioning III, and further to expand their clinical skills. Additional expenses may include supplies, equipment, and/or uniforms. Course meets three (3) days/week with 24 hours of clinical practice weekly. Prerequisite: Full-time Medical Radiography Clinical III (MIG222F).

MIG-228P Part-Time Medical Radiography Clin V 3 Credits
This course allows students to develop additional experience in the materials covered in Positioning I, Positioning II, and Positioning III, and further to expand their clinical skills. Additional expenses may include supplies, equipment, and/or uniforms. Course meets five (5) days/week, with 35 hours of clinical practice weekly. Prerequisite: Part-time Medical Radiography Clinical III (MIG222P).

MIG-230 Radiation Protection 3 Credits
This course covers an overview of the effects of ionizing radiation on the human body and the protective measures available to minimize those effects. The course examines the effects that produce somatic as well as genetic changes. This
COURSE DESCRIPTIONS

Medical Laboratories Technician

MLT-211 Hematology and Hemostasis
3 Credits
This course consists exploring the theory and practice of routine hematology. Topics include the collection and handling of clinical specimens, the origin, development, and function of human blood cells in health and disease, hemostasis, and coagulation, and quality control. Routine hematology and coagulation testing will be emphasized. Prerequisite: Introduction to Clinical Laboratory Science (CLS111).

MLT-212 Medical Microbiology and Lab
4 Credits
This course is a comprehensive study of both theory and practical aspects of clinical microbiology. Emphasis will be placed on the collection and handling of clinical specimens as well as the primary isolation and identification of microorganisms. Frequently encountered bacterial, pathogenic to humans. Other topics discussed include antimicrobial chemotherapy and host resistance. Other organisms examined include fungi and parasites. This course is open only to admitted CLS students. Prerequisite: Introduction to Clinical Laboratory Science (MLT111) and Microbiology/Lab (BIO205).

MLT-213 Immunology and Serology
4 Credits
This course introduces the theoretical principles of immunology which involve the structure, function, and interactions of the immune system. The serological techniques useful in the diagnosis of many diseases will be reviewed and performed. Prerequisites: Introduction to Clinical Laboratory Science (MLT111).

MLT-241 Immunohematology
4 Credits
This course consists of the study of the genetic basis and immunological interaction of the major blood group antigens and antibodies. Topics will include compatibility testing, antibody screening and identification techniques, blood donation, transfusion therapy, record keeping, and quality control techniques. Prerequisite: Immunology & Serology (CL5213).

MLT-242 Clinical Chemistry
4 Credits
The primary focus of the course is the biochemical analysis of blood and body fluids in health and disease. Topics include routine manual and automated testing methods, electrophoresis, molecular techniques, safety practices and quality control. Prerequisites: Chemical Science II/Lab (CHM111) or Introduction to Inorganic Chemistry/ Lab (CHM120), and Immunology & Serology (MLT213).

MLT-251 Clinical Laboratory Sciences Practicum
12 Credits
This course consists of Practicum experiences at one of the College’s clinical affiliates in which the student acquires knowledge and experiences in laboratory practices and procedures. Prerequisite: Successful completion of Clinical Laboratory Sciences coursework.

Magnetic Resonance (MR)

MRC-111 MR Concepts I
3 Credits
This interactive, web-based course begins with MR screening and safety, legal and ethical principles,
# Nursing

### MRC-299 MR Clinical Internship
3 Credits
This 100-hour clinical introduction will enhance the academic experience for students by introducing them to the clinical practice of MRI. Students are responsible for providing their own clinical site. Clinical sites must be pre-approved by program faculty. Students must comply with the clinical policies, as stated in the Student Manual before attending clinical. Clinical Offender Record Information (CORI) check will be conducted on all students before placement, and the outcome may impact the student’s ability to participate in the internship experience. Health clearance is also required prior to participation. Pre/corequisites: MR Concepts II (MRC211) and permission of department chair.

### MUS-113 Jazz Ensemble
3 Credits
This course offers additional instruction in vocal skills. A continuation of Vocal Performance I, this course fosters ear training, note reading, some keyboarding application, and much creative activity.

### MUS-119 Music Appreciation I
3 Credits
This course covers the full spectrum of rhythm, intervals, scales, key signatures, chords, triads and sevenths, and cadences for beginning students. The course fosters ear training, note reading, some keyboarding application, and much creative activity.

### MUS-122 Foundations of Music
3 Credits
This course covers the full spectrum of rhythm, intervals, scales, key signatures, chords, triads and sevenths, and cadences for beginning students. The course fosters ear training, note reading, some keyboarding application, and much creative activity.

### MUS-129 Rock and Roll History
3 Credits
Beginning with the roots of rock in the rockabily and blues traditions, continuing through the classical rock of the 50’s and 60’s, this course covers all styles of rock, current and past. The course covers listening to and identifying specific idiosyncrasies of various performers that are central to the study. This course meets General Education Humanities Requirement Area 6.

### MUS-131 Piano I
3 Credits
This course provides group instruction for the beginner in keyboard technique, including note reading, fundamentals of rhythm, intervals, chords and scales, and a variety of keyboard literature. Students progress at their individual pace.

### MUS-132 Piano II
3 Credits
A continuation of Piano I (MUS131), this course emphasizes music reading and expands the repertoire. Prerequisite: Piano I (MUS131) or permission from instructor.

### MUS-135 Counterpoint and Harmonization
3 Credits
Students learn to apply counterpoint, the art of combining independent melodies, and harmonization, which provides suitable chordal accompaniment to melody. Prerequisite: Foundations of Music (MUS122).

### MUS-151 Music in the United States
3 Credits
A survey of musical practice in the United States from the earliest colonial period to the present, this course is designed to give the student an understanding of the richness of our country’s musical heritage, both popular (vernacular) and classical (cultivated). Students listen to and discuss old and new music of many styles - folk, symphonic, rock, opera, religious, ethnic, jazz, and pop.

### MUS-157 Vocal Performance Workshop
3 Credits
This is a workshop class that offers instruction in basic vocal skills. Instruction in these techniques will lead students to develop their ability to sing accurately and with confidence in any style. This class is open to anyone with a sincere interest in becoming a better singer, regardless of past vocal experience. Each class begins with a group warm-up session that leads to individual performances before the instructor and the rest of the class.

### MUS-159 Vocal Performance Workshop II
3 Credits
A continuation of Vocal Performance I, this class offers additional instruction in vocal skills. Instructions in these techniques will further develop the student's ability to sing accurately and confidently in any style. Prerequisite: Vocal Performance Workshop I (MUS157).

### MUS-161 World Music
3 Credits
This course fosters an appreciation of music from around the world (especially non-Western music.) Students will explore the music of Africa, the Middle East, Asia, East Asia, the Indian subcontinent, and the Americas, including the Caribbean. Students will learn how music functions as an expression of social customs and shared values, and how it is impacted by the history and geography of each culture. Prerequisites: Grade of C or better in Academic Reading III (ESL098) or Reading Skills II (RDC095) and Writing Skills II (ENG095) or exemption by placement testing.

### Nursing

#### NUR-95 Success in Nursing
3 Credits
This introductory course focuses on assisting students to adapt to the upcoming challenges in the nursing curriculum. The course emphasizes test-taking skills, study skills, critical thinking, learning styles, and therapeutic nurse-patient communication and beginning nursing concepts. The course is designed for nursing students accepted to the nursing program in the fall semester and those students planning to apply to the Nursing Program. Course meets: 3 hrs. lecture.

#### NUR-99 Nursing Pathways
2 Credits
This course is designed for students who are seeking readmission to the nursing program. This course will assist students in analyzing their study skills, and designing a path for successful completion of the nursing program. Topics include time management, stress reduction, adapting study skills, and test-taking techniques and practice. Students are encouraged to use introspection and critical thinking as they formulate a plan that will enable them to complete the nursing program and take the licensure exam after graduation. Computer software and small group work for problem solving in answering multiple-choice questions will be utilized.

#### NUR-100 Drug Calculation
1 Credit
This course covers the apothecary, metric, and household systems of weights and measures and is designed for students admitted to the Nursing Program. The course focuses on the computation of drug dosages for oral and parenteral medications. It emphasizes the applications of skills necessary to compute dosages for infants, children, and adults and the calculations of intravenous infusions and medications. Class meets: 1 hr. lecture. Prerequisite: Foundations of Algebra (MAT097) or placement.

#### NUR-101 Health Assessment and Basic Skills/Lab
2 Credits
This course introduces students to basic health assessment of the adult client using the body systems approach. Students acquire hands on physical assessment skills and then transfer these skills to the clinical setting. Students also learn the basic nursing skills necessary to provide care to the patient in the clinical setting. Additional expenses may include supplies, equipment, and/ or uniforms. Course meets: 1 hr. lecture, 3 hrs. simulation lab. Prerequisites: Acceptance into the Nursing Program and Anatomy/Physiology I Lab (BIO203), College Writing I (ENG111), and Drug Calculations (NUR100).

#### NUR-111 Nursing I
7 Credits
This course provides the foundation for the theory and practice of associate degree nursing.
The concepts of optimal health, person, nurse, environment, and holistic nursing are introduced within the framework of health promotion, health restoration, and health maintenance. Critical thinking is introduced to the critical thinking skills required for nursing practice. The student learns and begins to apply the nursing process in the promotion of health for adult clients using functional health patterns categories. Additional expenses may include supplies, equipment, and/or uniforms. Course meets: 5 hrs. lecture; 6 hrs. clinical practice in selected health care facilities. Prerequisite: Acceptance into the Nursing Program and Anatomy and Physiology I or Lab (BIO203), College Writing I (ENG111), and Drug Calculations (NUR100).

**NUR-112 Nursing II 10 Credits**

This course builds upon the concepts introduced in Nursing I (NUR111). Students apply the nursing process within the framework of health restoration, health maintenance, and health promotion in the care of adults with medical/surgical and mental health problems. Students use critical thinking skills to meet the health care needs of the adult client. Students also learn beginning acute care nursing skills necessary to provide care to the whole person. Additional expenses may include supplies, equipment, and/or uniforms. Class meets: 5 hrs. lecture; 3 hrs. simulation lab; 12 hrs. clinical practice in selected health care facilities. Prerequisites: Anatomy and Physiology I or Lab (BIO204), Health Assessment and Basic Skills/Lab (NUR101), Nursing I (NUR111), and Principles of Psychology (PSY101).

**NUR-211 Nursing III 9 Credits**

This course builds upon the concepts introduced in NUR101, NUR111, and NUR112 and includes the nurses role in health promotion, health restoration, and health maintenance for the childbearing and childrearing family. Students use critical thinking skills in the application of the nursing process. Students provide nursing care to the childbearing family, and to children with physical and mental health problems. Additional expenses may include supplies, equipment, and/or uniforms. Class meets: 5 hrs. lecture; 12 hrs. clinical practice in selected health care facilities. Prerequisites: Microbiology/Lab (BIO205), Nursing II (NUR112), and Human Growth/Development (PSY113).

**NUR-212 Nursing IV 9 Credits**

This course builds upon all previous courses focusing on health promotion, health restoration, and health maintenance for persons with complex health problems. Students apply the principles of delegation and leadership in the clinical setting. Students integrate critical thinking skills in the application of the nursing process and in clinical decision-making. Clinical practice includes hospital/health care facilities and community experience. Students will select observed practices, use of the computer lab. Course meets: 5 hrs. lecture; 12 hrs. clinical practice in selected health care facilities. Prerequisites: Nursing III (NUR211).

**NUR-213 Nursing Seminar 1 Credit**

This seminar focuses on current health care issues and the ethical, legal, and professional framework necessary for nursing practice. The course assists in the transition from student nurse to beginning practitioner. The course utilizes a variety of learning activities that promote critical thinking. The course explores topics such as conflict resolution, cultural competence, health care access, empowerment, and lifelong learning. Course meets: 1 hr. lecture. Prerequisite: Nursing III (NUR211).

**Office and Information Management**

**OIM-100 PC Keyboarding Techniques 1 Credit**

This is an introductory course in college keyboarding designed for students with little or no keyboarding proficiency as well as those looking to upgrade or refresh their skills. Learning to type properly has never been more important. Using state-of-the-art, hands-on, self-paced software, students proceed from basic lessons through accuracy and speed-building exercises designed to prepare them for careers requiring keyboarding proficiency. Taught through BHCC’s on-line eCollege, students submit hands-on progress reports to the course instructor as they proceed through each lesson. Upon completion of this course, students will gain the skill and knowledge needed to evaluate their career goals and to complete the practicum. Minimum speed of 20 words per minute at a minimum of 1 error per minute. For additional information and/or a course syllabus, contact CITDepartment@bhcc.mass.edu.

**OIM-102 Medical Computer Applications 3 Credits**

This course includes keyboarding instruction with an emphasis on proper technique, speed building, and proofreading. Students learn the correct format for business letters, memorandums, business reports, and medical documents. Students use the Internet for e-mail and job searches. In addition, they create a resume, reference sheet, and cover letter. Note: For Allied Health students or by permission of department chair.

**OIM-103 Microsoft Word I 3 Credits**

This course uses Microsoft Word and covers applications, including but not limited to font and paragraph settings, page setup, table format, headers and footers, page numbering in sections, footnotes, citations, bibliographies, mail merge and envelopes, spell check and thesaurus, and electronic forms. Students create documents commonly used within academic and business settings. Students develop correct keyboarding technique in order to meet the industry standard for speed and accuracy. Note: An examination test is available through the Center for Self-Directed Learning each semester for students with previous keyboarding experience by contacting the Prior Learning Coordinator.

**OIM-104 OIM Career Exploration 1 Credit**

This online class provides students with the tools needed to explore career options and to explore strategies for securing employment within the office and/or medical office job market. Students will complete modules that engage them in activities designed to evaluate values, skills, and interests as related to their prospective careers. Students will use resources on the BHCC portal and elsewhere to explore individual careers and research employers and the local job market. Resumes and cover letters will also be completed.

**OIM-106 Records and Information Management 3 Credits**

This course provides an introduction to records management, including alphabetic, subject, numeric and geographic filing guidelines, as well as storage media, space limitations, compliance and risk management, and disaster recovery. Students will complete hands-on projects using Outlook for customizing and flagging e-mail, using search folders, creating and using contacts/notes, scheduling meetings, and integrating Word merge functions using contacts. File management using Windows Explorer and business research using Internet Explorer are integrated with PowerPoint presentations to tie together all the various professional skills using a qualitative approach. Prerequisites: Application/Concepts (CIT110) or Information Technology Problem Solving (CIT113).

**OIM-112 Microsoft Word II 3 Credits**

This course uses Microsoft Word to create common business documents such as letters, memorandums, tables, reports, desktop publishing flyers, and electronic forms. Students learn to use spell checker, macros, templates, bullets, and numbering, leaders, merging, sorting, hyperlinks, section breaks, styles, formulas, clip art, WordArt, and column layout. Diagnostic, and speed building exercises are used to improve keyboarding accuracy and speed. A minimal speed of 40 words per minute is strongly recommended. Students also acquire skills that prepare them for MOUS (Microsoft Office User Specialist) certification. Prerequisite: Grade of C or better in MS Word I (OIM103) or Keyboarding: Document Generation I (OIM101) and Applications/Concepts (CIT110) or by permission of the department chairperson.

**OIM-115 Administrative Technology and Procedures 3 Credits**

This course introduces administrative skills vital for employment in business and industry, including telecommunications, mail and copy services, travel, meeting, and conference arrangements; teleworkers/virtual assistants; customer service; and job applications and techniques. The class develops problem solving, critical thinking, organizational skills, and interpersonal skills while emphasizing work ethics, teamwork, and cultural diversity. To enhance these skills, students work individually and in teams to conduct library, Internet research and give presentations in class. Personnel from area corporations may participate in class discussions. Prerequisites: Keyboarding: Document Generation (OIM101) and Applications/Concepts (CIT110).

**OIM-121 OIM Practicum 1 Credit**

This field experience takes place after students have completed the course work required for the certificate. Students work for 45 hours within a work environment related to their career goals, abilities, and skills. Students complete the OIM Practicum course prior to the practicum and participate in a weekly seminar during the field experience. Prerequisites: Students complete all coursework with a grade point average of 2.75 or higher. Students must meet with the Internship Coordinator during the semester prior to completing the practicum.

**OIM-132 Administrative Business Communication I 3 Credits**

This course utilizes computer applications in the Language Lab for individualized review of fundamental English skills based on pre-test results. Work will focus on emails, memorandums, and letters relevant to office and/or medical office environments. Students will develop skills in taking minutes at meetings.
Physics

Students will develop questionnaires, complete surveys, and write summary reports. Students will create resumes and human resources personnel will provide feedback. Students will create PowerPoint presentations based on data provided by the instructor. Students learn to use an English reference guide to verify correct English usage. Prerequisite: Writing Skills II (ENG095). Pre/corequisite: Introductory MS Word (OIM101).

OIM-170
Procedures for the Medical Office
3 Credits
This course includes Windows, word processing, medical office procedures, and computerized medical management software. Students create documents commonly used in a medical office as well as job application materials, using templates, macros, and/or merged documents. Concepts covered include interpersonal communications, telecommunications, billing and collections, reimbursement procedures, records management, and mail classification and procedures. Hands-on experience using computerized medical management software provides practice in entering patient information, diagnostic cases, and financial transactions; processing insurance claims; scheduling patient appointments; and generating commonly used reports. Note: For Allied Health students or by permission of department chair. Prerequisite: Keyboarding: Document Generation I (OIM101) or Medical Computer Application (OIM102; formerly OIM142) or any computer applications course or by permission of the department chair.

OIM-190
Medical Information Management
3 Credits
This course covers the medical environment and staff patient and staff scheduling medical documents and computerized medical applications, professional activities and travel arrangements for medical staff, health insurance, and HIPPA standards, and ICD and CPT coding. Students use a computerized patient accounting software application to enter patient information, diagnostic and procedure codes, schedule and revise patient and staff appointments, process insurance claims, enter financial transactions, and generate financial reports. Students complete individual team projects that include Internet research as well as a written and oral presentation on an issue related to medical office administration. Pre/corequisite: Keyboarding: Document Generation I (OIM101).

OIM-199
Technology on the Move
3 Credits
Students explore career opportunities in medical, legal, and executive administration fields. This course includes critical thinking and teamwork projects to help students develop the ability to give and receive constructive criticism in a supportive environment. Students complete individual and team projects that use Internet research and library resources. Based on research related to office and information management issues, they develop written and oral presentation skills. Time management, listening, note-taking, and test-taking skills are emphasized. Security issues, legal and ethical issues, and cultural diversity are covered. Current students, alumni, and business personnel will provide perspectives on how to succeed in academe and in the business world. Prerequisites: Writing Skills II (ENG095) or placement and Academic Reading (ESL098) or Reading Skills II (RDG095) or placement. Pre/corequisite: Keyboarding: Document Generation I (OIM101).

OIM-200
Introduction to Physicians’ Billing
3 Credits
This course presents the revenue cycle concept to students, which encompasses registration practices and the impact this process has on the billing function. The varied health care delivery systems and the history of the delivery of medical care are presented. The variety of prospective reimbursement systems on data collection, billing, and effective processes are defined and discussed. The principles of ICD and CPT coding, the management of data, and the constantly changing regulations of CMS and other external regulators is reviewed. Technicalities of managing all aspects of claims submission and denial are examined. The course is offered only in the evening. Pre/corequisite: Medical Terminology (NHP180).

OIM-232
Administrative Business Communication II
3 Credits
The course covers human relations skills, non-verbal communication, diversity, cultural sensitivity, and global awareness. Meeting and event planning as well as telephone techniques are included. Students research business-related topics, write formal reports and work in groups to develop PowerPoint presentations. Resume writing, letter writing, and mock interviews are included to prepare students for internship placement. Students continue individualized review of English skills as needed. This course is offered fall only. A CORI check may be required to participate in the Office and Information Management Internship. Prerequisite: Grade of C or better in Business Correspondence I (OIM120) or Administrative Business Correspondence I (OIM132). Pre/corequisites: Records and Information Management (OIM106), Document Generation I (OIM110) or MS Word II (OIM112), and Technology and Procedures (OIM115) or permission of department chairperson.

OIM-299
Office/Information Management Internship
3 Credits
This field experience takes place during the spring semester of the second year and provides specific occupational preparation for office careers. Students work in an off-campus work environment related to their career goals, abilities, and skills. Students participate in seminars prior to internship and during the field experience. This course is offered spring semester only. Pre/corequisites: All courses within major or by chair approval. Note: Administrative Business Communication (OIM230) is offered fall semester only and must be taken the fall semester prior to internship.

Philosophy

PHL-101
Introduction to Philosophy
3 Credits
This introductory course acquaints students with the philosophic method, the problems and living issues of philosophy, and the great philosophers. Prerequisites: Grade of C or better in Academic Reading III (ESL098) or Reading Skills II (RDG095) and Writing Skills II (ENG095); or exemption by placement testing.

PHL-103
Ethics
3 Credits
This course covers the major philosophical issues in normative ethics and moral philosophy. It covers discussions regarding philosophical views about what is morally right or wrong and the applications to the individual and society. This course emphasizes contemporary problems, issues, and value conflicts. Grade of C or better in Academic Reading III (ESL098) and Academic Writing III (ENG095) or Reading Skills I (RDG090) and Writing Skills I (ENG090), or exemption by placement testing.

PHL-111
World Religions
3 Credits
This course analyzes the beliefs and practices of major world religions, including Hinduism, Buddhism, Judaism, Christianity, and Islam. Through study of these religions, students compare the beliefs of various traditions and understand their values in an historical context. The course meets General Education World View Requirement Area 3. Prerequisites: Grade of C or better in Academic Reading III (ESL098) or Reading Skills II (RDG095) and Writing Skills II (ENG095), or exemption by placement testing.

PHY-191
Introduction to Physics/ Lab
4 Credits
This course provides the background for the study of electronics and other technical areas. Topics include classical mechanics, the conservation laws, and electrodynamics. This course meets General Education Science and Technology Requirement Area 5. This course is for Electric Power Utility Program students only. Prerequisite: A grade of C or better in Topics in Algebra/Trigonometry (MAT193).

PHY-201
General Physics I/Lab
4 Credits
This introductory course covers the principles of physics, using a problem-solving approach. Laws of motion, forces, work and energy, momentum and harmonic motion will be covered. For the biology student this course will provide him or her with an enhanced understanding of the physical aspects of living systems. Laboratory work will reinforce the understanding of physical concepts and promote the development of problem solving skills. This course satisfies the physics requirement of the AS Biological Science program. This course does not satisfy the physics requirement of the AA Chemical Science or Physics/Engineering concentrations or the AS Engineering program. Prerequisite: Grade of C or better in Precalculus (MAT197).

PHY-202
General Physics II/Lab
4 Credits
This introductory course covers the principles of physics, using a problem-solving approach. Laws of motion, forces, work and energy, momentum and harmonic motion will be covered. For the biology student this course will provide him or her with an enhanced understanding of the physical aspects of living systems. Laboratory work will reinforce the understanding of physical concepts and promote the development of problem solving skills. This course satisfies the physics requirement of the AS Biological Science program. This course does not satisfy the physics requirement of the AA Chemical Science or Physics/Engineering concentrations or the AS Engineering program. Prerequisite: Grade of C or better in General Physics I/Lab (PHY201).

PHY-251
College Physics I/Lab
4 Credits
This course is an introduction to some of the fundamental principles and concepts of physics, using a problem-solving approach. The topics considered include the basic equations of motion,
Newton’s laws and their applications, work, energy, momentum, rotational kinematics and dynamics, conservation laws, laws of universal gravitation, and simple harmonic and oscillatory motion. Course meets: 3 hrs. lecture; 3 hrs. lab. Prerequisite: Grade of C or better in Calculus I (MAT281).

PHY-252 College Physics II/Lab 4 Credits
In the first half of the course, this continuation of College Physics I (PHY251) covers the following topics: basic topics in electricity and magnetism, electromagnetic radiation, the nature of light, and optics. In the second half, the course covers an introduction to some basic ideas in modern physics. It also covers these additional topics: atomic structure, quantization, and nuclear physics. Course meets: 3 hrs. lecture; 3 hrs. lab. Prerequisite: College Physics I/Lab (PHY251). Pre/corequisite: Grade of C or better in Calculus II (MAT282).

Paralegal
PLG-101 Introduction to Law 3 Credits
This course provides students with an understanding of the paralegal field. The course assists students to become familiar with all aspects of the legal system. The course emphasizes the role of the paralegal and the way that role complements that of the lawyer. The course explores the role of law in our society, the judicial system, contract law, tort law, equity, and criminal law. Prerequisites: Writing Skills II (ENG095), Reading Skills II (RDG095) or Academic Reading III (ESL098) or placement.

PLG-102 Legal Research and Writing 3 Credits
This course covers an introduction to legal writing and proper use of legal terminology in developing and drafting a format for the legal memorandum, preparing briefs, and, in particular, formulating research skills. Prerequisite: Introduction to Law (PLG101).

PLG-103 Litigation 3 Credits
Litigation is a core function of many law firms. Students will learn the rules and requirements necessary to provide effective litigation support in a law office. Topics include the organization and jurisdiction of federal and state courts, the preparation of pleadings, motions, interrogatories, judicial notice, preparation and admission of evidence, subpoenas, depositions and trial notebooks, internet research, analyzing and summarizing documents, arguing points, and particular, formulating research skills. Prerequisite: Introduction to Law (PLG101).

PLG-104 Legal Ethics 3 Credits
This course presents the major areas of legal ethics placing special and comprehensive emphasis on how the rules affect paralegals. It aids students in understanding how the legal profession is regulated generally and the impact that paralegals conduct has on the lawyers who employ them. Through case studies, geared specifically toward paralegals, demonstrations of the rules are introduced and applied. Prerequisite: Introduction to Law (PLG101).

PLG-105 Practical Legal Writing 3 Credits
This course is intended to be a continuation of Legal Research and Writing (PLG102). The course provides students the opportunity to improve their writing skills for all aspects of working in a legal environment, including, legal correspondence, legal memorandums, case briefs and a variety of court documents. The course covers the structure and jurisdiction of the Federal and Massachusetts Court Systems. Prerequisites: Introduction to Law (PLG101), Legal Research & Writing (PLG102), and College English (ENG111).

PLG-201 Family Law 3 Credits
This course covers the laws concerning family relationship, marriage, cohabitation, adoption, divorce, child custody, support, alimony, and the effects of wills and probate. Prerequisite: Introduction to Law (PLG101).

PLG-202 Business Organizations 3 Credits
Choosing the proper form of business organization can mean the difference between success and failure. Many attorneys are involved in advising their commercial clients regarding the appropriate form of business. This course covers the rules and requirements to establish sole proprietorships, partnerships, limited liability companies, limited liability partnerships, business trusts, corporations and joint ventures. Practical considerations include the preparation and management of the documents necessary for the organization and maintenance of each business entity. Corporate materials are reviewed, as are corporate characteristics, formation procedures, financial structure, meetings, dividends, share ownership, amendments, dissolution, and Massachusetts incorporation procedures. Prerequisite: Introduction to Law (PLG101).

PLG-203 Real Estate Law 3 Credits
This course thoroughly investigates the theory and practice of real estate transactions from the perspectives of both the buyer and the seller. The topics include examination of titles, estates in land, restrictions, easements, covenants, options, deeds, mortgages, and foreclosure proceedings. Prerequisites: Writing Skills II (ENG095), Reading Skills II (RDG095) or Academic Reading III (ESL098) or placement.

PLG-204 Wills, Estates and Trusts 3 Credits
This course covers the initial investigation and preparation of estates and trusts in detail. Topics include the causes and effects of trusts, wills and probate; litigation and procedural laws. Prerequisites: Writing Skills II (ENG095), Reading Skills II (RDG095) or Academic Reading III (ESL098) or placement.

PLG-299 Paralegal Internship 3 Credits
An internship in Paralegal Studies is a hands-on learning experience at law firms, public agency, corporation, or other law-related organizations, under the direct supervision of a legal professional. It is intended to provide students the opportunity to gain practice in their field of study. Students perform 150 hours of internship service over the course of 10-15 weeks, during the spring, fall, or summer semesters. Students meet bi-weekly with their advisor to prepare papers, work on related projects, and discuss experiences with other students. Students are responsible for following all guidelines in the BHCC Internship Handbook. Prerequisites: Completion of all PLG required courses. Pre/corequisite: a cumulative grade point average of at least 3.0 in the program and approval of the paralegal faculty internship coordinator.

Pharmacy Technician
PMT-103 Pharmacy for the Surgical Technologist I 1 Credit
This course provides the student with a basic foundation in pharmacology. This will help prepare the student to safely and appropriately prepare and manage operating room medications, solutions and specimens. This class is a lecture class and meets one hour per week for 15 weeks. Calculations involving fractions and decimals will be reviewed. Students will be introduced to common medical terminology and weights and measures used routinely in the measurement and administration of medications. Use and understanding of the metric system will be emphasized. Prerequisite: admission into the Surgical Technology Program.

PMT-105 Pharmacy for the Surgical Technologist II 1 Credit
This is the second in a two-course sequence designed to provide the student with a basic foundation in pharmacology. This course is oriented to providing the student with information regarding commonly used pre-operative and post-operative medications. This class is a lecture class and meets one hour per week for 15 weeks. Drugs will be discussed by grouping them into general classes and with important differences among group members being highlighted. The dosage, routes of administration, generic and trade names, common adverse reactions and important drug interactions will be emphasized. Prerequisite: Pharmacy for the Surgical Technologist I (PMT103).

PMT-111 Pharmacy Practice for Pharmacy Technicians I 4 Credits
The course provides the student with the fundamental concepts and skills upon which the role of the LPN is built. Concepts of Health care delivery throughout the age-related continuum of care are introduced such as, patient-centered care and communication and leadership, legal and professionalism. Basic nursing interventions and the concepts of system-based and evidence-based practice are introduced and interwoven with the importance of safety, quality improvement and cultural diversity. Students acquire physical assessment skills and learn the basics of informatics and technology which are transferred to the clinical setting where teamwork and interdisciplinary collaboration are practiced and encouraged. Additional expenses may include supplies, equipment and uniforms. Course meets 6 hours of lecture / lab 1-2 days per week and 6 hours of clinical practice per week at the college or at selected health care facilities. Prerequisite: acceptance into the Practical Nursing Program, Foundations of Algebra (MAT097), College Writing I (ENG 111), Anatomy and Physiology I/Lab (BIO 203) and Anatomy and Physiology II/Lab (BIO 204).

PMT-112 Pharmacy Practice for Pharmacy Technicians II 4 Credits
Practical Nursing II is a course which builds on all the semester I courses and concepts with particular attention to the individuals with more complex health care needs and with problems related to alteration in health status. Principles of Nutrition and Pharmacology are applied in relation to health
Practical Nursing

and the disease process. Teaching is an integral component of each unit of study. Subjective and objective data are influenced by culture, age and previous experiences of the patient and is a building block for critical thinking. The Nursing Process is utilized as the critical thinking tool in assessing this data for the purpose of planning and implementing holistic individualized nursing care. Applications of the concepts of caring and therapeutic nurse-patient relationships are stressed. During the clinical experience, the student will be accountable for providing competent, ethical and legal care in the role of the Practical Nurse. Additional expenses may include supplies, equipment and uniforms. Course meets 6 hours of lecture / lab 1-2 days per week and 18 hours of clinical practice per week at the college or at selected health care facilities. Prerequisite: Practical Nursing I (PNP 111), Drug Calculation (NUR 100) and Principles of Psychology (PSY 101).

PNP-112 Practical Nursing II 12 Credits
This course builds upon the concepts introduced in Practical Nursing I (PNP111). Students apply the nursing process within the framework of optimal health, restoration and health maintenance in the care of adults with stable medical surgical health care needs. This course builds upon the vocational trends of the practical nurse. Additional expenses may include supplies, equipment and uniforms. Course meets 6 hours of lecture/lab one to two days per week and 18 hours of clinical practice at the college or in selected health care facilities each week. Prerequisites: PNP-112 and Drug Calculations (NUR100).

PNP-113 Practical Nursing III 10 Credits
The student synthesizes and integrates cultural sensitivity and health education to provide safe and effective care and advocate for patients throughout the lifespan. The student outlines and implements a plan of care related to the challenges of the pediatric/MCH/geriatric patient, integrating the concepts of Erikson’s developmental stages and extends care to family and community. Knowledge of medications and nursing implications of administration are expectations in the clinical setting. Legal and ethical principles are taught and adhered to within the scope of practice of the LPN. The leadership role of the practical nurse is defined and practiced in the long-term care setting where patient outcomes are predictably defined. Additional expenses may include supplies, equipment and uniforms. Course meets 6 hours of lecture/lab 1-2 days per week and 18 hours of clinical practice per week at the college or at selected health care facilities. Prerequisite: Practical Nursing II (PNP 112).

Portuguese

POR-101 Elementary Portuguese I 3 Credits
This course covers an introduction to the sounds and structures of the Portuguese language. The video-based, self-paced course emphasizes both Portuguese and Brazilian culture.

POR-102 Elementary Portuguese II 3 Credits
This continuation course of Elementary Portuguese I (POR101) places greater emphasis on reading skills. The video-based, self-paced course stresses more complex Portuguese structures. The course meets General Education ?Humanities? Requirement Area 6. Prerequisite: Elementary Portuguese I (POR101) or one year of high school Portuguese.

Psychology

PSY-101 Principles of Psychology 3 Credits
This introductory psychology course covers a survey of information that includes the brain and behavior, research methods, learning, consciousness, motivation, emotion, human growth and development, personality, abnormal behavior, and psychotherapy, social cognition and understanding. The course meets General Education Individual and Society Requirement Area 2. Prerequisite: Academic Reading III (ESL098) or Speaking Skills II (RDG095) or co-enrollment in integrated courses, or exemption by placement testing.

PSY-105 Psychology of Social Relations 3 Credits
This course covers the complex interrelationship between the individual and society. Topics include attitude formation, prejudice, conflict, frustration, cooperation and competition, cultural and interpersonal difficulties involving identity formation, and alienation versus integration.

PSY-107 Group Dynamics 3 Credits
Through class exercises and observation, this course explores the relationship between the theory and experience of effective groups. It examines comparisons of individual and group performance, group goals, problem solving, decision-making, conformity, norms, cohesiveness, and leadership. The course meets General Education Individual and Society Requirement Area 2.

PSY-131 Psychology of Popular Culture 3 Credits
This course is designed to facilitate the development of critical thinking, reading, and writing skills through the psychological study of popular culture. Issues of social psychology, cross-cultural communication, identity development, creativity, violence, and psychological health will be analyzed in a variety of domains of popular culture. Psychological theory and analysis will be applied to youth culture, consumer culture, political campaigns, contemporary music and visual arts, tourism, stand-up comedy, advertising, and the internet. This course meets General Education Individual and Society Requirement Area 2.

PSY-141 Social Aspects of Aging 3 Credits
This course will provide a survey of major topics in the psychology of aging. Students will investigate the domains of memory, cognition and intelligence, the social and cultural environment, sensation and perception, language, emotion, spirituality, personality, health behavior, and the living environment. Students will look for common themes across domains, such as change and maintenance of identity with age. Students will learn research methods for studies of aging and will have an understanding of the aging brain.

PSY-203 Psychology of Personal Adjustment 3 Credits
This course explores the development and expression of the personality through an examination of processes by which the self-concept is formed. The course covers the theories of behavioral scientists that have contributed to the study of adjustment. Scientific study of the effects of stress and stress management techniques are included in this curriculum. The course prepares students for advanced study in psychology and places emphasis on critical thinking skills, especially as applied to scientific research. Prerequisite: Grade of C or higher in Principles of Psychology (PSY101) or permission of instructor.

PSY-209 Child Psychology 3 Credits
This course examines the normal physical, cognitive and socio-emotional development of children.
from conception to age twelve. This course is to be used for meeting the requirements of the A.A. Psychology Concentration or for elective credit in other programs. However, this course may not be used to meet program requirements for degrees or certificates in the ECDDev, EDU, or HSV programs. Students may not receive credit for both PSY109 and ECD103 to meet requirements for degrees or certificates for college graduation. Prerequisite: Grade of C or better in Principles of Psychology (PSY101).

PSY-213 Human Growth and Development
3 Credits
This course examines the theories of the biological, social, and psychological development of human beings throughout the life span. This course may be taken either as a prerequisite course for the pre-nursing program, or as an elective by non-Psychology majors. The course does not satisfy the requirements of the A.A. Psychology Concentration program. Prerequisite: Grade of C or higher in Principles of Psychology (PSY101).

PSY-215 Counseling
3 Credits
This course explores theories and practices in counseling individuals and groups. It explores various theoretical approaches to counseling, and provides practical exercises in counseling. This course is restricted to those students enrolled in the Human Services, Education, Early Childhood, Psychology, or Sociology programs or by permission of the department chair of Education, Early Childhood, and Human Services or the department chair of Behavioral Sciences. Prerequisite: Grade of C or higher in Principles of Psychology (PSY101).

PSY-219 Social Psychology
3 Credits
This course covers the complex interrelationship between the individual, small groups, and the greater society. Topics include attitude formation and change, social conflict, prejudice, frustration, and cooperation versus competition and aggression. Prerequisite: Grade of C or higher in Principles of Psychology (PSY101).

PSY-223 Personality
3 Credits
This course covers distinctive patterns of behavior, including the thoughts and emotions that characterize individuals’ adaptation to life. It examines four major approaches to the study of personality: psychoanalytic, behavioral, trait dispositional, and humanistic. Students study varying degrees of emphasis on processes or forces impinging on individuals’ interaction with their environment. Prerequisite: Grade of C or higher in Principles of Psychology (PSY101).

PSY-224 Adolescent and Adult Development
3 Credits
In this course, students study adolescents and adults in the areas of physical, intellectual and social changes, and their emotional growth and development during life stages of adolescence and adulthood. Prerequisite: Grade of C or higher in Principles of Psychology (PSY101).

PSY-227 Abnormal Psychology
3 Credits
This advanced course for the serious student of psychology covers the history of mental illness and its treatment, modern classification, diagnosis, the theoretical causes of disorders, and treatments. The range of psychopathology extends from the disorder-free person to adjustment reactions, anxiety disorders, personality disorders, and borderline disorders, to psychoses and major disorders. Prerequisite: Grade of C or higher in Principles of Psychology (PSY101) or permission of instructor.

PSY-233 Intro to Psychiatric Rehabilitation
3 Credits
This course provides an overview of the underlying core values, principles and methods of psychosocial rehabilitation. Course topics include understanding the experience of mentally ill persons and their paths to recovery, a brief historical background on the emergence of psychosocial rehabilitation as an alternative to traditional models of diagnosis and treatment; the principles of psychosocial rehabilitation and their application to assessment and rehabilitation planning and intervention, practitioner competencies, different program settings; and the role of the family in psychosocial rehabilitation. Prerequisite: Introduction to Psychology (PSY101).

PSY-235 Introduction to Behavioral Research
3 Credits
This course is an introduction to the ways of discovering, describing, and making warranted assertions about aspects of people and social life. The chief objectives are 1) to help students develop the skills and knowledge necessary to become intelligent critics of research in the behavioral and social sciences, and 2) to give them a rudimentary understanding of the design and evaluation of scientific research. Statistical material is treated in a conceptual manner. Prerequisite: Principles of Psychology (PSY101).

Reading
RDG-90 Reading Skills I
3 Credits
This course develops basic reading skills necessary for success with college level material. The course will focus on improving comprehension and vocabulary. In particular, students will improve ability to recognize and articulate main ideas, supporting details, and patterns of organization. Students will also improve vocabulary skills using context clues and the dictionary. Note: Students must meet exit-level requirements or pass a departmental reading final in order to earn a passing grade of C in this course.

RDG-95 Reading Skills II
3 Credits
This course develops advanced reading skills necessary for success with college level material. The course will focus on achieving college level comprehension skills and vocabulary. In particular, students will recognize and articulate main ideas, supporting details, and patterns of organization. Students will develop critical reading and thinking skills and improve vocabulary. In addition, students will improve note-taking and test-taking skills. Note: Students must meet exit-level requirements or pass a departmental reading final in order to earn a passing grade of C in this course. Prerequisite: Grade of C or better in Reading Skills I (RDG90) or placement by examination.

Russian
RUS-101 Elementary Russian I
3 Credits
This course will introduce students to the Russian language and culture. The course focuses on useful vocabulary and basic concepts of grammar essential for leading simple conversations in everyday situations. The course offers a unique insight into the life of Russian people. Students will master the Cyrillic alphabet and major pronunciation rules necessary for reading in Russian. No prior knowledge of Russian is required.

Science
SCI-221 Interpretation and Presentation of Scientific Research
3 Credits
This course will introduce students to the major aspects of formal scientific communication. Students will learn how to read scientific papers or posters, listen to conference presentations, search primary sources, write lab reports in the style of a scientific paper, and to present experimental results in both poster and oral presentation formats. Students will use assignments from previous science courses as the foundation for their own paper, poster and oral presentations. This course is recommended for all STEM majors and will provide students with the communication skills required for research internships. This course may be used as a career elect for all science and engineering programs. Course meets: 3 hour lecture. Prerequisites: Completion of at least two college-level science or engineering courses (BIO195 or above, CHM201 or above, PHY201 or above, ENR101 or above) or permission of Department chairperson.

Surgical Technology
NHP-180 Medical Terminology
3 Credits
This course provides instruction in the development of basic medical terminology. Competency in medical terminology promotes effective communication among members of the healthcare team.

SGT-105 Surgical Technology I
5 Credits
This course is an introduction to the profession of surgical technology. The foundation and theory of the practice of Surgical Technology are presented to the student in conjunction with hands on experience in surgical technology, standard precautions, surgical equipment and instrumentation, and the care of the surgical patient. The introduction to the clinical setting is presented in the lab. The surgical conscience is defined and developed as well as standards of professionalism. Prerequisite: admission into the Surgical Technology Program.

SGT-106 Surgical Technology II
8 Credits
This course focuses on the introduction of surgical specialties. During clinical placement students participate in the corresponding surgical interventions as they apply to each specialty. Prerequisites: Basic Anatomy/Physiology/Lab (BIO107) or Human Biology/Lab (BIO108) and Surgical Technology I (SGT105).
Sociology

SGT-107
Surgical Technology III
3 Credits
This course provides a direct focus on performance in the clinical setting. Students participate as independent members of the surgical team, demonstrating beginning level competence of advanced skills and anticipation of surgical needs. Classroom discussions will include legal, ethical, moral issues, or incidents, emergencies, and understanding the surgical patient’s reaction to stress and illness. Prerequisite: Surgical Technology II (SGT106), Pharmacology for the Surgical Technologist II (PMT105), and Human Growth and Development (PSY213).

SGT-109
Central Processing I
2 Credits
This course covers an introduction to the profession of Central Processing. It introduces principles of microbiology, technical functions, and functional areas as applied to Central Processing. The course covers the process of infection and disease transmission. It also covers manual and mechanical decontamination and disinfection. Course meets: 2 hrs. lecture.

SGT-109A
Central Processing I Clinical
2 Credits
During clinical practice at local medical centers, students participate in corresponding central processing functions. A minimum of 90 hours of clinical is required. People working in central processing can apply for prior learning assessment credits.

SGT-110
Central Processing II
2 Credits
This course introduces high and low temperature sterilization, sterile packaging and storage. The chemistry of Sterilization is presented. Quality control, risk management regulations and recommendations and recommended practices are introduced. Inventory management and principles of purchasing are also introduced. Course meets 2 hrs lecture. Prerequisites: Central Processing I (SGT109), Writing Skills I (ENG090), Foundations of Mathematics (MAT093) and Reading Skills I (RDG090).

SGT-110A
Central Processing II Clinical
2 Credits
During clinical experience students participate in applications of theory to actual practice. A minimum of 90 hrs of clinical is required. Prerequisites: Central Processing I (SGT109) and Central Processing Clinical (SGT111) with a grade of C or better.

SGT-111
Central Processing Clinical
2 Credits
This course is clinically focused with students focusing on clinical skills acquisition. Students develop both depth and breadth of experience during clinical rotation. Course meets the first night to discuss clinical placement. 6 hrs clinical. Prerequisite: Central Processing I (SGT109) with a grade of C or better. People working in Central Processing can apply for Prior Learning Assessment credits.

SGT-115
Asepsis for Surgical Technology
2 Credits
This course covers the principles and practices of surgical asepsis that must be maintained in the operating room. This course will cover a brief introduction to microbiology with emphasis on infection control in the surgical setting. The course will cover sterilization, disinfection and antisepsis and the role of the surgical Technologist as it applies to these principles. Prerequisites: Admission into the Surgical Technology Program.

SGT-116
Surgical Seminar
4 Credits
This course provides students with an opportunity to advance their knowledge of surgical procedures through the use of case studies. The seminar will be an online course that focuses on discussion of surgical specialties, complications, new technologies and the role of the surgical technologist as they advance from student to employee. Prerequisites: Surgical Technology II (SGT106) and Human Growth and Development (PSY213).

Sociology

SOC-101
Principles of Sociology
3 Credits
This course covers an introduction to the concepts and theories of society and social institutions. The course meets General Education ‘Individual and Society’ Requirement Area 2. Prerequisite: Academic Reading III (ESL098) or Reading Skills II (RDG095) or co-enrollment in integrated courses or exemption from reading requirement by placement testing.

SOC-109
Cultural Anthropology
3 Credits
This course demonstrates the way that the basic concepts and techniques developed by cultural anthropologists help us understand various cultures and intercultural relations. Through ethnographic readings and films, students learn about kinship, gender, ethnicity, religion, and social change in a variety of cultures. The course increases awareness of cultural dimensions of human experience and the diversity and flexibility of human cultures. The course meets General Education Individual and Society Requirement Area 2. Prerequisite: Academic Reading III (ESL098) or Reading Skills II (RDG095) or co-enrollment in integrated courses or exemption from reading requirement by placement testing.

SOC-110
Physical Anthropology
3 Credits
Presented in four basic sections, this course covers an introduction to the field of physical anthropology, genetics, human evolution, and the evolution of behavior. Module topics include the background of physical anthropology; man in the natural world; practical genetics; classification within the human species; homo sapiens; homo erectus; the Australopithecines; evolution review; what was before man; evolution of behavior; where do we go from here? This course is offered through the Center for Self-Directed Learning only.

SOC-203
Social Problems
3 Credits
This course critically examines contemporary social problems by applying national and global sociological perspectives to the issues of poverty, racial and ethnic inequalities, sexuality, crime, and the environment. Students explore the systemic causes of social problems. How does a social problem become defined? What are the causes of various social problems? What can be done about them? Students may be expected to participate in service-learning projects in order to apply course materials to real world efforts to solve social problems. Prerequisites: Grade of C or better in Principles of Sociology (SOC101) and College Writing I (ENG111).

SOC-204
Sociology of Organizations
3 Credits
This course will explore how social institutions are created and maintained. Their impact on individual and social lives will be analyzed. Concepts like bureaucracy, power, conflict, functionalism, and stratification will be discussed in detail. Some of the organizations to be focused upon includes: education, government, economic organizations, health care, social services, sports, religion, the family, and communication/media. This course will empower students with concepts and skills that will help them to better understand how social structures work and interact with each other. An open systems approach will be used in this course. Prerequisites: Grade of C or better in Principles of Sociology (SOC101) and College Writing I (ENG111).

SOC-205
Urban Sociology
3 Credits
This course covers the problems of social issues of contemporary urban life. It covers individuals’ responses to cultural, racial, political, institutional, educational, economic, and other challenges of city life. Prerequisite: Principles of Sociology (SOC101).

SOC-206
Juvenile Delinquency
3 Credits
This course analyzes the nature and types of juvenile behavior that violate the law. Students study issues such as socialization, deviant stage, social processes, the special attributes of youth, and historical attitudes toward childhood and adolescence. Topics include family juvenile court, correctional institutions, causes of delinquency, the female delinquent, and prevention and treatment of delinquency.

SOC-207
Criminology
3 Credits
This course examines various aspects of crime from the perspective of the sociologist. The course examines social structure/societal processes theories of social disorganization and crime causation. Other topics include the history of criminology, the nature and extent of crime, the measurement of crime, criminal typologies, public order, crime, and victimization. Prerequisite: Principles of Psychology (PSY101) or Principles of Sociology (SOC101).

SOC-211
The Family
3 Credits
This course examines psychological and sociological factors related to the dynamics of family life. The course covers the process of the growth and adjustment of each family member as the family structure changes. Students discuss the historical, contemporary, and future family. Prerequisite: one introductory Behavioral Science course.

SOC-225
Sociology of Homosexuality
3 Credits
This survey course examines issues dealing with homosexuality from the perspective of the sociologist. The course emphasizes the essentialist/constructionist debate; facts and myths about homosexuality; the influence of prejudice and discrimination on the lives of gay men, lesbians and their families; and the impact of sexual culture/community. Other topics include coming out issues, development of gay and lesbian identities, the needs of a gay family member, gay history, gay spirituality, the AIDS crisis, and
the gay liberation movement and its impact on contemporary culture.

SOC-227
Race, Class, and Gender
3 Credits
This course explores issues of color, gender, class, and caste as they exist in contemporary American society. The impact of hate groups on American life and culture will be explored through the concept of difference and the ideas of superiority and inferiority. Topics to be discussed include racism, sexism, multiculturalisms and Eurocentrism. Prerequisite: Principles of Sociology (SOC101) or Principles of Psychology (PSY101) or Cultural Anthropology (SOC109).

SOC-229
Sociology of Film
3 Credits
This course deciphers the explicit and implicit message contained in films that has to do with the organization and structure of culture and society from the past to the present. The course covers the idea that, like all art forms, films are created in a social context and express a particular point of view through the characters, themes, motifs, and visual styles they embody.

Sonography

SON-119
Subspecialty Sonography and Neurosonography
3 Credits
This hybrid course will familiarize the student with interpretation of normal and abnormal sonographic findings of subspecialty exams. This course will also have a hybrid and in class component for an introduction to neurosonography. Related scanning techniques and associated Color Flow and Doppler are described. Sonographic/medical terminology, pathophysiology, clinical presentation and associated laboratory findings as they relate to subspecialty sonography and neurosonography will be covered. Prerequisite: Cross-Sectional Anatomy (SON113). Corequisite: General Sonography Clinical I (SON121).

SON-121
General Sonography Clinical I
3 Credits
This course is the hands on application of ultrasound in the hospital setting. Scanning skills are developed during this clinical. Students will be performing supervised ultrasounds and presenting and testing to sonographers and or physicians. Students will become acquainted with the responsibilities needed to work in the ultrasound setting. Clinical will take place 3 days a week. Prerequisite: Cross-Sectional Anatomy (SON113). Corequisites: Abdominal Ultrasound (SON115), Ultrasound Scanning and Pathology (SON117), and Subspecialty Sonography/Neurosonography (SON119).

SON-123
General Sonography Clinical II
3 Credits
This course is a continuation of General Sonography Clinical I. It is a hybrid course that has in class and online components. Students will become acquainted with the responsibilities needed to work in the ultrasound setting. Scanning skills are developed during this clinical. Clinical will take place 2 days a week. Prerequisite: General Sonography Clinical I (SON121). Corequisite: General Sonography Clinical III (SON223).

SON-217
Advanced General Sonography II
2 Credits
This hybrid course is a combination of classroom teaching and online learning experience. Course topics include a review of obstetrical and gynecological sonography as well as physics and instrumentation. Interesting sonographic cases will be presented for review. Articles from the Journal of Ultrasound in Medicine and the Journal of Diagnostic Medical Sonography will be reviewed and discussed. Registry practice exams will be taken online on a regular basis. Prerequisite: Advanced General Sonography (SON215), Corequisite: General Sonography Clinical IV (SON225).

SON-219
Obstetrical/Gynecological Sonography I
3 Credits
This course familiarizes the student with interpretation of normal sonographic findings of gynecological and first, second and third trimester sonography. All measurement techniques including gestational dating will be discussed. Abnormal sonographic findings as they relate to gynecology and the first trimester will be covered. Related scanning techniques and associated Color Flow and Doppler are described. Sonographic/medical terminology, pathophysiology, clinical presentation and associated laboratory findings as they relate to gynecology and the first trimester will be covered. Prerequisite: General Sonography Clinical II (SON123). Corequisite: General Sonography Clinical III (SON223).

SON-221
Obstetrical and Gynecological II
3 Credits
This course is a continuation of Obstetrical/Gynecological Sonography I. Abnormal sonographic findings as they relate to second and third trimesters will be covered. Fetal anomalies as well as maternal disease will be discussed. Related scanning techniques and associated Color Flow and Doppler are described. Sonographic/medical terminology, pathophysiology, clinical presentation and associated laboratory findings as they relate to the second and third trimesters will be covered. Prerequisite: Obstetrical/Gynecological Sonography I (SON219). Corequisite: General Sonography Clinical IV (SON225).

SON-223
General Sonography Clinical III
3 Credits
This course is the hands on application of ultrasound in the hospital setting. Scanning skills are developed during this clinical. Students will be performing supervised ultrasounds and present daily cases to sonographers and or physicians. Students will become acquainted with the responsibilities needed to work in the ultrasound setting. Clinical will take place 3 days a week. Prerequisite: General Sonography Clinical II (SON123). Corequisite: Obstetrical and Gynecological Sonography I (SON219), Advanced General Sonography (SON215), and Diagnostic Instrumentation (SON213).

SON-225
General Sonography Clinical IV
3 Credits
This course is the hands on application of ultrasound in the hospital setting. Scanning skills are developed during this clinical. Students will be performing supervised ultrasounds and present daily cases to sonographers and or physicians. Students will become acquainted with the responsibilities needed to work in the ultrasound setting. Clinical
**Sport Management**

**SPM-101  Principles of Sport Management**  
3 Credits  
This course examines the issues of management and organizational behavior within the context of the sports industry. Students will gain a comprehensive view of the procedures and operations of sports organizations and enterprises and will examine processes such as budgeting, marketing, event management, and labor relations that are necessary for the successful administration of these organizations. The Principles of Sport Management course is designed for individuals with interests in careers that combine management skills and knowledge of the sports industry. Prerequisite: Introduction to Business (BUS101).

**SPM-201  Psychology of Sport**  
3 Credits  
This course is the study of the interaction between psychological variables and performance in sports and physical activity. This course is designed to help students both learn and then apply practical as well as theoretical information as it relates to the psychology of sport. The course includes topics such as optimal performance, correlation, motivation, co-action effect, self-actualization, psycho-behavioral techniques, self-efficacy, and the general health benefits of sport participation. This introductory course is ideal for students who wish to work with athletes in some capacity, pursue a career in sports management, or plan on working with individuals in the health and fitness industry. Prerequisite: Principles of Psychology (PSY101).

**SPM-211  Sport Facility and Event Management**  
3 Credits  
This course provides students with an understanding of the complexity involved in major sports events and facilities in relation to their social, cultural, and physical environment. Topics include the analysis of goals and resources, the development of revenue streams, design and planning, scheduling and operations, staff management, and the implementation of programming. Risk management and security issues reflective of today’s environment will be discussed. Prerequisite: Principles of Sport Management (SPM101).

**SPM-213  Sport Law and Ethics**  
3 Credits  
This course will examine the legal issues concerning the areas of amateur and professional sports. Discussion of amateur sports includes the roles, rules and activities of the NCAA and questions involving amateurism, eligibility, sex discrimination and antitrust. This course is designed to introduce students to the legal, business, and policy issues and disputes that arise in the world of amateur and professional sports. Discussion of professional sports includes professional sports leagues, labor relations, contractual questions and representation. Issues important to both areas include violence in sports, drug testing, criminal, tort issues, and sponsorship endorsements. Prerequisite: Principles of Sport Management (SPM101).

**SPM-215  Sport Marketing and Promotion**  
3 Credits  
This course takes an in-depth look at fundamental marketing practices as applied to various sport venues and provides a detailed analysis of sport as a product, sport consumer markets, and sport product markets. Students will become familiar with marketing strategies applied to specific segments of the sport industry including amateur, college, professional and recreational markets. Students will prepare and organize marketing, promotional, and public relations campaigns applied to the sport and leisure industry. Legal issues and other challenges facing the sport industry will also be examined. Prerequisite: Principles of Sport Management (SPM101).

**SPM-217  Seminar in Sport Management**  
3 Credits  
Through case discussion, lecture, videos, guest speakers, and field research, this course provides the student with a series of concepts, framework, analytical techniques and management decision-making skills to enable him/her to anticipate and critically examine and evaluate some of the problems, issues, opportunities, facing a sport business enterprise. This course should be taken in student’s final semester. Prerequisite: Principles of Sport Management (SPM101).

**SPM-299  Sport Management Internship**  
3 Credits  
This course enhances the academic experience for students. All internships take place at pre-approved sites. Students engage in activities that improve knowledge of the practical world of work and help them gain professional experience. The internship experience applies resources gained from students’ study to improve the quality of their contributions to the employer. A faculty coordinator supervises and grades all courses. Students are responsible for following all guidelines in the BHCC Internship Handbook. Prerequisite: Department Chair approval.

**Spanish**

**SPN-101  Elementary Spanish I**  
3 Credits  
This course, for students with little or no previous knowledge of Spanish, covers an introduction to the sounds and structures of Spanish and the development of basic skills needed for understanding and speaking Spanish. The course does not use native speakers or for students who have studied this language within the last three years.

**SPN-102  Elementary Spanish II**  
3 Credits  
This continuation course of Elementary Spanish I (SPN101) emphasizes conversational skills and simple readings. The course meets General Education Humanities Requirement Area 6. Prerequisite: Elementary Spanish I (SPN101) or one year of high school Spanish.

**SPN-201  Intermediate Spanish I**  
3 Credits  
This course covers a review of basic language skills and emphasizes conversational and reading skills. Prerequisite: Elementary Spanish II (SPN102) or two years of high school Spanish or permission of instructor.

**SPN-202  Intermediate Spanish II**  
3 Credits  
This continuation course of Intermediate Spanish I (SPN201), emphasizes self-expression through speaking, reading, and writing. Prerequisite: Intermediate Spanish I (SPN201) or three years of high school Spanish or permission of instructor.

**Theatre**

**THE-107  Acting I**  
3 Credits  
This course covers a total approach to the actor’s art and stresses the use of body and voice. It includes improvisation, theater games, and sensory exercises with eventual involvement in scene study and character development. This course meets General Education Humanities Requirement Area 6.

**THE-108  Acting II**  
3 Credits  
Acting II (THE107).

**THE-109  Play Production Workshop**  
3 Credits  
This course covers practical training in acting, costuming, makeup, lighting, and stage management related to the production performed by each class. All students work as crew members and are encouraged to audition for roles in the play. Students may repeat this course three times, earning one credit for each repetition.

**THE-111  Improvisation**  
3 Credits  
This course explores improvisation both as an art and also as the basis for developing roles for stage and on-camera work. Students develop spontaneity, narrative skills, the ability to work off a partner, and to make strong choices on stage. Students work with the repertoire of comedy improvisation groups, with more dramatic and naturalistic improvisation groups, and with more dramatic and naturalistic improvisation situations. Students may repeat this course three times, earning one credit for each repetition.

**THE-113  Voice and Movement**  
3 Credits  
This course frees the body and voice from habitual tensions and patterns and opens and expands the possibilities for vocal and physical expressiveness. Voice training focuses on the cultivation of a flexible and expressive voice and the development of interpretive skills. Movement focuses on body awareness, control, and flexibility for the stage.
THE-115
Playwriting
3 Credits
This course introduces students to various approaches to writing for the stage. Components of playwriting, which include narrative, structure, plot, character, dialogue, and setting, as well as the concept of theatre, will be explored. Through reading and discussion of short works by a selection of playwrights, students will gain a sense of the development of playwriting while also being exposed to various playwriting genres. During the semester, students will create short works for the stage. Weekly writing exercises will be shared and discussed in class.

Visual and Media Arts

VMA-100
VMA Freshman Seminar
3 Credits
This interdisciplinary course builds a connection to the aesthetic, historical and intellectual aspects of an artist community and creative work while helping students navigate through some of the logistical hurdles of the first year experience. Students participate in a variety of group activities, discussions and presentations with faculty and visiting artists. Field trips include local galleries/ studios and museums. A journal/sketchbook is required. The course is required for all Visual and Media Arts majors. Prerequisites: Writing Skills II (ENG095) and Foundations of Mathematics (MAT093).

VMA-102
Visual Design: Composition and Color
3 Credits
This course introduces the student to elements and principals of design that are fundamental to all fields of visual art. Within the context of 2-dimensional problem solving, students will develop a working vocabulary of visual elements including line, form, space, and color, in order to explore the expression of principles of composition such as balance, rhythm, emphasis, and proportion. Students will experience working with a variety of mediums and begin to develop skills in both visual thinking and craftsmanship. Prerequisites: Writing Skills II (ENG095) and Foundations of Mathematics (MAT093).

VMA-103
Visual Design: Form and Time
3 Credits
This course introduces the student to the fundamental elements and principles of design within the context of 3-dimensional form and time, both essential to the understanding of 2D and sequential art and design. Working with a variety of materials students will explore the fundamentals of scale, volume, space and light in 3 dimensions. Through exploring sequence and visual narrative, students will be introduced to the fundamentals of viewer experience in time. Prerequisites: Writing Skills II (ENG095) and Foundations of Mathematics (MAT093).

VMA-104
Drawing I
3 Credits
An introductory studio course designed to examine basic vocabulary and drawing skills and concepts. Using a wide range of drawing media, students work primarily from observation mastering the concepts of objective drawing. While concentrating on the formal visual elements: line, shape, value, texture, and (limited) color, students explore concepts as figure/ground, scale, positive and negative space, proportion, perspective, volume, light, compositional issues and pictorial unity. There is an emphasis on writing and communication skills for mastery of basic vocabulary, and process of evaluation and critique. This course meets General Education Humanities Requirement Area 6. Prerequisite: Writing Skills II (ENG095).

VMA-105
Digital Imaging With Photoshop
3 Credits
The Adobe Photoshop workspace reflects the technical basis of the digital image. Understanding the structure of this important application enables the student to systematically build confidence and skill in its use, and also apply its principles in related applications. This course surveys the breadth and depth of the Photoshop workspace and toolset through lecture presentations and lab exercises. An overview of the digital imaging workflow will be presented, with emphasis on image processing. Students must have basic computer literacy. Prerequisite: Writing Skills II (ENG095) and Foundations of Mathematics (MAT093).

VMA-111
Introduction to Mass Media
3 Credits
This course covers an overview of the history and theory of mass media, including print, radio, television, the Internet, movies, advertising and public relations. The course covers general concepts of mass media, the media industries, and practical methods to analyze and understand the influence of the mass media on social, cultural, and political life, not only in the United States, but also around the globe. In addition, the course looks at ways individuals themselves can influence the media. The course meets General Education World View Requirement Area 3. Prerequisites: Writing Skills II (ENG095) and Foundations of Mathematics (MAT093).

VMA-112
Art History: Prehistoric to Medieval
3 Credits
This course is a broad multicultural survey of the art and architecture of Egypt, Rome, Greece, the Near, Mid, and Far East, and Europe, from the Paleolithic Era through the Moyen Age. The course stresses the understanding of art through examining visual concepts such as composition, space, rhythm, symmetry, perspective, and subject matter, as well as its social, political, and cultural contexts. Students will experience and analyze works of art through lectures, written assignments, journal entries, identification and essay exams, presentations, group projects, and visits to museums. The course meets General Education Humanities Requirement Area 6. Prerequisites: Writing Skills II (ENG095) and Foundations of Mathematics (MAT093).

VMA-113
Art History: Renaissance-Contemporary
3 Credits
This course is a broad multicultural survey of art and architecture from the Early Renaissance through contemporary times. Major movements in both Western and non-Western traditions are covered. The course stresses the understanding of art through examining visual concepts such as composition, space, rhythm, symmetry, perspective, and subject matter, as well as its social, political, and cultural contexts. Students will experience and analyze works of art through lectures, written assignments, journal entries, identification and essay exams, presentations, group projects, and visits to museums. The course meets General Education Humanities Requirement Area 6. Prerequisites: Writing Skills II (ENG095) and Foundations of Mathematics (MAT093).

VMA-114
History of Graphic Design
3 Credits
This course critically investigates and explores graphic design and visual communication history, major movements and pivotal artists and designers. This course requires participation of students in lecture and presentation, writing and studio projects, which will build critical thinking and visual skills. The course provides a necessary historical basis for students in the Graphic Design Program in the Visual & Media Arts Department. Prerequisites: Writing Skills II (ENG095) and Foundations of Mathematics (MAT093).

VMA-115
The Moving Image
3 Credits
This course critically investigates and explores the history and technical development of the moving image, including major and influential works, artists, technical advances, and movements in film, television, and digital presentations. This course builds critical thinking and visual skills. The course provides a necessary historical basis for students in the Media Communications Program in the Visual & Media Arts Department. Prerequisites: Writing Skills II (ENG095) and Foundations of Mathematics (MAT093).

VMA-122
Painting I
3 Credits
This course instructs students in the painting medium of acrylic and/or oil paint. The course places emphasis on drawing, composition, color, value, and paint quality. Students acquire basic skills in painting from observation. Class time includes one-on-one instruction and group critiques. The course meets General Education Humanities Requirement Area 6. Prerequisites: Writing Skills II (ENG095) and Foundations of Mathematics (MAT093).

VMA-123
Water Color I
3 Credits
An introduction to the medium of watercolor paint, this course demonstrates and explores basic techniques such as wet-on-dry, wet-on-wet, and washes. Students draw from observation and learn to manipulate value, tone, and color. Class time includes one-on-one instruction and group critiques. The course meets General Education Humanities Requirement Area 6. Prerequisites: Writing Skills II (ENG095) and Foundations of Mathematics (MAT093).

VMA-124
Printmaking I
3 Credits
An introduction to a variety of printmaking processes, this course includes woodcut, monotype, engraving, and dry point. The course encourages experimentation in a self-motivated workshop environment. Class time includes one-on-one instruction and group critiques. Some drawing experience is desirable, although not required. The course meets General Education Humanities Requirement Area 6. Prerequisites: Writing Skills II (ENG095) and Foundations of Mathematics (MAT092).

VMA-131
Digital Publishing with InDesign
3 Credits
This course introduces students to the fundamental knowledge required to operate Macintosh computers for use in digital publishing. Students become computer literate by learning the basic principles of digital publishing. Through an introduction to the word processing program.
Microsoft Word and the page layout program InDesign, students are directed in the production of documents that require the application of those principles. Students are also exposed to Adobe Illustrator and Adobe Photoshop as they are used in conjunction with Adobe InDesign. Students without previous computer experience are encouraged to take Applications’ Concepts (CIT110). Prerequisites: Writing Skills II (ENG095) and Foundations of Mathematics (MAT093).

VMA-132 Typographic 3 Credits
This course examines the theory and practice of typographic principles. Students undertake creative projects in typographic composition. The course considers both effectiveness and aesthetic value of the composition. The course is required of all first year graphic arts students. (Fall semester only.) Prerequisites: Writing Skills II (ENG095) and Foundations of Mathematics (MAT093).

VMA-141 Elements of Video Production 3 Credits
This course gives students an overview of the theoretical, aesthetic, and practical elements of digital video pre-production, production, and post-production. Through a series of creative exercises, lectures, and classroom critiques, students will gain an understanding of the fundamental skills required in planning, scripting, directing, shooting, lighting, and editing digital video productions for a variety of purposes and audiences. The course provides a special emphasis on understanding and using visual storytelling techniques to relate information and emotion. Recommended prerequisite: Digital Imaging with Photoshop (VMA105). Prerequisites: Writing Skills II (ENG095) and Foundations of Mathematics (MAT093).

VMA-151 Introduction to Audio Technology 3 Credits
This course will provide the student with the basic knowledge and skills required for audio production. Through lectures and hands-on lab work, students will learn the technical and aesthetic aspects of microphones, tape decks, and mixing consoles. Both digital and analog production media will be covered, with greater emphasis on the digital realm. In addition to technical abilities, students will also examine the nature of the acoustic environment, and will be introduced to digital audio editing software. Prerequisites: Writing Skills II (ENG095) and Foundations of Mathematics (MAT093).

VMA-161 Introduction to Digital Photography 3 Credits
Digital photography has made it technically possible to generate countless photographs at virtually no cost, yet the formal problems of picture-making remain. How is it possible to create photographs with power and significance? This course explores basic technical issues of the digital photography workflow joined with a formal exploration of seeing photographically, using both shooting assignments and lab exercises. Examples from the photographic tradition will be examined. Adobe Photoshop is used to adjust and manipulate images for printing. Inkjet printers are used to create photographs of high quality output. Students must have a digital camera and basic computer literacy. This course fulfills General Education Humanities Requirement Area 6. Prerequisites: Writing Skills II (ENG095) and Foundations of Mathematics (MAT093).

VMA-207 Figure Drawing 3 Credits
Students draw from the model as a means of understanding form, shape, and line gaining experience with a variety of drawing media. Figure Drawing emphasizes shorter poses as training in immediate response to gesture and form. This course serves as a requirement and preparation for intermediate level and concept-based studio courses such as Ideas in Art: Fine Arts Studio, Observational Drawing, and Multi-Level Studio classes. Prerequisite: Drawing (VMA104).

VMA-209 Portfolio Presentation Seminar 1 Credit
This course is required for all Visual & Media Arts students. Students will prepare, review and present a visual portfolio that best reflects the skill, knowledge and level of achievement in their program area. Additionally they will prepare a resume and identify interview skills. Emphasis is on developing a cohesive presentation format of projects reflecting various skills.

VMA-221 Painting I for Fine Arts 3 Credits
This course introduces students to the fundamentals of painting with heavy body paints and mediums. Working from observation students will gain the basic skills necessary to control the value, color, texture and composition of the paintings they create. They will develop visual problem solving skills and critical vocabulary through group critiques and individual meetings. This course will leave them with a basic understanding of how to build a personalized, sustainable painting practice. Prerequisite: Drawing I (VMA104).

VMA-223 Water Color II 3 Credits
Focusing on developing one’s personal sense of aesthetics and style, this course explores various techniques used in watercolor. The course places emphasis on creating cohesive, well-composed paintings, while it develops an understanding of the elusive properties of spontaneity and transparency as they relate to the medium of watercolor paint. Prerequisite: Watercolor I (VMA123) or permission of instructor.

VMA-224 Printmaking II 3 Credits
A continuation of Printmaking I (VMA124), this course further develops the techniques of dry point, engraving, woodcut, and monotype while focusing on thematic development and content.

VMA-227 Ideas in Art: Fine Arts Studio 3 Credits
What topic should my artwork discuss? How should this project manifest? Why am I making this? These questions comprise the three basic considerations that inform an artwork’s concept; the Subject (the what or the topic), Form (the how or the format) and the Content (the why or the artist’s intention). Ideas in Art students will explore how to successfully apply these essential conceptual considerations to a creative practice. Students will examine their own motives while investigating broader topics introduced through readings, writings and workshops. Studio art projects encourage the evolution of personal style as students gain exposure to an array of contemporary and historical conceptual frameworks. Students will exercise conceptual and visual problem solving skills through group critiques and individual meetings. This course will help students begin building a visually and conceptually enriched art practice. Prerequisite: Figure Drawing (VMA207) or Painting I for Fine Arts (VMA221).

VMA-228 Multi-Level Art Studio 3 Credits
This course is designed to accommodate above beginning level fine arts students as they hone their creative practice within a skill-based curriculum. The emphasis of this course is to provide students with the space and guidance to develop projects of their own design. Applicable formal and conceptual considerations will be explored by investigating contemporary and historical practices. Students will exercise their conceptual and visual problem solving skills through group critiques and individual meetings. This course will conclude the presentation of aesthetically and conceptually original art portfolio from each student. Prerequisite: Ideas in Art: Fine Arts Studio (VMA227).

VMA-231 Digital Illustration with Illustrator 3 Credits
This course explores the use of the computer as a design tool. Instruction emphasizes the mastery of fundamental computer functions and software operations. It prepares graphic design students in computer software and technology used in graphic design. Students explore the creative potential, solve design and layout problems, and exhibit an understanding of the professional requirements of document preparation and production. The course uses Adobe InDesign and Adobe Illustrator software. Prerequisite: Writing Skills II (ENG095) and Foundations of Math (MAT093).

VMA-222 Observational Drawing 3 Credits
This course provides students with intermediate to advance instruction in drawing from direct observation. Working from life students will master the relationship between value, form, and space while experimenting with various drawing materials, implements, techniques and strategies. Through group critiques and individual meetings they will exercise their visual problem solving skills and increase their critical vocabulary. This course will provide the necessary foundation upon which to build a sustainable drawing practice. Prerequisite: Figure Drawing (VMA204).

VMA-230 Portfolio for Fine Arts 3 Credits
This course will exercise their conceptual and visual problem solving skills through group critiques and individual meetings. This course will help them begin building their own sustainable painting practice. Prerequisite: Painting I for Fine Arts (VMA221).
COURSE DESCRIPTIONS

VMA-232
Design Communication I
3 Credits
This course explores the use of the computer as a design tool. Instruction emphasizes the mastery of fundamental computer functions and software operations. It prepares graphic design students in computer software and technology used in graphic design. Students explore the creative potential, solve design and layout problems, and exhibit an understanding of the professional requirements of document preparation and production. The course uses Adobe InDesign and Adobe Illustrator software. Prerequisite: Introduction to Desktop Publishing (VMA131).

VMA-233
Design Communication II
3 Credits
This course covers a continuation of the examination and interpretation of the elements and principles of design as applied to the practice of graphic design and visual communication from visualization to production techniques. Students use the computer to create portfolio pieces for use in their future job search or in applications to four-year institutions. The course uses Microsoft Word, Adobe InDesign, Adobe Illustrator and Adobe Photoshop software. Prerequisite: Design Communication I (VMA232).

VMA-234
Publication Design
3 Credits
This advanced course for graphic arts students covers the design, layout, and format of books. Students design a book with images that is the culmination of all they have learned. This book is included in their portfolio. The course is required of all graphic arts students and is offered spring semester only. Prerequisite: Design Communication I (VMA232) or approval of department chair.

VMA-241
Advanced Video Production
3 Credits
This course focuses on development of the skills and concepts necessary for digital video production. Students learn the advanced use of the HDV digital camcorder microphones, the field audio mixer and lighting techniques. The course uses images and materials acquired in the course in its corequisite class, Video Post Production (VMA242), in order to complete a final project counting for both courses. Topics covered include fiction and non-fiction production techniques, including research, script development and interviewing. Discussion of theoretical issues in applied media aesthetics will be an integral and essential part of the class. Prerequisite: Elements of Video Production (VMA141) or permission of instructor. Corequisite: Video Post Production (VMA242).

VMA-242
Video Post-Production
3 Credits
This course delivers an intensive workshop in digital nonlinear post-production software, theory and techniques. Students work in-depth with Final Cut Pro and will also explore other aspects of the Final Cut Studio package, including Live Type, Soundworks Pro, and Motion. The course also provides a solid foundation in the theory and aesthetics of film and video editing by examining the history and development of the editing process. The course uses images and materials acquired in its corequisite course, Advanced Video Production (VMA241), in order to complete a Final Project counting for both courses. Prerequisite: Elements of Video Production (VMA141) or permission of instructor. Corequisite: Advanced Video Production (VMA241).

VMA-243
Projects in Video Production
3 Credits
The approach and content of this course focuses on producing a work of professional quality for use as a portfolio presentation of student achievement. Drawing on skills they have acquired in previous production courses, students will write, shoot, and edit a high-quality video program, including audio sweetening, digital composite effects, and graphics, modeling their activities on a real-world production atmosphere. Actual production activities depend on project production schedule and needs. Prerequisites: Advanced Video Production (VMA241) and Video Post Production (VMA242) or permission of instructor.

VMA-244
Media Project Planning
3 Credits
This course is an intensive survey of all aspects of pre-production planning for video and multimedia productions. Special emphasis is given to the process of writing for the media, including idea development, preparation of proposals, treatments, storyboards and scripts that clearly define message, intent and audience. A variety of storytelling methods and approaches to the creative process will be explored, including the dramatic, educational, corporate and documentary formats. In addition, the fundamentals of production management will be presented, including script breakdown, production scheduling, resource planning, and budgeting. Students will be expected to utilize skills gained in this class in subsequent media production classes. Prerequisite: Elements of Video Production (VMA141).

VMA-252
Audio Studio Production
3 Credits
This course will cover basic techniques for multi-track studio recording. Topics will include: microphone techniques and placement, tracking and overdubbing, mixing and digital editing, and use of outboard equipment. Use of ProTools software in a recording environment is emphasized. Prerequisite: Introduction to Audio Technology (VMA151).

VMA-254
Design for the World Wide Web
3 Credits
This course addresses the unique design issues involved in creating web pages. Students learn to develop graphics and media to integrate content and media elements, and to create visually attractive, communicative, and effective pages for electronic delivery. The course gives special attention to software applications used in the creation of web page design and graphics. Prerequisite: Digital Imaging with Photoshop (VMA105).

VMA-260
Interactive Design I
3 Credits
Learn digital application interactive design from the ground up in this comprehensive, practical class. Students start by clarifying the goals for the digital application and target audience, and then learn common design processes including basic design elements, page layouts, project site plan, visual design in Photoshop and optimized graphic generation (e.g., optimized images, buttons, and titles). Students will learn to research and develop the visual design for user interface and interaction for digital applications. Prerequisites: Photoshop (VMA105) or instructor permission.

VMA-255
Interactive Design II
3 Credits
This is a practical class teaching interactive visual design from conception to completion. Students start by coming up with an idea for and examining the needs of their design projects, then define the target audience and behavior, page layouts, project planning/site maps, and techniques to smooth their workflow. Students will choose their digital applications(e.g., website, Apple iPhone) for their projects. The final visual designs are ready to be delivered for development and implementation. Prerequisites: Interactive Design I (VMA275), or the permission of the instructor.

VMA-256
Graphic Design Internship
3 Credits
Required in the Graphic Design Program, this course is designed to provide students with practical experience in a professional setting and preparation for a successful career in the graphic design field. Designation of Internship site will be based on student academic and career goals. The internship is paired with in-class learning and weekly meetings with the instructor and/or the representative of the designated business agency. Prerequisite: Design Communication I (VMA232).

VMA-262
Media Communication Internship
3 Credits
This internship course is dedicated to field experience in a professional job situation and is recommended as a final semester course. Students arrange for placement at an internship site with a departmental supervisor in the semester previous to the actual internship. Site experience requires 120-150 hours, as well as a personal project related to the internship. Prerequisite: Advanced Video Production (VMA241) or permission of department chair.

CVS Caremark

Megan Rocchio  
Pharmacy Residency Coordinator  
B Brigham and Women’s Hospital

Surgical TECHNOLOGY

Charlotte Gugliemi, M.S.N.  
Perioperative Educator  
Beth Israel Deaconess Medical Center

Peter C. DiStefano  
Practicing CST

Marsha Hopkins  
Operating Room Nurse Manager  
Boston Veteran’s Administration Medical Center

Arlene Lowenstein, R.N., Ph.D.  
Public Member  
Simmons College

Dawn Tenney, M.S.N.  
Director of Surgical Services  
Massachusetts General Hospital

Kristen Urbanek  
ST Program Graduate

Susan Twardy, B.S.N.  
Perioperative Educator  
B Brigham and Women’s Hospital

Thomas White, M.D.  
Physician  
Retired

Martha Cunningham  
Central Processing Manager, Surgical Services  
Massachusetts Eye and Ear Infirmary

ULTRASOUND PROGRAM ADVISORY BOARD

Dr. Carol Benson  
DMS Medical Director  
B Brigham & Women’s Hospital

Robert Cataldo, RDCS  
Chief of Echocardiography Lab  
B Boston Medical Center

Sandra Creaser, R.T. (R) (N) (M) (ARRT)  
Community Partner  
Charlestown, MA

Diane DeRoche, RDCS  
Echo Lab Supervisor  
Nashoba Valley Regional Medical Center  
Ayer, MA 01432

Charlene Doherty, RDMS  
Staff Sonographer, Ultrasound Department  
North Shore Medical Center

Sandra Doherty  
Public Member

James Fantony  
Cardiac Sonographer  
Newton-Wellesley Hospital

Chun Ho, R.D.M.S.,R.V.T.  
Clinical Ultrasound Consultant

Dr. Sherif Labib  
Echo Lab Director  
Lahey Clinical Medical Center

VISUAL AND MEDIA ARTS

Aidria Astravas  
Manager  
Future Media Concepts

Charles Roberts  
Professor, Media Communications  
Fitchburg State University

Helene Zuckerbrod  
Assistant Director of Admissions  
Massachusetts College of Art
EXECUTIVE DIVISION

Pam Y. Eddinger  
President

Faculty and Professional Staff

Michael Harris
Assistant Professor (temp)
Computer Information Technology Department
B.S. UMass Lowell

E. Alicia Harris
Assistant Professor
Hospitality Department
A.A. Culinary Institute of America; B.A. Syracuse University

Paula A. Hayes
Professor
Nurse Education Department
A.S. Middlesex Community College; B.S., M.S. Northeastern University

Joshua Heerter
Language Lab ESL and English Tutor
Academic Support and College Pathway Programs
B.A. UMass Amherst

Joyce Henderson
Project Director, U.S. Department of Labor Grant Project
Professional Studies and Workforce Development
M.Ed. Cambridge College

Cynthia Henri
Recruitment Counselor
Enrollment Management and Admissions
B.S. Bridgewater State University

Amparo Hernandez-Folch
Professor
Mathematics Department
B.A. University of Puerto Rico; M.Ed. University of Florida

Caryn S. Hirsch
Director
Publications and Creative Services Department
B.A. Rutgers University

Melissa B. Holster
Director
Financial Aid Office
B.A. Lafayette College; Ed.M. Boston University

William L. Hoover
Professor
Science and Engineering Department
B.S. Youngstown State University; M.D. Spartan Health Sciences University

Daniel Horlander
Programmer Analyst
Enrollment Services and Life Map
B.S., M.S. University of Illinois at Urbana

Euphrasie Inangorore
Application Developer
Integrated Marketing and Communications
B.S. UMass Lowell

John J. Jean
Professor
Mathematics Department
M.A., Ph.D., Ed.D Columbia University

Hilaire Jean-Gilles
Associate Professor
Business Administration Department
A.S. Bunker Hill Community College, B.S. UMass Boston; M.S. Boston University

Handine Jean-Marie
Special Programs Coordinator (9th-12th grade Outreach Specialist)-TRIO Talent Search Program
Chelsea Campus
B.A. Emmanuel College

Nada Jecmenica
Academic Counselor
Advising and Life Map
B.A., M.Ed. Cambridge College

Signe Johns
Senior Special Programs Coordinator
Student Activities
B.S. UMass Dartmouth

Christine M. Johnsen
Professor
Nurse Education Department
A.S.N., B.S. Excelsior College; M.S.N. Northeastern University; M.P.H. Columbia University

Lloyd Sheldon Johnson
Professor
Behavioral Science Department
B.A. Wayne State University; M.Ed. Antioch University; Ed.D. UMass Boston

Lori Johnson
Assistant Professor
(Clinical Laboratory Instructor) Nurse Education Department
A.S. Finger Lakes Community College; B.S. Robert Wesleyan College; M.S., Ed.D.Walden University

Belinda L. Kadambi
Professor
Science and Engineering Department
B.S., M.S. University of Bombay, India; Ph.D. University of Cincinnati

Abdul K. Kalokoh
Learning Specialist
Center for Self-Directed Learning
A.S. New York City Community College; B.S. S.U.N.Y. at Albany

Sunny Kang
Associate Professor
Mathematics Department
B.S. University of California; M.A. California State University

Paul Kasili
Associate Professor
Science and Engineering Department
B.A. Coe College; Ph.D. University of Tennessee

Swati Kelkar
Assistant Professor
Mathematics Department
B.S. Meera Girls College, B.A. Gandharva Mahavidyalaya, B.Ed. Lal Bahadur Shastri Teachers' Training College, M.S. Mohanal Sukhada University, Udaipur, India; M.A. Northern State University, Aberdeen South Dakota

George Kelley
Professor
Hospitality Department
A.S. Bunker Hill Community College; B.A. UMass Boston; M.A. Boston University

Jacqueline Kerstner
Professor
ESL Department
B.A. University of Delaware; M.Ed. Boston University; Certificate in Liberal Arts, University of Copenhagen

Tammie A. Key
Academic Counselor
International Center
B.A. Eastern Nazarene College; M.Ed Cambridge College

Shun Y. Kiang
Assistant Professor
English Department
B.A. University of Florida; M.A. Stetson University; Ph.D. Northeastern University

Jacqueline L. Kiddy
Coordinator
Advising and Life Map
A.A. North Shore Community College; M.Ed. Cambridge College; L.M.H.C.; L.R.C.

Anne Marie Killilea
Professor
Nurse Education Department
B.S.N. Saint Anselm College; M.S.N. Regis College

Sarah Knights
Dual Enrollment Program Assistant (Staff Assistant)
Academic Support and College Pathway Programs
B.S. Northeastern University

Kenneth M. Kozikowski
Director
Technology Support Services
B.S. Assumption College

Joyce Krystofowski
Assistant Professor
Hospitality Department
B.A. Wheaton College; B.S. Newbury College; M.A. Boston University

Anicia Kuchesky
Librarian (Coordinator of Library Services)
Library and Learning Commons
M.L.S. University of Texas; M.Ed. Our Lady of the Lake University

Marilyn Kuhn
Executive Director
Development and BHCC Foundation
B.A. Georgetown University

Justice Kumahia
Success Coach (Academic Counselor)
Advising and Life Map
A.S. Bunker Hill Community College; B.S. Babson College; M.A. UMass Boston

Gretchen Lahey
Senior Special Programs Coordinator,
Dual Enrollment and Malden High School
Academic Support and College Pathway Programs
B.A. University of Maine

Darrell LeMar
Executive Director
Workforce Development
B.A., M.S. UMass Boston

Christina Lambert
Success Coach (Academic Counselor)
Advising and Life Map
B.A. Wheaton College; M.S. Colorado State University

Julie K. Lambert
Learning Specialist
Center for Self-Directed Learning
B.A. S.U.N.Y. at Binghamton; M.Ed. Lesley College
Faculty and Professional Staff

Eleonora Lapo
Learning Specialist
Center for Self-Directed Learning
A.A. Ulster County Community College; B.S., M.A.T. S.U.N.Y. at New Paltz

Deborah A. Latina
Assistant Professor and Chairperson
Allied Health Certificate Programs
B.S. Northeastern University

JoDe M. Lavine
Professor
Science and Engineering Department
B.S. Texas Tech University; M.S., Ph.D. The University of Memphis

David J. Leavitt
Executive Director
Institutional Research
B.A. Suffolk University; J.D. Mass School of Law

Daze S. Lee
Associate Professor
Business Administration Department
B.B.A. Korea University; M.B.A. Providence College

Maria D. Leite
Manager of the Fitness Center
Administration
B.A. UMass Boston

Beverly M. Lewis
Bursar
Student Payment Office
B.A. Northeastern University; M.B.M. Cambridge College

Judy B. Lindamood
Professor and Chairperson
Early Childhood Education and Human Services Department
B.S., M.S. Ohio State University; Ed.D. Teachers College, Columbia University

Rebecca Love
Associate Professor
Nurse Education Department
B.A. Boston University; M.S. Northeastern University

Jayne MacPherson
Professor
Surgical Technology Certificate Program
B.S. Purdue University; Certificate in Surgical Technology, Lesley University; M.S. Framingham State University; CAGS, Ph.D. Simmons College

Lauren Maguire
Professor
Hospitality Department
B.S. Northeastern University; M.Ed. UMass Lowell

Grace Mah
Coordinator
Teaching, Learning and Instructional Technology Center
A.S. Savannah Technical College; B.S. Virginia Tech; M.S. Capella University

Jamie L. Mahoney
Associate Professor
Computer Information Technology Department
B.A. Villanova University; M.B.A. University of Maryland

Janice Maienza
Assistant Professor
Nurse Education Department
B.S. Northeastern University; M.S.N. MGH Institute of Health Professions

Ujunwa Makhene
Application Developer
Integrated Marketing and Communications
A.S. Bunker Hill Community College; B.A. Tufts University

Kathryn L. Mapstone
Professor and Chairperson
History and Social Sciences Department
B.S. Springfield College; M.A., Ph.D. Boston College

MaryLee Marra
Professor
Nurse Education Department
B.S. Boston State College; M.S. UMass Boston

Nancy W. Martignetti
Senior Academic Associate
Professional Studies and Workforce Development
B.A. UMass Boston; M.M. Cambridge College

Alessandro G. Massaro
Professor
ESL Department
B.A. UMass Amherst; M.Ed. Boston University

Emmanuela Maurice
Associate Professor
English Department
B.S. UMass Boston; M.F.A. Lesley University

Carlos Maynard
Assistant Professor
Behavioral Science
A.A. Roxbury Community College; B.A., M.A. UMass Boston

Martha Mazeika
Instructional Designer
Enrollment Management and LifeMap
B.A. UMass Dartmouth; M.Ed. Springfield College

Andrew McCarthy
Librarian (Coordinator of Library Services)
Library and Learning Commons
B.A. Tufts University; M.L.I.S. McGill University

Jeff McClelland
Assistant Professor
ESL Department
B.A. University of California, Santa Cruz; M.A. San Francisco University

Laurie K. McCorry
Dean
Science and Engineering Department
B.S. UMass Amherst; Ph.D. Johns Hopkins University

Luana L. McCuish
Professor
English Department
B.S., M.A. Salem State University

Sandra J. McDonald
Senior Financial Aid Counselor
Financial Aid Office
A.S. Bunker Hill Community College

Michele McGrath
Assistant Professor
Practical Nursing Program
A.S. Quinsigamond Community College; B.S. UMass Amherst; M.S. UMass Worcester

Andrew E. McLaughlin
Librarian
Library and Learning Commons
B.A. Kalamazoo College; M.L.I.S. Simmons College

Arthur Metherell
Application Developer
Administrative Systems
B.S. UMass Lowell

Cora Miller
Academic Coordinator, Learn and Earn
Career Advancement and Internships
B.A., M.Ed., Ph.D. University of Pittsburgh; M.B.A. Bryant University

Elizabeth C. Miller
Assistant Professor
Computer Information Technology Department
A.B. Mount Holyoke College; M.S. Boston College

Austin Mirasolo
Director of TRIO Talent Search Program
Chelsea Campus
B.S. University of Texas

Donna M. Misrati
Professor and Chairperson
Medical Imaging Program
B.S. Boston University; M.B.A. UMass Boston; R.T. (R.) (C.T.)

Paul E. Moda
Coordinator
Student Activities
B.S. Elmsa College; M.A. Emerson College

Dawn M. Monahan
Associate Professor
Nurse Education Department
B.S.N. Emmanuel College, M.S.N. Salem State University

Laura L. Montgomery
Director, Art Gallery
Integrated Marketing and Communications
B.A. UMass Boston; M.F.A. Mass. College of Art

Tracy Moran
Manager of the Fitness Center
Athletics Department

Facilities Management

Ruth J. Goodwin
Graphic Arts Technician II
Publications and Creative Services
A.A., DTP Certificate, Bunker Hill Community College

Cecilia M. Granados
Clerk V
Chelsea Campus

Marie Griffin
EDP Systems Analyst IV
Technology Support Services

Glen Grondin
EDP Systems Analyst II
Technology Support Services
A.S., B.S ITT Technical Institute

Thanh Ha
Audio Visual Equipment Technician II
Audio Visual Department

Kevin J. Hanley
Assistant Manager of Computer Operations
Central Services
A.S. Bunker Hill Community College

Lan To Huynh
L & P Manager
Science and Engineering Department
B.S. UMass Boston

Shamila Imani
Accountant II
Student Payment Office
B.A. The University of Business and Management, Tehran; M.B.A. Endicott College

Sharon A. Irby
Clerk IV
Advising and Life Map

Frances H. Jarvis
Administrative Assistant II
President’s Office
B.A. UMass Boston

Nicole S. Jennings
Administrative Assistant II
Mathematics, Behavioral and Social Sciences

Support Staff

ADMINISTRATION, FACULTY AND STAFF
## Support Staff

### Debra D. Rowe
- Accountant III
  - Business Office
  - A.A. Bunker Hill Community College

### Stephen C. Roy
- Administrative Assistant II
  - Veterans Center
  - A.S. Bunker Hill Community College

### Lorraine C. Sacco
- Clerk V
  - Central Services
  - Certificate in Paralegal, Bunker Hill Community College

### Raymond Samms
- Campus Police Officer II
  - Public Safety

### Gabriel Sanchez
- Administrative Assistant I
  - Veterans Center

### Jasmin Sarita
- Clerk IV
  - Financial Aid Office

### Alexandra Servideo
- Administrative Assistant I
  - Practical Nursing Program
  - A.S. Bunker Hill Community College

### Sonia Sharma
- Administrative Assistant II
  - Workforce Development

### Edwin L. Silva
- EDP Systems Analyst II
  - Technology Support Services
  - A.S. Bunker Hill Community College

### Elva Singal
- Laboratory Technician II
  - Science and Engineering Department
  - B.A. National University of Engineering, Lima Peru

### Elaina Singleton
- Accountant II
  - Payroll Office

### Frederick J. Smith
- Clerk VI (pt)
  - Registrar’s Office
  - B.A. UMass Boston

### William J. Sunderland
- Maintainer I
  - Facilities Management

### Ronald Sutherland
- EDP Systems Analyst IV
  - Network Operations

### Mary L. Sweeney
- Accountant V
  - Business Office
  - Certificate, Burdett Business School

### Dina M. Taruz
- Administrative Assistant I
  - Student Success Program

### Rina Tenore
- Clerk VI
  - Registrar’s Office

### Flora J. Vega
- Clerk V
  - Enrollment Management and Admissions
  - A.S. Gibbs College

### Frank Watts
- Technical Assistant I
  - (Video Production Specialist)
  - Teaching, Learning and Instructional Technology Center

### Vincente White
- Storeroom Clerk IV
  - Central Services
  - A.S. Bunker Hill Community College; B.S. Salem State College

### Mary B. Williams
- Graphic Arts Technician I
  - Central Services

The Adjunct Faculty seniority listing is current as of April 1, 2015. Updates will be available online at bhcc.edu/catalog under Addendum.
A.A. – ASSOCIATE IN ARTS – An undergraduate degree of at least 60 credits awarded upon successful completion of a program of study in liberal arts and sciences that prepares students to transfer to a baccalaureate institution.

A.S. – ASSOCIATE IN SCIENCE – An undergraduate degree of at least 60 credits awarded upon successful completion of a program of study in an applied subject area, such as computers, electronics, or health that prepares students to enter the workforce.

ACADEMIC ADVISOR – College staff member responsible for providing guidance in course and/or program-related issues.

ACADEMIC COURSE LOAD – The number of credit hours in which a student is enrolled during the semester.

ACADEMIC PLANNING – The outlining of a course of action to help the student to achieve their personal and career goals.

ACADEMIC TERM (SEMESTER) – Fall, spring and summer semesters when classes are in session. The fall and spring semesters are approximately 16 weeks long. The summer semester usually has three sessions varying in length from five to twelve weeks.

ACADEMIC YEAR – Fall, spring, and summer semesters, generally from early September to mid-August.

ACCREDITATION – Certification by an independent educational board that colleges or university’s practices and policies meet or exceed official standards.

ACE MENTOR PROGRAM – The ACE Mentor program provides students enrolled in Learning Community courses assistance in making a successful transition to college by focusing on academic achievement, engagement, and cultural competency.

ADD A COURSE – To enroll in additional courses after registration is complete, accomplished through Admissions and Enrollment Services.

ADMINISTRATION – College staff members responsible for management and supervision.

ALUMNI – Graduates, in the plural.

ARTICULATION AGREEMENT – A formal agreement between Bunker Hill Community College and a four-year college or university which eases students’ transfer to that institution.

AUDIT – To take a course under an agreement which does not result in a final grade of A, B, C, etc... Generally involves regular attendance and participation, but limits graded activities, such as exams; requires full payment of tuition.

BOARD OF TRUSTEES – An appointed board that oversees and is responsible for the policies and fiscal affairs of a college.

BOOT CAMP – A free special college program designed for students to complete pre-college courses before officially beginning their first semester.

BRIDGE SESSION – An eight week semester that runs during the summer for a few three-credit courses and all four-credit courses.

BURSAR – College official responsible for the billing and collecting of tuition and fees.

CAREER PLANNING – Prepares students for employment that matches their interests and professional goals.

CAREER PROGRAM – A specialized degree designed to equip a student with the skills and educational background needed for employment in a specific field, such as business administration, criminal justice, etc...

CERTIFICATE Program – An academic program of study in a specific field intended for occupational training, upgrading, or retraining, generally 30 credits or less in duration. A certificate is awarded upon successful completion of the program.

COMMENCEMENT – Graduation.

COMMUNITY EDUCATION – Courses offered by this department are non-credit and taken by students for personal enrichment.

CO-REQUISITE – A course requirement that is taken concurrently with another course.

COURSE CLUSTER – Two or more courses grouped together around a common academic theme. Instructors teaching in a cluster situation work as a team to ensure cluster objectives are met.

CREDIT COURSE – An academic course numbered 100 or above in the college catalog which may be applied toward completion of a degree or certificate. (See also Developmental Course).

CREDIT HOUR – A standard measure of the amount of instructional time required to successfully complete a course. For example, ENG111, College Writing I, is a 3 credit hour course, which means that it meets for 3 hours each week for one semester.

CSDL – An academic center at which students can register for a wide range of courses. Students can learn at their own pace through a variety of instructional media/materials.

CURRICULUM – A set of courses focused in a particular field, e.g. accounting, criminal justice, early childhood.

DEAN – A member of the administrative staff responsible for supervision and management of a particular division of the college.

DEGREE PROGRAM – At Bunker Hill Community College, an Associate in Arts or Associate in Science program of study requiring 60 credits or more for completion.

DEVELOPMENTAL COURSE – A basic skill development course numbered below 100 in the college catalog which carries college credit but does not count toward the requirements for graduation.

DROP A COURSE – To cancel registration in a course. It may be accomplished only during the schedule adjustment period as specified on the academic calendar and is processed through Admissions and Enrollment Services.

EARLY ADVANTAGE – An early intervention program designed to identify students who are experiencing difficulty in a course(s) early in the semester and to provide guidance and assistance that will help them have a successfully complete the course(s).

EDUCATION PLAN – A student’s map or guide that delineates the courses they need to take to earn their degree or certificate and when those courses will be taken and in what format.

Glossary of Academic Terms

EDUCATIONAL PLANNING – The planning process in which both staff and student create an educational pathway to facilitate persistence and success.

ELECTIVE – A course in a program of study which may be selected from a variety of courses in the designated discipline and is numbered above 100.

ePORTFOLIO – This is a vehicle for students to track their academic journeys through college by sharing their accomplishments and reflecting on their learning in ways that are both personally and publicly meaningful.

FACULTY – An employee of the College who delivers academic instruction.

FEES – Charges by the College for specific services to students.

FINANCIAL AID – Funding from various sources provided to students to assist in defraying expenses of college (See Financial Aid section of this catalog).

FINANCIAL PLANNING – A set of resources and tools designed to help students make sound financial decisions that are in line with their personalized plan.

FREE APPLICATION FOR FEDERAL STUDENT AID (FAFSA) – A required standardized application that includes detailed financial data and is used to determine eligibility for all financial aid programs.

FULL-TIME (STUDENT) – Student registered for 12 or more credits in the fall or spring semester or six (6) credits in the summer.

GED – General Educational Development (high school equivalency diploma).

GENERAL EDUCATION – A common core of courses required of all students that provides for the acquisition of core skills and knowledge necessary in a literate citizenry.

GOOD ACADEMIC STANDING – A student is considered making compute student academic standing.

G.P.A. (CUMULATIVE G.P.A.) – Grade Point Average, used to compute student academic standing.

HYBRID COURSE – Courses that combine traditional classroom instruction with online learning to deliver academic content that is the same as received in a pure classroom setting.

INSTRUCTIONAL DELIVERY – The modality used to impart course content.

INTERNSHIP – A program designed to give a student real work place experience in their intended career before graduation.

INTEGRATED SUPPORT NETWORK – Identifies and directs students to people, resources, and services that meet their unique needs to promote success and individual growth.

IP GRADE (In Progress) – A grade conferred by a faculty member giving a student a period of time after the end of the semester to complete all of the required coursework to earn a passing grade.

LEARN AND EARN PROGRAM – Paid internships at companies located in the greater Boston area.

LEARNING COMMUNITY CLUSTER – Enrolls the same group of students in two or more courses centered on common academic themes enabling students to learn and study together.

LEARNING COMMUNITY SEMINAR – A course designed to assist first time students make a successful transition to college.

LEARNING CONTRACT – An independent learning agreement between a student and a faculty member under the auspices of a Dean that allows a student to enroll in and complete a course that is not offered in any other format in a semester.

LIFEMAP – A system of shared responsibility between students and the college, as students navigate their personalized plan for identifying and achieving their academic, career, and personal goals.

MAJOR/PROGRAM OF STUDY – The degree or certificate program a student is officially enrolled in.

MATRICULATION – Formal application to and acceptance in a degree or certificate program.

MIDNIGHT COURSES – College courses starting at 11:45 p.m. and ending at 2:30 a.m. to accommodate the learning needs second shift workers and other students whose schedules are very tight or just prefer to learn during that time period.

MID-SEMESTER WARNING GRADE – Official notice to a student by faculty that at the half-way point of the semester a student is in danger of not passing a course(s) with a grade of C or better.

MID-TERM – The point midway through an academic term.

NA GRADE (Never Attended) – An administrative withdrawal designation conferred by faculty to students enrolled in a course(s) and who do not attend one class during the first four weeks of the semester.

NON-CREDIT COURSE – A course that is non-credit bearing and cannot be used to satisfy an academic requirement for any degree or certificate program.

NON-MATRICULATED STUDENT – A student taking college courses without being enrolled in a degree or certificate program.

ONLINE DEGREE PROGRAM – Degree programs that allow students the ability to fulfill all of the requirements by completing online courses.

OPEN ADMISSION – A students’ automatic acceptance into a non-selective degree or certificate program with a High School diploma or GED.

PART-TIME (STUDENT) – Student enrolled for 11 credits or fewer in the fall or spring semester.

PLA - PRIOR LEARNING ASSESSMENT – A program through which students may earn credit for college-level learning acquired through non-collegiate experiences such as employment, military training, community service, and volunteer activities.

Continued on following page
Glossary of Academic Terms

PLANNED COURSES – The formal process of determining the order and semester courses have to be taken in to earn a degree or certificate.

PORTAL – The computerized entryway to the student information system.

PREREQUISITE – Skill or course required for entry into a course or program of study.

PROBATION – Formal notice that a student is not in good academic standing and imposes limits on the number of credits a student may register for in a semester.

RE-ADMISSION – The process by which students who return to the College to re-enroll in a degree or certificate program after an absence of at least one semester.

SATELLITE CAMPUS – Location besides a college’s main or branch campus where classes are held and courses are facilitated.

Satisfactory Academic Progress (S.A.P.) – Minimum grade point average and course completion rate that must be earned by a student to be considered in good academic standing.

SCHEDULE ADJUSTMENT (ADD/DROP) – A short period of time after a semester begins that allows students to change their course enrollment and/or course schedules.

SELECTIVE PROGRAM ADMISSION – Some programs are competitive and have specific requirements that must be met before a student may submit an application for admission. These programs are competitive and acceptance is not guaranteed.

SELF-DIRECTED LEARNING – An approach to learning that requires students to take the lead in determining how they will learn subject matter and work to autonomously to acquire that knowledge.

SOCIAL NETWORKING – Connects students to other students, faculty, staff, and the larger community to assist them in achieving their educational, career, and financial goals.

STAFF – An employee of the College who does not teach or facilitate academic instruction.

START SMART ORIENTATION – The formal process of welcoming new students to the college and providing them with information on the resources, services, and departments they may access to assist them to be academically successful.

STEM – Stands for Science, Technology, Engineering, and Mathematics.

STOP-IN – A student who takes a course during the summer session while on their semester break from their four-year college or university.

STREAMING MEDIA – Online courses providing students with access to asynchronous instruction.

SUCCESS COACH – A Success Coach is assigned to a Learning Communities course to assist students. Success coaches collaborate with faculty and ACE mentors to engage students in academic content and to work with students to identify pathways that encompass academic, career, and personal goals.

SUSPENSION – Students on probation who after taking a reduced course load, continue to not meet the grade and completion rate threshold to be in good academic standing. These students may be required to take a semester off.

TO BE ANNOUNCED (TBA) – An instructor and/or a room has yet to be assigned for a course.

TRANSFER GUIDELINES – Informal documents suggesting courses to be taken at Bunker Hill Community College for most effective transfer to a four-year college or university.

TRANSFER PROGRAM – A degree program designed for students who plan to continue their academic careers beyond the associate degree level through transfer to a four-year college or university.

TRANSCRIPT – Permanent record of students’ academic grades; available through Admissions and Enrollment Services.

TUITION – Charges by the College to a student for registration in credit courses.

VIRTUAL COURSES – Online synchronous learning.

WEB COURSE – A course that is completely online and provides the same academic content that is delivered in a traditional classroom course.

WITHDRAWAL FROM COLLEGE – The formal process of notifying the College of the decision to discontinue attending all classes.

WITHDRAWAL FROM A COURSE – The formal process of notifying the college of the decision to discontinue attending a Course.

Please note the following when using the BHCC Chelsea Campus and H-Building Shuttles:
1) Plan to depart at least 30 minutes before your class starts.
2) Because of weather, traffic, road construction, etc., all shuttle schedule times are estimates.
3) To allow for travel time, do not schedule classes back-to-back at different BHCC locations.
The shuttles are for BHCC students, faculty and staff.
Please note that there is no student parking at the H-Building.
For directions to Bunker Hill Community College’s two campuses, three satellites and the H-Building by car and public transportation, please refer to the following information and links below.

AFFIRMATIVE ACTION AND EQUAL OPPORTUNITY GUIDELINES
Bunker Hill Community College does not discriminate on the basis of race, creed, religion, color, sex, sexual orientation, gender identity, age, disability, genetic information, maternity leave or national origin in its educational programs and in admission to, treatment in or employment in its programs or activities as required by Chapters 151B and C of the Massachusetts General Laws; Titles VI and VII, Civil Rights Act of 1964; Title IX, Education Amendments of 1972; and Section 504, Rehabilitation Act of 1973 and regulations promulgated thereunder.

Direct all inquiries concerning the application of these regulations to Thomas L. Saltonstall, Director of Diversity and Inclusion, the College's Affirmative Action Officer and Title IX and Section 504 Coordinator, 250 New Rutherford Avenue, Room E236F, Boston, MA 02129, by emailing tlsalton@bhcc.mass.edu or by calling 617-228-3311
